

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-K

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2024

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File No. 001-36609

NORTHERN TRUST CORPORATION

(Exact name of registrant as specified in its charter)

Delaware
(State or other jurisdiction of incorporation or organization)

36-2723087
(I.R.S. Employer Identification No.)

50 South La Salle Street
Chicago, Illinois
(Address of principal executive offices)

60603
(Zip Code)

Registrant's telephone number, including area code: (312) 630-6000

Securities registered pursuant to Section 12(b) of the Act:

<u>Title of Each Class</u>	<u>Trading Symbol</u>	<u>Name of Each Exchange On Which Registered</u>
Common Stock, \$1.66 2/3 Par Value	NTRS	The NASDAQ Stock Market LLC
Depository Shares, each representing 1/1,000th interest in a share of Series E Non-Cumulative Perpetual Preferred Stock	NTRSO	The NASDAQ Stock Market LLC

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer Emerging growth company
Non-accelerated filer Smaller reporting company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant has filed a report on and attestation to its management's assessment of the effectiveness of its internal control over financial reporting under Section 404(b) of the Sarbanes-Oxley Act (15 U.S.C. 7262(b)) by the registered public accounting firm that prepared or issued its audit report.

If securities are registered pursuant to Section 12(b) of the Act, indicate by check mark whether the financial statements of the registrant included in the filing reflect the correction of an error to previously issued financial statements.

Indicate by check mark whether any of those error corrections are restatements that required a recovery analysis of incentive-based compensation received by any of the registrant's executive officers during the relevant recovery period pursuant to §240.10D-1(b).

Indicate by check mark whether the registrant is a shell company (as defined in Exchange Act Rule 12b-2). Yes No

The aggregate market value of the registrant's common stock as of June 28, 2024 (the last business day of the registrant's most recently completed second fiscal quarter), based upon the last sale price of the common stock at June 28, 2024 as reported by The NASDAQ Stock Market LLC, held by non-affiliates was approximately \$16.6 billion. Determination of stock ownership by non-affiliates was made solely for the purpose of responding to this requirement and the registrant is not bound by this determination for any other purpose.

At January 31, 2025, 195,697,744 shares of common stock, \$1.66 2/3 par value, were outstanding.

Portions of the registrant's Proxy Statement for its 2025 Annual Meeting of Stockholders are incorporated by reference into Part III hereof.

PART I

ITEM 1 – BUSINESS

Northern Trust Corporation

Northern Trust Corporation (the “Corporation”) is a leading provider of wealth management, asset servicing, asset management and banking solutions to corporations, institutions, families and individuals. The Corporation is a financial holding company conducting business through various U.S. and non-U.S. subsidiaries, including The Northern Trust Company (Bank).

The Bank is an Illinois banking corporation headquartered in Chicago and the Corporation’s principal subsidiary. Founded in 1889, the Bank conducts its business through its U.S. operations and its various U.S. and non-U.S. branches and subsidiaries. At December 31, 2024, the Bank had consolidated assets of \$154.9 billion and common bank equity capital of \$10.8 billion.

The Corporation was formed as a holding company for the Bank in 1971. The Corporation has a global presence with offices in 24 U.S. states and Washington, D.C., and across 22 locations in Canada, Europe, the Middle East and the Asia-Pacific region. At December 31, 2024, the Corporation had consolidated total assets of \$155.5 billion and stockholders’ equity of \$12.8 billion.

The Corporation expects that the Bank will continue in the foreseeable future to be the major source of the Corporation’s consolidated assets, revenues, and net income. Except where the context otherwise requires, references to “Northern Trust,” “we,” “us,” “our,” “its,” or similar terms mean Northern Trust Corporation and its subsidiaries on a consolidated basis.

Business Overview

Northern Trust focuses on managing and servicing client assets through its two client-focused reporting segments: Asset Servicing and Wealth Management. Asset management and related services are provided to Asset Servicing and Wealth Management clients primarily by the Asset Management business. The revenue and expenses of Asset Management and certain other support functions are allocated fully to Asset Servicing and Wealth Management. Northern Trust reports certain income and expense items not allocated to Asset Servicing and Wealth Management in a third reporting segment, Other.

ASSET SERVICING

Asset Servicing (AS) is a leading global provider of asset servicing and related services to corporate and public retirement funds, foundations, endowments, fund managers, insurance companies, sovereign wealth funds, and other institutional investors around the globe. Asset servicing and related services encompass a full range of capabilities including but not limited to: custody; fund administration; investment operations outsourcing; investment management; investment risk and analytical services; employee benefit services; securities lending; foreign exchange; treasury management; brokerage services; transition management services; banking; and cash management. Client relationships are managed through the Bank and the Bank’s and the Corporation’s other subsidiaries, including support from locations in North America, Europe, the Middle East, and the Asia-Pacific region. At December 31, 2024, total Asset Servicing assets under custody/administration (AUC/A), assets under custody, and assets under management (AUM) were \$15.6 trillion, \$12.2 trillion, and \$1.2 trillion, respectively.

WEALTH MANAGEMENT

Wealth Management (WM) focuses on high-net-worth individuals and families, business owners, executives, professionals, retirees, and established privately-held businesses in its target markets. In supporting these targeted segments, Wealth Management provides trust, investment management, custody, and philanthropic services; financial consulting; guardianship and estate administration; family business consulting; family financial education; brokerage services; and private and business banking. Wealth Management also includes Global Family Office, which provides customized services, including but not limited to: investment management; global custody; fiduciary; private banking; family office consulting; and technology solutions to meet the complex financial and reporting needs of ultra-high-net-worth individuals and family offices across the globe.

Wealth Management is one of the largest providers of advisory services in the United States, with AUC/A, assets under custody, and AUM of \$1.1 trillion, \$1.1 trillion, and \$450.7 billion, respectively, at December 31, 2024. Wealth Management services are delivered by multidisciplinary teams through a network of offices in 19 U.S. states and Washington, D.C., as well as offices in London, Guernsey, Singapore, and Abu Dhabi.

ASSET MANAGEMENT

Asset Management, through the Corporation's various subsidiaries, supports the Asset Servicing and Wealth Management reporting segments by providing a broad range of asset management and related services and other products to clients around the world. Investment solutions are delivered through separately managed accounts, bank common and collective funds, registered investment companies, exchange traded funds, non-U.S. collective investment funds, and unregistered private investment funds. Asset Management's capabilities include active and passive equity; active and passive fixed income; cash management; multi-asset and alternative asset classes (such as private equity and hedge funds of funds); and multi-manager advisory services and products. Asset Management's activities also include overlay services and other risk management services. Asset Management operates internationally through subsidiaries and distribution arrangements and its revenue and expense are fully allocated to Asset Servicing and Wealth Management. As discussed above, Northern Trust managed \$1.6 trillion in assets as of December 31, 2024, including \$1.2 trillion for Asset Servicing clients and \$450.7 billion for Wealth Management clients.

Competition

Northern Trust faces intense competition in all aspects and areas of its business. Competition comes from both regulated and unregulated financial services organizations, whose products and services span the local, national, and global markets in which Northern Trust conducts operations. Our competitors include a broad range of financial institutions and service companies, including other custodial banks, investment counseling firms, deposit-taking institutions, asset management firms, benefits consultants, trust companies, investment banking firms, insurance companies, and various financial technology companies, including software providers and data services firms. As our businesses grow and markets evolve, we may encounter increasing and new forms of competition around the world.

Northern Trust's business strategy is to provide exceptional quality financial services to targeted market segments in which it believes it has a competitive advantage to offer clients a unique value proposition. As part of this strategy, Northern Trust seeks to differentiate itself from its competitors with premier, holistic solutions and exceptional experiences tailored to meet clients' needs. In addition, Northern Trust emphasizes the development and growth of recurring and scalable sources of fee-based income and continual productivity improvements. Northern Trust also seeks to maintain its foundational strength with a strong, conservative balance sheet and a globally respected brand.

Economic Conditions And Government Policies

The earnings of Northern Trust are affected by numerous external influences. Chief among these are general economic conditions, both domestic and international, and actions that governments and their central banks take in managing their economies. These general conditions affect all of Northern Trust's businesses, as well as the quality, value, and profitability of its loan and investment portfolios.

The Board of Governors of the Federal Reserve System (Federal Reserve Board) implements monetary policy through its open market operations in United States Government securities, its setting of the discount rate at which member banks may borrow from Federal Reserve Banks, and its changes in the reserve requirements for deposits. The policies adopted by the Federal Reserve Board directly affect interest rates and therefore what banks earn on their loans and investments and what they pay on their savings and time deposits and other purchased funds.

Supervision and Regulation

Northern Trust is subject to extensive regulation and supervision under state and federal laws in the United States and in each of the jurisdictions in which it does business. The descriptions below outline significant elements of selected laws and regulations applicable to Northern Trust and are qualified in their entirety by reference to the particular statutory or regulatory provisions summarized. These descriptions do not summarize all laws and regulations applicable to Northern Trust or all possible or proposed changes to such laws or regulations and are not intended to be a substitute for the related statutes or regulatory provisions.

Changes in laws or regulations applicable to Northern Trust may have a material effect on its businesses and results of operations. The scope of the laws and regulations, and the intensity of the supervision to which Northern Trust is subject have increased in recent years, initially in response to the financial crisis, and more recently in light of other factors, including the banking turmoil in early 2023, technological factors, market changes, and climate change concerns. Regulatory enforcement and fines have also increased across the banking and financial services sector. Northern Trust expects that its business will remain subject to extensive regulation and heightened supervision.

FINANCIAL HOLDING COMPANY REGULATION

Under U.S. law, the Corporation is a bank holding company that has elected to be a financial holding company subject to the supervision, examination, and regulation of the Federal Reserve Board. A financial holding company is permitted to engage in a broader range of financial activities than a bank holding company. The Federal Reserve Board has authority to limit the activities that a financial holding company may conduct if any depository institution controlled by the financial holding company is found to no longer be “well-capitalized” and “well-managed” or has not received at least a “satisfactory” rating in its most recent Community Reinvestment Act (CRA) examination. Failure to meet one or more of these requirements may result in restrictions on the Corporation’s ability to exercise powers granted to financial holding companies, to engage in new activities, to continue current activities, or to make acquisitions. The Bank Holding Company Act also requires a bank holding company to obtain prior approval from the Federal Reserve Board before it acquires substantially all the assets of any bank, or ownership or control of more than 5% of the voting shares of any bank.

SUBSIDIARY REGULATION

The Bank is a member of the Federal Reserve System, with deposits insured by the Federal Deposit Insurance Corporation (FDIC), and is subject to regulation by both agencies. As an Illinois banking corporation, the Bank is also subject to Illinois state laws and regulations and to examination and supervision by the Division of Banking of the Illinois Department of Financial and Professional Regulation. The Bank is also registered as a transfer agent with the Federal Reserve Board and is registered as a swap dealer with the U.S. Commodity Futures Trading Commission (CFTC) under the Commodity Exchange Act. As a result, the Bank is subject to supervision, examination and enforcement by certain other regulatory bodies, including the CFTC and the National Futures Association (NFA). The Corporation’s nonbanking affiliates are subject to examination by the Federal Reserve Board and, in certain circumstances, other functional regulators, as discussed in greater detail below.

ENHANCED PRUDENTIAL STANDARDS

Under the Federal Reserve Board’s tailoring rules, the Corporation is subject to the enhanced prudential standards applicable to Category II banking organizations. As a Category II institution, the Corporation must submit annual capital plans to the Federal Reserve Board, conduct supervisory and internal periodic stress tests to evaluate capital adequacy in adverse economic conditions, maintain enhanced risk management procedures, comply with a liquidity risk management framework (discussed below in “Liquidity Standards”) and single counterparty credit limits, conduct liquidity stress tests, and hold a buffer of liquid assets estimated to meet funding needs during a financial stress event. The Corporation is not subject to all of the standards applicable to U.S. bank holding companies that are global systemically important bank holding companies (GSIBs), such as the total loss-absorbing capacity requirement, capital surcharge, enhanced supplementary leverage ratio, or additional single counterparty credit limits.

LONG-TERM DEBT AND CLEAN HOLDING COMPANY REQUIREMENTS

In 2023, the U.S. banking regulators proposed a rule that would require banking organizations with \$100 billion or more in total assets to comply with long-term debt requirements and clean holding company requirements similar to those that currently apply only to GSIBs. This proposal would also impose a long-term debt requirement on certain categories of insured depository institutions that are not consolidated subsidiaries of U.S. GSIBs, including insured depository institutions with \$100 billion or more in total assets, such as the Bank. If adopted, this proposal would require the Corporation and the Bank to each maintain a minimum outstanding eligible long-term debt amount of no less than the greatest of (i) 6% of risk-weighted assets (RWA), (ii) 2.5% of total leverage exposure, and (iii) 3.5% of average total consolidated assets. The Bank would be required to issue the minimum amount of eligible long-term debt to the Corporation, and the Corporation would be required to issue the minimum amount of eligible long-term debt externally. In addition, if adopted as proposed, the clean holding company requirement would limit or prohibit the Corporation from entering into certain transactions that could impede its orderly resolution, including, for example, prohibiting the Corporation from entering into transactions that could spread losses to subsidiaries and third parties, as well as limiting the amount of the Corporation’s liabilities that are not eligible long-term debt. The timing and form of any final rule implementing the long-term debt and clean holding company requirements is uncertain.

RESOLUTION PLANNING

As required by Section 165(d) of the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act), the Corporation is required to submit periodically to the Federal Reserve Board and FDIC a resolution plan for its rapid and orderly resolution in the event of material financial distress or failure. In August 2024, the Federal Reserve Board and FDIC issued final joint guidance on resolution planning requirements applicable to the Corporation under Section 165(d). The Corporation’s next 2024 165(d) plan submission is due to the FDIC and Federal Reserve Board by October 1, 2025.

In addition, the Bank, as an insured depository institution, is required to submit to the FDIC periodic plans for resolution in the event of its failure. In June 2024, the FDIC adopted a final rule that would require covered insured depository institutions, such as the Bank, to submit a full resolution plan to the FDIC every three years and submit an interim supplement in each year that it is not required to submit a full resolution plan. The final rule increases the content requirements for plan submissions and introduces a new credibility standard for the FDIC's evaluation of resolution plans, which would be enforceable against the covered insured depository institutions. The final rule was effective October 1, 2024. The Bank's first interim supplement is due July 1, 2025, and its full resolution plan is due July 1, 2026.

Separately, the European Union Bank Recovery and Resolution Directive (BRRD) sets out the framework for the recovery and resolution of European Union (EU) credit institutions and systemically-important investment firms, including certain of the Bank's subsidiaries and branches. The BRRD establishes a set of harmonized rules for early intervention measures, recovery and resolution planning, bail-in powers and requirements for total loss absorbing capital for EU institutions, collectively known as minimum requirements for own funds and eligible liabilities (MREL). Northern Trust Global Services SE, a Luxembourg-incorporated indirect subsidiary of the Bank, is authorized and supervised by the European Central Bank (ECB) and subject to the prudential supervision of the ECB and the Luxembourg Commission de Surveillance du Secteur Financier (CSSF). As such, Northern Trust Global Services SE falls within the scope of the BRRD and its recovery and resolution planning is overseen by the CSSF and the Single Resolution Board (the resolution authority for ECB-supervised institutions).

The United Kingdom (UK) has established a special resolution regime and a resolvability assessment framework overseen by the Bank of England (as the UK resolution authority) with many similar features to the BRRD, which was substantially retained as part of UK law following the withdrawal of the UK from the EU. The special resolution regime applies to firms that are permitted to accept deposits under Part 4A of the Financial Services and Markets Act 2000. As such, the London branch of the Bank, as a UK branch of a third-country institution that accepts deposits, falls within the scope of the special resolution regime.

ORDERLY LIQUIDATION AUTHORITY.

Under the Dodd-Frank Act, certain financial companies, such as the Corporation and certain of its covered subsidiaries, can be subjected to an orderly liquidation authority if in default or danger of default and their resolution under the U.S. Bankruptcy Code would have serious adverse effects on financial stability in the United States, among other requirements set by statute. If the Corporation were subject to orderly liquidation authority, the FDIC would be appointed as its receiver, which would give the FDIC considerable powers to resolve the Corporation. Absent such actions, the Corporation, as a bank holding company, would remain subject to the U.S. Bankruptcy Code.

THE VOLCKER RULE.

The Volcker Rule generally prohibits banking entities, including the Bank and its affiliates, from engaging in proprietary trading, subject to certain exemptions and exclusions, such as for market-making, hedging, certain trading activities in U.S. and foreign sovereign debt, and trading activities related to liquidity management. The Volcker Rule also prohibits certain investments in, and relationships with, covered funds as defined in the Volcker Rule, such as hedge funds, private equity funds and similar funds, subject to a number of exemptions and exclusions. Northern Trust maintains an enterprise-wide compliance program to comply with the Volcker Rule.

HOLDING COMPANY AS A SOURCE OF STRENGTH

The Corporation, as a bank holding company, is required to serve as a source of financial and managerial strength to its depository institution subsidiary. Under this requirement, the Corporation could be required to commit resources to the Bank should the Bank experience financial distress.

PAYMENT OF DIVIDENDS

The Corporation may pay dividends, repurchase stock, and make other capital distributions only in accordance with the capital plan rules and capital adequacy standards of the Federal Reserve Board, including the stress capital buffer requirement, discussed further in “—Capital Adequacy Requirements” below. Dividends from the Bank are a significant source of funds for the Corporation, and the Corporation's ability to pay dividends on its common stock therefore depends in part on the ability of the Bank to pay sufficient dividends to the Corporation.

Various other federal and state laws and regulations limit the amount of dividends that may be paid by the Bank to the Corporation without regulatory consent. The Bank may not pay any dividends if it is undercapitalized, or if the payment of the dividend would cause it to become undercapitalized. In general, the amount of dividends that may be paid in a calendar year is limited to its “recent earnings” (the current year's net income combined with the retained net income of the two preceding years), or its “undivided profits” (generally, accumulated net profits that have not been paid out as dividends or transferred to surplus), whichever is less. The ability of the Bank to pay dividends to the Corporation may also be affected by the capital adequacy standards applicable to the Bank (discussed further below), which include minimum requirements and buffers.

CAPITAL PLANNING AND STRESS TESTING

The Corporation's capital distributions are subject to the Federal Reserve Board's capital plan rules, which require the Corporation to submit annual capital plans to the Federal Reserve Board for review.

The major components of that oversight are the Federal Reserve Board's Comprehensive Capital Analysis and Review (CCAR) and Dodd-Frank Act Stress Tests (DFAST). These requirements involve both company-run and supervisory-run testing of capital under various scenarios, including baseline and severely adverse scenarios provided by the appropriate banking regulator.

Under the DFAST regulations, the Corporation is required to undergo regulatory stress tests conducted by the Federal Reserve Board annually. The Bank also is required to conduct its own annual internal stress test (although it is permitted to combine certain reporting and disclosure of its stress test results with the results of the Corporation). Results from the Corporation's and the Bank's annual company-run stress tests are reported to the appropriate regulators and made publicly available. Northern Trust published the results of its most recent company-run stress tests on June 28, 2024.

CAPITAL ADEQUACY REQUIREMENTS

The Corporation, as a bank holding company, is subject to risk-based and leverage capital guidelines implemented by the Federal Reserve Board that are based on industry-standard guidelines published by the International Basel Committee on Banking Supervision (Basel Committee), known as Basel III. The Bank, as an FDIC-insured depository institution, is also required to meet risk-based and leverage capital guidelines established by regulators which are generally similar to those established by the Federal Reserve Board for bank holding companies.

Under the Basel III rules, the Corporation, with the Bank, is a "core" banking organization that is required to use the advanced approaches methodologies to calculate and disclose publicly its risk-based capital ratios. The Corporation also is subject to a capital floor that is based on the Basel III standardized approach to calculating risk-based capital ratios. The Corporation is therefore required to calculate its risk-based capital ratios under both the standardized and advanced approaches, and is subject to the more stringent of the two in the assessment of its capital adequacy.

In 2023, the U.S. banking agencies issued a proposed rule to implement the Basel III endgame agreement for large banks (Basel III Endgame Proposal). The proposed rule has not been finalized and U.S. regulators have indicated their intent to revise and reissue the proposal. No time table has been provided for the re-proposal or its effective date. The proposal would introduce a new method for calculating risk weighted assets, referred to as the expanded risk-based approach, which better aligns with the global Basel Accord adopted by the Basel Committee. The proposal would eliminate the current Basel III rule's advanced approaches methodologies and effectively replace it with the expanded risk-based approach, which more heavily relies on standardized methodologies. As compared with the standardized approach, the expanded risk-based approach includes more granular risk weights for credit risk and introduces a new market risk framework. In addition, unlike the standardized approach, the expanded risk-based approach includes operational risk and credit valuation adjustment RWA components.

The Basel III Endgame Proposal, if adopted as a final rule, would maintain the current Basel III rule's dual-requirement structure, whereby the Corporation and the Bank would be required to calculate risk-based capital ratios under both the expanded risk-based approach and the standardized approach. In addition, the proposal would modify the standardized approach by requiring that the new market risk standards from the proposal also be applied in the standardized approach.

The Basel III Endgame Proposal would apply the stress capital buffer to risk-based capital requirements calculated under both the expanded risk-based approach and the standardized approach.

It is uncertain if and when the final rule for Basel III Endgame Proposal will be adopted, and if so, whether it will be finalized as proposed. The potential impacts on the Corporation and the Bank of a final rule remain uncertain until a final rule is published.

The Bank’s risk-based and leverage capital ratios at December 31, 2024, were well above the regulatory requirements established by U.S. banking regulators. The risk-based and leverage capital ratios for the Corporation and the Bank, together with the regulatory minimum ratios and the ratios required for classification as “well-capitalized,” are provided in the following chart.

TABLE 1: RISK-BASED AND LEVERAGE CAPITAL RATIOS AS OF DECEMBER 31, 2024

	COMMON EQUITY TIER 1 CAPITAL		TIER 1 CAPITAL		TOTAL CAPITAL		TIER 1 LEVERAGE		SUPPLEMENTARY LEVERAGE
	STANDARDIZED APPROACH	ADVANCED APPROACH	STANDARDIZED APPROACH	ADVANCED APPROACH	STANDARDIZED APPROACH	ADVANCED APPROACH	STANDARDIZED APPROACH	ADVANCED APPROACH	ADVANCED APPROACH
Northern Trust Corporation	12.4 %	14.5 %	13.3 %	15.6 %	15.1 %	17.4 %	8.1 %	8.1 %	8.9 %
The Northern Trust Company	11.4 %	13.6 %	11.4 %	13.6 %	12.8 %	15.0 %	6.9 %	6.9 %	7.5 %
Minimum required ratio	4.5 %	4.5 %	6.0 %	6.0 %	8.0 %	8.0 %	4.0 %	4.0 %	3.0 %
“Well-capitalized” minimum ratios, as applicable									
Northern Trust Corporation	N/A	N/A	6.0 %	6.0 %	10.0 %	10.0 %	N/A	N/A	N/A
The Northern Trust Company	6.5 %	6.5 %	8.0 %	8.0 %	10.0 %	10.0 %	5.0 %	5.0 %	3.0 %

Advanced approaches institutions, such as the Corporation and the Bank, are subject to a minimum supplementary leverage ratio of 3.0%. Advanced approaches institutions that are insured depository institutions, such as the Bank, also must maintain at least a 3.0% supplementary leverage ratio to be considered “well-capitalized.” The Corporation is also subject to a stress capital buffer, which integrates forward-looking stress test results with non-stress capital requirements, and the Bank is also subject to a capital conservation buffer, which respectively requires the Corporation and the Bank to hold a buffer of Common Equity Tier 1 capital above the minimum risk-based capital requirements in order to avoid constraints on dividends, equity repurchases and compensation. The minimum capital buffer requirement for advanced approaches banking organizations, such as the Corporation and the Bank, is 2.5%.

A “countercyclical buffer” of 0% to 2.5% of a banking organization’s total RWA for advanced approaches banking organizations, such as the Corporation, is also a component of the capital adequacy framework. In general, the amount of the countercyclical capital buffer is a weighted average of the countercyclical capital buffer established in the various jurisdictions in which the banking organization has credit exposures. The U.S. countercyclical buffer is currently set at 0%.

The results of the 2024 DFAST, published by the Federal Reserve Board on June 26, 2024, resulted in Northern Trust’s stress capital buffer and effective Common Equity Tier 1 capital ratio minimum requirement remaining constant at 2.5% and 7.0%, respectively, for the annual capital plan cycle, which began on October 1, 2024 and continues through September 30, 2025.

LIQUIDITY STANDARDS

Northern Trust is subject to the U.S. liquidity coverage ratio (LCR) requirement, which is designed to ensure that covered banking organizations, including the Corporation and the Bank, maintain an adequate level of unencumbered high-quality liquid assets equal to their expected net cash outflow for a 30-day time horizon under a prescribed regulatory liquidity stress scenario. As of December 31, 2024, the Corporation and the Bank were in compliance with applicable LCR requirements.

Northern Trust also is subject to the U.S. net stable funding ratio (NSFR) requirement, designed to promote more medium- and long-term funding of the assets and activities of banking entities over a one-year time horizon. As of December 31, 2024, the Corporation and the Bank were in compliance with applicable NSFR requirements. In addition, Northern Trust publicly discloses certain qualitative and quantitative information about its NSFR consistent with the semi-annual disclosure requirements of the Federal Reserve Board’s final rule on U.S. NSFR disclosure.

As noted above, the enhanced prudential standards impose additional liquidity requirements for large bank holding companies. The Corporation, a Category II institution under the final tailoring rule, is subject to the liquidity risk management, monthly liquidity stress testing, liquidity buffer, and daily liquidity reporting requirements.

PROMPT CORRECTIVE ACTION

Federal banking regulators are required to take “prompt corrective action” with respect to a depository institution if that institution does not meet certain capital adequacy standards, and are also authorized to take appropriate action against a parent bank holding company of an under-capitalized banking subsidiary. In certain instances, the Corporation could be required to guarantee the performance of a capital restoration plan for the Bank if it were under-capitalized.

RESTRICTIONS ON TRANSACTIONS WITH AFFILIATES

The Bank is subject to restrictions governing transactions between it and affiliated entities, including the Corporation, its affiliates, and its subsidiaries. These transactions must be on terms and conditions that are, or in good faith would be, offered to nonaffiliated companies (i.e., on terms not less favorable to the Bank than market terms). Further, extensions of credit must be secured fully with qualifying collateral and are limited to 10% of the Bank's capital and surplus for transactions with a single affiliate and to 20% of the Bank's capital and surplus for transactions with all affiliates.

SWAPS AND OTHER DERIVATIVES.

Northern Trust is subject to comprehensive regulation of its derivatives businesses, including regulations that impose margin requirements, business conduct requirements, trade reporting, central clearing and mandatory trading on regulated exchanges or execution facilities for certain types of swaps and security-based swaps. CFTC and U.S. Securities and Exchange Commission (SEC) rules require registration of swap dealers and security-based swap dealers, respectively, and impose numerous obligations on such registrants, including adherence to business conduct standards for all in-scope instruments. The Bank is registered with the CFTC as a swap dealer and is subject to CFTC and NFA rules and supervision related to its swaps business. Swap dealers regulated by a prudential regulator, like the Bank, are subject to uncleared swap margin requirements and minimum capital requirements established by the prudential regulators. The Corporation has not registered and does not expect that it, or any of its affiliates, will be required to register as a security-based swap dealer with the SEC.

In addition, certain nonbanking affiliates, including Northern Trust Securities, Inc. and Northern Trust Investments, Inc., are registered with the CFTC as commodity trading advisors and/or commodity pool operators, or are operating under certain exemptions from such registration pursuant to CFTC rules and other guidance, and commodity pool operators have certain responsibilities with respect to each pool they operate or advise.

BROKER-DEALER AND INVESTMENT ADVISER REGULATION

Northern Trust Securities, Inc. is registered as a broker-dealer with the SEC and is a member of various self-regulatory organizations, including the Financial Industry Regulatory Authority, Inc. (FINRA). Broker-dealers are subject to laws and regulations relating to all aspects of their securities business operations, including, but not limited to, sales and trading practices, securities offerings, handling of customer funds, net capital levels, recordkeeping, privacy requirements, and the conduct of directors, officers, and employees. Broker-dealers are also regulated by securities administrators in those states where they do business. Northern Trust Securities, Inc. is also registered with the Municipal Securities Rulemaking Board (MSRB) as a municipal securities dealer and subject to regulation as such.

Northern Trust Securities, Inc. and other subsidiaries of the Corporation are registered with the SEC as investment advisers and are subject to regulation by the SEC. The Corporation's registered investment advisers in the United States are subject to the Investment Advisers Act of 1940, as amended (the Investment Advisers Act), and SEC rules and regulations thereunder, including with respect to record-keeping, operational and marketing requirements, disclosure obligations, fiduciary and other obligations and prohibitions on fraudulent activities, and other applicable state and federal laws and regulations, including anti-fraud laws. The SEC is authorized to institute proceedings and impose sanctions for violations of the Investment Advisers Act, ranging from fines and censure to termination of an investment adviser's registration. Noncompliance with the Investment Advisers Act or other federal and state securities laws and regulations could result in investigations, sanctions, disgorgement, termination of an investment adviser's registration, fines and/or reputational harm.

ANTI-MONEY LAUNDERING, ANTI-TERRORISM LEGISLATION, AND OFFICE OF FOREIGN ASSETS CONTROL

Certain subsidiaries of the Corporation are subject to the Bank Secrecy Act of 1970, as amended by the USA PATRIOT Act of 2001 and Anti-Money Laundering Act of 2020 and implemented in the regulation of the federal banking regulators and the Financial Crimes Enforcement Network (FinCEN), which requires banks to comply with anti-money laundering (AML) and financial transparency requirements, such as conducting due diligence, verifying client and beneficial owner identification, and monitoring client transactions and detecting and reporting suspicious activities. AML laws outside the United States contain similar requirements. The Anti-Money Laundering Act of 2020 includes the Corporate Transparency Act, which requires FinCEN to issue regulations requiring reporting of and access to beneficial ownership information of legal entities and amendments to related customer due diligence requirements for financial institutions. The applicable rule is subject to litigation which is still pending although various preliminary injunctions have been stayed. In the meantime, FinCEN has extended the filing deadline by 30 days and signaled its intent to revisit the rule. Additionally, there is a possibility of legislation that will postpone the deadline to January 1, 2026.

The U.S. Department of the Treasury's Office of Foreign Assets Control (OFAC) and U.S. Department of State administer and enforce U.S. economic sanctions laws and regulations, which prohibit the Corporation and its subsidiaries from engaging in certain transactions and dealings including business in or with certain jurisdictions and parties that are the target of U.S. economic sanctions, such as organizations and countries suspected of aiding, harboring or engaging in terrorist acts or undermining the sovereignty and territorial integrity of democratic countries. If the Corporation or the Bank

finds a sanctioned name or jurisdiction on any transaction, asset or account, the Corporation or the Bank may be required to reject or block such account or transaction and notify the appropriate authorities.

Failure to comply with these requirements could result in fines, penalties, lawsuits, regulatory sanctions or difficulties in obtaining approvals, restrictions on their business activities or harm to reputation. Many other countries have imposed similar laws and regulations that apply to the Corporation's non-U.S. offices. The Corporation has established policies and procedures to comply with these laws and the related regulations.

DEPOSIT INSURANCE AND ASSESSMENTS

The Bank accepts deposits and eligible deposits have the benefit of FDIC insurance up to the standard maximum deposit insurance amount, which is currently \$250,000 for each ownership right and capacity under which the eligible deposit accounts are maintained. Under the Federal Deposit Insurance Act (FDIA), insurance of deposits may be terminated by the FDIC upon a finding that the insured depository institution has engaged in unsafe and unsound practices, is in an unsafe or unsound condition, or has violated laws, regulations, or orders from a regulatory agency.

The FDIC's Deposit Insurance Fund (DIF) is funded by assessments on FDIC-insured depository institutions. The FDIC assesses premiums based on an assessment rate and an assessment base. An insured depository institution's assessment base considers average consolidated total assets, less the average tangible equity of the insured depository institution during the assessment period. The assessment base of custody banks is adjusted to exclude certain liquid assets from total average assets. To qualify as a custody bank, certain institutional eligibility criteria must be met. The Bank qualifies as a custody bank for this purpose. The FDIC utilizes a risk-based system to determine each institution's assessment rate. The assessment rate schedule can change from time to time at the discretion of the FDIC, subject to certain limits.

The FDIC, as required under the FDIA, established a plan in September 2020 to restore the DIF reserve ratio to meet or exceed the statutory minimum of 1.35% within eight years. Based on the FDIC's recent projections, the FDIC determined that the DIF reserve ratio is at risk of not reaching the statutory minimum by the statutory deadline of September 30, 2028 without increasing the deposit insurance assessment rates. In 2022, the FDIC adopted a final rule, applicable to insured depository institutions, to increase initial base deposit insurance assessment rate schedules uniformly by 2 basis points, beginning on January 1, 2023. The FDIC also concurrently maintained the long-term target reserve ratio for the DIF, referred to as the Designated Reserve Ratio, at 2.00% for 2024. The increase in assessment rate schedules is intended to increase the likelihood that the reserve ratio of the DIF reaches the statutory minimum of 1.35% by the statutory deadline of September 30, 2028.

In November 2023, the FDIC issued a final rule to implement a special assessment to recoup losses to the DIF associated with bank failures in the first half of 2023. The assessment base for the special assessment is equal to an insured depository institution's estimated uninsured domestic office deposits reported as of December 31, 2022, adjusted to exclude the first \$5 billion of uninsured domestic office deposits. The FDIC will collect the special assessment, over an initial eight-quarter collection period and currently projects that the special assessment will be collected for an additional two quarters beyond the initial eight-quarter collection period, at a lower rate, subject to change depending on any adjustments to the loss estimate, mergers, failures, or amendments to reported estimates of uninsured deposits. In conjunction with the special assessment, \$84.6 million was recorded to Other Operating Expense in the fourth quarter of 2023. A subsequent reassessment by the FDIC in 2024 resulted in an increase of the assessed amount to \$99.3 million and an additional \$14.7 million was recorded to Other Operating Expense. The final rule was effective on April 1, 2024, with the first collection for the special assessment reflected on the invoice for the first quarterly assessment period of 2024, with a payment date of June 28, 2024. Three quarterly assessments aggregating \$31.7 million were paid in 2024. For more information on the FDIC's special assessment, please refer to Note 24, "Commitments and Contingent Liabilities" included under Item 8, "Financial Statements and Supplementary Data".

COMMUNITY REINVESTMENT ACT

The Bank is subject to the CRA. The CRA and the regulations issued thereunder are intended to encourage banks to help meet the credit needs of their service areas, including low- and moderate-income neighborhoods and persons, consistent with the safe and sound operations of the banks. For purposes of the CRA, the Bank operates under a "wholesale" designation granted by the Federal Reserve Board and fulfills its CRA obligations by making qualified investments for the purposes of community development. The Bank received an "outstanding" CRA rating from the Federal Reserve Board in its most recent CRA examination.

In 2023, the U.S. banking agencies issued a final rule to amend their regulations implementing the CRA. The rule materially revises the current CRA framework, mostly for retail designated banks, including the assessment areas in which a bank is evaluated to include activities associated with online and mobile banking, the tests used to evaluate a bank in its assessment areas, new methods of calculating credit for lending, investment and service activities, and additional data collection and reporting requirements. The rule is expected to result in a significant increase in the thresholds for large banks to receive "outstanding" ratings in the future.

According to the new rule, banks currently designated as “wholesale” will be absorbed into the “limited purpose” designation. The rule outlines that a limited purpose bank is one that is not in the business of extending consumer or retail loans, except on an incidental and accommodation basis. Limited purpose banks are only subject to a qualitative and quantitative review of a bank’s community development lending and investments in each assessment area. While we will continue to be evaluated on our community development activities in our local markets, we will also be evaluated against a national benchmark based on assets.

The rule was expected to take effect on April 1, 2024, with most of its provisions becoming applicable on January 1, 2026. Reporting of the collected data will not be required until 2027. Several banking industry groups filed a lawsuit seeking to invalidate the CRA final rule, in which they argued that the federal banking agencies exceeded their statutory authority in adopting the CRA final rule. In March 2024, a federal judge granted an injunction to extend the CRA final rule’s effective date, originally set for April 1, 2024. The effective date will be extended each day the injunction remains in place, pending the resolution of the lawsuit.

DATA PRIVACY AND SECURITY

Federal law establishes a minimum federal standard of financial privacy by, among other provisions, requiring financial institutions to adopt, disclose, and enforce privacy policies with respect to consumer information, setting limitations on disclosure to third parties of consumer information, setting standards for protecting client information and preventing unlawful access to such information, and requiring notice of data breaches in certain circumstances. For example, the Federal Trade Commission has the authority to regulate and enforce against unfair or deceptive acts or practices in or affecting commerce, including acts and practices with respect to data privacy and security, and the Gramm-Leach-Bliley Act regulates the confidentiality and security of customer information obtained by financial institutions and certain other types of financial services businesses.

Most U.S. states, the EU and other non-U.S. jurisdictions also have adopted their own statutes and/or regulations concerning data privacy and security and requiring notification of data breaches—for example, the General Data Protection Regulation (GDPR) in Europe and its equivalent in the UK (UK GDPR), the Personal Information Protection Law (PIPL) in China, and the California Consumer Privacy Act, as amended by the California Privacy Rights Act (collectively, CCPA) in the United States. Similar laws are in effect or being considered in other jurisdictions in which we operate across the globe. The GDPR is designed to harmonize data privacy and security laws across the European Economic Area (EEA) and to protect EEA citizens’ data privacy and security. The GDPR imposes stringent operational requirements on both data controllers and data processors and has extraterritorial effect as its scope includes all data controllers and processors outside the EEA whose processing activities relate to the offering of goods or services to, or monitoring the behavior of, EEA individuals. Organizations that violate certain provisions of the GDPR could be fined up to €20 million or 4% of their annual worldwide revenue for the preceding fiscal year, whichever is greater. The GDPR also has been implemented into UK law as part of the arrangements following the UK’s withdrawal from the EU and operates in conjunction with other local data privacy requirements, although the GDPR and UK GDPR may diverge over time. Prior to the most recent general election, the UK was in the process of reforming its data privacy rules through a new Data Protection and Digital Information Bill. The Data Protection and Digital Information Bill did not become law before Parliament was dissolved on May 24, 2024. It is possible that it or similar data protection measures will be introduced by the government in the current Parliament.

In the United States, the CCPA broadly defines personal information and substantially increases the rights of California residents to understand how their personal information is collected, used, and otherwise processed by commercial businesses, such as affording them the right to access and request deletion of their information and to opt out of certain sharing and sales of personal information. The CCPA includes a private right of action (permitting lawsuits to be brought by private individuals instead of the state Attorney General or other government actor for certain breaches), and contemplates civil penalties of up to \$2,500 for each violation and up to \$7,500 for each intentional violation.

In addition, several states have enacted, or are considering enacting, comprehensive data privacy laws similar to the CCPA. These laws apply, or will apply, in addition to laws that already exist in all 50 U.S. states that require businesses to provide notice under certain circumstances to consumers whose personal information has been disclosed as a result of a data breach. Moreover, the U.S. Congress has recently considered, and is currently considering, various proposals for more comprehensive data privacy and security legislation, to which we may be subject if enacted.

Northern Trust uses a variety of machine learning and artificial intelligence (“AI”) solutions to process transactional activity more efficiently and to mitigate risk. These uses currently include, among others, digitizing documents, detecting anomalous, fraudulent transactions and training services teams on operational processes.

Regulation of AI is rapidly evolving in the U.S. and worldwide as legislators and regulators are increasingly focused on these powerful emerging technologies. The technologies underlying AI and its uses are subject to a variety of laws and regulations, including intellectual property, privacy, data protection, cybersecurity, consumer protection, competition, and equal opportunity laws, and are expected to be subject to increased regulation and new laws or new applications of existing laws and regulations.

Northern Trust has certain processes and controls in place designed to mitigate the risks associated with the use of AI solutions, including monitoring the development and applicability of such evolving laws and regulations, and will take steps designed to comply with laws and regulations applicable to Northern Trust's use of AI.

The Corporation maintains a regulatory change framework designed to monitor and respond to regulatory change, including with respect to data privacy and security, and has adopted and disseminated privacy policies and communicates required information relating to financial privacy and data security in accordance with applicable law.

CONSUMER LAWS AND REGULATIONS

The Corporation's banking subsidiaries are subject to certain federal and state laws and regulations designed to protect consumers in transactions with banks. Failure to comply with these laws and regulations could lead to substantial penalties, operating restrictions and reputational damage to the financial institution. Consumer laws and regulations are enforced by the Consumer Financial Protection Bureau (CFPB) and other federal and state regulators.

NON-U.S. REGULATION

Northern Trust is subject to the laws and regulatory authorities of the jurisdictions in which its non-U.S. branches and subsidiaries operate. For example, branches and subsidiaries conducting banking and asset servicing businesses in the UK are authorized to do so pursuant to the UK Financial Services and Markets Act 2000. They are authorized by the Prudential Regulation Authority (PRA) and/or the Financial Conduct Authority (FCA). The PRA and FCA exercise broad supervisory and disciplinary powers that include the power to revoke temporarily or permanently authorization to conduct a regulated business upon breach of the relevant regulations, impose capital requirements, suspend registered employees, and impose censures and fines on both regulated businesses and their regulated employees. Additionally, the Bank is licensed as a foreign authorized deposit-taking institution in Australia under the Banking Act (Australia) and as a wholesale bank in Singapore under the Banking Act (Singapore) and as a result is subject to the supervision of the Australian Prudential Regulation Authority and the Monetary Authority of Singapore, respectively.

Northern Trust's European branches and subsidiaries are subject to the laws and regulatory authorities of the EU and the member states in which they are domiciled. For example, Northern Trust Global Services SE, as an EU-domiciled credit institution in Luxembourg, is subject to the prudential supervision of the ECB and the CSSF. Moreover, Northern Trust's non-EU branches and subsidiaries conducting financial services activities in the EU may fall within the scope of the laws of the EU and, given the increasing extraterritorial effect of EU legislation, non-EU branches and subsidiaries may still fall within the scope of EU law if they transact outside of the EU with EU clients.

Since January 31, 2020, the UK has not been a member of the EU. EU legislation as it applied to the UK on December 31, 2020 is a part of UK domestic legislation, under the control of the UK's parliament. Most UK law relevant to the Corporation and its subsidiaries is still closely aligned with the EU legislative framework in place in December 2020. However, in 2022, the UK government proposed legislation that makes significant reforms to the UK's financial services regulations. In particular, the Financial Services and Markets Act 2023 includes measures revoking retained EU law relating to financial services. In addition, the UK government announced a package of post-Brexit reforms to drive growth and competitiveness in the financial services sector. The Financial Services and Markets Act 2023 along with these other reforms may directly and indirectly impact the Corporation.

The following items provide a brief description of certain key regulatory requirements in the EU and the UK relevant to the Corporation and its subsidiaries, in addition to the BRRD and GDPR and UK GDPR discussed under "Resolution Planning" and "Data Privacy and Security," respectively, above.

EU and UK Prudential Regulatory Frameworks. The EU Capital Requirements Directive of June 26, 2013 (CRD) and the EU Capital Requirements Regulation of June 26, 2013 (CRR) set out the framework for prudential regulation of credit institutions in the EU, including, among other things, capital and liquidity requirements, leverage, and disclosure and reporting. CRR and CRD have been subject to extensive amendments relating to the leverage ratio, the net stable funding ratio, large exposures, and market and counterparty credit risk, enhancing the resiliency of EU banks to potential future economic shocks, the transition to climate neutrality and finalizing the implementation of the Basel III agreement. Since June 26, 2021, investment firms under the recast Markets in Financial Instruments Directive (MIFID) have been subject to a new prudential regime under the EU Investment Firm Directive and Investment Firm Regulation. In April 2021, the Financial Services Act came into force in the UK establishing among other things, (i) a framework for the new investment firm prudential framework to apply in the UK and (ii) the UK implementation of Basel III standards, including amendments to CRR as implemented into UK law following the withdrawal from the EU. UK and EU branches and subsidiaries of the Corporation may also be subject to local rules on outsourcing and operational resilience. In June 2024, the texts of CRR III and CRD VI, were formally published in the Official Journal of the EU. Through these regulations, the EU will implement the Basel III accord into EU law. These regulations affect the capital and liquidity requirements of European banking entities and restrict the provision of prescribed core banking services, including lending, the provision of guarantees and commitments, and the taking of deposits or other borrowing, by non-EU entities to EU entities, except where these services are provided through an authorized EU branch or where an exemption applies. The new regime will be phased in, beginning in 2024 through to 2027.

Markets Regulation. MIFID (which came into force in 2018), the linked Markets in Financial Instruments Regulation (MIFIR), and the European Market Infrastructure Regulation 648/2012 (EMIR) are the primary pieces of EU legislation which regulate, among other things, trading in derivative and securities markets, transaction reporting, investor protection, clearing and risk mitigation. MIFID, MIFIR and EMIR, with applicable amendments, now form part of UK law under the legislation implemented when the UK left the EU. Reforms to the onshored version of MIFIR have been made by the UK Financial Services and Markets Act 2023. The reforms impact, among other things, the share trading obligation and derivatives trading obligation.

Central Securities Depositories Regulation. On September 17, 2014, the EU Central Securities Depositories Regulation (CSDR) entered into force (subject to a number of transitional provisions). The CSDR aims principally to ensure that transactions between buyers and sellers of dematerialized securities are settled in a safe and timely manner by introducing common securities settlement standards across the EU. Key features of the CSDR include shorter settlement periods, settlement discipline measures (including mandatory cash penalties and “buy-ins” for settlement fails and settlement fails reporting) and an obligation regarding dematerialization for most securities. In the UK, the Financial Services and Markets Act 2023 grants to the Bank of England new rule-making powers in relation to central securities depositories (CSD).

Securities Financing Transactions and Reuse of Collateral Regulation. On November 25, 2015, the EU adopted a regulation on securities financing transactions and reuse of collateral (SFTR) as part of its approach to addressing shadow banking. The regulation includes provisions for enhanced transparency and reporting of securities financing transactions. The SFTR entered into force on January 12, 2016. The reporting obligations under the SFTR were phased in over several periods through January 11, 2021.

Benchmarks Regulation. On January 1, 2018, the EU Benchmarks Regulation (BMR) became applicable in all EU member states. The principal objectives of the BMR are to restore investor confidence in the accuracy, robustness and integrity of indices used as benchmarks in financial instruments and financial contracts or to measure the performance of investment funds, and the benchmark-setting process itself. The BMR aims to achieve these objectives by ensuring that benchmarks are not subject to conflicts of interest, are used appropriately, and reflect the actual market or economic reality they are intended to measure. The BMR has been incorporated into UK law following the withdrawal from the EU, with applicable amendments.

Sustainable Finance Disclosure Regulations. On December 29, 2019, the EU Sustainable Finance Disclosure Regulations (SFDR) entered into force. SFDR aims to prevent “greenwashing” (conveying a misleading or false impression a product is more environmentally favorable than it actually is) by requiring disclosure of how sustainability risks and environmental, social and governance (ESG) factors are part of the investment and business processes of asset managers. Mandatory disclosures are required to be published at product and manager levels in a variety of ways, including on websites, in pre-contractual documents (e.g., prospectuses) and in annual reports. In October 2021, the UK government announced that it will launch its own consultation with stakeholders on sustainable finance disclosures rules for certain UK market participants and certain investment products. On October 25, 2022, the FCA issued a consultation paper on new measures for a UK regime on sustainability disclosure requirements and investment labels. The new measures, including an anti-greenwashing rule, product labels and product naming and marketing rules, entered into force during the course of 2024.

Taxonomy Regulation. On July 12, 2020, Regulation (EU) 2020/852 (Taxonomy Regulations) entered into force. The Taxonomy Regulations are part of the EU’s recent measures designed to encourage environmentally sustainable investment decision making and introduce a technical framework to ascertain how sustainable an economic activity is. The Taxonomy Regulations apply to financial market participants including MiFID firms, Undertakings for the Collective Investment in Transferable Securities (UCITS) management companies, and alternative investment fund managers, and will require them to make further entity, pre-contractual and periodic disclosures. The UK government is in the process of consulting on and implementing its own “green” taxonomy for guiding companies and investors on “green” investments, similar to the EU regime.

Deposit Guarantee Scheme. Eligible deposits held with EU credit institutions and certain other financial entities are subject to the recast Deposit Guarantee Schemes Directive (DGSD) implemented in 2014. It required EU member states to introduce legislation establishing at least one deposit guarantee scheme (DGS). A DGS which is established and recognized in one member state is obliged to cover the depositors (up to certain prescribed amounts) at branches of the same institution in other EU member states. In the UK, the Financial Services Compensation Scheme is the national DGS for the protection and reimbursement of depositors of failed financial institutions.

Fifth EU Money Laundering Directive. On July 9, 2018, the Fifth EU Money Laundering Directive (MLD5) entered into force. MLD5 was required to be transposed into local law by EU member states by January 10, 2020 and introduced the following key changes to the previous EU AML regime: (i) EU member states must ensure that registers of ultimate beneficial owners of companies and other legal entities are accessible to the general public; (ii) the previous AML regime was extended to additional service providers, such as electronic wallet providers, virtual currency exchange service providers, and art dealers, and further specifications regarding the scope of application of MLD5 with respect to tax advisors and estate agents were provided; (iii) the threshold for identifying holders of prepaid cards was lowered to €150; and (iv) EU member states were required to implement enhanced due diligence measures to monitor suspicious transactions involving high-risk countries more strictly. The UK government transposed MLD5 into UK law and, therefore, the UK anti-money laundering regime is currently broadly aligned with the EU. On December 7, 2022, the Council of the EU agreed its position on AML regulation through the Sixth EU Money Laundering Directive. The new rules will extend to, among other items, the entire crypto-asset sector, third-party intermediaries, persons trading in precious metals, precious stones and cultural goods. The text of the Sixth EU Money Laundering Directive was published in June 2024 and EU member states have until 2027 to transpose its requirements into national legislation.

Shareholder Rights Directive. On May 17, 2017, the recast Shareholder Rights Directive (EU) 2017/828 was published (SRD II). Member states of the EU were required to bring into force the laws, regulations and administrative provisions necessary to comply with the Directive by June 10, 2019. SRD was designed to establish requirements in relation to the exercise of shareholder rights and, recognizing that shares are often held through complex chains of intermediaries, SRD II is designed to improve mechanisms for the identification of shareholders by companies, as well as improve the transmission of information along the chain of intermediaries to facilitate the exercise of shareholder rights. Non-EU intermediaries are required to comply with the requirements if they provide services with respect to shares of companies that have their registered office in the EU. SRD II has been incorporated into UK law and remains largely aligned with the EU.

Depository Books & Records. Following the European Securities and Markets Authority's opinion on asset segregation and application of depository delegation rules to CSDs published on July 20, 2017, changes were introduced by two EU regulations modifying the existing Alternative Investment Fund Managers Directive (AIFMD) and UCITS Level 2 Regulations. The changes aim to better define asset segregation requirements and to add additional safeguards, primarily focusing on information flow between the depository and any third party to whom safe-keeping functions have been delegated. The key changes (i) impact the frequency of reconciliations between the depository's internal accounts and records and those of any third party in the custody chain, (ii) require the depository to maintain an independent record separate from the record maintained by the third party, and (iii) increase due diligence obligations where custody of assets is delegated to third parties outside of the EU. AIFMD and the UCITS directive were incorporated into UK law and remain largely aligned with the EU. The changes impact Northern Trust's subsidiaries providing depository services to European-domiciled fund clients.

In addition to the above, the Bank's and the Corporation's subsidiary banks located outside the United States are subject to regulatory capital requirements in the jurisdictions in which they operate. As of December 31, 2024, each of our non-U.S. banking subsidiaries had capital ratios above their specified minimum requirements.

Human Capital Management

Our talent is our greatest asset and a core enabler of our strategy. Empowering our employees is central to our talent vision. Northern Trust employed approximately 23,300 full-time equivalent employees as of December 31, 2024. The regional breakout of our employee base is 42% Asia-Pacific, 41% North America, and 17% Europe, Middle East, and Africa.

THE EMPLOYEE EXPERIENCE

We elevate the employee experience from recruitment to retirement by investing in three core areas: professional development, rewarding performance, and strengthening workforce and operational resiliency. By fostering an environment where our employees thrive, we ensure that our workforce is fully engaged, motivated, celebrated, and equipped to drive our strategy.

To support this effort, we continue to invest in our Human Capital Management System to streamline manual processes and enable dynamic workforce analytics, helping managers make informed decisions and gain insights into their teams.

Our culture influences how we behave as an organization and unites us across businesses, geographies, and functions. Embedded in our culture are five behaviors to help us deliver on our strategic objectives: relentlessly client-centric, constantly managing risk, respectfully candid, intentionally inclusive, and always accountable.

PROFESSIONAL DEVELOPMENT

From internships to executive development, our goal is to help our employees excel in their current roles and acquire new skills for future growth. Through Northern Trust University, we deliver comprehensive professional and functional training programs designed to equip our employees at every stage of their careers. Our performance management practices promote

high performance across the company and are aligned to our strategy from goal-setting to evaluation. We provide comprehensive manager training on performance differentiation and application to our performance ratings scale to foster transparent feedback and continuous improvement.

REWARDING PERFORMANCE

We believe that recognizing and rewarding the contributions of our employees is critical to their continued success. We have a variety of awards and recognition programs tailored to different opportunities and achievements. Our in-person celebrations, such as our Quarter Century Club, which honors our long-tenured employees, and the Chairman's Awards, which recognize outstanding individual and team achievements, reinforce performance and appreciation.

We ensure our employees are compensated fairly by aligning their total compensation with market competitive pay for their roles, experience, and performance. Our total compensation includes base salaries, performance-linked incentive compensation, and comprehensive benefits designed to meet the needs of our employees and their families.

WORKFORCE & OPERATIONAL RESILIENCY

Our operating model is designed to reinforce the strength of our control framework, foster enterprise change management, provide robust governance and oversight, accelerate scalable growth, and leverage and develop our talent. To align with our strategy and position the Corporation for future success, new leaders are appointed from our internal talent pool as well as recruited externally to bring in new skills and expertise.

Planning for leadership resiliency is a core component of our talent strategy. We identify and develop leaders with the necessary skills to execute business strategies and have documented succession plans for leadership resiliency roles.

Our well-being programs support employees and help maintain an inclusive and resilient environment. Through these programs, we enhance employee engagement, reduce workforce risks, and build an adaptive, high-performing culture.

In 2024, over 88% of our employees participated in the annual Employee Engagement Survey which is a crucial tool for understanding and meeting the needs of our employees and driving engagement and retention. The survey results are reviewed by the Board and discussed in leadership meetings, reflecting our dedication to continuous improvement.

Embedded in our engagement survey is an inclusion index which is a gauge to understand our employees' sense of belonging and their ability to contribute to the success of the firm. We are committed to fostering an inclusive workplace that aligns with the Corporation's mission, values, goals, business practices, and all applicable laws.

Available Information

Through the Corporation's website at www.northerntrust.com, the Corporation makes available free of charge its Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, and all other reports and all amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended (Exchange Act), as soon as reasonably practicable after it files such material with, or furnishes such material to, the SEC. The contents of the Corporation's website, the website of the SEC at www.SEC.gov or any other website referenced herein are not a part of this Annual Report on Form 10-K.

ITEM 1A - RISK FACTORS

In the normal course of our business activities, we are exposed to a variety of risks. The following discussion sets forth the material risk factors that we have identified. Although we discuss these risk factors primarily in the context of their potential effects on our business, financial condition or results of operations, these risks could have other possible adverse consequences, including those described below. Additional risks beyond those discussed below, elsewhere in this Annual Report on Form 10-K or in other of our reports filed with, or furnished to, the SEC also could affect us adversely. Further, we cannot assure you that the risk factors herein or elsewhere in our other reports address all potential risks that we may face.

For a discussion of the risks and uncertainties that may affect our future results, see "Forward-Looking Statements" included in Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations."

Summary

Our business, financial condition or results of operations may be materially and adversely affected by various risk types and considerations, including market risks, operational risks, credit risks, liquidity risks, regulatory and legal risks, strategic risks, and other risks, including as a result of the following:

Market Risks

- We are dependent on fee-based business for a majority of our revenues, which may be affected adversely by market volatility, a downturn in economic conditions, underperformance and/or negative trends in investment preferences.
- Changes in interest rates can affect our earnings negatively.
- Changes in the monetary, trade and other policies of various regulatory authorities, central banks, governments and international agencies may reduce our earnings and affect our growth prospects negatively.
- Macroeconomic conditions and uncertainty in the global economy, including the financial stability of various regions or countries across the globe, including the risk of defaults on sovereign debt and related stresses on financial markets, could have a significant adverse effect on our earnings.
- Declines in the value of securities held in our investment portfolio can affect us negatively.
- Changes in a number of particular market conditions, including in foreign currency rates, cross-border investing activity and the demand for borrowing or lending securities, could affect our earnings negatively.

Operational Risks

- We are subject to many types of operational risks that could affect our earnings negatively.
- We are highly dependent on information technology systems, and networks, many of which are operated by third parties, and any failures of, or disruptions to, our or such third parties' technological systems or networks could materially and adversely affect our business.
- Breaches of our security measures, including, but not limited to, those resulting from cyber-attacks, or other information security incidents may result in losses.
- Errors, breakdowns in controls or other mistakes in the provision of services to clients or in carrying out transactions for our own account can subject us to liability, result in losses or have a negative effect on our earnings in other ways.
- Our dependence on technology, and the need to update frequently our technology infrastructure, exposes us to risks that also can result in losses.
- A failure or circumvention of our controls and procedures could have a material adverse effect on our business, financial condition and results of operations.
- Failure of any of our third-party vendors (or their vendors) to perform can result in losses.
- We are subject to certain risks inherent in operating globally which may affect our business adversely.
- Failure to control our costs and expenses adequately could affect our earnings negatively.
- Pandemics, natural disasters, global climate change, acts of terrorism, geopolitical tensions, and global conflicts may have a negative impact on our business and operations.

Credit Risks

- Failure to evaluate accurately the prospects for repayment when we extend credit or maintain an adequate allowance for credit losses can result in losses or the need to make additional provisions for credit losses, both of which reduce our earnings.
- Market volatility and/or weak economic conditions can result in losses or the need for additional provisions for credit losses, both of which reduce our earnings.
- The failure or perceived weakness of any of our significant counterparties could expose us to loss.

Liquidity Risks

- If we do not manage our liquidity effectively, our business could suffer.
- If the Bank is unable to supply the Corporation with funds over time, the Corporation could be unable to meet its various obligations.
- We may need to raise additional capital in the future, which may not be available to us or may only be available on unfavorable terms.
- Any downgrades in our credit ratings, or an actual or perceived reduction in our financial strength, could affect our borrowing costs, capital costs and liquidity adversely.

Regulatory and Legal Risks

- Failure to comply with regulations and/or supervisory expectations can result in penalties and regulatory constraints that restrict our ability to grow or even conduct our business, or that reduce earnings.
- We are subject to extensive and evolving government regulation and supervision that impacts our operations. Changes by the U.S. and other governments to laws, regulations and policies applicable to the financial services industry may heighten the challenges we face and make regulatory compliance more difficult and costly.
- We are subject to complex and evolving laws, regulations, rules, standards and contractual obligations regarding data privacy and security, which could increase the cost of doing business, compliance risks and potential liability.

- We may be impacted adversely by claims or litigation, including claims or litigation relating to our fiduciary responsibilities.
- We may be impacted adversely by supervisory and/or regulatory enforcement matters.
- We may fail to set aside adequate reserves for, or otherwise underestimate our liability relating to, pending and threatened claims, with a negative effect on our earnings.
- The ultimate impact on us of regulatory divergence between the United Kingdom and the European Union remains uncertain.
- If we fail to comply with legal standards, we could incur liability to our clients or lose clients, which could affect our earnings negatively.

Strategic Risks

- If we are not able to attract, retain and motivate personnel, our business could be negatively affected.
- If we do not develop and execute strategic plans successfully, our growth may be impacted negatively.
- We are subject to intense competition in all aspects of our businesses, which could have a negative effect on our ability to maintain satisfactory prices and grow our earnings.
- Damage to our reputation could have a direct and negative effect on our ability to compete, grow and generate revenue.
- We need to invest in innovation constantly, and the inability or failure to do so may affect our businesses and earnings negatively.
- Failure to understand or appreciate fully the risks associated with development or delivery of new product and service offerings may affect our businesses and earnings negatively.
- Our success with large, complex clients requires an understanding of the market and legal, regulatory and accounting standards in various jurisdictions.
- We may take actions to maintain client satisfaction that result in losses or reduced earnings.
- Our operations, businesses and clients could be materially adversely affected by the effects of climate change or concerns related thereto.

Other Risks

- The systems and models we employ to analyze, monitor and mitigate risks, as well as for other business purposes, are inherently limited, may not be effective in all cases and, in any case, cannot eliminate all risks that we face.
- Changes in tax laws and interpretations and challenges to our tax positions may affect our earnings negatively.
- Changes in accounting standards may be difficult to predict and could have a material impact on our consolidated financial statements.
- Our ability to return capital to stockholders is subject to the discretion of our Board of Directors and may be limited by U.S. banking laws and regulations, applicable provisions of Delaware law, or our failure to pay full and timely dividends on our preferred stock and the terms of our outstanding debt.

Market Risks

We are dependent on fee-based business for a majority of our revenues, which may be affected adversely by market volatility, a downturn in economic conditions, underperformance and/or negative trends in investment preferences.

Our principal operational focus is on fee-based business, which is distinct from commercial banking institutions that earn most of their revenues from loans and other traditional interest-generating products and services. Fees for many of our products and services are based on the market value of assets under management, custody or administration; the volume of transactions processed; securities lending volume and spreads; fees for other services rendered; and in certain businesses, fees calculated as a percentage of our clients' earnings, all of which may be impacted negatively by market volatility, a downturn in economic conditions, underperformance and/or negative trends in investment preferences. For example, downturns in equity markets and decreases in the value of debt-related investments resulting from market disruption, illiquidity or other factors historically have reduced the valuations of the assets we manage or service for others, which generally impacted our earnings negatively. Further, although we do not hold, invest in, or custody cryptocurrency assets, the markets in which they trade are highly volatile and volatility in these markets may impact the markets for other assets that we hold, invest in, or custody, which could also impact our fees or financial condition. Market volatility and/or weak economic conditions also could affect wealth creation, investment preferences, trading activities, and savings patterns, which in turn could impact demand for certain products and services that we provide.

Our earnings also could be affected by poor investment returns or changes in our clients' investment preferences driven by factors beyond market volatility or weak economic conditions. Poor absolute or relative investment performance in funds or client accounts that we manage or in investment products that we design or provide could result in declines in the market values of portfolios that we manage and/or administer and could affect our ability to retain existing assets and to attract new clients or additional assets from existing clients. For example, from time to time in the past, outflows from certain of our products driven by relative investment performance or other factors adversely impacted our overall fees derived from assets that we manage. Broader changes in our clients' investment preferences that lead to less investment in mutual funds or other collective funds, such as the shift in investment preference to lower fee products, could also impact our earnings negatively.

Changes in interest rates could affect our earnings negatively.

The direction and level of interest rates are important factors in our earnings. Interest rate changes could affect the interest earned on assets differently than interest paid on liabilities. In response to rising inflation, the Federal Reserve Board increased interest rates from historically low levels during 2022 and 2023. While a rising interest rate environment generally has had a positive effect on our net interest margin, in some circumstances, a rise in interest rates has affected us negatively, and could again in the future affect us negatively. For example, the rapid increases in interest rates during 2022 and 2023 adversely impacted the value of certain of our investment securities, and consequently, our capital, liquidity, and earnings. Additionally, higher interest rates historically have caused, and could in the future cause: market volatility and downturns in equity markets, resulting in a decrease in the valuations of the assets we manage or service for others, which generally impact our earnings negatively; our clients to transfer funds into investments with higher rates of return, resulting in decreased deposit levels and higher fund or account redemptions; our borrowers to experience difficulties in making higher interest payments, resulting in increased credit costs, provisions for loan and lease losses and charge-offs; reduced bond and fixed income fund liquidity, resulting in lower performance, yields and fees; or higher funding costs.

Conversely, low-interest-rate environments generally result in a compressed net interest margin and also have a negative impact on our fees earned on certain of our products. For example, in the past we waived certain fees associated with money market funds due to the low level of short-term interest rates. Low net interest margins and fee waivers each negatively impact our earnings.

Although we have policies and procedures in place to assess and mitigate potential impacts of interest rate risks, if our assumptions about any number of variables are incorrect, these policies and procedures to mitigate risk may be ineffective, which could impact earnings negatively.

Please see "Market Risk" in the "Risk Management" section included in Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations," for a more detailed discussion of interest rate and market risks we face.

Changes in the monetary, trade and other policies of various regulatory authorities, central banks, governments and international agencies may reduce our earnings and affect our growth prospects negatively.

The monetary, trade and other policies of U.S. and international governments, agencies and regulatory bodies have a significant impact on economic conditions and overall financial market performance. For example, the Federal Reserve Board regulates the supply of money and credit in the U.S. through quantitative tightening and/or easing, and its policies determine in large part the level of interest rates and our cost of funds for lending and investing, and play a role in contributing to or moderating levels of inflation, all of which meaningfully impact our earnings. Further, the Federal Reserve Board's policies can affect our borrowers by increasing interest rates or making sources of funding less available, which may increase the risk that borrowers fail to repay their loans from us. Changes in monetary, trade and other governmental policies are beyond our control and can be difficult to predict, and we cannot determine the ultimate effect that any such changes would have upon our business, financial condition or results of operations.

Macroeconomic conditions and uncertainty in the global economy, including the financial stability of various regions or countries across the globe, including the risk of defaults on sovereign debt and related stresses on financial markets, could have a significant adverse effect on our earnings.

Risks and concerns about the financial stability of various regions or countries across the globe could have a detrimental impact on economic and market conditions in these or other markets across the world. Foreign market volatility and economic disruptions have affected, and may in the future affect, consumer confidence levels and spending, international trade policy, personal bankruptcy rates, levels of incurrence of and default on consumer debt, and home prices. Additionally, financial markets may be adversely affected by the liquidity or capital deficiencies (actual or perceived) of financial institutions and related industry and government actions, the outbreak of hostilities or political and governmental instability (including the expansion or escalation of military conflict between Ukraine and the Russian Federation or the conflict in the Middle East, and tensions between the U.S. and China), terrorism, political or civil unrest, public health epidemics or pandemics, sovereign debt downgrades or debt crises, or other geopolitical events. For example,

developments related to the U.S. federal debt ceiling, including the possibility of a government shutdown, default by the U.S. government on its debt obligations, or related credit-rating downgrades, could have adverse effects on the broader economy, disrupt access to capital markets, and contribute to, or worsen, an economic recession. The cumulative effect of uncertain business conditions or economic challenges faced in various foreign markets, including fiscal or monetary concerns, economic downturns and the possibility of a recession in some jurisdictions, other economic factors (including changes in foreign currency exchange rates, interest rates and changes to tax laws or the application or enforcement practices of such laws), or volatility or lack of confidence in the financial markets may adversely affect certain portions of our business, financial condition, and results of operations.

Declines in the value of securities held in our investment portfolio could affect us negatively.

Our investment securities portfolio represents a greater proportion, and our loan portfolio represents a smaller proportion, of our total consolidated assets in comparison to many other financial institutions. The value of securities available for sale and held to maturity within our investment portfolio, which is generally determined based upon market values available from third-party sources, have fluctuated, and may continue in the future to fluctuate, as a result of market volatility and economic or financial market conditions, including interest rates. For example, in recent years, we realized notable losses on the sale of available for sale securities and we may realize additional losses in the future. Declines in the value of securities held in our investment portfolio negatively impact our levels of capital, liquidity, and, to the extent we realize losses, earnings. Although we have policies and procedures in place to assess and mitigate potential impacts of market risks, including hedging-related strategies, those policies and procedures are inherently limited because they cannot anticipate the existence or future development of currently unanticipated or unknown risks. Accordingly, market risks have, from time to time, negatively affected the value of securities held in our investment portfolio and in the future we could suffer additional adverse effects as a result of our failure to anticipate and manage these risks properly.

Changes in a number of particular market conditions, including in foreign currency exchange rates, cross-border investing activity and the demand for borrowing or lending securities, could affect our earnings negatively.

We provide foreign exchange services to our clients, primarily in connection with our custody business. Foreign currency volatility influences our foreign exchange trading income as does the level of client activity. Foreign currency volatility and changes in client activity may result in reduced foreign exchange trading income. Fluctuations in exchange rates could raise the potential for losses resulting from foreign currency trading positions where aggregate obligations to purchase and sell a currency other than the U.S. dollar do not offset each other or offset each other in different time periods. We also are exposed to non-trading foreign currency risk as a result of our holdings of non-U.S. dollar denominated assets and liabilities, investments in non-U.S. subsidiaries, and future non-U.S. dollar denominated revenue and expense.

We have policies and procedures in place to assess and mitigate potential impacts of foreign exchange risks, including hedging-related strategies. Any failure or circumvention of our procedures to mitigate risk could impact earnings negatively. Please see “Market Risk” in the “Risk Management” section included in Item 7, “Management’s Discussion and Analysis of Financial Condition and Results of Operations,” for a more detailed discussion of market risks we face.

In addition, in past periods, reductions in the volatility of currency-trading markets, the level of cross-border investing activity, and the demand for borrowing securities or willingness to lend such securities have affected our earnings from activities such as foreign exchange trading and securities lending negatively. If these conditions occur again in the future, our earnings from these activities could be affected negatively. In certain of our businesses, such as securities lending, our fee is calculated as a percentage of our clients’ earnings, such that market and other factors that reduce our clients’ earnings from investments or trading activities also reduce our revenues.

Operational Risks

We are subject to many types of operational risks that could affect our earnings negatively.

We regularly assess and monitor operational risk in our businesses. Despite our efforts to assess and monitor operational risk, our risk management program may not be effective in all cases. Factors that could impact our operations and expose us to risks varying in size, scale and scope, some or all of which could be exacerbated by the trend toward hybrid and remote working arrangements in recent years, include:

- failures of technological systems or networks or breaches of security measures, including, but not limited to, those resulting from computer viruses, cyber-attacks or other information security incidents;
- human errors or omissions, including failures to comply with applicable laws or corporate policies and procedures;
- theft, fraud or misappropriation of assets, whether arising from the intentional actions of internal personnel or external third parties;
- defects or interruptions in computer or communications systems;
- breakdowns in processes and internal controls; over-reliance on manual processes and controls, which are less scalable than automated processes and controls;
- failures of the systems and facilities that support our operations;

- failure of any third-party vendor to properly execute the processes on which Northern Trust relies;
- unsuccessful or difficult implementation of computer systems upgrades;
- defects in product design or delivery;
- difficulty in accurately pricing assets, which can be aggravated by market volatility and illiquidity and lack of reliable pricing from third-party vendors;
- negative developments in relationships with key counterparties, third-party vendors, employees or associates in our day-to-day operations; and
- external events that are wholly or partially beyond our control, such as pandemics, geopolitical events, political or social unrest, natural disasters or acts of terrorism.

While we have in place many controls and business continuity plans designed to address many of these factors, these plans may not operate successfully to mitigate these risks effectively. We also may fail to identify or fully understand the implications and risks associated with changes in the financial markets or our businesses—particularly as our geographic footprint, product pipeline and client needs and expectations evolve—and consequently fail to enhance our controls and business continuity plans to address those changes in an adequate or timely fashion. If our controls and business continuity plans do not address the factors noted above and operate to mitigate the associated risks successfully, such factors may have a negative impact on our business (including operational resilience), financial condition or results of operations. In addition, an important aspect of managing our operational risk is creating a risk culture in which all employees fully understand the inherent risk in our business and the importance of managing risk as it relates to their job functions. We continue to enhance our risk management program to support our risk culture, ensuring that it is sustainable and appropriate for our role as a major financial institution. Nonetheless, if we fail to provide the appropriate environment that sensitizes all of our employees to managing risk, our business could be impacted adversely. Please see “Other Risks” in this “Risk Factors” section for further description of risks associated with the systems and models we employ to analyze, monitor and mitigate risks.

We are highly dependent on information technology systems and networks, many of which are operated by third parties, and any failures of, or disruptions to, our or such third parties’ technological systems or networks could materially and adversely affect our business.

Our business is dependent on our and third parties’ information technology systems and networks. Any failure, interruption or breach in the security of any such systems or networks could severely disrupt our operations and could subject us to liability claims, harm our reputation, interrupt our operations, or otherwise adversely affect our business, financial condition or results of operations.

Additionally, our computer, communications, data processing, networks, backup, business continuity or other operating, information or technology systems, including those that we outsource to providers, may fail to operate properly or become disabled, overloaded or damaged as a result of a number of factors, including events that are wholly or partially beyond our control, which could have a negative effect on our ability to conduct our business activities.

The third parties with which we do business also are susceptible to the foregoing risks (including regarding the third parties with which they are similarly interconnected or on which they otherwise rely), and our or their business operations and activities may therefore be affected adversely, perhaps materially, by failures, disruptions, terminations, software bugs or errors, natural disasters or malfeasance by, or attacks or constraints on, one or more financial, technology, infrastructure or government institutions or intermediaries with whom we or they are interconnected or conduct business.

Our business interruption insurance may be inadequate to compensate us for all losses that may occur as a result of any system, network or operational failure or disruption.

Breaches of our security measures, including, but not limited to, those resulting from cyber-attacks or other information security incidents, may result in losses.

Our systems involve the storage, transmission and other processing of clients’ and our personal, proprietary, confidential and sensitive information, and security breaches, including cyber-attacks or other information security incidents, have previously exposed us and could in the future expose us to theft, loss, destruction, gathering, monitoring, dissemination, misappropriation, misuse, alteration, or unauthorized disclosure of or unauthorized access to this information. Despite our implementation of a variety of security measures, our computer systems, networks, and data, including clients’ or our personal, proprietary, confidential and sensitive information, could be subject to cyber-attacks or other information security incidents, such as, among other things, from physical and electronic break-ins or unauthorized tampering, theft, malware and computer virus attacks, ransomware attacks, social engineering attacks (including phishing and vishing attacks), credential stuffing, account takeovers, insider threats or denial-of-service attacks. Our security measures also may be breached due to the actions of outside parties, employee error, failure of our controls with respect to access to our systems, malfeasance or otherwise. Any failure, interruption or breach in the security of our systems could severely disrupt our

operations and could subject us to liability claims, harm our reputation, interrupt our operations, or otherwise adversely affect our business, financial condition or results of operations.

Data privacy and security risks for large financial institutions like us are significant in part because of the evolving proliferation of new technologies, the use of internet-based solutions, mobile devices, and cloud technologies to conduct financial transactions and the increased sophistication and rapidly evolving techniques of hackers, terrorists, organized crime and other external parties, including foreign state actors and state-sponsored actors, any of which may see their effectiveness enhanced by the use of AI. Data privacy and security risks also may derive from fraud or malice on the part of our employees or third parties, or may result from human error, software bugs or errors, server malfunctions, software or hardware failure or other technological failure. If we fail to continue to upgrade our technology infrastructure to ensure effective data privacy and security relative to the type, size and complexity of our operations, we could become more vulnerable to cyber-attacks and other information security incidents and, consequently, subject to significant regulatory penalties and reputational damage. Also, the trend in the past several years toward a hybrid work environment that includes a combination of in-office and remote work creates a broader attack surface for, and increases potential vulnerabilities from, cyber threats.

While we generally conduct security assessments on third-party vendors, we cannot be certain that their information security protocols are sufficient to withstand a cyber-attack or other information security incident. Some of our vendors may store or have access to our data and may not have effective controls, processes, or practices to protect our information from loss, unauthorized disclosure, unauthorized use or misappropriation, cyber-attacks or other information security incidents. In addition, our clients often use personal devices, such as computers, smart phones and tablets, which are particularly vulnerable to loss and theft, as well as third parties with whom they share information used for authentication, to access our systems and networks and manage their accounts, which may heighten the risk of system failures, interruptions or security breaches.

Moreover, the increased use of mobile and cloud technologies could heighten these and other operational risks. Reliance on mobile or cloud technology or any failure by mobile technology and cloud service providers to adequately safeguard their systems and networks and prevent cyber-attacks or other information security incidents could disrupt our operations or the operations of our or their service providers and result in misappropriation, corruption or loss of personal, confidential, proprietary, or other sensitive information or the inability to conduct ordinary business operations. In addition, there is a risk that encryption and other protective measures may be circumvented, particularly to the extent that new computing technologies increase the speed and computing power available. A vulnerability in our service providers' software or systems, a failure of our service providers' safeguards, policies or procedures, or a cyber-attack or other information security incident affecting any of these third parties could harm our business.

In recent years, several financial services firms suffered successful cyber-attacks launched both domestically and from abroad, resulting in the disruption of services to clients, loss or misappropriation of sensitive or private information, and reputational harm. We and our clients have been, and expect to continue to be, subject to a wide variety of cyber-attacks and other similar threats, including computer viruses, ransomware and other malicious code, distributed denial-of-service attacks, and phishing and vishing attacks, and it is possible that we could suffer material losses resulting from a breach. Because the techniques used to obtain unauthorized access, disable or degrade service or sabotage systems and networks change frequently and often are not recognized until launched against a target, we may be unable to anticipate these techniques, to implement adequate preventative measures, or to address them until they are discovered. In addition, successful cyber-attacks may persist for an extended period of time before being detected. Because any investigation of an information security incident would be inherently unpredictable, the extent of a particular information security incident and the path of investigating the incident may not be immediately clear. It may take a significant amount of time before such an investigation can be completed and full and reliable information about the incident is known. While such an investigation is ongoing, we may not necessarily know the extent of the harm or how best to remediate it, certain errors or actions could be repeated or compounded before they are discovered and remediated, and communication to the public, regulators, clients and other stakeholders may be inaccurate, any or all of which could further increase the costs and consequences of an information security incident.

We could be the subject of legal claims or proceedings related to information security incidents, including regulatory investigations and other legal actions, carrying the potential for damages, fines, sanctions or other penalties, injunctive relief requiring costly compliance measures and reputational damage. Further, the market perception of the effectiveness of our information security measures could be harmed, our reputation could suffer and we could lose clients in conjunction with security incidents, each of which could have a negative effect on our business, financial condition and results of operations. A breach of our security also may affect adversely our ability to effect transactions, service our clients, manage our exposure to risk or expand our business. An event that results in the loss of information also may require us to reconstruct lost data or reimburse clients for data and credit monitoring services, which could be costly and have a negative impact on our business and reputation. Although we maintain insurance coverage in the event of information theft, damage, or destruction from cyber-attacks or other information security incidents, there can be no assurance that liabilities or losses

we may incur will be covered under such policies, that the amount of insurance will be adequate to cover such losses, that insurance will continue to be available to us on economically reasonable terms, or at all, or that our insurer will not deny coverage as to any future claim.

Further, even if not directed at us, attacks on financial or other institutions important to the overall functioning of the financial system or on our counterparties could affect, directly or indirectly, aspects of our business.

Errors, breakdowns in controls or other mistakes in the provision of services to clients or in carrying out transactions for our own account can subject us to liability, result in losses or have a negative effect on our earnings in other ways.

In our asset servicing, investment management, fiduciary administration and other business activities, we effect or process transactions for clients and for ourselves that involve very large amounts of money. Failure to manage or mitigate operational risks properly can have adverse consequences, and increased volatility in the financial markets may increase the magnitude of resulting losses. Further, remote working and other modified business practices initiated in recent years, combined with the increasing sophistication and frequency of potential cyber-attacks and other information security incidents, have heightened our operational and execution risk. Given the high volume of transactions we process, errors that affect earnings may be repeated or compounded before they are discovered and corrected.

Our dependence on technology, and the need to update frequently our technology infrastructure, exposes us to risks that also can result in losses.

Our businesses depend on information technology infrastructure, both internal and external, to record and process, among other things, a large volume of increasingly complex transactions and other data, in many currencies, on a daily basis, across numerous and diverse markets and jurisdictions. Due to our dependence on technology and the important role it plays in our business operations, combined with the increasing sophistication and frequency of potential cyber-attacks and other information security incidents, we must constantly improve and update our information technology infrastructure. Upgrading, replacing, and modernizing these systems can require significant resources and often involves implementation, integration and security risks that could cause financial, reputational, and operational harm. In recent years, there has been an acceleration in the transition from traditional to digital financial services and heightened customer expectations in this area, and this transition may require us to invest greater resources in technological advancements. Failure to ensure adequate review and consideration of critical business and regulatory issues prior to and during the introduction and deployment of key technological systems or networks or failure to align operational capabilities adequately with evolving client commitments and expectations may have a negative impact on our results of operations. The failure to respond properly to, and invest in, changes and advancements in technology and/or to compete for and retain employees with the necessary technical skills and expertise could limit our ability to attract and retain clients, prevent us from offering products and services comparable to those offered by our competitors, inhibit our ability to meet regulatory requirements or otherwise have a material adverse effect on our operations.

A failure or circumvention of our controls and procedures could have a material adverse effect on our business, financial condition and results of operations.

We regularly review and update our internal controls, disclosure controls and procedures, and corporate governance policies and procedures. Any system of controls, however well designed and operated, is based in part on certain assumptions and can provide only reasonable, not absolute, assurances that the objectives of the system will be met. Any failure or circumvention of our controls and procedures or failure to comply with regulations related to controls and procedures could have a material adverse effect on our business, financial condition and results of operations. If we identify material weaknesses in our internal control over financial reporting or are otherwise required to restate our financial statements, we could be required to implement expensive and time-consuming remedial measures and could lose investor confidence in the accuracy and completeness of our financial reports. In addition, there are risks that individuals, either employees or contractors, consciously circumvent established control mechanisms by, for example, exceeding trading or investment management limitations, or committing fraud.

Failure of any of our third-party vendors (or their vendors) to perform can result in losses.

Third-party vendors provide key components of our business operations such as data processing, recording and monitoring transactions, online banking interfaces and services, and network access. Our use of third-party vendors exposes us to the risk that such vendors (or their vendors) may not comply with their servicing and other contractual obligations, including with respect to indemnification and information security, and to the risk that we may not satisfy applicable regulatory responsibilities regarding the management and oversight of third parties and outsourcing providers. While we have established risk management processes and continuity plans, any disruptions in service from a key vendor for any reason or poor performance of services have in the past and could in the future have a negative effect on our ability to deliver products and services to our clients and conduct our business. Replacing these third-party vendors or performing the tasks they perform for ourselves has in the past and could in the future create significant delay and expense.

We are subject to certain risks inherent in operating globally which may affect our business adversely.

In conducting our U.S. and non-U.S. business, we are subject to risks of loss and adverse economic impacts from various unfavorable political, economic, legal, public health, or other developments, including social or political instability, changes in governmental policies or policies of central banks, expropriation, nationalization, confiscation of assets, price controls, capital controls, exchange controls, unfavorable tax rate changes, tax court rulings and changes in laws and regulations. Less mature and often less regulated business and investment environments heighten these risks in various emerging markets. Our non-U.S. operations accounted for 27% of our revenue in 2024. Our non-U.S. businesses are subject to extensive regulation by various non-U.S. regulators, including governments, securities exchanges, central banks and other regulatory bodies in the jurisdictions in which those businesses operate. In many countries, the laws and regulations applicable to the financial services industry are uncertain and evolving and may be applied with extra scrutiny to foreign companies. Moreover, the regulatory and supervisory standards and expectations in one jurisdiction may not conform with standards or expectations in other jurisdictions. Even within a particular jurisdiction, the standards and expectations of multiple supervisory agencies exercising authority over our affairs may not be harmonized fully. Accordingly, it may be difficult for us to determine the exact requirements of local laws in every market or manage our relationships with multiple regulators in various jurisdictions. Our inability to remain in compliance with local laws in a particular market and manage our relationships with regulators could have an adverse effect not only on our businesses in that market but also on our reputation generally. The failure to mitigate properly such risks or the failure of our operating infrastructure to support such international activities could result in operational failures and regulatory fines or sanctions, which could affect our business and results of operations adversely.

We actively strive to optimize our geographic footprint. This optimization may occur by establishing operations in lower-cost locations or by outsourcing to third-party vendors in various jurisdictions. These efforts expose us to the risk that we may not maintain service quality, control or effective management within these operations. In addition, we are exposed to the relevant macroeconomic, political, public health, and similar risks generally involved in doing business in those jurisdictions. The increased elements of risk that arise from conducting certain operating processes in some jurisdictions could lead to an increase in reputational risk. During periods of transition, greater operational risk and client concern exist with respect to maintaining a high level of service delivery.

In addition, we are subject in our global operations to rules and regulations relating to corrupt and illegal payments, money laundering, and laws that prohibit us from doing business with certain individuals, groups and countries, such as the U.S. Foreign Corrupt Practices Act, the USA PATRIOT Act, the UK Bribery Act, and economic sanctions and embargo programs administered by the U.S. Office of Foreign Assets Control and similar agencies worldwide. While we have invested and continue to invest significant resources in training and in compliance monitoring, the geographic diversity of our operations, employees, clients and customers, as well as the vendors and other third parties with whom we deal, presents the risk that we may be found in violation of such rules, regulations, laws or programs and any such violation could subject us to significant penalties or affect our reputation adversely.

Failure to control our costs and expenses adequately could affect our earnings negatively.

Our success in controlling the costs and expenses of our business operations also impacts operating results. Through various parts of our business strategy, we aim to produce efficiencies in operations that help reduce and control costs and expenses, including the costs of losses associated with operating risks attributable to servicing and managing financial assets. Increased expenses have affected—and a failure to control our costs and expenses in the future, whether as a result of inflation or otherwise, could affect—our earnings negatively.

Pandemics, natural disasters, global climate change, acts of terrorism, geopolitical tensions, and global conflicts may have a negative impact on our business and operations.

Pandemics, natural disasters, global climate change, acts of terrorism, geopolitical tensions, global conflicts (including the continuing military conflict between Ukraine and the Russian Federation, the conflict in the Middle East and tensions between the U.S. and China) or other similar events, as well as government actions or other restrictions in connection with such events, have had in the past, or may in the future have, a negative impact on our business and operations. While we have in place business continuity plans, such events may still damage our facilities, disrupt or delay the normal operations of our business (including communications and technology), result in harm to or cause travel limitations on our employees, impose significant compliance costs with new financial and economic sanctions regimes, and have a similar impact on our clients, suppliers, third-party vendors and counterparties. For example, in some jurisdictions such as the Russian Federation, local market restrictions, laws, sanctions programs or government intervention inhibit our clients' and our ability to access or transfer cash or securities held for clients through subcustodians and clearing agencies. When such client deposit liabilities are on our consolidated balance sheet, we maintain a corresponding amount of cash on deposit with the subcustodian or clearing agency, which increases our credit exposure to that entity and can accumulate over time based upon distributions on, or other activities related to, our clients' assets. If the subcustodian or clearing agency were to become insolvent in circumstances not involving expropriation of assets or other sovereign risk events and/or factors or

events beyond our reasonable control that excuse performance under force majeure or other contractual provisions, the risk of loss on such cash on deposit may potentially be incurred by us. As of December 31, 2024, we held cash that accumulates in relation to Russian securities with our subcustodian and/or clearing agencies for the benefit of certain clients in our Asset Servicing business which are subject to restrictions that inhibit our ability to access or transfer such deposits, and which amount is expected to increase significantly over time as long as the sanctions and other relevant restrictions remain in effect. Our subcustodian is also a subsidiary of a large, global financial institution with whom we have other credit exposures, which may limit the financial relationship we may have with this counterparty and has in the past made, and may in the future make, compliance with specific U.S. regulatory single counterparty credit limits more challenging.

The foregoing or similar events also could impact us negatively to the extent that they result in reduced capital markets activity, lower asset price levels, or disruptions in general economic activity in the U.S. or abroad, or in financial market settlement functions. In addition, these or similar events may impact economic growth negatively, which could have an adverse effect on our business and operations, and may have other adverse effects on us in ways that we are unable to predict. Please see “Strategic Risks” in this “Risk Factors” section for further description of risks associated with climate change.

Credit Risks

Failure to evaluate accurately the prospects for repayment when we extend credit or maintain an adequate allowance for credit losses can result in losses or the need to make additional provisions for credit losses, both of which reduce our earnings.

We evaluate extensions of credit before we make them and provide for credit risks based on our assessment of the credit losses inherent in our loan and securities portfolio, including undrawn credit commitments. This process requires us to make difficult and complex judgments, including forecasts of economic conditions through the life of these credit exposures. Challenges associated with our credit risk assessments include identifying the proper factors to be used in assessments and accurately estimating the impacts of those factors. Allowances that prove to be inadequate may require us to realize increased provisions for credit losses or write down the value of certain assets on our balance sheet, which result in losses and/or increased provisions for credit losses and in turn would affect earnings negatively.

Market volatility and/or weak economic conditions can result in losses or the need for additional provisions for credit losses, both of which reduce our earnings.

Credit risk levels and our earnings can be affected by market volatility and/or weakness in the economy in general and in the particular locales in which we extend credit, a deterioration in credit quality, or a reduced demand for credit. Adverse changes in the financial performance or condition of our borrowers resulting from market volatility, elevated interest rates, and/or weakened economic conditions could impact the borrowers’ abilities to repay outstanding loans, which could in turn impact our financial condition and results of operations negatively.

The failure or perceived weakness of any of our significant counterparties could expose us to loss.

The financial markets are characterized by extensive interconnections among financial institutions, including banks, broker-dealers, collective investment funds and insurance companies. As a result of these interconnections, we and many of our clients have counterparty exposure to other financial institutions. This counterparty exposure presents risks to us and to our clients because the failure or perceived weakness of any of our counterparties has the potential to expose us to risk of loss. Instability in the financial markets, or in certain countries where these counterparties are domiciled, has resulted historically in some financial institutions becoming less creditworthy. During such periods of instability, we are exposed to increased counterparty risks, both as principal and in our capacity as agent for our clients. Changes in market perception of the financial strength of particular financial institutions can occur rapidly, are often based upon a variety of factors and can be difficult to predict. In addition, the criteria for and manner of governmental support of financial institutions and other economically important sectors remain uncertain. Further, the consolidation of financial services firms and the failures of other financial institutions has in the past increased, and may in the future increase, the concentration of our counterparty risk. These risks are heightened by the fact that our operating model relies on the use of unaffiliated sub-custodians to a greater degree than certain of our competitors that have banking operations in more jurisdictions than we do. We are not able to mitigate all of our and our clients’ counterparty credit risk. If a significant individual counterparty defaults on an obligation to us, we could incur financial losses that have a material and adverse effect on our business, financial condition and results of operations.

Liquidity Risks

If we do not manage our liquidity effectively, our business could suffer.

Liquidity is essential for the operation of our business. Market conditions, unforeseen outflows of funds or other events could have a negative effect on our level or cost of funding, affecting our ongoing ability to accommodate liability maturities and deposit withdrawals, meet contractual obligations, and fund new business transactions at a reasonable cost and in a timely manner. If our access to stable and low-cost sources of funding, such as customer deposits, is reduced, we may need to use alternative funding, which could be more expensive or of limited availability. Further evolution in the regulatory requirements relating to liquidity and risk management also may impact us negatively. Additional regulations may impose more stringent liquidity requirements for large financial institutions, including the Corporation and the Bank. Given the overlap and complex interactions of these regulations with other regulatory changes, the full impact of the adopted and proposed regulations remains uncertain until their full implementation.

In addition, a significant portion of our business involves providing certain services to large, complex clients, which, by their nature, require substantial liquidity. Our failure to manage successfully the liquidity and balance sheet issues attendant to this portion of our business may have a negative impact on our ability to meet client needs and grow.

We also manage investment products that, while not obligations of ours, may be exposed to liquidity risks. These products, such as money market and other short-term investments provide clients a right to the return of cash or assets on limited notice. If clients demand a return of their cash or assets, particularly on limited notice, and these investment products do not have the liquidity to support those demands, we could be forced to sell investment securities held by these investment products at unfavorable prices potentially damaging our reputation with the investment community.

For more information on regulations and other regulatory changes relating to liquidity, see “Supervision and Regulation—Liquidity Standards” in Item 1, “Business.” Any substantial, unexpected or prolonged changes in the level or cost of liquidity could affect our business adversely.

If the Bank is unable to supply the Corporation with funds over time, the Corporation could be unable to meet its various obligations.

The Corporation is a legal entity separate and distinct from the Bank and the Corporation’s other subsidiaries. The Corporation relies in large part on dividends paid to it by the Bank to meet its obligations and to pay dividends to stockholders of the Corporation. There are various legal limitations on the extent to which the Bank and the Corporation’s other subsidiaries can supply funds to the Corporation by dividend or otherwise. Dividend payments by the Bank to the Corporation in the future will require continued generation of earnings by the Bank and could require regulatory approval under certain circumstances. For more information on dividend restrictions, see “Supervision and Regulation—Payment of Dividends” in Item 1, “Business.”

We may need to raise additional capital in the future, which may not be available to us or may only be available on unfavorable terms.

We may need to raise additional capital to provide sufficient resources to meet our business needs and commitments, to accommodate the transaction and cash management needs of our clients, to maintain our credit ratings in response to regulatory changes, including capital rules, or for other purposes. However, our ability to access the capital markets, if needed, will depend on a number of factors, including the state of the financial markets. Heightened interest rates, disruptions in financial markets, negative perceptions of our business or our financial strength, or other factors may impact our ability to raise additional capital, if needed, on terms favorable to us. For example, in the event of future turmoil in the banking industry or other idiosyncratic events, there is no guarantee that the U.S. government will invoke the systemic risk exception, create additional liquidity programs, or take any other action to stabilize the banking industry or provide liquidity. Any diminished ability to access short-term funding or capital markets to raise additional capital, if needed, could subject us to liability, restrict our ability to grow, require us to take actions that would affect our earnings negatively or otherwise affect our business and our ability to implement our business plan, capital plan and strategic goals adversely.

Any downgrades in our credit ratings, or an actual or perceived reduction in our financial strength, could affect our borrowing costs, capital costs and liquidity adversely.

Rating agencies publish credit ratings and outlooks on our creditworthiness and that of our obligations or securities, including long-term debt, short-term borrowings, preferred stock and other securities. Our credit ratings are subject to ongoing review by the rating agencies and thus may change from time to time based on the agencies’ evaluation of a number of factors, including our financial strength, performance, prospects and operations as well as factors not under our control, such as rating-agency-specific criteria or frameworks for our industry or certain security types, which are subject to revision from time to time, and conditions affecting the financial services industry generally.

Downgrades in our credit ratings may affect our borrowing costs, our capital costs and our ability to raise capital and, in turn, our liquidity adversely. A failure to maintain an acceptable credit rating also may preclude us from being competitive in certain products. Additionally, our counterparties, as well as our clients, rely on our financial strength and stability and evaluate the risks of doing business with us. If we experience diminished financial strength or stability, actual

or perceived, a decline in our stock price or a reduced credit rating, our counterparties may be less willing to enter into transactions, secured or unsecured, with us, our clients may reduce or place limits on the level of services we provide them or seek other service providers, or our prospective clients may select other service providers, all of which may have other adverse effects on our business.

The risk that we may be perceived as less creditworthy relative to other market participants is higher in a market environment in which the consolidation, and in some instances failure, of financial institutions, including major global financial institutions, could result in a smaller number of larger counterparties and competitors. If our counterparties perceive us to be a less viable counterparty, our ability to enter into financial transactions on terms acceptable to us or our clients, on our or our clients' behalf, will be compromised materially. If our clients reduce their deposits with us or select other service providers for all or a portion of the services we provide to them, our revenues will decrease accordingly.

Regulatory and Legal Risks

Failure to comply with regulations and/or supervisory expectations could result in penalties and regulatory constraints that restrict our ability to grow or even conduct our business, or that reduce earnings.

Virtually every aspect of our business in the United States and around the world is regulated by domestic and foreign governmental agencies that have broad supervisory powers and the ability to impose sanctions. These regulations cover a variety of matters, including prohibited activities, required capital levels, resolution planning, human trafficking and modern slavery, and data privacy and security. Some of these requirements are directed specifically at protecting depositors of the Bank, the U.S. DIF and the banking system as a whole. Regulatory violations or the failure to meet formal or informal commitments made to regulators could generate penalties, require corrective actions that increase costs of conducting business, result in limitations on our ability to conduct business, restrict our ability to expand or impact our reputation adversely. Failure to obtain necessary approvals from regulatory agencies, whether formal or based upon supervisory expectations, on a timely basis could affect proposed business opportunities and results of operations adversely. Similarly, changes in laws or failure to comply with new requirements or with future changes in laws or regulations could impact our results of operations and financial condition negatively.

We are subject to extensive and evolving government regulation and supervision that impacts our operations. Changes by the U.S. and other governments to laws, regulations and policies applicable to the financial services industry could heighten the challenges we face and make regulatory compliance more difficult and costly.

We operate in a highly regulated environment, and are subject to a comprehensive statutory and regulatory regime affecting all aspects of our business and operations, including oversight by governmental agencies both inside and outside the United States. Various regulatory bodies have demonstrated heightened scrutiny of financial institutions through many regulatory initiatives. These initiatives have increased compliance costs and regulatory risks and may lead to financial and reputational damage in the event of a compliance violation, even if the failure to comply was inadvertent or reflected a difference in interpretation. Although we have programs in place, including policies, training and various forms of monitoring, designed to ensure compliance with legislative and regulatory requirements, we cannot provide assurance that these programs and policies are or will be adequate to identify and manage internal and external compliance risks. For example, our business may be adversely impacted by actual or alleged misconduct by an employee or other negative outcomes caused by human error. In addition, changes to statutes, regulations or regulatory and supervisory policies or their interpretation or implementation and the continued heightening of regulatory and supervisory requirements could affect us in substantial and unpredictable ways. For example, governments and regulators could take actions that increase intervention in the normal operation of our businesses and the businesses of our competitors in the financial services industry, and these likely would involve additional legislative and regulatory requirements imposed on banks and other financial services companies. Any such actions could increase compliance costs and regulatory risks, lead to financial and reputational damage in the event of a violation, affect our ability to compete successfully or limit how we conduct our business, and also could impact the nature and level of competition in the industry in unpredictable ways. The full scope and impact of possible legislative or regulatory changes and the extent of regulatory activity is uncertain and difficult to predict. For example, given the current rapid pace of change, we are unable to predict what, if any, changes to the laws and regulations applicable to the financial services industry may be enacted by the new U.S. Congress in conjunction with the new U.S. presidential administration under unified party control, and what the impact of any such changes will be upon our business, financial condition, and results of operations. We expect the current U.S. presidential administration will seek to implement a regulatory reform agenda that is significantly different than that of the prior administration, impacting the rulemaking, supervision, examination and enforcement priorities of the federal banking agencies. Moreover, the turnover of the U.S. presidential administration is expected to result in certain changes in the leadership and senior staffs of the federal banking agencies which are likely to impact the rulemaking, supervision, examination and enforcement priorities and policies of such agencies, the potential impacts of which, if any, we cannot predict at this time.

Further, the regulatory framework for AI and similar technologies, and automated decision making, is changing rapidly. It is possible that new laws and regulations will be adopted in the U.S. and in non-U.S. jurisdictions, or that existing laws and regulations may be interpreted, in ways that would affect the operation of our products and services and the way in which we use AI and similar technologies. For more information on regulations regarding AI, see “Supervision and Regulation” in Item 1, “Business.”

The evolving regulatory and supervisory environment and uncertainty about the timing and scope of future laws, regulations and policies may contribute to decisions we may make to suspend, reduce or withdraw from existing businesses, activities or initiatives, which may result in potential lost revenue or significant restructuring or related costs or exposures. We also face the risk of becoming subject to new or more stringent requirements in connection with the introduction of new regulations or modification of existing regulations, which could require us to hold more capital or liquidity or have other adverse effects on our businesses or profitability. For example, proposed changes to applicable capital and liquidity requirements, such as the Basel III Endgame Proposal and the long-term debt proposal, could result in increased expenses or cost of funding, which could negatively affect our financial results or our ability to pay dividends and engage in share repurchases. For more information concerning our legal and regulatory obligations with respect to Basel III and long-term debt requirements, see “Supervision and Regulation” in Item 1, “Business.”

In addition, regulatory responses in connection with severe market downturns or unforeseen stress events could alter or disrupt our planned future strategies and actions. Adverse developments affecting the overall strength and soundness of other financial institutions, the financial services industry as a whole and the general economic climate and the U.S. Treasury market could have a negative impact on perceptions about the strength and soundness of our business even if we are not subject to the same adverse developments. For example, during 2023, the FDIC took control and was appointed receiver of Silicon Valley Bank, Signature Bank, and First Republic Bank. The failure of other banks and financial institutions and the measures taken by governments and regulators in response to these events could adversely impact our business, financial condition and results of operations.

We are subject to complex and evolving laws, regulations, rules, standards and contractual obligations regarding data privacy and security, which could increase the cost of doing business, compliance risks and potential liability.

We are subject to complex and evolving laws, regulations, rules, standards and contractual obligations governing data privacy and security, which may differ and potentially conflict, in various jurisdictions, and any failure to comply with these laws, regulations, rules, standards and contractual obligations could expose us to liability and/or reputational damage. Regulators globally are introducing the potential for greater monetary fines on institutions that suffer from breaches leading to the loss, misappropriation or unauthorized access, use or disclosure of personal, confidential, proprietary or sensitive information. Most U.S. states, the EU and other non-U.S. jurisdictions also have adopted their own statutes and/or regulations concerning data privacy and security and notification of data breaches. These and other changes in laws or regulations associated with the enhanced protection of personal and other types of information could greatly increase compliance costs, the size of potential fines related to the protection of such information and reporting obligations in the case of cyber-attacks or other information security incidents. Compliance with these laws, regulations, rules and standards may require us to change and continuously update our policies, procedures and technology controls for information security, which could, among other things, make us more vulnerable to operational failures and to monetary penalties for breach of such laws, regulations, rules and standards.

In the U.S., there are numerous federal, state and local data privacy and security laws and regulations governing the collection, sharing, use, retention, disclosure, security, storage, transfer and other processing of personal information. At the federal level, we are subject to, among other laws and regulations, the rules and regulations promulgated under the authority of the Federal Trade Commission and the Gramm-Leach-Bliley Act. Moreover, the U.S. Congress has considered, and may in the future consider, various proposals for more comprehensive data privacy and security legislation, to which we may be subject if enacted. At the state level, we are subject to laws and regulations such as the CCPA. Numerous other states also have enacted, or are in the process of enacting or considering, comprehensive state-level data privacy and security laws and regulations that share similarities with the CCPA. Moreover, laws in all 50 U.S. states require businesses to provide notice under certain circumstances to consumers whose personal information has been disclosed as a result of a data breach.

At the international level, we are subject to the GDPR and UK GDPR and similar laws are in effect or being considered in other jurisdictions in which we operate across the globe. While the GDPR and the UK GDPR remain substantially similar for the time being, the UK government has announced that it would seek to chart its own path on data protection and reform its relevant laws, including in ways that may differ from the GDPR, to an extent. Legal developments in the EEA and the UK also have created complexity and uncertainty regarding processing and transfers of personal data from the EEA and the UK to the U.S. and other so-called third countries outside the EEA and the UK that have not been determined by the relevant data protection authorities to provide an adequate level of protection for privacy rights. Importantly, significant monetary fines have been imposed since the introduction of such stringent privacy laws in

the EU and the UK and regulatory expectations of governance and accountability with respect to the protection of personal, proprietary, confidential and sensitive information continue to expand and evolve.

Further, while we strive to publish and prominently display privacy notices and policies that are accurate, comprehensive, and compliant with applicable laws, regulations, rules and industry standards, we cannot ensure that our privacy policies and other statements regarding our practices will be considered sufficient to protect us from claims, proceedings, liability or adverse publicity relating to data privacy and security, considering the fast-evolving regulatory landscape. Although we endeavor to comply with our privacy policies, we may at times fail to do so or be alleged to have failed to do so. The publication of our privacy policies and other documentation that provide promises and assurances about data privacy and security can subject us to potential government or legal action if they are found to be deceptive, unfair, or misrepresentative of our actual practices. Any concerns about our data privacy and security practices, even if unfounded, could damage our reputation and adversely affect our business.

Any failure or perceived failure by us to comply with our privacy policies, or applicable data privacy and security laws, regulations, rules, standards or contractual obligations, or any compromise of security that results in unauthorized access to, or unauthorized loss, destruction, use, modification, acquisition, disclosure, release or transfer of personal information, may result in requirements to modify or cease certain operations or practices, the expenditure of substantial costs, time and other resources, proceedings or actions against us, legal liability, governmental investigations, enforcement actions, claims, fines, judgments, awards, penalties, sanctions and costly litigation (including class actions). Any of the foregoing could harm our reputation, distract our management and technical personnel, increase our costs of doing business, adversely affect the demand for our products and services, and ultimately result in the imposition of liability, any of which could have a material adverse effect on our business, financial condition and results of operations.

We may be impacted adversely by claims or litigation, including claims or litigation relating to our fiduciary responsibilities.

Our businesses involve the risk that clients or others may sue us, claiming that we or third parties for whom they say we are responsible have failed to perform under a contract or otherwise failed to carry out a duty perceived to be owed to them. Our trust, custody and investment management businesses are particularly subject to this risk. This risk is heightened when we act as a fiduciary for our clients and may be further heightened during periods when credit, equity or other financial markets are deteriorating in value or are particularly volatile, or when clients or investors are experiencing losses. In addition, regulators, tax authorities and courts have increasingly sought to hold financial institutions liable for the misconduct of their clients where such regulators and courts have determined that the financial institution should have detected that the client was engaged in wrongdoing, even though the financial institution had no direct knowledge of the wrongdoing.

Claims made or actions brought against us, whether founded or unfounded, may result in lawsuits, injunctions, settlements, damages, fines or penalties, which could have a material adverse effect on our financial condition or results of operations or require changes to our business. Even if we defend ourselves successfully, litigation often is costly and time-consuming and requires significant attention from our management, and public reports regarding claims made against us may cause damage to our reputation among existing and prospective clients or negatively impact the confidence of counterparties, rating agencies and stockholders, consequently affecting our earnings negatively.

We may be impacted adversely by supervisory and/or regulatory enforcement matters.

In the ordinary course of our business, we are subject to various governmental enforcement inquiries, supervisory examinations, investigations and subpoenas. These may be directed generally to participants in the businesses in which we are involved or may be directed specifically at us. In conjunction with both supervisory and enforcement matters, we may face limits on our ability to conduct or expand our business, be required to implement corrective actions that increase the costs of conducting business, or become subject to civil or criminal penalties or other remedial sanctions, any of which could result in reputational damage or otherwise have an adverse impact on us.

The complexity of the federal and state regulatory, supervisory and enforcement regimes in the U.S., coupled with the global scope of our operations and the increased aggressiveness of the tax and regulatory environment worldwide, also means that a single event may give risk to a large number of overlapping investigations and regulatory proceedings, either by multiple agencies in the U.S. or by multiple regulators and other governmental entities or tax authorities in different jurisdictions. Responding to inquiries, investigations, and proceedings, regardless of the outcome of the matter, is time consuming and expensive and can divert the attention of our senior management from our business. The outcome of such proceedings may be difficult to predict or estimate until late in the proceedings, which may last a number of years.

The number of regulatory and governmental investigations and proceedings, as well as the amount of penalties and fines sought, has remained elevated for many firms in the financial services industry. The Corporation and other financial institutions have become subject to increased scrutiny, more intense supervision and regulation, and a higher risk of enforcement action, which we expect to continue. For example, the failures in 2023 of Silicon Valley Bank, Signature Bank, and First Republic Bank and the regulatory investigations into these failures resulted in increased regulatory scrutiny

and heightened supervisory expectations of these banks, which could require us to expend significant time and effort to implement enhanced compliance procedures or to incur other expenses. Any such heightened enforcement activity or new regulations could have a material adverse effect on our business, financial condition and results of operations.

We may fail to set aside adequate reserves for, or otherwise underestimate our liability relating to, pending and threatened claims, with a negative effect on our earnings.

We estimate our potential liability for pending and threatened claims and record reserves when appropriate pursuant to generally accepted accounting principles (GAAP). The process is inherently subject to risk, including the risks that a judge or jury could decide a case contrary to our evaluation of the law or the facts or that a court could change or modify existing law on a particular issue important to the case. Our earnings will be adversely affected if our reserves are not adequate.

The ultimate impact on us of regulatory divergence between the United Kingdom and the European Union remains uncertain.

While regulatory standards remain largely aligned following the UK's withdrawal from the EU, commonly referred to as "Brexit," it is possible that future divergence may occur between the UK and EU; therefore, the final impact remains uncertain. In December 2020, the UK and the EU agreed on a trade and cooperation agreement that entered into force on May 1, 2021. While the trade and cooperation agreement covers the general objectives and framework of the relationship between the UK and the EU, it generally does not address the regulation of financial services. Instead, in March 2021, the UK and the EU agreed upon a framework for voluntary regulatory cooperation and dialogue on financial services issues between the parties in a memorandum of understanding, which was signed on June 27, 2023.

Since the UK's withdrawal from the EU on December 31, 2020, the UK government has embarked on a program of significant regulatory reform. In particular, the Financial Services and Markets Act 2023 contains provisions that will eventually repeal all EU rules and regulations relating to financial services that were incorporated into UK law following Brexit. The UK government and the UK financial services regulatory authorities has been consulting on a number of measures that will replace the current EU-based rules and regulations with measures that reflect the particular needs of the UK market and policy objectives of the UK's regulatory authorities. Consequently, over time it is likely that the rules and regulations relating to financial services will diverge, which may result in additional compliance costs for our UK and EU businesses.

If we fail to comply with legal standards, we could incur liability to our clients or lose clients, which could affect our earnings negatively.

Managing or servicing assets with reasonable prudence in accordance with the terms of governing documents and applicable laws is an important part of our business. Failure to comply with the terms of governing documents and applicable laws, manage adequately the risks or manage appropriately the differing interests often involved in the exercise of fiduciary responsibilities may subject us to liability or cause client dissatisfaction, which could impact negatively our earnings and growth.

Strategic Risks

If we are not able to attract, retain and motivate personnel, our business could be negatively affected.

Our success depends, in large part, on our ability to attract new employees, retain and motivate our existing employees, and continue to compensate our employees competitively. Competition for the best employees in most activities in which we engage can be intense, and there can be no assurance that we will be successful in our efforts to recruit and retain necessary personnel. Factors that affect our ability to attract and retain talented employees include our compensation and benefits programs, our profitability and our reputation for rewarding and promoting qualified employees. Our ability to attract and retain key executives and other employees may be hindered as a result of existing and potential regulations applicable to incentive compensation and other aspects of our compensation programs. These laws and regulations may not apply in the same manner to all financial institutions and other companies, which therefore may subject us to more restrictions than other institutions and companies with which we compete for talent and may also hinder our ability to compete for talent with other industries. In addition, our current or future approach to in-office and remote work arrangements may not meet the needs or expectations of our current or prospective employees, may not be perceived as favorable as compared to the arrangements offered by competitors and may not be conducive to a collaborative working environment, which could adversely affect our ability to attract, retain and motivate employees. The unexpected loss of services of necessary personnel, both in businesses and corporate functions, could have a material adverse impact on our business because of their skills; knowledge of our markets, operations and clients; years of industry experience; and, in some cases, the difficulty of promptly finding qualified replacement personnel. Similarly, the loss of necessary employees, either individually or as a group, could affect our clients' perception of our abilities adversely. A competitive labor market may also have the effect of heightening many of these risks.

If we do not develop and execute strategic plans successfully, our growth may be impacted negatively.

Our growth depends upon successful, consistent development and execution of our business strategies. A failure to develop and execute these strategies may impact growth negatively. A failure to grow organically or to integrate successfully an acquisition could have an adverse effect on our business. The challenges arising from the integration of an acquired business may include preserving valuable relationships with employees, clients, suppliers and other business partners, delivering enhanced products and services, as well as combining accounting, data processing and internal control systems. To the extent we enter into transactions to acquire complementary businesses and/or technologies, we may not achieve the expected benefits of such transactions, which could result in increased costs, lowered revenues, ineffective deployment of capital, regulatory concerns, exit costs or diminished competitive position or reputation. These risks may be increased if the acquired company operates internationally or in a geographic location where we do not already have significant business operations.

Execution of our business strategies also may require certain regulatory approvals or consents, which may include approvals of the Federal Reserve Board and other domestic and non-U.S. regulatory authorities. These regulatory authorities have the ability to impose conditions on the activities or transactions contemplated by our business strategies which may impact negatively our ability to realize fully the expected benefits of certain opportunities. Further, acquisitions we announce may not be completed, or completed in the time frame anticipated, if we do not receive the required regulatory approvals, if regulatory approvals are significantly delayed or if other closing conditions are not satisfied.

We are subject to intense competition in all aspects of our businesses, which could have a negative effect on our ability to maintain satisfactory prices and grow our earnings.

We provide a broad range of financial products and services in highly competitive markets. We compete against large, well-capitalized, and geographically diverse companies that are capable of offering a wide array of financial products and services at competitive prices. In certain businesses, such as foreign exchange trading, electronic networks present a competitive challenge. Additionally, technological advances (such as the use of generative AI) and the growth of internet-based commerce have made it possible for other types of institutions to offer a variety of products and services competitive with certain areas of our business. Many of these nontraditional service providers have fewer regulatory constraints and some have lower cost structures. The same may be said for competitors based in non-U.S. jurisdictions, where legal and regulatory environments may be more favorable than those applicable to the Corporation and the Bank as U.S.-domiciled financial institutions. These competitive pressures may have a negative effect on our earnings and ability to grow. Pricing pressures, as a result of the willingness of competitors to offer comparable or improved products or services at a lower price, also may result in a reduction in the price we can charge for our products and services, which could have, and in some cases has had, a negative effect on our ability to maintain or increase our profitability.

Damage to our reputation could have a direct and negative effect on our ability to compete, grow and generate revenue.

Our ability to compete effectively, to attract and retain clients and employees, and to grow our business is dependent on maintaining our reputation. Damage to our reputation can therefore cause significant harm to our business and prospects, and can arise from various sources, including, among others, the failure or perceived failure to meet or appropriately address client expectations or fiduciary or other obligations; operational failures; legal and regulatory requirements; potential conflicts of interest; data privacy and security; social and sustainability concerns related to our business activities; or any other of the risks discussed in this Item 1A. Additionally, the actual or alleged actions of our affiliates, vendors or other third parties with which we do business, the actual or alleged actions or statements of our employees or adverse publicity could negatively impact our reputation and significantly harm our business prospects. Damage to our reputation for delivery of a high level of service could undermine the confidence of clients and prospects in our ability to serve them and accordingly affect our earnings negatively. Damage to our reputation also could affect the confidence of rating agencies, regulators, stockholders and other parties in a wide range of transactions that are important to our business and the performance of our common stock. Failure to maintain our reputation ultimately could have an adverse effect on our ability to manage our balance sheet or grow our business. Actions by the financial services industry generally or by other members of or individuals in the financial services industry also could impact our reputation negatively or lead to a general loss of confidence in, or impact market perception of, financial institutions that could negatively affect us.

Our reputation may be significantly damaged by adverse publicity or negative information regarding the Corporation and the Bank, whether true or not, that may be published or broadcast by the media or posted on social media, non-mainstream news services or other parts of the internet. The proliferation of social media channels utilized by us and third parties, as well as the personal use of social media by our employees and others, may increase the risk of negative publicity, including through the rapid dissemination of inaccurate, misleading or false information, which could harm our reputation or have other negative consequences. Furthermore, ESG-related issues have been the subject of increased focus by regulators and stakeholders, including outside the U.S., and particularly in Europe. Any inability to meet applicable requirements or expectations, including those from conflicting U.S. and non-U.S. global expectations, may adversely impact our reputation. Additionally, various stakeholders have divergent views on ESG-related matters, including in the

countries in which we operate and invest, as well as states and localities where we serve public sector clients. In the case of proxy voting, there is the inherent risk of misalignment between the proxy votes we cast on behalf of clients and all of our clients' values and preferences. This divergence increases the risk that any action or lack thereof by us on such matters will be perceived negatively by some stakeholders and could adversely impact our reputation and business.

We need to invest in innovation constantly, and the inability or failure to do so may affect our businesses and earnings negatively.

Our success in the competitive environment in which we operate requires consistent investment of capital and human resources in innovation, particularly in light of the current "FinTech" environment, in which the financial services industry is undergoing rapid technological changes and financial institutions are investing significantly in evaluating new technologies, such as AI, machine learning, blockchain and other distributed ledger technologies, and developing potentially industry-changing new products, services and industry standards. Our investment is directed at generating new products and services, and adapting existing products and services to the evolving standards and demands of the marketplace. Among other things, investing in innovation helps us maintain a mix of products and services that keeps pace with our competitors and achieve acceptable margins. Our investment also focuses on enhancing the delivery of our products and services in order to compete successfully for new clients or gain additional business from existing clients. Effectively identifying gaps or weaknesses in our product offerings is important to our success. Failure to keep pace with our competition in any of these areas could affect our business opportunities, growth and earnings adversely. There are substantial risks and uncertainties associated with innovation efforts, including an increased risk that new and emerging technologies may expose us to increased data privacy and security and other information technology threats. We must invest significant time and resources in developing and marketing new products and services, and expected timetables for the introduction and development of new products or services may not be achieved and price and profitability targets may not be met. Further, our revenues and costs may fluctuate because new products and services generally require start-up costs while corresponding revenues take time to develop or may not develop at all.

Failure to understand or appreciate fully the risks associated with development or delivery of new product and service offerings may affect our businesses and earnings negatively.

The success of our innovation efforts depends, in part, on the successful implementation of new product and service initiatives. Not only must we keep pace with competitors in the development of these new offerings, but we must accurately price them (as well as existing products) on a risk-adjusted basis and deliver them to clients effectively. Our identification of risks arising from new products and services, both in their design and implementation, and effective responses to those identified risks, including pricing, is key to the success of our efforts at innovation and investment in new product and service offerings.

Our success with large, complex clients requires an understanding of the market and legal, regulatory and accounting standards in various jurisdictions.

A significant portion of our business involves providing certain services to large, complex clients which requires an understanding of the market and legal, regulatory and accounting standards in various jurisdictions. Any failure to understand, address or comply with those standards appropriately could affect our growth prospects or affect our reputation negatively. We identify and manage risk through our business strategies and plans and our risk management practices and controls. If we fail to identify and manage significant risks successfully, we could incur financial loss, suffer damage to our reputation that could restrict our ability to grow or conduct business profitably, or become subject to regulatory penalties or constraints that could limit some of our activities or make them significantly more expensive. In addition, our businesses and the markets in which we operate are continuously evolving. We may fail to understand fully the implications of changes in legal or regulatory requirements, our businesses or the financial markets or fail to enhance our risk framework to address those changes in a timely fashion. If our risk framework is ineffective, either because it fails to keep pace with changes in the financial markets, legal and regulatory requirements, our businesses, our counterparties, clients or service providers or for other reasons, we could incur losses, suffer reputational damage or find ourselves out of compliance with applicable regulatory or contractual mandates or expectations. These risks are magnified as client requirements become more complex and as our increasingly global business requires end-to-end management of operational and other processes across multiple time zones and many inter-related products and services.

We may take actions to maintain client satisfaction that could result in losses or reduced earnings.

We may take action or incur expenses in order to maintain client satisfaction or preserve the usefulness of investments or investment vehicles we manage in light of changes in security ratings, liquidity or valuation issues or other developments, even though we are not required to do so by law or the terms of governing instruments. The risk that we will decide to take actions to maintain client satisfaction that result in losses or reduced earnings is greater in periods when credit or equity markets are deteriorating in value or are particularly volatile and liquidity in markets is disrupted.

Our operations, businesses and clients could be materially adversely affected by the effects of climate change or concerns related thereto.

Risks related to climate change could impact our business, financial condition, and results of operations adversely. The physical risks of climate change include harm to people and property arising from acute climate-related events, such as floods, hurricanes, heatwaves, droughts and wildfires, and chronic, longer-term shifts in climate patterns, such as rising average global temperatures, rising sea levels, and an increase in the frequency and severity of extreme weather events and natural disasters. Such developments could disrupt our operations and resilience capabilities, those of our clients, or third parties on which we rely. Further, the consequences of climate change could negatively impact our clients' ability to pay outstanding loans, reduce the value of collateral, or result in insurance shortfalls.

Climate change could also result in transition risk arising from changes in policy, regulations, technology, business practices or market preferences toward a lower-carbon economy. While these changes could create opportunities, they could also adversely impact us or our clients. These impacts could result in increased operational or compliance costs, higher energy expenses, additional taxes, and the devaluation of assets.

Our reputation and business prospects may also be damaged if we do not, or are perceived not to, effectively prepare for the potential business and operational opportunities and risks associated with climate change. This includes the development and marketing of effective and competitive new products, objectively understanding how climate changes might impact the financial performance of direct and indirect client investments, and other services designed to address our clients' climate related needs. We also face regulatory and liability risk associated with not meeting regulatory expectations on climate risks, greenwashing claims, a failure to execute on our public climate-related commitments, or by association with individuals, entities, industries or products that may be inconsistent with our stated positions on climate change issues. At the same time, certain financial institutions have also been subject to external scrutiny from regulatory agencies, government officials, and others. This can be in relation to a number of climate change areas and can lead to negative publicity and reputational damage. For example, questions on how the impacts of climate change are being reflected in business and investment decisions and the decision to reduce involvement in certain industries or projects associated with climate change. Due to the divergent views of stakeholders, we are at increased risk that any action, or lack thereof, by us concerning our response to climate change will be perceived negatively by some stakeholders, which could adversely impact our reputation and business. If we do not identify, quantify, and mitigate such risks successfully, we may experience financial losses, litigation, reputational harm, and losses of investor and stakeholder confidence.

Even as regulators begin to mandate additional disclosure of climate-related information by companies across sectors, methodologies and data used to conduct more robust climate-related risk analyses are still in development. Third-party exposures, emissions, climate-related risks, and other data are limited in availability and variable in quality. Modeling capabilities across the industry to analyze climate-related risks and interconnections are improving but remain imperfect. These legislative and regulatory uncertainties along with inconsistencies and conflicts of policy across jurisdictions, and changes regarding climate-related risk management and disclosures are likely to result in higher regulatory, compliance, credit, reputational and other risks and costs.

Other Risks

The systems and models we employ to analyze, monitor and mitigate risks, as well as for other business purposes, are inherently limited, may not be effective in all cases and, in any case, cannot eliminate all risks that we face.

We use various systems and models, including AI-powered solutions, in analyzing and monitoring several risk categories, as well as for other business purposes. While we assess and improve these systems and models on an ongoing basis, there can be no assurance that they, along with other related controls, will effectively mitigate risk under all circumstances, or that they will adequately mitigate any risk or loss to us. As with any systems and models, there are inherent limitations because they involve techniques and judgments that cannot anticipate every economic and financial outcome in the markets in which we operate, nor can they anticipate the specifics and timing of such outcomes. Further, these systems and models may fail to quantify accurately the magnitude of the risks we face or they may not be effective against all types of risk, including risks that are unidentified or unanticipated. Our measurement methodologies rely on many assumptions and historical analyses and correlations. These assumptions may be incorrect, and the historical correlations on which we rely may not continue to be relevant. Models based on historical data sets might not be accurate predictors of future outcomes and their ability to appropriately predict future outcomes may degrade over time due to limited historical patterns, extreme or unanticipated market movements or customer behavior and liquidity, especially during severe market downturns or stress events (e.g., geopolitical events or pandemics). Consequently, the measurements that we make may not adequately capture or express the true risk profiles of our businesses or provide accurate data for other business purposes, each of which ultimately could have a negative impact on our business, financial condition and results of operations. Errors in the underlying model or model assumptions, or inadequate model assumptions, could result in unanticipated and adverse consequences, including material loss or noncompliance with regulatory requirements or expectations. In addition, the use of generative AI, a relatively new and emerging technology in the early stages of commercial use, exposes us to additional risks, such as damage to our reputation, competitive position, and business, legal and regulatory risks and additional costs.

For example, generative AI has been known to produce false or “hallucinatory” inferences or output, and certain generative AI uses machine learning and predictive analytics, which can create inaccurate, incomplete, or misleading content, unintended biases, and other discriminatory or unexpected results, errors or inadequacies, any of which may not be easily detectable. Additionally, to the extent that we do not have sufficient rights to use the data or other material or content used in or produced by the AI tools used in our business, or if we experience cybersecurity incidents in connection with our use of AI, it could adversely affect our reputation and expose us to legal liability or regulatory risk, including with respect to third-party intellectual property, privacy, data protection and cybersecurity, publicity, contractual or other rights. Further, our competitors or other third parties may incorporate AI into their products more quickly or more successfully than us, which could impair our ability to compete effectively. As the utilization of AI becomes more prevalent, we anticipate that it will continue to present new or unanticipated ethical, reputational, technical, operational, legal, competitive, and regulatory issues, among others. As a result, the challenges presented with our use of AI could adversely affect our business, financial condition, and results of operations.

Changes in tax laws and interpretations and challenges to our tax positions could affect our earnings negatively.

Both U.S. and non-U.S. governments and tax authorities, including states and municipalities, from time to time issue new, or modify existing, tax laws and regulations. These authorities may also issue new, or modify existing, interpretations of those laws and regulations. These new laws, regulations or interpretations, and our actions taken in response to, or reliance upon, such changes in the tax laws may impact our tax position in a manner that affects our earnings negatively.

We are sometimes subject to challenges from U.S. and non-U.S. tax authorities, including states and municipalities, regarding the amount of taxes due. These challenges may result in adjustments to the timing or amount of taxable income, deductions, tax credits, or the allocation of income among tax jurisdictions, all of which could require a greater provision for taxes or otherwise affect earnings negatively.

Changes in accounting standards may be difficult to predict and could have a material impact on our consolidated financial statements.

New accounting standards, changes to existing accounting standards, or changes in the interpretation of existing accounting standards by the Financial Accounting Standards Board, the SEC or bank regulatory agencies, or otherwise reflected in GAAP, potentially could have a material impact on our financial condition and results of operations. These changes are difficult to predict and in some cases we could be required to apply a new or revised standard retroactively, resulting in the revised treatment of certain transactions or activities, or even the restatement of consolidated financial statements for prior periods.

Our ability to return capital to stockholders is subject to the discretion of our Board of Directors and may be limited by U.S. banking laws and regulations, applicable provisions of Delaware law, or our failure to pay full and timely dividends on our preferred stock and the terms of our outstanding debt.

Holders of our common stock are entitled to receive only such dividends and other distributions of capital as our Board of Directors may declare out of funds legally available for such payments under Delaware law. Although we have declared cash dividends on shares of our common stock historically, we are not required to do so. In addition to the approval of our Board of Directors, our ability to take certain actions, including our ability to pay dividends, repurchase stock, and make other capital distributions, is dependent upon, among other things, their payment being made in accordance with the capital rules and capital adequacy standards of the Federal Reserve Board.

A significant source of funds for the Corporation is dividends from the Bank. As a result, our ability to pay dividends on the Corporation’s common stock will depend in large part on the ability of the Bank to pay dividends to the Corporation. There are various legal limitations on the extent to which the Bank and the Corporation’s other subsidiaries can supply funds to the Corporation by dividend or otherwise. Dividend payments by the Bank to the Corporation in the future will require continued generation of earnings by the Bank and could require regulatory approval under certain circumstances. If the Bank is unable to pay dividends to the Corporation in the future, our ability to pay dividends on the Corporation’s common stock would be affected adversely.

Our ability to declare or pay dividends on, or purchase, redeem or otherwise acquire, shares of our common stock or any of our shares that rank junior to our preferred stock as to the payment of dividends and/or the distribution of any assets on any liquidation, dissolution or winding-up of the Corporation also generally will be prohibited in the event that we do not declare and pay in full dividends on our Series D Non-Cumulative Perpetual Preferred Stock (Series D Preferred Stock) and Series E Non-Cumulative Perpetual Preferred Stock (Series E Preferred Stock). Further, in the future if we default on certain of our outstanding debt we will be prohibited from making dividend payments on our common stock until such payments have been brought current.

Any reduction or elimination of our common stock dividend, or even our failure to maintain the common stock dividend level in a manner comparable to our competitors, likely would have a negative effect on the market price of our common stock. For more information on dividend restrictions, see “Supervision and Regulation—Payment of Dividends” and “Supervision and Regulation—Capital Planning and Stress Testing” in Item 1, “Business.”

Additionally, on October 19, 2021, we announced that our Board authorized a share repurchase program to repurchase up to 25.0 million shares of the Corporation's outstanding common stock with a capacity of 10,948,828 shares remaining under the plan as of December 31, 2024. The Corporation retains the ability to repurchase when circumstances warrant and applicable regulation permits. The Inflation Reduction Act of 2022, imposes a 1% excise tax on the fair market value of stock repurchases after December 31, 2022. There have been proposals to significantly increase this excise tax rate. Any such material increases may impact our future strategies relating to the return of capital to our shareholders, including the size of, or execution against, current or future repurchase programs related to shares of our common stock.

ITEM 1B – UNRESOLVED STAFF COMMENTS

None.

ITEM 1C – CYBERSECURITY

Risk management and strategy

Northern Trust understands the importance of managing cybersecurity risk to ensure the safety and security of our data, network and systems. Our cybersecurity program is regularly assessed by Audit Services through various assurance activities, with the results reported to the Audit Committee of the Board of Directors (Audit Committee), and by the Non-Financial Risk team, with the results reported to the Business Risk Committee of the Board of Directors (Business Risk Committee). Northern Trust also operates a global security operations center for threat identification and response. The center aggregates security threat information from systems and platforms across the business and alerts the organization in accordance with its documented Cybersecurity Incident Response Plan. In addition to the cybersecurity controls managed and monitored within the organization, Northern Trust uses external third-party security teams on a regular basis to assess the effectiveness of our cybersecurity program and controls. These teams perform program maturity assessments, penetration tests, security assessments, and reviews of Northern Trust's vulnerability to cyber-attacks. Annually, certain elements of the cybersecurity program are subject to an audit by an independent consultant, as well as an assessment by a separate, independent third party, the results of which, including opportunities identified for improvement and related remediation plans, are reviewed with the Board. Our cybersecurity program is also examined regularly by the Corporation's prudential and conduct regulators within the scope of their jurisdiction.

The Cybersecurity Incident Response Plan was developed to respond to cybersecurity incidents. A cybersecurity incident starts with malicious intent and can include, but is not limited to, disruptions of service, denials-of-service, compromises of information systems, data exfiltration or data corruption. The plan provides a streamlined approach that includes enterprise-level response plans. The plans can be invoked rapidly to address matters that raise enterprise concern and to communicate impact, actions, and status to senior management, including the Chief Information Security Officer (CISO), and appropriate stakeholders, including escalation to appropriate Board-level governance committees, and is reviewed, tested, and updated regularly.

Northern Trust's disclosure procedures and controls also address cybersecurity incidents and include elements to ensure an analysis of potential disclosure obligations arising from any such incidents. Northern Trust maintains compliance programs to address the applicability of restrictions on securities trading while in possession of material, nonpublic information, including instances in which such information may relate to cybersecurity incidents.

Northern Trust also maintains a comprehensive Information and Cyber Security Training and Awareness practice providing baseline and targeted education and awareness for employees and contractors. This program includes at least one required annual online training class for all employees and contractors, supplemental refresher training throughout the year, targeted training based on roles and risk levels, multiple simulated phishing and vishing attacks with associated training, the distribution of regular cybersecurity awareness materials, and the designation of individuals as Information Security and Privacy champions within the businesses.

Governance

The Business Risk Committee, which reports regularly to the Board, oversees management's actions to identify, assess, mitigate and remediate material issues related to cybersecurity and technology risk as part of our enterprise risk management program and processes. The Cybersecurity Risk Oversight Subcommittee of the Business Risk Committee, chaired by the former chief information officer and chief transformation officer of a Fortune 50 company, assists the Business Risk Committee in discharging its oversight duties with respect to cybersecurity risk and meets on a regular basis to provide for an even deeper focus on, and governance framework around, cybersecurity risks inherent in the Corporation's business. The Business Risk Committee, Cybersecurity Risk Oversight Subcommittee, and the Board are regularly briefed on the organization's cybersecurity posture by senior management, including the Chief Executive Officer, Chief Information Officer (CIO), Chief Risk Officer, Head of Non-Financial Risk, Head of Cyber and Technology Risk, and CISO. The CISO has over 20 years of experience leading teams at financial institutions, including in the areas of risk

management and information security, reports to the CIO and is responsible for identifying, managing, and, if necessary, remediating cybersecurity risk to ensure the protection of our data, network, and systems. The primary management-level committees responsible for assessing and managing cybersecurity risk are the Information Technology Oversight Committee, chaired by the CIO, who has over 20 years of experience in technology leadership roles, and the Information Technology Risk Committee, chaired by the Head of Cyber and Technology Risk, who has over 20 years of cybersecurity and risk management experience.

Effective management of risks related to the confidentiality, integrity, and availability of information is crucial in an environment of increasing cybersecurity threats and requires a structured approach to establish and communicate expectations and required practices. Northern Trust's cybersecurity and technology risk management program provides the overall structure for identifying, assessing and managing the respective risks in a sustainable manner supported by an organizational structure that reflects support from executive management and includes risk committees comprised of members from across the business. The program is supported by the Cyber and Technology Risk Management Policy approved by the Business Risk Committee. The Cyber and Technology Risk Management Policy and Framework are based on the National Institute of Standards and Technology (NIST) Cybersecurity Framework and Cyber Risk Institute (CRI) Profile and provide a comprehensive overview of cybersecurity and technology risk management governance activities pertaining to the confidentiality of information, integrity of systems, data and processes, and the availability of business functions that may be adversely impacted. These governance processes, internal controls, and risk management practices, which are part of our enterprise risk management program and processes, are designed to keep risk at levels appropriate to Northern Trust's overall cyber risk appetite and the inherent risk in the markets in which Northern Trust operates. Northern Trust employees are responsible for promoting cybersecurity best practices as well as adhering to applicable policies and standards to safeguard data and business systems. In cases where Northern Trust relies on third-party vendors to perform services, controls are routinely reviewed for alignment with industry standards and their ability to protect information in accordance with Northern Trust's Third-Party Risk Management Program.

To date, Northern Trust has not identified any cybersecurity threats or incidents that have materially affected or are reasonably likely to materially affect our business strategy, results of operations, or financial condition. However, despite our efforts, we cannot eliminate all risks from cybersecurity threats or incidents, or provide assurances that we have not experienced an undetected cybersecurity threat or incident. For more information about these risks, see "Breaches of our security measures, including, but not limited to, those resulting from cyber-attacks or other information security incidents, may result in losses," in Item 1A, "Risk Factors."

ITEM 2 – PROPERTIES

The executive offices of the Corporation and the Bank are located at 50 South La Salle Street in Chicago. This Bank-owned building is occupied by various divisions of Northern Trust's businesses. Adjacent to this building is one office building in which the Bank leases space principally for the asset management business. Financial services are provided by the Bank and other subsidiaries of the Corporation through a network of offices in 24 U.S. states and Washington, D.C., and across 22 locations in Canada, Europe, the Middle East and the Asia-Pacific region. The majority of those offices are leased. The Bank's other primary U.S. operations are located in five facilities: a leased facility at 333 South Wabash Avenue in Chicago; a leased facility in Tempe, Arizona; and one leased and two Bank-owned supplementary operations/data center buildings located in the western suburbs of Chicago. A majority of the Bank's London-based staff is located at a leased facility at Canary Wharf in London. Additional support and operations activity originates from two facilities in India, one facility in Ireland, and one facility in the Philippines, all of which are leased. The Bank and the Corporation's other subsidiaries operate from various other facilities in North America, Europe, the Asia-Pacific region, and the Middle East, most of which are leased.

The Corporation believes that its owned and leased facilities are suitable and adequate for its business needs. The Corporation continues to evaluate its owned and leased facilities and may determine from time to time that certain of its facilities are no longer necessary for its operations. There is no assurance that the Corporation will be able to dispose of any excess facilities or that it will not incur costs in connection with such dispositions, which could be material to its operating results in a given period.

For additional information relating to properties and lease commitments, refer to Note 8, "Buildings and Equipment" and Note 9, "Lease Commitments," included under Item 8, "Financial Statements and Supplementary Data," and which information is incorporated herein by reference.

ITEM 3 – LEGAL PROCEEDINGS

The information presented under the caption "Legal Proceedings" in Note 24, "Commitments and Contingent Liabilities," included under Item 8, "Financial Statements and Supplementary Data," is incorporated herein by reference.

ITEM 4 – MINE SAFETY DISCLOSURES

Not applicable.

SUPPLEMENTAL ITEM – INFORMATION ABOUT OUR EXECUTIVE OFFICERS

The following sets forth certain information with regard to each executive officer of the Corporation.

Michael G. O’Grady - Mr. O’Grady, age 59, joined Northern Trust in 2011 and has served as Chairman of the Board since 2019, as Chief Executive Officer since 2018 and as President since 2017. Prior to that, Mr. O’Grady served as Executive Vice President and President of Corporate & Institutional Services from 2014 to 2016 and as Chief Financial Officer from 2011 to 2014. Before joining Northern Trust, Mr. O’Grady served as a Managing Director in Bank of America Merrill Lynch’s Investment Banking Group.

Clive A. Bellows - Mr. Bellows, age 61, joined Northern Trust in 2011 and has served as Executive Vice President and President of Europe, Middle East and Africa since June 2024. Prior to that, Mr. Bellows served as Head of Global Fund Services for Europe, Middle East and Africa from 2016 to June 2024. Before joining Northern Trust in 2011, Mr. Bellows served as Managing Director and Head of Relationship Management for Asset Managers and Hedge Funds at JPMorgan Chase & Co. from 2006 to 2011 and as Executive Director and Global Head of Client Service, Global Markets at Deutsche Bank AG from 2004 to 2006. Mr. Bellows also served as Head of Relationship Management for the Global Fund Services and Investment Manager Liaison Group at Northern Trust from 1997 to 2003.

Peter B. Cherecwich - Mr. Cherecwich, age 60, joined Northern Trust in 2007 and has served as Executive Vice President and Chief Operating Officer since October 2024. Prior to that, Mr. Cherecwich served as President of Asset Servicing since 2017, as President of Global Fund Services from 2010 to 2017 and as Chief Operating Officer of Corporate & Institutional Services from 2008 to 2014. From 2007 to 2008, he served as Head of Institutional Strategy & Product Development. Before joining Northern Trust, Mr. Cherecwich served in several executive and operational roles at State Street Corporation.

Kelley A. Conway - Ms. Conway, age 51, joined Northern Trust in 2021 and has served as Executive Vice President and Head of Strategic Change, Data and Digital since October 2024. Prior to that, Ms. Conway served as Executive Vice President and Head of Corporate and Digital Strategy. Prior to joining Northern Trust, Ms. Conway led the Financial Services Technology Advisory practice in North America and Global Capital Markets Applied Intelligence Practice at Accenture, where she had been employed since 2017.

David W. Fox, Jr. - Mr. Fox, age 65, joined Northern Trust in 2012 and has served as Executive Vice President and Chief Financial Officer since October 2024. Prior to that, Mr. Fox served as Executive Vice President and President of the Global Family & Private Investment Offices Group from July 2015 through September 2024 and as Executive Vice President and Head of the Americas, Corporate & Institutional Services from May 2012 to June 2015. Before joining Northern Trust, Mr. Fox served in various leadership roles with J.P.Morgan.

Steven L. Fradkin - Mr. Fradkin, age 63, joined Northern Trust in 1985 and has served as Executive Vice President and Vice Chairman since October 2024. Prior to that, Mr. Fradkin served as President of Wealth Management since 2014, and as President of Corporate & Institutional Services from 2009 to 2014. From 2004 to 2009, he served as Chief Financial Officer.

Daniel E. Gamba - Mr. Gamba, age 57, joined Northern Trust as Executive Vice President and President of Asset Management in April 2023. Before joining Northern Trust, Mr. Gamba spent over two decades at Blackrock, Inc., where he served as Co-Head of Fundamental Equities from 2020 to February 2023, as Global Head of Active Equity Product Strategy from 2016 to 2020, and as Head of Americas Institutional iShares Business and Co-Head iShares U.S. from 2011 to 2016. Prior to that, Mr. Gamba served in various executive roles at Blackrock, Inc.

Mark C. Gossett - Mr. Gossett, age 63, joined Northern Trust in 1983 and has served as Executive Vice President and Chief Risk Officer since 2020. Prior to that, Mr. Gossett served as Chief Credit Officer and Head of Market and Liquidity Risk from 2014 to 2020 and as Co-Head of Global Foreign Exchange from 2012 to 2014. Mr. Gossett also previously served as the Chief Risk Officer of Asset Management from 2009 to 2012 and as the Chief Operating Officer of Asset Management from 2005 to 2009.

Jane B. Karpinski - Ms. Karpinski, age 62, joined Northern Trust in 2006 and has served as Executive Vice President since 2016 and as Global Head of Regulatory Affairs since December 2023. Ms. Karpinski previously served as Chief Audit Executive from 2017 to December 2023, and as Controller from 2013 to 2017. Prior to that, she served as International Chief Financial Officer from 2012 to 2013, and as Chief Financial Officer for Europe, Middle East and Africa from 2007 to 2012.

John P. Landers - Mr. Landers, age 52, joined Northern Trust in 2003 and has served as Executive Vice President since December 2024 and as Controller since December 2023. Mr. Landers previously served as Chief Productivity Officer from January 2023 to December 2023 and as Chief Financial Officer of Asset Servicing from September 2015 to January 2023.

Susan C. Levy - Ms. Levy, age 67, joined Northern Trust in 2014 and has served as Executive Vice President and General Counsel since that time. Ms. Levy also previously served as Corporate Secretary from 2018 to 2021. Before joining Northern Trust, Ms. Levy served as Managing Partner of the law firm Jenner & Block from 2008 to 2014, where she was a partner since 1990.

Teresa A. Parker - Ms. Parker, age 64, joined Northern Trust in 1982 and has served as Executive Vice President and President of Asset Servicing since October 2024. Prior to that, Ms. Parker served as President of Europe, Middle East and Africa since 2017 and as Chief Operating Officer of Corporate & Institutional Services from 2014 to 2017. From 2009 to 2014, she served as Executive Vice President, Corporate & Institutional Services for the Asia-Pacific region.

Thomas A. South - Mr. South, age 55, joined Northern Trust in 1999 and has served as Executive Vice President and Chief Information Officer since 2018. Prior to that, Mr. South served as Chief Business Architect from 2014 to 2018 and as Chief Operating Officer of Operations & Technology from 2013 to 2014.

Alexandria Taylor - Ms. Taylor, age 42, joined Northern Trust in 2022 and has served as Executive Vice President and Chief Administrative Officer since October 2024. Prior to that, she served as Chief Human Resources Officer. Before joining Northern Trust, Ms. Taylor spent nearly two decades at Bank of America based in New York City where she was the head of Human Resources for corporate, institutional and wealth management businesses. She also oversaw the team responsible for Global Human Resources regulatory relations. Prior to that, Ms. Taylor held positions of increasing responsibility and complexity at Bank of America.

Jason J. Tyler - Mr. Tyler, age 53, joined Northern Trust in 2011 and has served as Executive Vice President and President of Wealth Management since October 2024. Prior to that, Mr. Tyler served as Chief Financial Officer since 2020, as Chief Financial Officer of Wealth Management from 2018 to 2019, as Global Head of Asset Management's Institutional Group from 2014 to 2018, and as Global Head of Strategy from 2011 to 2014. Before joining Northern Trust, Mr. Tyler served in certain executive and operational roles at Ariel Investments and Bank One/American National Bank.

All officers are appointed annually by the Board of Directors. Officers continue to hold office until their successors are duly elected or until their death, resignation or removal by the Board.

PART II

ITEM 5 – MARKET FOR REGISTRANT’S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Our common stock is listed on The NASDAQ Stock Market LLC under the symbol “NTRS.” There were 1,417 stockholders of record as of January 31, 2025. The following table shows certain information relating to the Corporation’s purchases of common stock through our share repurchase program for the three months ended December 31, 2024.

TABLE 2: REPURCHASES OF COMMON STOCK IN THE FOURTH QUARTER OF 2024

PERIOD	TOTAL NUMBER OF SHARES PURCHASED	AVERAGE PRICE PAID PER SHARE	TOTAL NUMBER OF SHARES PURCHASED AS PART OF A PUBLICLY ANNOUNCED PLAN	MAXIMUM NUMBER OF SHARES THAT MAY YET BE PURCHASED UNDER THE PLAN
October 1 - 31, 2024	223,867	\$ 101.85	223,867	13,076,283
November 1 - 30, 2024	1,259,715	106.36	1,259,715	11,816,568
December 1 - 31, 2024	867,740	108.45	867,740	10,948,828
Total (Fourth Quarter)	2,351,322	\$ 106.70	2,351,322	10,948,828

On October 19, 2021, the Corporation announced a share repurchase program under which the Corporation’s Board of Directors authorized the Corporation to repurchase up to 25.0 million shares of the Corporation’s common stock. The repurchase authorization approved by the Board of Directors has no expiration date, thus the Corporation retains the ability to repurchase when circumstances warrant and applicable regulation permits. For more information, please refer to Note 13, “Stockholders’ Equity,” provided in Item 8, “Financial Statements and Supplementary Data.”

COMPARISON OF FIVE-YEAR CUMULATIVE TOTAL RETURN

The following graph compares the cumulative total stockholder return on the Corporation's common stock to the cumulative total return of the S&P 500 Index and the KBW Bank Index for the five fiscal years ended December 31, 2024. The cumulative total stockholder return assumes the investment of \$100 in the Corporation's common stock and in each index on December 31, 2019 and assumes reinvestment of dividends. The KBW Bank Index is a modified-capitalization-weighted index made up of 24 of the largest banking companies in the United States. The Corporation is included in the S&P 500 Index and the KBW Bank Index.

Total Return Assumes \$100 Invested on December 31, 2019 with Reinvestment of Dividends

	DECEMBER 31,					
	2019	2020	2021	2022	2023	2024
Northern Trust	\$ 100	\$ 91	\$ 119	\$ 91	\$ 90	\$ 113
S&P 500 Index	100	118	152	125	158	197
KBW Bank Index	100	90	124	98	97	133

ITEM 6 – [RESERVED]

ITEM 7 – MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following is management's discussion and analysis of the financial condition and results of operations (MD&A) of Northern Trust Corporation (Corporation) for the year ended December 31, 2024. The following should be read in conjunction with the consolidated financial statements and related footnotes included in this report. Investors also should read the section titled "Forward-Looking Statements."

BUSINESS OVERVIEW

The Corporation is a leading provider of wealth management, asset servicing, asset management and banking solutions to corporations, institutions, families and individuals. The Corporation focuses on managing and servicing client assets through its two client-focused reporting segments: Asset Servicing and Wealth Management. Asset management and related services are provided to Asset Servicing and Wealth Management clients primarily by the Asset Management business.

The Corporation conducts business through various U.S. and non-U.S. subsidiaries, including The Northern Trust Company (the Bank). The Corporation was formed as a holding company for the Bank in 1971. The Corporation has a global presence with offices in 24 U.S. states and Washington, D.C., and across 22 locations in Canada, Europe, the Middle East and the Asia-Pacific region. Except where the context requires otherwise, the terms "Northern Trust," "we," "us," "our," "its," or similar terms refers to the Corporation and its subsidiaries on a consolidated basis.

CONSOLIDATED RESULTS OF OPERATIONS

The following information summarizes our consolidated results of operations for 2024 compared to 2023. For a discussion related to the consolidated results of operations for 2023 compared to 2022, refer to Part II, Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations," in our Annual Report on Form 10-K for the year ended December 31, 2023 (2023 Form 10-K), which was filed with the United States Securities and Exchange Commission on February 27, 2024.

Revenue

Northern Trust generates the majority of its revenue from Noninterest Income that primarily consists of Trust, Investment and Other Servicing Fees. Net Interest Income comprises the remainder of revenue and consists of Interest Income generated by earning assets, net of Interest Expense on deposits and borrowed funds.

Revenue in 2024 of \$8.3 billion increased \$1.5 billion, or 22%, from \$6.8 billion in 2023, primarily driven by higher Other Operating Income, Trust, Investment and Other Servicing Fees, and Net Interest Income. Noninterest Income represented 74% and 71% of total revenue in 2024 and 2023, respectively, and totaled \$6.1 billion in 2024, which increased \$1.3 billion, or 28%, from \$4.8 billion in 2023.

Noninterest Income in 2024 increased primarily due to higher Other Operating Income as well as Trust, Investment and Other Servicing Fees. Other Operating Income of \$1.2 billion in 2024 increased \$928.7 million from \$228.7 million in the prior year, primarily driven by a \$896.7 million gain related to Northern Trust's participation in an exchange offer related to shares of a class of Visa, Inc. common stock and a \$68.1 million gain on the sale of an equity investment, partially offset by mark-to-market activity on existing swap agreements related to shares of a class of Visa, Inc. common stock, including a \$12.8 million expense related to litigation escrow funding, as well as losses recognized as a result of a securities repositioning related to the supplemental pension plan and impairment charges taken on certain investments. Please refer to Note 24, "Commitments and Contingent Liabilities" included under Item 8, "Financial Statements and Supplementary Data," for additional details related to the exchange offer. Trust, Investment and Other Servicing Fees of \$4.7 billion in 2024 increased \$366.0 million, or 8%, from \$4.4 billion in 2023, primarily due to favorable markets and net new business. Investment Security Gains (Losses), net reflects \$189.3 million of losses in 2024 as compared to \$169.5 million of losses in 2023, both due to repositionings of the available for sale debt securities portfolio in each year.

Net Interest Income on a fully taxable equivalent (FTE) basis in 2024 of \$2.2 billion increased \$169.4 million, or 8%, from \$2.0 billion in 2023, primarily due to higher deposits and higher average interest rates, partially offset by an unfavorable balance sheet mix. The net interest margin on an FTE basis increased to 1.64% in 2024 from 1.56% in 2023, primarily due to higher average interest rates and a favorable funding mix shift. Average earning assets increased \$3.6 billion, or 3%, from \$130.8 billion in 2023 to \$134.4 billion in 2024, primarily due to higher client deposits, partially offset by lower borrowing activity, the net of which resulted in higher funding of earning assets.

Additional information regarding Northern Trust's revenue by type is provided in the following table.

TABLE 4: REVENUE

(In Millions)	FOR THE YEAR ENDED DECEMBER 31,		
	2024	2023	2022
Noninterest Income			
Trust, Investment and Other Servicing Fees	\$ 4,727.8	\$ 4,361.8	\$ 4,432.6

Security Commissions and Trading Income	150.5	135.0	136.2
Other Operating Income	1,157.4	228.7	191.3
Investment Security Gains (Losses), net	(189.3)	(169.5)	(214.0)
Total Noninterest Income	\$ 6,113.3	\$ 4,791.5	\$ 4,874.0
Net Interest Income ⁽¹⁾	2,177.1	1,982.0	1,887.2
Total Revenue	\$ 8,290.4	\$ 6,773.5	\$ 6,761.2

⁽¹⁾ Net Interest Income stated on a GAAP basis. Net Interest Income on an FTE basis includes FTE adjustments of \$31.8 million, \$57.5 million, and \$45.6 million for 2024, 2023, and 2022, respectively. A reconciliation of total consolidated revenue, Net Interest Income and net interest margin on a GAAP basis to revenue, Net Interest Income and net interest margin on an FTE basis, respectively, (each of which is a non-GAAP financial measure) is provided in "Supplemental Information—Reconciliation to Fully Taxable Equivalent" within this "Management's Discussion and Analysis of Financial Condition and Results of Operations" section.

Trust, Investment and Other Servicing Fees

Trust, Investment and Other Servicing Fees are based primarily on the market value of assets held in custody, managed or serviced; the volume of transactions; number of accounts; securities lending volume and spreads; and fees for other services rendered. Certain market value calculations on which fees are based are performed on a monthly or quarterly basis in arrears.

The components of Trust, Investment and Other Servicing Fees are provided in the following table.

TABLE 5: TRUST, INVESTMENT AND OTHER SERVICING FEES

(\$ In Millions)	FOR THE YEAR ENDED DECEMBER 31,			CHANGE	
	2024	2023	2022	2024 / 2023	2023 / 2022

Total Wealth Management Trust, Investment and Other Servicing Fees	\$ 2,095.0	\$ 1,899.9	\$ 1,936.3	10 %	(2)%
Total Consolidated Trust, Investment and Other Servicing Fees	\$ 4,727.8	\$ 4,361.8	\$ 4,432.6	8 %	(2)%

Asset Servicing

Asset Servicing Trust, Investment and Other Servicing Fees are primarily attributable to services related to custody, fund administration, investment management, and securities lending. Custody and Fund Administration fees, are driven primarily by values of client AUC/A, transaction volumes and the number of accounts. The asset values used to calculate these fees vary depending on the individual fee arrangements negotiated with each client. Custody fees related to asset values are client specific and are priced based on month-end market values, quarter-end market values, or the average of month-end market values for the quarter. The fund administration fees that are asset-value-related are priced using month-end, quarter-end, or average daily balances. Investment Management fees are based generally on market values of client AUM management throughout the period. Typically, the asset values used to calculate fee revenue are based on a one-month or one-quarter lag.

Securities Lending revenue is affected by market values; the demand for securities to be lent, which drives volumes; and the interest rate spread earned on the investment of cash deposited by investment firms as collateral for securities they have borrowed. The Other fee category in Asset Servicing includes products such as investment risk and analytical services, benefit payments, and other services. Revenue from these products is based generally on the volume of services provided or a fixed fee.

Custody and Fund Administration fees increased in 2024 from 2023 primarily due to favorable markets and net new business. Investment Management fees increased in 2024 from 2023 primarily due to favorable markets and net new business. Securities Lending decreased in 2024 from 2023 primarily due to lower spreads. Other fees increased from the prior-year, primarily due to new business.

The following tables provide a breakdown of the Asset Servicing assets under custody and assets under management.

TABLE 6: ASSET SERVICING ASSETS UNDER CUSTODY

(\$ In Billions)	DECEMBER 31,			CHANGE	
	2024	2023	2022	2024 / 2023	2023 / 2022

Total Assets Under Management	\$ 1,159.7	\$ 1,032.0	\$ 898.1	12 %	15 %

Cash and other assets deposited by investment firms as collateral for securities borrowed from custody clients are managed by Northern Trust and are included in assets under custody and assets under management. This securities lending collateral totaled \$176.2 billion and \$167.4 billion at December 31, 2024 and 2023, respectively.

Wealth Management

Wealth Management fee income is calculated primarily based on market values and is impacted by both one-month and one-quarter lagged asset values. Fee income in the regions increased in 2024 from 2023 primarily due to favorable markets. Global Family Office fee income increased in 2024 from 2023 primarily due to favorable markets and asset inflows.

The following tables provide a summary of Wealth Management assets under custody and assets under management.

TABLE 8: WEALTH MANAGEMENT ASSETS UNDER CUSTODY

(\$ In Billions)	DECEMBER 31,			CHANGE	
	2024	2023	2022	2024 / 2023	2023 / 2022

Barclays Capital Global Aggregate Bond Index	463	471	(2)

Client Assets

Northern Trust, in the normal course of business, holds assets under custody/administration and management in a fiduciary or agency capacity for its clients. In accordance with GAAP, these assets are not assets of Northern Trust and are not included in its consolidated balance sheets. AUC/A and AUM are a driver of our Trust, Investment and Other Servicing Fees. For the purposes of disclosing AUC/A, to the extent that both custody and administration services are provided, the value of the assets is included only once in this amount.

At December 31, 2024, AUC/A increased from December 31, 2023, primarily reflecting favorable markets and asset inflows, partially offset by unfavorable currency translation.

The following table presents AUC/A by reporting segment.

TABLE 12: ASSETS UNDER CUSTODY/ADMINISTRATION BY REPORTING SEGMENT

(\$ In Billions)	DECEMBER 31,			CHANGE	
	2024	2023	2022	2024 /2023	2023 /2022

Foreign Exchange Trading Income

Northern Trust provides foreign exchange services in the normal course of business as an integral part of its custody services. Active management of currency positions, within conservative limits, also contributes to foreign exchange trading income. Foreign Exchange Trading Income in 2024 increased from 2023, primarily driven by higher trading volumes.

Security Commissions and Trading Income

Security Commissions and Trading Income, generated primarily from securities brokerage services provided by Northern Trust Securities, Inc., in 2024 increased from 2023, primarily driven by an increase in equity commissions from higher equity trading volumes.

Other Operating Income

Other Operating Income in 2024 increased from 2023 primarily driven by a \$896.7 million gain related to Northern Trust's participation in an exchange offer related to shares of a class of Visa, Inc. common stock and a \$68.1 million gain on the sale of an equity investment, partially offset by mark-to-market activity on existing swap agreements related to shares of a class of Visa, Inc. common stock, including a \$12.8 million expense related to litigation escrow funding, as well as losses recognized as a result of a securities repositioning related to the supplemental pension plan and impairment charges taken on certain investments. Please refer to Note 18, "Other Operating Income" and Note 24, "Commitments and Contingent Liabilities" included under Item 8, "Financial Statements and Supplementary Data," for additional details related to Other Operating Income and Visa, respectively.

Investment Security Gains (Losses), Net

Investment Security Gains (Losses), net reflects a \$189.3 million loss on the sale of available for sale debt securities in the current period arising from a repositioning of the portfolio. In the prior year, there was \$169.5 million of losses on sales of available for sale debt securities also arising from repositionings of the portfolio.

Net Interest Income

Net Interest Income is defined as the total of Interest Income and amortized fees on earning assets, less Interest Expense on deposits and borrowed funds, adjusted for the impact of interest-related hedging activity. Earning assets—including Federal Funds Sold, Securities Purchased under Agreements to Resell, Interest-Bearing Due from and Deposits with Banks, Federal Reserve and Other Central Bank Deposits, Securities, Loans and Leases, and Other Interest-Earning Assets—are financed by a large base of interest-bearing liabilities that include client deposits, short-term borrowings, Senior Notes and Long-Term Debt. Short-term borrowings include Federal Funds Purchased, Securities Sold Under Agreements to Repurchase, and Other Borrowings. Earning assets also are funded by noninterest-bearing funds, which include demand deposits and Stockholders' Equity. Net Interest Income is subject to variations in the level and mix of earning assets and interest-bearing funds and their relative sensitivity to interest rates. In addition, the levels of nonaccruing assets and client compensating deposit balances used to pay for services impact Net Interest Income.

Net interest margin is the difference between what we earn on our assets and what we pay for deposits and other sources of funding. The direction and level of interest rates are important factors in our earnings. Net interest margin is calculated by dividing annualized Net Interest Income by average interest-earning assets.

Net Interest Income stated on an FTE basis is a non-GAAP financial measure that facilitates the analysis of asset yields. Management believes an FTE presentation provides a clearer indication of net interest margins for comparative purposes. When adjusted to an FTE basis, yields on taxable, nontaxable, and partially taxable assets are comparable; however, the adjustment to an FTE basis has no impact on Net Income. A reconciliation of Net Interest Income on a GAAP basis to Net Interest Income on an FTE basis is provided in "Supplemental Information—Reconciliation to Fully Taxable Equivalent" within this "Management's Discussion and Analysis of Financial Condition and Results of Operations" section.

The following tables present an analysis of average daily balances and interest rates affecting Net Interest Income and an analysis of Net Interest Income changes.

TABLE 19: AVERAGE CONSOLIDATED BALANCE SHEETS WITH ANALYSIS OF NET INTEREST INCOME (INTEREST AND RATE ON A FULLY TAXABLE EQUIVALENT BASIS)⁽¹⁾

(\$ In Millions)	2024			2023			2022

⁽¹⁾ Northern Trust's non-U.S. activities are primarily related to its asset servicing, asset management, foreign exchange, cash management, and commercial banking businesses. The operations of Northern Trust are managed on a reporting segment basis and include components of both U.S. and non-U.S. source income and assets. Non-U.S. source income and assets are not separately identified in Northern Trust's internal management reporting system. However, Northern Trust is required to disclose non-U.S. activities based on the domicile of the customer. Due to the complex and integrated nature of Northern Trust's activities, it is difficult to segregate with precision revenues, expenses and assets between U.S. and non-U.S.-domiciled customers. On the basis of averages, the percentage of total assets attributable to foreign activities was 16%, 18%, and 19% as of December 31, 2024, 2023 and 2022, respectively. On the basis of averages, the percentage of total liabilities attributable to foreign activities was 54%, 55%, and 58% as of December 31, 2024, 2023 and 2022, respectively. For additional information, refer to the Geographic Area Information section of Note 31, "Reporting Segments and Related Information," provided in Item 8, "Financial Statements and Supplementary Data."

⁽²⁾ Interest-Bearing Due from and Deposits with Banks includes the interest-bearing component of Cash and Due from Banks and Interest-Bearing Deposits with Banks as presented on the consolidated balance sheets.

⁽³⁾ Includes the impact of balance sheet netting under master netting arrangements of approximately \$62.4 billion and \$29.1 billion in 2024 and 2023, respectively. Excluding the impact of netting, the average interest rate on Securities Purchased under Agreements to Resell would be approximately 5.29% and 5.27% in 2024 and 2023, respectively. Excluding the impact of netting, the average interest rate on Securities Sold under Agreements to Repurchase would be approximately 5.21% and 5.22% in 2024 and 2023, respectively. Northern Trust nets securities sold under repurchase agreements against those purchased under resale agreements when there is a legally enforceable master netting arrangement.

⁽⁴⁾ Average balances include nonaccrual loans.

⁽⁵⁾ Other Interest-Earning Assets include certain community development investments, collateral deposits with certain securities depositories and clearing houses, Federal Home Loan Bank and Federal Reserve stock, and money market investments which are classified in Other Assets on the consolidated balance sheets.

⁽⁶⁾ Cash and Due from Banks and Other Central Bank Deposits includes the noninterest-bearing component of Federal Reserve and Other Central Bank Deposits on the consolidated balance sheets.

⁽⁷⁾ Other Borrowings primarily includes advances from the Federal Home Loan Bank of Chicago.

⁽⁸⁾ Rate calculations are based on actual balances rather than the rounded amounts presented in the table above.

⁽⁹⁾ A reconciliation of Net Interest Income on a GAAP basis to Net Interest Income on an FTE basis is provided in "Supplemental Information—Reconciliation to Fully Taxable Equivalent" within this "Management's Discussion and Analysis of Financial Condition and Results of Operations" section.

TABLE 20: ANALYSIS OF NET INTEREST INCOME CHANGES DUE TO VOLUME AND RATE⁽¹⁾

⁽¹⁾ Changes not due solely to average balance changes or rate changes are allocated proportionately to average balance and rate based on their relative absolute magnitudes.

⁽²⁾ Changes due to average balance and average rate include the impact of balance sheet netting as noted in Table 20: Average Consolidated Balance Sheets with Analysis of Net Interest Income. Excluding the impact of netting, the 2024 vs. 2023 change in Securities Purchased under Agreements to Resell attributed to the average balance and the average rate would be \$1.8 billion and \$4.1 million respectively. The 2023 vs. 2022 change attributed to the average balance and the average rate would be \$1.2 billion and \$294.9 million respectively. Excluding the impact of netting, the 2024 vs. 2023 change in Securities Sold under Agreements to Repurchase attributed to the average balance and the average rate would be \$1.7 billion and \$(3.7) million respectively. The 2023 vs. 2022 change attributed to the average balance and the average rate would be \$1.2 billion and \$246.6 million respectively.

Notes: Net Interest Income (FTE), a non-GAAP financial measure, includes adjustments to a fully taxable equivalent basis for Loans and Leases, Securities and Other Interest-Earning Assets. The adjustments are based on a federal income tax rate of 21.0%, where the rate is adjusted for applicable state income taxes, net of related federal tax benefit. Total taxable equivalent interest adjustments amounted to \$31.8 million in 2024, \$57.5 million in 2023 and \$45.6 million in 2022. A reconciliation of Net Interest Income and net interest margin on a GAAP basis to Net Interest Income and net interest margin on an FTE basis (each of which is a non-GAAP financial measure) is provided in "Supplemental Information—Reconciliation to Fully Taxable Equivalent" within this "Management's Discussion and Analysis of Financial Condition and Results of Operations" section. Net interest margin is calculated by dividing annualized net interest income by average interest-earning assets.

Interest revenue on cash collateral positions is reported above within Interest-Bearing Due from and Deposits with Banks, within Loans and Leases, and within Other Interest-Earning Assets. Interest expense on cash collateral positions is reported above within Non-U.S. Offices Interest-Bearing Deposits. Related cash collateral received from and deposited with derivative counterparties is recorded net of the associated derivative contract in Other Assets and Other Liabilities, respectively.

Net Interest Income in 2024 increased from 2023. Net Interest Income, stated on an FTE basis, increased from 2023, due to a higher net interest margin and higher levels of average earning assets. Average earning assets in 2024 increased from 2023, primarily due to higher client deposits, partially offset by lower borrowing activity, the net of which resulted in higher funding of earning assets.

The net interest margin in 2024 increased from 2023. The net interest margin on an FTE basis in 2024 increased from 2023, primarily due to higher average interest rates and a favorable funding mix shift.

Federal Reserve and Other Central Bank Deposits averaged \$35.2 billion in 2024, which increased \$4.0 billion, or 13%, from \$31.2 billion in 2023, due to deposit inflows. Interest-Bearing Due From and Deposits with Banks averaged \$4.8 billion in 2024 and \$4.3 billion in 2023. Average Securities were \$50.1 billion and increased \$0.2 billion, or 0%, from \$49.9 billion in 2023. Average taxable Securities were \$43.9 billion in 2024 and \$46.8 billion in 2023. Average nontaxable Securities, which represent securities that are primarily exempt from U.S. federal and state income taxes, were \$6.2 billion in 2024 and \$3.1 billion in 2023.

Loans averaged \$40.9 billion in 2024, which decreased \$1.2 billion, or 3%, from \$42.2 billion in 2023, primarily reflecting lower levels of commercial and institutional and non-U.S. loans, partially offset by higher levels of commercial real estate and private client loans. Commercial and institutional loans averaged \$11.1 billion in 2024 and decreased \$1.3 billion, or 11%, from \$12.4 billion for 2023. Non-U.S. loans averaged \$3.0 billion in 2024 and decreased \$360.9 million, or 11%, from \$3.4 billion for 2023. Residential real estate loans averaged \$6.4 billion in both 2024 and 2023. Commercial real estate loans averaged \$5.3 billion in 2024 and increased \$316.8 million, or 6%, from \$5.0 billion for 2023. Private client loans averaged \$14.2 billion in 2024 and increased \$171.0 million, or 1%, from \$14.0 billion for 2023.

Average Other Interest-Earning Assets include certain community development investments, collateral deposits with certain securities depositories and clearing houses, Federal Home Loan Bank stock, money market investments, and Federal Reserve stock of \$854.8 million, \$1,369.3 million, \$335.1 million, \$92.3 million, and \$70.0 million, respectively, which are recorded in Other Assets on the consolidated balance sheets.

Northern Trust utilizes a diverse mix of funding sources. Average Interest-Bearing Deposits increased \$8.4 billion, or 10%, to \$95.9 billion in 2024 from \$87.5 billion in 2023. Interest expense for Interest-Bearing Deposits in the current year was driven by higher interest rates and higher balances. Average Non-U.S. Offices Interest-Bearing Deposits comprised 67% and 69% of total average Interest-Bearing Deposits for the years ended December 31, 2024 and 2023, respectively. Average Total Interest-Bearing Liabilities increased \$4.2 billion, or 4%, to \$112.9 billion in 2024 from \$108.7 billion in 2023. The balances within short-term borrowing classifications vary based on funding requirements and strategies, interest rate levels, changes in the volume of lower-cost deposit sources, and the availability of collateral to secure these borrowings. Average net noninterest-bearing funds decreased \$0.6 billion, or 3%, to \$21.5 billion in 2024 from \$22.1 billion in 2023, primarily resulting from lower levels of Demand and Other Noninterest-Bearing Deposits. Average Demand and Other Noninterest-Bearing Deposits decreased \$1.0 billion, or 5%, to \$16.8 billion in 2024 from \$17.7 billion in 2023. The average rate on total source of funds was 5.65% in 2024 and 4.07% in 2023.

Stockholders' Equity

Stockholders' Equity averaged \$12.3 billion in 2024, compared with \$11.5 billion in 2023. The increase in average Stockholders' Equity of \$803.0 million, or 7%, was primarily due to higher Retained Earnings. During the year ended December 31, 2024, the Corporation maintained its quarterly common stock dividend at \$0.75 per share. During the year ended December 31, 2024, the Corporation, through common stock dividends and repurchases of 10,489,770 shares of common stock, returned \$1.5 billion in capital to common stockholders. During the year ended December 31, 2023, the Corporation, through common stock dividends and repurchases of 4,384,678 shares of common stock, returned \$977.7 million in capital to common stockholders.

The Corporation's current stock repurchase authorization to repurchase up to 25.0 million shares was approved by the Board of Directors in October 2021. Shares are repurchased by the Corporation to, among other things, manage the Corporation's capital levels. Repurchased shares are used for general purposes, including the issuance of shares under stock option and other equity incentive plans. The repurchase authorization approved by the Board of Directors has no expiration date, thus the Corporation retains the ability to resume repurchases thereunder when circumstances warrant and applicable regulations permit. Please refer to Note 13, "Stockholders' Equity," provided in Item 8, "Financial Statements and Supplementary Data."

Provision for Credit Losses

There was a negative Provision for Credit Losses of \$3.0 million in 2024, as compared to a Provision for Credit Losses of \$24.5 million in 2023. The negative provision during 2024 resulted from decreases in both individual and collective reserves. The decrease in individual reserves was driven by one Commercial loan charge-off. The decrease in collective reserves was primarily in held to maturity securities driven by methodology changes and improvements in portfolio quality partially offset by an increase in the Commercial Real Estate (CRE) portfolio, driven by deterioration in portfolio quality. The prior-year provision primarily reflected an increase in the reserve evaluated on a collective basis within the CRE portfolio, driven by an increase in the size and duration of the portfolio, weaker economic projections for the industry, methodology updates, and credit quality deterioration on a small number of loans.

Net charge-offs in 2024 totaled \$11.3 million resulting from \$15.5 million of charge-offs and \$4.2 million of recoveries, compared to net charge-offs of \$5.0 million in 2023 resulting from \$8.7 million of charge-offs and \$3.7 million of recoveries. For additional discussion of the Allowance for Credit Losses, refer to the "Asset Quality" section.

Noninterest Expense

Noninterest Expense for 2024 increased from 2023, primarily reflecting increased Compensation, Equipment and Software, and Outside Services expense, partially offset by lower Other Operating Expense.

The components of Noninterest Expense and a discussion of significant changes during 2024 and 2023 are provided below.

TABLE 21: NONINTEREST EXPENSE

(\$ In Millions)	FOR THE YEAR ENDED DECEMBER 31,			CHANGE	
	2024	2023	2022	2024 / 2023	2023 / 2022
Compensation	\$ 2,471.1	\$ 2,321.8	\$ 2,248.0	6 %	3 %
Employee Benefits	417.8	405.2	437.4	3	(7)
Outside Services	998.0	906.5	880.3	10	3
Equipment and Software	1,075.0	945.5	838.8	14	13
Occupancy	216.8	232.3	219.1	(7)	6
Other Operating Expense	455.2	472.9	359.3	(4)	32
Total Noninterest Expense	\$ 5,633.9	\$ 5,284.2	\$ 4,982.9	7 %	6 %

Compensation

Compensation expense, the largest component of Noninterest Expense, increased in 2024 from 2023, primarily due to higher severance-related charges and an increase to base pay adjustments. Severance-related charges were \$81.8 million in 2024 as compared to \$36.7 million in 2023. Full-time equivalent employees totaled approximately 23,300 at December 31, 2024, up 1% from approximately 23,100 at December 31, 2023.

Outside Services

Outside Services expense in 2024 increased from 2023, primarily reflecting higher consulting services and higher technical services.

Equipment and Software

Equipment and Software expense in 2024 increased from 2023, primarily due to higher software amortization and higher software support and rental expense.

Occupancy

Occupancy expense in 2024 decreased from 2023, primarily due to charges related to early lease exists recorded during the prior-year period.

Other Operating Expense

Other Operating Expense in 2024 decreased from 2023 primarily due to an \$84.6 million FDIC special assessment and a \$25.6 million charge related to the write-off of an investment in a client capability, both recorded in the prior year, partially offset by a \$70.0 million charitable contribution, a \$10.6 million legal settlement, and \$14.7 million of additional expense related to the FDIC special assessment, recorded in the current year. Please refer to Note 24, "Commitments and Contingent Liabilities" included under Item 8, "Financial Statements and Supplementary Data," for additional details related to the FDIC special assessment.

Please refer to Note 19, "Other Operating Expense" included under Item 8, "Financial Statements and Supplementary Data," for additional details related to other operating expenses.

Provision for Income Taxes

The 2024 Provision for Income Taxes was \$628.4 million, representing an effective rate of 23.6%. This compares with a Provision for Income Taxes of \$357.5 million and an effective rate of 24.4% in 2023.

See Note 20, "Income Taxes," provided in Item 8, "Financial Statements and Supplementary Data," for more information on income taxes.

REPORTING SEGMENTS AND RELATED INFORMATION

The following information summarizes our consolidated results of operations by reporting segment for 2024 compared to 2023. For a discussion related to the consolidated results of operations by reporting segment for 2023 compared to 2022, refer to Part II, Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations," in our 2023 Form 10-K, which was filed with the SEC on February 27, 2024.

Northern Trust is organized around its two client-focused reporting segments: Asset Servicing and Wealth Management. Asset management and related services are provided to Asset Servicing and Wealth Management clients primarily by the Asset Management business. The revenue and expenses of Asset Management and certain other support functions are allocated fully to Asset Servicing and Wealth Management.

Reporting segment financial information, presented on an internal management-reporting basis, is determined by accounting systems used to allocate revenue and expense to each segment, and incorporates processes for allocating assets, liabilities, equity and the applicable interest income and expense utilizing a funds transfer pricing (FTP) methodology. Under the methodology, assets and liabilities receive a funding charge or credit that considers interest rate risk, liquidity risk, and other product characteristics on an instrument level. Additionally, segment information is presented on an FTE basis as management believes an FTE presentation provides a clearer indication of net interest income. The adjustment to an FTE basis has no impact on Net Income.

Equity is allocated to the reporting segments based on a variety of factors including, but not limited to, risk, regulatory considerations, and internal metrics. Allocations of equity and certain corporate expense may not be representative of levels that would be required if the segments were independent entities. The accounting policies used for management reporting are consistent with those described in Note 1, "Summary of Significant Accounting Policies." Transfers of income and expense items are recorded at cost; there is no consolidated profit or loss on sales or transfers between reporting segments. Northern Trust's presentations are not necessarily consistent with similar information for other financial institutions.

Revenues, expenses and average assets are allocated to Asset Servicing and Wealth Management, with the exception of non-recurring activities such as certain corporate transactions and costs incurred associated with acquisitions, divestitures, litigation, restructuring, and tax adjustments not directly attributable to a specific reporting segment, which are reported within the Other segment.

Reporting segment results are subject to reclassification when organizational changes are made. The results are also subject to refinements in revenue and expense allocation methodologies, which are typically reflected on a prospective basis.

Effective January 2024, Northern Trust implemented certain enhancements to its FTP methodology, impacting the allocation of Net Interest Income to the Asset Servicing and Wealth Management segments. As a result, the approximate impact on the Asset Servicing and Wealth Management segments was a \$132.0 million decrease and a \$132.0 million increase in Net Interest Income, respectively, for the year ended December 31, 2024. Prior-year segment results have not been revised to reflect this methodology change.

The following tables reflect the earnings contribution and certain average balances of Northern Trust's reporting segments for the years ended December 31, 2024, 2023, and 2022.

TABLE 22: RESULTS OF REPORTING SEGMENTS

(\$ In Millions)	ASSET SERVICING			WEALTH MANAGEMENT		
	FOR THE YEAR ENDED DECEMBER 31	2024	2023	2022	2024	2023

⁽¹⁾ Other Segment Items include Occupancy, Equipment & Software and Other Operating Expense.

Segment results are stated on an FTE basis which has no impact on Net Income. Net Interest Income on an FTE basis includes FTE adjustments of \$31.8 million, \$57.5 million, and \$45.6 million for 2024, 2023, and 2022, respectively. A reconciliation of total consolidated revenue, Net Interest Income and net interest margin on a GAAP basis to revenue, Net Interest Income and net interest margin on an FTE basis, respectively, (each of which is a non-GAAP financial measure) is provided in “Supplemental Information—Reconciliation to Fully Taxable Equivalent” within this “Management’s Discussion and Analysis of Financial Condition and Results of Operations” section.

Asset Servicing

Asset Servicing is a leading global provider of asset servicing and related services to corporate and public retirement funds, foundations, endowments, fund managers, insurance companies, sovereign wealth funds, and other institutional investors around the globe. Asset servicing and related services encompass a full range of capabilities including but not limited to: custody; fund administration; investment operations outsourcing; investment management; investment risk and analytical services; employee benefit services; securities lending; foreign exchange; treasury management; brokerage services; transition management services; banking; and cash management. Client relationships are managed through the Bank and the Bank’s and the Corporation’s other subsidiaries, including support from locations in North America, Europe, the Middle East, and the Asia-Pacific region.

Asset Servicing Trust, Investment and Other Servicing Fees

For an explanation of Asset Servicing Trust, Investment, and Other Servicing Fees, please see the “Trust, Investment, and Other Servicing Fees” section within the Consolidated Results of Operations section.

Asset Servicing Foreign Exchange Trading Income

Foreign Exchange Trading Income for 2024 increased from 2023, primarily driven by higher client volumes.

Asset Servicing Provision for Credit Losses

There was a negative Provision for Credit Losses of \$4.6 million for 2024 compared to a Provision for Credit Losses of \$0.5 million for 2023. The 2024 negative Provision for Credit Losses was primarily in the Commercial and Institutional (C&I) portfolio, driven by an improvement in credit quality. The Provision for Credit Losses during 2023 primarily reflected a deterioration in credit quality on a small number of loans at the time, offset by a better overall macroeconomic outlook.

Asset Servicing Noninterest Expense

Asset Servicing Noninterest Expense, which includes the direct expense of the reporting segment, indirect expense allocations for product and operating support, and indirect expense allocations for certain corporate support services, increased in 2024 from 2023. The increase primarily reflects higher expense allocations and an increase in Compensation expense due to higher severance related charges.

Wealth Management

Wealth Management focuses on high-net-worth individuals and families, business owners, executives, professionals, retirees, and established privately-held businesses in its target markets. In supporting these targeted segments, Wealth Management provides trust, investment management, custody, and philanthropic services; financial consulting; guardianship and estate administration; family business consulting; family financial education; brokerage services; and private and business banking. Wealth Management also includes Global Family Office, which provides customized services, including but not limited to: investment management; global custody; fiduciary; and private banking; family office consulting, and technology solutions, to meet the complex financial and reporting needs of ultra-high-net-worth individuals and family offices across the globe. Wealth Management is one of the largest providers of advisory services in the United States with AUC/A, assets under custody, and AUM of \$1.1 trillion, \$1.1 trillion, and \$450.7 billion, respectively, at December 31, 2024. Wealth Management services are delivered by multidisciplinary teams through a network of offices in 19 U.S. states and Washington, D.C., as well as offices in London, Guernsey, Singapore and Abu Dhabi.

Wealth Management Trust, Investment and Other Servicing Fees

For an explanation of Wealth Management Trust, Investment, and Other Servicing Fees, please see the “Trust, Investment, and Other Servicing Fees” section within the Consolidated Results of Operations section.

Wealth Management Other Noninterest Income

Other Noninterest Income for 2024 decreased from 2023, primarily due to lower credit-related fees and swap fees; partially offset by an increase in core brokerage related fees.

Wealth Management Net Interest Income

Net Interest Income on an FTE basis for 2024 increased from 2023, primarily due to the change in reporting segment allocation methodology beginning in 2024 noted above and higher deposit balances. Net interest margin on an FTE basis increased to 2.63% for 2024 from 2.20% in 2023.

Wealth Management Provision for Credit Losses

There was a Provision for Credit Losses of \$8.8 million for 2024 compared to a Provision for Credit Losses of \$24.0 million in 2023. The Provision for Credit Losses during 2024 was primarily due to an increase in the collective reserve, primarily in the C&I portfolio, driven by a small number of downgrades and increased duration, and the CRE portfolio, driven by exposure and portfolio quality; partially offset by a decrease in individual reserves, driven by a Commercial loan charge-off. The Provision for Credit Losses during 2023 reflected an increase in the reserve evaluated on a collective basis relating to the CRE portfolio, driven by an increase in exposure and duration of the portfolio, weaker economic projections for the industry, methodology updates, and portfolio quality at the time.

Wealth Management Noninterest Expense

Wealth Management Noninterest Expense, which includes the direct expense of the reporting segment, indirect expense allocations for product and operating support, and indirect expense allocations for certain corporate support services, increased in 2024 from 2023. The increase primarily reflects higher expense allocations and Compensation expense due to headcount and base pay adjustments.

Other

Other includes expenses for Asset Management, corporate and support functions not directly incurred by, but ultimately allocated back to, our two client-focused reporting segments. Income and expenses associated with non-recurring activities such as certain costs associated with acquisitions, divestitures, litigation, restructuring, and tax adjustments are retained within Other. Other also includes the FTE adjustments of \$31.8 million, \$57.5 million, and \$45.6 million for 2024, 2023, and 2022, respectively, in order to reconcile the segment results that are reported on an internal management-reporting basis into consolidated results.

Other—Noninterest Income (Loss)

Noninterest Income (Loss) in 2024 primarily reflected the gain related to the net impact from the Visa-related transactions and the gain related to the sale of an equity investment, partially offset by the loss on sale of available for sale debt securities arising from a repositioning of the portfolio in the first quarter of 2024. In the prior year, there was \$169.5 million of losses on sales of available for sale debt securities recognized in Investment Security Gains (Losses), net, in conjunction with repositionings of the portfolio.

Other—Noninterest Expense

Noninterest Expense in 2024 included a \$70.0 million charitable contribution to the Northern Trust Foundation, a \$14.7 million expense related to the FDIC special assessment, a \$10.6 million legal settlement, and non-allocated occupancy expense primarily arising from early lease exits.

Asset Management

Asset Management, through the Corporation's various subsidiaries, supports the Asset Servicing and Wealth Management reporting segments by providing a broad range of asset management and related services and other products to clients around the world. Investment solutions are delivered through separately managed accounts, bank common and collective funds, registered investment companies, exchange traded funds, non-U.S. collective investment funds, and unregistered private investment funds. Asset Management's capabilities include active and passive equity; active and passive fixed income; cash management; multi-asset and alternative asset classes (such as private equity and hedge funds of funds); and multi-manager advisory services and products. Asset Management's activities also include overlay services and other risk management services. Asset Management operates internationally through subsidiaries and distribution arrangements and its revenue and expense are allocated fully to Asset Servicing and Wealth Management.

At December 31, 2024, Northern Trust managed \$1.6 trillion in assets for personal and institutional clients, including \$1.2 trillion for Asset Servicing clients and \$450.7 billion for Wealth Management clients. The following table presents consolidated AUM as of December 31, 2024, 2023 and 2022 by investment type.

TABLE 23: CONSOLIDATED ASSETS UNDER MANAGEMENT BY INVESTMENT TYPE

(\$ In Billions)	DECEMBER 31,			CHANGE	
	2024	2023	2022	2024 / 2023	2023 / 2022

AUM increased at year-end 2024 from year-end 2023. The increase primarily reflected favorable markets and net asset inflows. The following table presents activity in consolidated AUM by product during the years ended December 31, 2024, 2023 and 2022.

TABLE 24: ACTIVITY IN CONSOLIDATED ASSETS UNDER MANAGEMENT BY PRODUCT

Total Earning Assets		134.4		130.8		3.6	3
Total Assets		146.6		142.6		4.0	3
Liabilities and Stockholders' Equity							
Total Interest-Bearing Deposits		95.9		87.5		8.4	10
Demand and Other Noninterest-Bearing Deposits		16.8		17.7		(0.9)	(5)
Federal Funds Purchased		2.6		5.1		(2.5)	(49)
Securities Sold under Agreements to Repurchase		0.5		0.4		0.1	29
Other Borrowings ⁽³⁾		7.0		10.3		(3.3)	(32)
Total Stockholders' Equity		12.3		11.5		0.8	7

⁽¹⁾ Interest-Bearing Due from and Deposits with Banks includes the interest-bearing component of Cash and Due from Banks and Interest-Bearing Deposits with Banks as presented on the consolidated balance sheets.

⁽²⁾ Other Interest-Earning Assets includes certain community development investments, collateral deposits with certain securities depositories and clearing houses, Federal Home Loan Bank and Federal Reserve stock, and money market investments which are classified in Other Assets on the consolidated balance sheets.

⁽³⁾ Other Borrowings primarily includes advances from the Federal Home Loan Bank of Chicago.

Average balances are considered to be a better measure of balance sheet trends, as period-end balances can be impacted by the timing of deposit and withdrawal activity involving large client balances. Average earning assets increased from the prior year primarily due to higher client deposits, partially offset by lower borrowing activity, the net of which resulted in higher funding of earning assets.

Stockholders' Equity. The increase in average Stockholders' Equity was primarily due to higher Retained Earnings.

During the year ended December 31, 2024, the Corporation declared cash dividends totaling \$608.4 million to common stockholders and repurchased 10,489,770 shares of common stock, including 424,806 shares withheld to satisfy tax withholding obligations related to share-based compensation, at a total cost of \$937.8 million (\$89.41 average price per share). During the year ended December 31, 2024, the Corporation declared cash dividends totaling \$41.8 million to preferred stockholders.

During the year ended December 31, 2023, the Corporation declared cash dividends totaling \$630.2 million to common stockholders and repurchased 4,384,678 shares of common stock, including 378,130 shares withheld to satisfy tax withholding obligations related to share-based compensation, at a total cost of \$347.5 million (\$79.26 average price per share). During the year ended December 31, 2023, the Corporation declared cash dividends totaling \$41.8 million to preferred stockholders.

Asset Quality**Securities Portfolio**

The following table presents the remaining maturity and average yield of Northern Trust's held to maturity (HTM) debt securities and available for sale (AFS) debt securities by security type as of December 31, 2024. Depending on market conditions, Northern Trust continuously seeks to optimize its securities portfolio, including through purchases and sales of AFS debt securities from time to time.

Note: Yield is calculated on amortized cost and presented on a taxable equivalent basis giving effect to the applicable federal and state tax rates.

Northern Trust maintains a high quality debt securities portfolio. The following tables provide the book value of debt securities by credit rating using ratings from Moody's, S&P Global or Fitch Ratings. Book value is fair value for AFS debt securities and amortized cost for HTM debt securities. Debt securities not explicitly rated were grouped where possible under the credit rating of the issuer of the security.

As of both December 31, 2024 and December 31, 2023, HTM debt securities not rated by Moody's, S&P Global or Fitch Ratings primarily consisted of certificates of deposit with a remaining life of less than six months, as well as investments purchased by Northern Trust to fulfill its obligations under the Community Reinvestment Act (CRA). Northern Trust fulfills its obligations under the CRA by making qualified investments for purposes of supporting institutions and programs that benefit low-to-moderate income communities within Northern Trust's market area.

For additional information relating to the securities portfolio, refer to Note 4, "Securities," provided in Item 8, "Financial Statements and Supplementary Data."

Loans

For additional information relating to the loan portfolio, refer to Note 5, "Loans," and Note 7, "Concentrations of Credit Risk" provided in Item 8, "Financial Statements and Supplementary Data."

The following table presents the remaining maturity of loans by segment and class as of December 31, 2024.

Nonaccrual Assets and 90 Days Past Due Loans

Nonaccrual assets consist of nonaccrual loans and other real estate owned (OREO). OREO is composed of commercial and residential properties acquired in partial or total satisfaction of loans. Loans that are delinquent 90 days or more and still accruing interest can fluctuate widely at any reporting period based on the timing of cash collections, renegotiation and renewals. For additional information relating to nonaccrual loans, refer to Note 5, "Loans," provided in Item 8, "Financial Statements and Supplementary Data."

The following table presents nonaccrual assets and loans that were delinquent 90 days or more and still accruing interest at December 31, 2024 and 2023.

TABLE 31: NONACCRUAL ASSETS

(\$ In Millions)	DECEMBER 31, 2024	2024 % OF TOTAL NONACCRUAL LOANS	DECEMBER 31, 2023	2023 % OF TOTAL NONACCRUAL LOANS

Nonaccrual Loans to Total Loans	0.13 %		0.13 %	
Nonaccrual Coverage (Loans Allowance / Nonaccrual Loans)	3.0x		2.8x	

Nonaccrual assets as of December 31, 2024 decreased from December 31, 2023, primarily due to a private client loan payoff, partially offset by the addition of one commercial loan during the current year. In addition to the negative impact on Net Interest Income and the risk of credit losses, nonaccrual assets also increase operating costs due to the expense associated with collection efforts. Changes in the level of nonaccrual assets may be indicative of changes in the credit quality of one or more loan classes. Changes in credit quality impact the allowance for credit losses through the resultant adjustment of the allowance evaluated on an individual basis and the quantitative and qualitative factors used in the determination of the allowance evaluated on a collective basis within the allowance for credit losses.

Allowance for Credit Losses

The Allowance for Credit Losses—which represents management's best estimate of lifetime expected credit losses related to various portfolios subject to credit risk, off-balance sheet credit exposure, and specific borrower relationships—is determined by management through a disciplined credit review process. Northern Trust measures expected credit losses of financial assets with similar risk characteristics on a collective basis. A financial asset is measured individually if it does not share similar risk characteristics with other financial assets and the related allowance is determined through an individual evaluation.

Management's estimates utilized in establishing an appropriate level of allowance for credit losses are not dependent on any single assumption. In determining an appropriate allowance level, management evaluates numerous variables, many of which are interrelated or dependent on other assumptions and estimates, and takes into consideration past events, current conditions and reasonable and supportable forecasts.

The results of the credit reserve estimation methodology are reviewed quarterly by Northern Trust's Credit Loss Reserve Committee, which receives input from Financial Risk Management, Treasury, Corporate Finance, the Economic Research Department, and each of Northern Trust's reporting business units.

As of December 31, 2024, the Allowance for Credit Losses related to loans, undrawn loan commitments and standby letters of credit, HTM debt securities, and other financial assets, was \$168.0 million, \$30.4 million, \$6.5 million, and \$1.0 million, respectively. As of December 31, 2023, the Allowance for Credit Losses related to loans, undrawn loan commitments and standby letters of credit, HTM debt securities, and other financial assets, was \$178.7 million, \$26.9 million, \$12.7 million, and \$0.9 million, respectively. For additional information relating to the Allowance for Credit Losses and the changes in the Allowance for Credit Losses during the years ended December 31, 2024 and 2023 due to charge-offs, recoveries and provisions for credit losses, refer to Note 6, "Allowance for Credit Losses," provided in Item 8, "Financial Statements and Supplementary Data."

The following table shows the net recoveries (charge-offs) to average loans and leases by segment and class at December 31, 2024, 2023, and 2022.

Total Select Average Loans and Leases ⁽¹⁾	\$ 36,986.9	\$ 37,811.4	\$ 36,929.5

⁽¹⁾ The table excludes the Other and Non-U.S. average loan segments.

⁽²⁾ The ratio reflects a charge-off in the third quarter of 2022 in association with a sale of the last lease remaining in Northern Trust's lease portfolio. As of December 31, 2024, December 31, 2023 and December 31, 2022, there were no leases outstanding.

⁽³⁾ As of December 31, 2023, there was a \$0.5 million net charge-off in other commercial which was not reflected as the segment is excluded from the table above.

Net recoveries (charge-offs) for the Non-U.S. segment was zero and therefore the ratio of net recoveries (charge-offs) to average loans and leases was excluded from the above table. Total average loans and leases for all loan portfolio categories were \$40.9 billion, \$42.2 billion, and \$41.0 billion for the years ended December 31, 2024, 2023, and 2022, respectively.

The following table provides the allowance evaluated on an individual and collective basis for the loans portfolio by segment and class at December 31, 2024 and 2023.

TABLE 33: ALLOCATION OF THE ALLOWANCE FOR CREDIT LOSSES

(\$ In Millions)	DECEMBER 31,			
	2024		2023

Total Personal	29.6	53	31.9	46
Total Allowance Evaluated on a Collective Basis	\$ 195.2		\$ 192.2	
Total Allowance for Credit Losses	\$ 198.4		\$ 205.6	
Allowance Assigned to:				
Loans	\$ 168.0		\$ 178.7	
Undrawn Commitments and Standby Letters of Credit ⁽¹⁾	30.4		26.9	
Total Allowance for Credit Losses	\$ 198.4		\$ 205.6	
Allowance Assigned to Loans to Total Loans	0.39 %		0.38 %	

⁽¹⁾ The portion of the allowance assigned to undrawn loan commitments and standby letters of credit is reported in Other Liabilities on the consolidated balance sheets.

Allowance Related to Credit Exposure Evaluated on an Individual Basis: The allowance evaluated on an individual basis is determined through individual evaluations of loans and lending-related commitments that have defaulted, generally those with Borrower Ratings of 8 and 9. These evaluations are based on expected future cash flows, the value of collateral, and other factors that may impact the borrower's ability to pay.

The allowance evaluated on an individual basis for Loans decreased \$10.2 million from \$13.4 million at December 31, 2023 to \$3.2 million at December 31, 2024, primarily attributable to a commercial loan charge-off in 2024.

Allowance Related to Credit Exposure Evaluated on a Collective Basis: The allowance evaluated on a collective basis for loans decreased \$0.5 million to \$164.8 million at December 31, 2024, compared with \$165.3 million at December 31, 2023. The allowance evaluated on a collective basis for undrawn loan commitments and letters of credit increased \$3.5 million to \$30.4 million at December 31, 2024, compared with \$26.9 million at December 31, 2023, primarily in the C&I portfolio, driven by portfolio changes.

Capital Expenditures

Capital expenditures for 2024 totaled \$745.5 million, of which \$644.0 million was for software, \$49.3 million was for computer hardware, \$45.0 million was for building and leasehold improvements, and \$7.2 million was for furnishings.

Capital expenditures for 2023 totaled \$675.8 million, of which \$559.3 million was for software, \$56.4 million was for computer hardware, \$56.0 million was for building and leasehold improvements, and \$4.1 million was for furnishings.

Software amortization and depreciation on computer hardware are charged to Equipment and Software expense. Depreciation on building and leasehold improvements and on furnishings is charged to Occupancy expense and Equipment and Software expense, respectively.

Northern Trust's technology investments support our core objectives to modernize the infrastructure, enhance resiliency, and develop capabilities so that we continue to deliver secure and innovative solutions to clients across the globe.

In addition to information technology, Northern Trust continues to invest in renovation and relocation projects to optimize our real estate footprint and modernize our existing offices for new ways of working.

Deposits

The following table provides the scheduled maturity of total time deposits in denominations of \$250,000 or greater at December 31, 2024. For additional information, refer to Note 11, "Deposits," provided in Item 8, "Financial Statements and Supplementary Data."

TABLE 34: REMAINING MATURITY OF TIME DEPOSITS \$250,000 OR MORE

(In Millions)	DECEMBER 31, 2024			TOTAL
	U.S. OFFICE CERTIFICATES OF DEPOSIT	OTHER TIME	NON-U.S. OFFICES	
3 Months or Less	\$ 3,354.7	\$ 2,116.1	\$	5,470.8
Over 3 Months through 6 Months	828.7	50.8		879.5
Over 6 Months through 12 Months	661.7	—		661.7
Over 12 Months	101.4	—		101.4
Total	\$ 4,946.5	\$ 2,166.9	\$	7,113.4

Deposits not insured by the FDIC as of December 31, 2024 and 2023 totaled \$115.4 billion and \$109.9 billion, respectively. These deposit amounts are derived by adding estimated U.S. office uninsured deposits as allowed by Federal Financial Institutions Examination Council instructions to all non-U.S. office deposits. Estimated uninsured U.S. office deposits are determined by calculating and totaling the deposits in excess of the deposit insurance limit on an individual account basis.

Short-Term Borrowings

Short-term borrowings includes Federal Funds Purchased, Securities Sold under Agreements to Repurchase, and Other Borrowings. Securities purchased under agreements to resell and securities sold under agreements to repurchase are accounted for as collateralized financings and recorded at the amounts at which the securities were acquired or sold plus accrued interest. To minimize any potential credit risk associated with these transactions, the fair value of the securities purchased or sold is monitored, limits are set on exposure with counterparties, and the financial condition of counterparties is regularly assessed. It is Northern Trust's policy to take possession, either directly or via third-party custodians, of securities purchased under agreements to resell. Securities sold under agreements to repurchase are either directly held by, or pledged to the counterparty until the repurchase. Northern Trust nets securities sold under agreements to repurchase against those purchased under agreements to resell when the requirements to net are met. See Note 24, "Commitments and Contingent Liabilities," Note 26, "Securities Purchased Under Agreements to Resell and Securities Sold Under Agreements to Repurchase," and Note 27, "Offsetting of Assets and Liabilities" provided in Item 8, "Financial Statements and Supplementary Data" for additional information on our repurchase and reverse repurchase agreements.

Geographic Area Information

Northern Trust's non-U.S. activities are primarily related to its asset servicing, asset management, foreign exchange, cash management, and commercial banking businesses. The operations of Northern Trust are managed on a reporting segment basis and include components of both U.S. and non-U.S. source assets. Non-U.S. source assets are not separately identified in Northern Trust's internal management reporting system. However, Northern Trust is required to disclose non-U.S. activities based on the domicile of the customer. Due to the complex and integrated nature of Northern Trust's activities, it is difficult to segregate with precision assets between U.S. and non-U.S.-domiciled customers. Therefore, certain subjective estimates and assumptions have been made to allocate assets between U.S. and non-U.S. operations.

The following tables present selected average assets and liabilities attributable to non-U.S. operations (based on the obligor's domicile). For additional information refer to Note 31, "Reporting Segments and Related Information," provided in Item 8, "Financial Statements and Supplementary Data."

TABLE 35: SELECTED AVERAGE ASSETS AND LIABILITIES ATTRIBUTABLE TO NON-U.S. OPERATIONS

(In Millions)	2024	2023
Total Assets	\$ 23,565.3	\$ 24,927.8
Time Deposits with Banks	1,626.0	1,847.7
Loans	1,768.9	2,349.5
Non-U.S. Investments	12,814.6	14,565.0
Total Liabilities	72,150.2	67,964.2
Deposits	70,364.5	66,232.9

STATEMENTS OF CASH FLOWS

The following discusses the statement of cash flow activities for the years ended December 31, 2024, 2023, and 2022.

TABLE 36: CASH FLOW ACTIVITY SUMMARY

(In Millions)	FOR THE YEAR ENDED DECEMBER 31,		
	2024	2023	2022
Net cash provided by (used in):			
Operating activities	\$ (486.0)	\$ 2,625.6	\$ 2,392.4
Investing activities	(2,563.5)	4,784.1	25,929.8
Financing activities	3,439.5	(7,182.6)	(26,437.4)
Effect of Foreign Currency Exchange Rates on Cash	(504.3)	(89.8)	(287.4)
Change in Cash and Due from Banks	\$ (114.3)	\$ 137.3	\$ 1,597.4

Operating Activities

Net cash used in operating activities of \$486.0 million for the year ended December 31, 2024 was primarily attributable to higher net collateral deposited with derivative counterparties and pension plan contributions.

For the year ended December 31, 2023, net cash provided by operating activities of \$2.6 billion was primarily attributable to period earnings and the impact of other operating activities, net.

Investing Activities

Net cash used in investing activities of \$2.6 billion for the year ended December 31, 2024 was primarily attributable to net purchases of available for sale debt securities and lower levels of deposits with the Federal Reserve and other central banks, partially offset by lower levels of loans, net proceeds from held to maturity debt securities, and the proceeds from the sale of Visa Class C common shares.

For the year ended December 31, 2023, net cash provided by investing activities of \$4.8 billion was primarily attributable to lower levels of deposits with the Federal Reserve and other central banks and net proceeds from available for sale debt securities, partially offset by higher levels of loans.

Financing Activities

Net cash provided by financing activities of \$3.4 billion for the year ended December 31, 2024 was primarily attributable to increased levels of total deposits, partially offset by common stock repurchases and lower levels of federal funds purchased. The increase in total deposits was primarily attributable to non-U.S. offices and savings certificates and other time deposits.

For the year ended December 31, 2023, net cash used in financing activities of \$7.2 billion was primarily attributable to decreased levels of total deposits. The decrease in total deposits was primarily attributable to lower levels of savings, money market and other interest-bearing.

CAPITAL MANAGEMENT

One of Northern Trust's primary objectives is to maintain a strong capital position to merit the confidence of clients, counterparties, creditors, regulators and stockholders. A strong capital position helps Northern Trust execute its strategies and withstand unforeseen adverse developments.

Senior management, with oversight from the Capital Governance Committee of the Board of Directors and the full Board of Directors, is responsible for capital management and planning. Northern Trust manages its capital on both a total Corporation basis and a legal entity basis. The Capital Committee is responsible for measuring and managing capital metrics against levels set forth within the Capital Policy approved by the Capital Governance Committee of the Board of Directors. In establishing the metrics related to capital, a variety of factors are taken into consideration, including the unique risk profiles of Northern Trust's businesses, regulatory requirements, capital levels relative to peers, economic and market forecasts, and the impact on credit ratings.

Capital levels increased in 2024 as average stockholders' equity increased \$803.0 million, or 7%, to \$12.3 billion. Total stockholders' equity was \$12.8 billion at December 31, 2024, as compared to \$11.9 billion at December 31, 2023. Preferred dividends totaling \$41.8 million were declared in 2024. During 2024, the Corporation maintained its quarterly common stock dividend at \$0.75 per common share. Common dividends totaling \$608.4 million were declared in 2024. During the year ended December 31, 2024, the Corporation repurchased 10,489,770 shares of common stock, including 424,806 shares withheld related to share-based compensation, at an average price per share of \$89.41.

In accordance with Basel III requirements, capital ratios are calculated using both the standardized and advanced approaches. As required by the Dodd-Frank Act, the lower of each capital ratio calculated under the standardized approach and the advanced approach serves as the effective ratio for purposes of determining capital adequacy. The following table provides a reconciliation of the Corporation's common stockholders' equity to total risk-based capital and its risk-based capital ratios, under the applicable U.S. regulatory rules as of December 31, 2024 and 2023.

TABLE 37: CAPITAL ADEQUACY

(\$ In Millions)	DECEMBER 31, 2024		DECEMBER 31, 2023	
	STANDARDIZED APPROACH	ADVANCED APPROACH	STANDARDIZED APPROACH	ADVANCED APPROACH
Common Equity Tier 1 Capital				
Common Stockholders' Equity	\$ 11,903.5	\$ 11,903.5	\$ 11,013.1	\$ 11,013.1
Goodwill and Other Intangible Assets, net of Deferred Tax Liability	(699.0)	(699.0)	(722.2)	(722.2)
Other	(166.3)	(166.3)	(111.5)	(111.5)
Total Common Equity Tier 1 Capital	11,038.2	11,038.2	10,179.4	10,179.4
Additional Tier 1 Capital				
Preferred Stock	884.8	884.8	884.9	884.9
Other	(52.8)	(52.8)	(40.4)	(40.4)
Total Additional Tier 1 Capital	832.0	832.0	844.5	844.5
Total Tier 1 Capital	11,870.2	11,870.2	11,023.9	11,023.9
Tier 2 Capital				
Qualifying Allowance for Credit Losses	205.9	—	219.2	—
Qualifying Subordinated Debt	1,347.1	1,347.1	1,490.8	1,490.8
Total Tier 2 Capital	1,553.0	1,347.1	1,710.0	1,490.8
Total Risk-Based Capital	\$ 13,423.2	\$ 13,217.3	\$ 12,733.9	\$ 12,514.7
Risk-Weighted Assets ⁽¹⁾	\$ 88,939.7	\$ 75,920.9	\$ 89,527.4	\$ 75,980.0
Total Assets – End of Period (EOP)	155,508.4	155,508.4	150,783.1	150,783.1
Adjusted Average Fourth Quarter Assets ⁽²⁾	145,666.8	145,666.8	135,701.9	135,701.9
Total Loans – EOP	43,390.6	43,390.6	47,617.0	47,617.0
Common Stockholders' Equity to:				
Total Loans – EOP	27.43 %	27.43 %	23.13 %	23.13 %
Total Assets – EOP	7.65	7.65	7.30	7.30
Risk-Based Capital Ratios				
Common Equity Tier 1 Capital	12.4 %	14.5 %	11.4 %	13.4 %
Tier 1 Capital	13.3	15.6	12.3	14.5
Total Capital (Tier 1 and Tier 2)	15.1	17.4	14.2	16.5
Tier 1 Leverage	8.1	8.1	8.1	8.1
Supplementary Leverage	N/A	8.9	N/A	8.6

⁽¹⁾ Risk-weighted assets exclude, as applicable under each regulatory approach, amounts primarily related to goodwill, certain other intangible assets, and net unrealized gains or losses on securities and reflect adjustments for excess allowances for credit losses that have been excluded from Tier 1 and Tier 2 capital, if any.

⁽²⁾ Adjusted average fourth quarter assets exclude amounts primarily related to goodwill, other intangible assets, and net unrealized gains or losses on securities.

As of December 31, 2024 and 2023, the Corporation's capital ratios exceeded the requirements for classification as "well-capitalized" under applicable U.S. regulatory requirements.

Northern Trust is a Category II institution as defined by the Federal Reserve Board which requires us to adhere to regulatory capital standards. In adhering to these standards, Northern Trust engages in a range of reporting and activities with regulators to affirm our financial strength and stability, including but not limited to, capital adequacy reporting that deducts any net unrealized losses related to AFS securities from reported capital, and stringent, annual company-run and supervisory stress testing in the form of Comprehensive Capital Analysis and Review (CCAR) exercises, which confirms our ability to remain solvent under severely adverse market conditions.

The results of the 2024 DFAST, published by the Federal Reserve Board on June 26, 2024, resulted in Northern Trust's stress capital buffer and effective Common Equity Tier 1 capital ratio minimum requirement remaining constant at 2.5% and 7.0%, respectively, for the annual capital plan cycle, which began on October 1, 2024 and continues through September 30, 2025.

In July 2023, the U.S. banking regulators issued the Basel III Endgame Proposal, which would change how risk-based capital requirements are determined for banking organizations, including Northern Trust. The proposal would eliminate the existing advanced approach methodologies for determining RWA and replace it with a new expanded risk-based approach. The proposed rule has not been finalized and U.S. regulators have indicated their intent to revise and reissue the proposal. No time table has been provided for the re-proposal or its effective date.

Further information regarding the Corporation's and the Bank's capital ratios and the minimum requirements for classification as "well-capitalized" is provided in the "Supervision and Regulation—Capital Adequacy Requirements" section of Item 1, "Business," and Note 32, "Regulatory Capital Requirements," provided in Item 8, "Financial Statements and Supplementary Data."

CRITICAL ACCOUNTING ESTIMATES

Our significant accounting policies are described in Note 1, "Summary of Significant Accounting Policies," provided in Item 8, "Financial Statements and Supplementary Data." The use of estimates and assumptions is required in the preparation of financial statements in conformity with GAAP and actual results could differ from those estimates. The SEC has issued guidance relating to the disclosure of critical accounting estimates. Critical accounting estimates are those that require management to make subjective or complex judgments about the effect of matters that are inherently uncertain and may change in subsequent periods. Changes that may be required in the underlying assumptions or estimates in these areas could have a material impact on Northern Trust's future financial condition and results of operations. Due to the inherent imprecision in accounting estimates, other estimates or assumptions could reasonably have been used in 2024 and changes in estimates are reasonably likely to occur from period to period.

For Northern Trust, accounting estimates that are viewed as critical are those relating to the allowance for credit losses and pension plan accounting. Management has discussed the development and selection of each critical accounting estimate with the Audit Committee of the Board of Directors (Audit Committee).

Allowance for Credit Losses

The Allowance for Credit Losses—which represents management's estimate of lifetime expected credit losses related to various portfolios subject to credit risk, off-balance sheet credit exposure, and specific borrower relationships—is determined by management through a disciplined credit review process. Northern Trust measures expected credit losses of financial assets with similar risk characteristics on a collective basis. The allowance for a financial asset that does not share similar risk characteristics with other financial assets is determined through an individual evaluation.

Management's estimates utilized in establishing an appropriate level of Allowance for Credit Losses are not dependent on any single assumption. In determining an appropriate allowance level, management evaluates numerous variables and takes into consideration past events, current conditions and reasonable and supportable forecasts.

The Allowance for Credit Losses consists of the following components:

Allowance Evaluated on a Collective Basis. Northern Trust utilizes a quantitative probability of default/loss given default approach for the calculation of its credit allowance on a collective basis. For each segment, the probability of default and the loss given default are applied to the exposure at default for each projected quarter to determine the quantitative component of the allowance. The quantitative allowance is then reviewed within a comprehensive qualitative adjustment framework, through which management applies judgment by assessing internal risk factors, potential limitations in the quantitative methodology, and other factors that are not fully contemplated in the forecast to compute an adjustment to the quantitative allowance for each segment and class of the loan portfolio.

The allowance estimation methodology for the collective assessment is based on data representative of the Corporation's financial asset portfolio from a historical observation period that includes both expansionary and recessionary periods. The estimation methodology and the related qualitative adjustment framework segregate the loan portfolio into segments and classes based on similar risk characteristics or risk monitoring methods.

For each class, the probability of default and loss given default are derived for each quarter of the remaining life of each instrument. For the first two years (the reasonable and supportable period), these factors are derived by applying quarterly macroeconomic projections using models developed from historical data on macroeconomic factors and loans with similar characteristics. For periods beyond the reasonable and supportable period, Northern Trust reverts to its long-run historical loss experience on a straight-line basis over four quarters. The projected exposure at default for every quarter is based on contractual balance projections as of each quarter-end, with adjustments made for potential draws on off-balance sheet commitments.

Estimating expected lifetime losses requires the use of projected macroeconomic factors. The Corporation uses multiple forecasts approved by Northern Trust's Macroeconomic Scenario Development Committee (MSDC). The baseline forecast aligns with the Corporation's latest thinking on macroeconomic projections for the next eight quarters. An alternative scenario is also considered, which reflects a recession that incorporates the experiences of a wider set of historical economic cycles. The forecasts are probability-weighted at each evaluation period and are management's best estimate of future economic projections at that time.

The allowance estimate is sensitive to changes in portfolio composition, portfolio quality, and macroeconomic forecasts. Increases in the amount of borrowing and material downgrades to the quality of the lending portfolio will

increase the reserve, all else equal. Similarly, deteriorating projections for macroeconomic conditions will increase the reserve. Macroeconomic factors that are particularly correlated to Northern Trust's loan portfolio are GDP growth, unemployment, non-farm employment, corporate profits, consumer spending, personal income, commercial real estate prices, credit spreads, and market volatility. To demonstrate the sensitivity to changes in macroeconomic conditions, Northern Trust applied a 100% probability weighting to downturn conditions, resulting in an increase to the collective component of the allowance for the loan portfolio of approximately \$126.5 million. The investment security and other financial assets portfolios are less sensitive to macroeconomic factors in terms of overall reserve impact due to factors such as high credit quality, short duration, and low historical losses.

The commercial and institutional (C&I) portfolio utilizes Northern Trust's internal borrower rating assessments to determine initial credit quality. A sensitivity analysis was performed to determine the impact of upgrades or downgrades by shifting the rating up or down by one rating class, assuming no changes to other factors, such as macroeconomic projections or qualitative adjustments. The analysis excludes defaulted loans and does not assume a default event; hence, borrowers in the lowest non-default rating class were not downgraded. Similarly, those in the highest rating class could not be upgraded. Assuming the final forecast probability weighting, the collective component of the allowance assigned to the C&I portfolio would increase by approximately \$77.6 million if all C&I borrowers were downgraded by one performing rating class. The C&I collective allowance would decrease by approximately \$38.9 million if borrower ratings were upgraded by one rating class.

The results of the credit reserve estimation methodology are reviewed quarterly by Northern Trust's Credit Loss Reserve Committee, which receives input from Financial Risk Management, Treasury, Corporate Finance, the Economic Research Department, and each of Northern Trust's reporting business units. The Credit Loss Reserve Committee determines the probability weights applied to each forecast approved by MSDC, and also reviews and approves qualitative adjustments to the collective allowance in line with Northern Trust's qualitative adjustment framework.

Allowance Evaluated on an Individual Basis. The allowance evaluated on an individual basis is determined through individual evaluations of loans and lending-related commitments that have defaulted, generally those with Borrower Ratings of 8 and 9. These evaluations are based on expected future cash flows, the value of collateral, and other factors that may impact the borrowers' ability to pay. For defaulted loans for which the amount of allowance, if any, is determined based on the value of the underlying real estate collateral, third-party appraisals are typically obtained and utilized by management. These appraisals are generally less than twelve months old and are subject to adjustments to reflect management's judgment as to the realizable value of the collateral.

Pension Plan Accounting

Northern Trust maintains a noncontributory defined benefit pension plan covering substantially all U.S. employees (U.S. Qualified Plan) and a U.S. noncontributory supplemental pension plan (U.S. Non-Qualified Plan). Certain European-based employees also retain benefits in local defined benefit pension plans, of which the majority are closed to new employees and to future benefit accruals. Measuring cost and reporting liabilities resulting from defined benefit pension plans requires the use of several assumptions regarding future interest rates, asset returns, compensation increases, mortality rates, and other actuarial-based projections relating to the plans. Due to the long-term nature of this obligation and the estimates that are required to be made, the assumptions used in determining the periodic pension expense and the projected benefit obligation are closely monitored and reviewed annually for adjustments that may be required. Pension accounting guidance requires that differences between estimates and actual experience be recognized as other comprehensive income in the period in which they occur. The differences are amortized into net periodic pension expense from accumulated other comprehensive income over the average remaining service period of active participants or over the expected remaining lifetime of plan participants for plans that have been previously frozen. As a result, differences between the estimates made in the calculation of periodic pension expense and the projected benefit obligation and actual experience affect stockholders' equity in the period in which they occur but continue to be recognized as expense systematically and gradually over subsequent periods.

Northern Trust recognizes the significant impact that these pension-related assumptions have on the determination of the pension obligations and related expense and has established procedures for monitoring and setting these assumptions each year. These procedures include an annual review of actual demographic and investment experience with the pension plans' actuaries. In addition to actual experience, adjustments to these assumptions consider observable yields on fixed income securities, known compensation trends and policies, as well as economic conditions and investment strategies that may impact the estimated long-term rate of return on plan assets.

In determining the pension expense for the U.S. Qualified Plan and for the U.S. Non-Qualified Plan in 2024, Northern Trust utilized a discount rate of 5.03% and 4.95% as of December 31, 2023, respectively. For both plans, the rate of increase in the compensation level is based on a graded schedule from 9.00% to 2.50% that averaged 5.56%. The expected long-term rate of return on U.S. Qualified Plan assets was 7.25% as of December 31, 2023.

In evaluating pension-related assumptions for the U.S. pension plans as of Northern Trust's December 31, 2024 measurement date, the following were considered:

- **Discount Rate:** Northern Trust estimates the discount rate for its U.S. pension plans by applying the plan specific projected cash flows for future benefit payments for each plan to the Aon AA Above Median yield curve as of the measurement date. This yield curve is composed of individual zero-coupon interest rates for 198 different time periods over a 99-year time horizon. Zero-coupon rates utilized by the yield curve are mathematically derived from observable market yields for AA-rated corporate bonds. This yield curve model referenced by Northern Trust in establishing the discount rate resulted in a rate of 5.70% and 5.55% at December 31, 2024 for the U.S. Qualified and U.S. Non-Qualified Plans, respectively.
- **Compensation Level:** Based on a review of actual and anticipated salary experience, the compensation scale assumption is, consistent with prior year, based on a graded schedule from 9.00% to 2.50% that averages 5.56%.
- **Rate of Return on Plan Assets:** The expected return on plan assets is based on an estimate of the long-term (30 years) rate of return on plan assets, which is determined using a building block approach that considers the current asset mix and estimates of return by asset class based on historical experience, giving proper consideration to diversification and rebalancing. Current market factors such as inflation and interest rates are also evaluated before long-term capital market assumptions are determined. Peer data and historical returns are reviewed to check for reasonability and appropriateness. As a result of these analyses, Northern Trust's rate of return assumption for the U.S. Qualified Plan continues to be 7.25% for 2025.
- **Mortality Table:** Northern Trust had adopted the aggregate Pri-2012 mortality table with a 2012 base year in 2019. Northern Trust's pension obligations reflect proposed future improvement under scale MP-2021, which was released by the Society of Actuaries in October 2021. As in prior year, no change to these assumptions was made in 2024 since the Society of Actuaries did not release any updates to its mortality tables and improvement scales in 2024 due to the still uncertain long-term impacts of the COVID-19 pandemic. Mortality assumptions on lump sum payments remain static and continue to be in line with the IRS prescribed table for minimum lump sums in 2025.

Net pension expense in 2025 is expected to increase slightly by approximately \$1.0 million, primarily driven by higher amortization of previously incurred asset losses, partially offset by the positive expense impacts from higher discount rates and the \$125 million contribution made to the U.S. Qualified Plan at the beginning of 2025.

In order to illustrate the sensitivity of these assumptions on the expected U.S. pension plans' 2025 periodic pension expense and the projected benefit obligation as of December 31, 2024, the following table is presented to show the effect of increasing or decreasing each of the assumptions by 25 basis points.

TABLE 38: SENSITIVITY OF U.S. PENSION PLANS ASSUMPTIONS

(In Millions)	25 BASIS POINT INCREASE	25 BASIS POINT DECREASE
Increase (Decrease) in 2025 Pension Expense		
Discount Rate Change	\$ (2.7)	\$ 2.8
Compensation Level Change	2.4	(2.3)
Rate of Return on Plan Assets Change	(3.9)	3.9
Increase (Decrease) in December 31, 2024 Projected Benefit Obligation		
Discount Rate Change	(30.0)	31.4
Compensation Level Change	9.1	(8.8)

Pension Contributions. The deduction limits specified by the Internal Revenue Code for contributions made by sponsors of defined benefit pension plans are based on a "Target Liability" under the provisions of the Pension Protection Act of 2006. Northern Trust contributed to the U.S. Qualified Plan \$125.0 million for the 2025 plan year and \$200.0 million for the 2024 plan year at the beginning of 2025 and 2024, respectively. The remaining maximum deductible contribution for 2025 is estimated at \$255.0 million. The minimum required contribution to the U.S. Qualified Plan is expected to be zero for 2025.

RECENT ACCOUNTING PRONOUNCEMENTS AND DEVELOPMENTS

In December 2023, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2023-09, "Income Taxes (Topic 740): Improvements to Income Tax Disclosures" (ASU 2023-09). ASU 2023-09 enhances disclosures by further disaggregating existing annual income tax disclosures related to the effective tax rate reconciliation and income taxes paid. ASU 2023-09 is effective for annual periods beginning after December 15, 2024, although early adoption is permitted. Upon adoption, the impact of ASU 2023-09 will be limited to certain enhancements within the notes to the consolidated financial statements and therefore is not expected to have an impact on Northern Trust's consolidated balance sheets or consolidated statements of income.

In November 2024, the FASB issued ASU No. 2024-03, "Income Statement—Reporting Comprehensive Income—Expense Disaggregation Disclosures (Subtopic 220-40): Disaggregation of Income Statement Expenses" (ASU 2024-03). ASU 2024-03 requires disaggregated disclosures in tabular format for specific income statement expense categories as well as a narrative disclosure about selling expenses. The amendments in ASU 2024-03 do not change or remove existing income statement presentation or disclosure requirements. ASU 2024-03 is effective for annual periods beginning after December 15, 2026, and interim periods beginning after December 15, 2027. Early adoption is permitted. Upon adoption, the impact of ASU 2024-03 will be limited to certain enhancements within the notes to the consolidated financial statements and therefore is not expected to have an impact on Northern Trust's consolidated balance sheets or consolidated statements of income.

In November 2024, the FASB issued ASU No. 2024-04, "Debt—Debt with Conversion and Other Options (Subtopic 470-20): Induced Conversions of Convertible Debt Instruments" (ASU 2024-04). The amendments in ASU 2024-04 provide additional guidance for determining whether certain settlements of convertible debt instruments with conversion terms that differ from the instruments' preexisting terms should be accounted for as an induced conversion or extinguishment of convertible debt. ASU 2024-04 is effective for interim and annual periods beginning after December 15, 2025, although early adoption is permitted. Upon adoption, ASU 2024-04 is not expected to have a significant impact on Northern Trust's consolidated balance sheets or consolidated statements of income.

RISK MANAGEMENT

Risk Management Overview

Northern Trust employs an integrated risk management framework to enable a risk-informed profile and support its business decisions and the execution of its corporate strategies. The framework provides a methodology to identify, manage, report and govern both internal and external risks to Northern Trust, and promotes a culture of risk awareness and good conduct across the organization. Northern Trust's risk culture encompasses the general awareness, attitude and conduct of employees with respect to risk and the management of risk across all lines of defense within the organization. Northern Trust cultivates a culture of effective risk management by defining and embedding risk management accountabilities in all employee performance expectations and provides training, development and performance rewards to reinforce this culture.

Northern Trust's risk management framework contains three inter-related elements, designed to support consistent enterprise risk identification, management and reporting: a comprehensive risk inventory, a static taxonomy of risk categories and a dynamic taxonomy of risk themes. The risk inventory is a detailed register of the risks inherently faced by Northern Trust. The risk categories and risk themes are classification systems used for classifying and managing the risk inventory and enabling different risk profile views. All identified risks inherent in Northern Trust's business activities are cataloged into the following risk categories: credit, operational, fiduciary, compliance, liquidity, market, and strategic risk. All material risks are also dynamically cataloged into various risk themes which are defined groupings that share common characteristics, focus on business outcomes and span across risk categories.

Northern Trust implements its risk management framework through a "three lines of defense" operating model, embedding a robust risk management capability within its businesses. The model, used to communicate risk management expectations across the organization, contains three roles, each with a complementary level of risk management accountability. Within this operating model, Northern Trust's businesses are the first line of defense for protecting it against the risks inherent in its businesses and are supported by dedicated business risk management teams. The Risk Management function, the second line of defense, sets the direction for Northern Trust's risk management activities and provides aggregate risk oversight and reporting in support of risk governance. Audit Services, the third line of defense, provides independent assurance as to the effectiveness of the integrated risk framework.

Risk Governance and Oversight Overview

Risk governance is an integral aspect of corporate governance at Northern Trust, and includes clearly defined accountabilities, expectations, internal controls and processes for risk-based decision-making and escalation of issues. The following diagram provides a high-level overview of Northern Trust's risk governance structure, highlighting oversight by the Board of Directors and key risk-related committees.

TABLE 39: RISK GOVERNANCE STRUCTURE

Northern Trust Corporation Board of Directors						
Audit Committee	Business Risk Committee – Cybersecurity Risk Oversight Subcommittee		Capital Governance Committee	Human Capital and Compensation Committee		
Global Enterprise Risk Committee (GERC)						
Credit Risk Committee	Market & Liquidity Risk Committee	Operational Risk Committee	Fiduciary Risk Committee	Compliance & Ethics Oversight Committee	Information Technology Risk Committee	Model Risk Oversight Committee

The Board of Directors provides oversight of risk management directly and through certain of its committees: the Audit Committee, the Business Risk Committee, the Capital Governance Committee and the Human Capital and Compensation Committee.

The Board of Directors annually approves Northern Trust's Risk Management Framework and Corporate Risk Appetite Statement.

The Audit Committee provides oversight with respect to financial reporting and legal risk.

The Business Risk Committee assumes primary responsibility and oversight with respect to credit risk, operational risk, fiduciary risk, compliance risk, market risk, liquidity risk, strategic risk, and associated risk themes. The Cybersecurity Risk Oversight Subcommittee is a subcommittee of the Business Risk Committee and assists the Business Risk Committee in discharging its duties with respect to risks related to cybersecurity inherent in Northern Trust's businesses.

The Human Capital and Compensation Committee oversees the development and operation of Northern Trust's incentive compensation program. The Committee annually reviews management's assessment of the effectiveness of the design and performance of Northern Trust's incentive compensation arrangements and practices in providing incentives that are consistent with Northern Trust's safety, soundness, and culture. This assessment includes an evaluation of whether Northern Trust's incentive compensation arrangements and practices discourage inappropriate risk-taking behavior by participants.

The Capital Governance Committee assists the Board of Directors in discharging its oversight duties with respect to capital management and resolution planning activities. Among other responsibilities, the Capital Governance Committee oversees Northern Trust's capital management assessments, forecasting, and stress testing processes and activities, including the annual CCAR exercise, and challenges management, as appropriate, on various elements of such processes and activities. Accordingly, the Capital Governance Committee provides oversight with respect to Northern Trust's linkage of material risks to the capital adequacy assessment process.

The Chief Risk Officer (CRO) oversees Northern Trust's management of risk and compliance, promotes risk awareness and fosters a proactive risk management environment wherein risks inherent in the business strategy are identified, understood, appropriately monitored and mitigated. The CRO reports directly to the Business Risk Committee and the Corporation's Chief Executive Officer. The CRO regularly advises the Business Risk Committee and reports to the Committee at least quarterly on risk exposures, risk management deficiencies and emerging risks. In accordance with the risk management framework, the Chief Risk Officer, Chief Compliance and Ethics Officer, Head of Financial Risk, Head of Non-Financial Risk, Head of Strategic Risk, Chief Fiduciary Risk Officer, International Chief Risk Officer, Head of Enterprise Risk Management, Chief Executive Officer, President—Asset Management, President—Asset Servicing, President—Wealth Management, Chief Financial Officer, Chief Information Officer and Chief Operating Officer, meet as the Global Enterprise Risk Committee (GERC) to provide executive management oversight and guidance with respect to the management of the categories of risk and risk themes within Northern Trust. The Chief Audit Executive, or such officer's designee, and the General Counsel, or such officer's designee, are invited to attend each GERC meeting as a non-voting member. All other members of the executive management team of the Corporation are also standing invitees. Among other risk management responsibilities, GERC receives reports, escalations, or recommendations from senior risk committees that are responsible for the management of risk, and from time to time may delegate responsibility to such committees for risk issues. Senior risk committees include:

The Credit Risk Committee (CRC) is the most senior credit committee at Northern Trust, with responsibility for establishing, approving, and monitoring credit-related policies and programs throughout the Bank. The Chief Credit Officer reports directly to the CRO, chairs the CRC, and heads the Credit Risk Management function at Northern Trust.

The Market & Liquidity Risk Committee (MLRC) oversees activities relating to the management of market and liquidity risks by facilitating a focused review of market and liquidity risk exposures and providing rigorous challenge of related policies, key assumptions, and practices.

The Operational Risk Committee (ORC) provides independent oversight and is responsible for setting the operational risk-related policies and developing and implementing the operational risk management framework and programs that support coordination of operational risk activities.

The Fiduciary Risk Committee (FRC) is responsible for establishing and reviewing the fiduciary risk policies and establishing the fiduciary risk framework, governance and programs that support the coordination of fiduciary risk activities.

The Compliance & Ethics Oversight Committee (CEOC) provides oversight and direction with respect to compliance policies, implementation of the compliance and ethics program, and the coordination of regulatory compliance initiatives across the Corporation.

The Information Technology Risk Committee (ITRC) provides oversight and direction with respect to information security, technology and cyber risk. The committee is responsible for recommending the policies related to, and overseeing development and implementation of the risk management framework, standards and processes supporting coordination and governance of, information security, technology and cyber risk management activities.

The Model Risk Oversight Committee (MROC) is responsible for providing management attention, direction, and oversight of the model risk management framework and model risk within Northern Trust.

In addition to the aforementioned committees, Northern Trust establishes business and regional risk committees, as well as a Swap Dealer Risk Committee, that also report into GERC.

Risk Assessment, Appetite and Reporting Processes

As part of the integrated risk framework, Northern Trust has established key risk identification and risk management processes, embedded within its businesses to enable a risk-informed profile that supports its business decisions and the execution of its corporate strategies. Northern Trust's risk assessment process consists of a series of programs across the first and second lines of defense that identify, measure, manage and report risks in line with risk appetite and guidelines.

Northern Trust defines its risk appetite as the aggregate level and types of risk the Board of Directors and senior management are willing to assume to achieve the Corporation's strategic objectives and business plan, consistent with prudent management of risk and applicable capital, liquidity, and other regulatory requirements. It includes consideration of the likelihood and impact of risks, using both monetary loss and non-financial measures across risk themes to monitor against tolerance thresholds and guideline levels that trigger escalation to risk committees, senior management, and the Board of Directors or committees thereof, as appropriate.

Risk Control

Risk Control is an internal, independent review function within the Risk Management function. Risk Control is managed by the Head of Risk Control and is comprised of Model Risk Management, Credit Review, and Global Compliance Testing groups, each with its own risk focus and oversight. Model Risk Management is responsible for the implementation and management of the enterprise-wide model risk framework and independently validating new models and reviewing and re-validating existing models. Credit Review provides an independent, ongoing assessment of credit exposure and related credit risk management processes across Northern Trust. Lastly, Global Compliance Testing evaluates the effectiveness of procedures and controls designed to comply with relevant laws and regulations, as well as corresponding Northern Trust policies governing regulatory compliance activities. The Business Risk Committee has oversight responsibility with respect to Risk Control generally as well as each of these groups.

Audit Services

Audit Services is an independent control function that assesses and validates controls within Northern Trust's risk management framework. Audit Services is managed by the Chief Audit Executive with oversight from the Audit Committee. Audit Services tests the overall adequacy and effectiveness of the system of internal controls associated with the framework on an ongoing basis and reports the results of these audits directly to the Audit Committee. Audit Services includes professionals with a broad range of audit and industry experience, including risk management expertise. The Chief Audit Executive reports directly to the Audit Committee and administratively reports to the Corporation's Chief Executive Officer and is a non-voting member of GERC.

Credit Risk

Credit risk is the risk to interest income or principal from the failure of a borrower, issuer, or counterparty to perform on an obligation.

Credit Risk Overview

Credit risk is inherent in many of Northern Trust's activities. The bulk of credit risk relates to loans, securities, and wholesale counterparty-related exposures, such as over-the-counter (OTC) derivatives and securities financing activities. Northern Trust's loan portfolio differs significantly from those of other large U.S. financial institutions in that Northern Trust is generally:

- not an originator of loan products intended to be sold into a secondary market or to be bundled into asset securitizations;
- not an agent bank or syndicator of loans, where risk management is achieved post-close through the sale of participations; and
- not a participant in leveraged financial transactions, such as project finance, hedge fund leveraging, loans to private equity sponsored companies, or prime brokerage activities.

Credit Risk Framework and Governance

The CRC is the most senior credit committee at Northern Trust, with responsibility for establishing, approving, and monitoring credit-related policies and programs throughout the Bank. The Chief Credit Officer reports directly to the CRO, chairs the CRC, and heads the Credit Risk Management function at Northern Trust.

The Credit Risk Management function is the focal point of the credit risk framework and, while independent of the business units that manage client relationships, it works closely with them to achieve the goal of assuring proactive management of credit risk. To monitor and control credit risk, the Credit Risk Management function maintains a framework that consists of policies, standards, and programs designed to promote a prudent credit culture and monitors adherence to those internal policies, standards, and programs, as well as external regulations. Independent oversight and review of the credit risk framework also is provided by Risk Control.

The credit risk framework stipulates authority levels for approval of the extension of credit. Individual credit authority for commercial and personal loans is limited to specified amounts and maturities. Credit requests exceeding policies or standards because of amount, maturity, rating, or other conditions, are referred to the relevant Group Credit Approval Committee. Credit decisions involving requests in excess of Group Credit Approval Committee limits require the approval of the Senior Credit Committee. The Capital Markets Credit Committee has sole authority for the approval, modification, or renewal of credit exposure limits to all wholesale market counterparties. The Senior Credit Committee and Capital Markets Credit Committee are both direct sub-committees of the CRC. The Treasury Credit Committee provides similar approval for investments in assets subject to credit risk, such as bonds and equities.

Credit Risk Measurement

The credit risk framework covers a number of different measurements of credit risk at Northern Trust, including RWA, the allowance for credit losses, and stress tests using various macroeconomic scenarios, such as the internal capital adequacy approval program and CCAR.

An integral component of credit risk measurement is Northern Trust's internal risk rating system. Northern Trust's internal risk rating system enables identification, measurement, approval and monitoring of the Corporation's credit risk. Calculations include entity-specific information about the obligor's or counterparty's probability of default (PD) and exposure-specific information about loss given default (LGD), exposure at default (EAD), and maturity. Northern Trust's internal risk rating system is intended to rank its credit risk without any direct linkage to external credit ratings.

Obligors are assigned PDs after consideration of both quantitative and qualitative factors. Although the criteria vary, the objective is for assigned PDs to be consistent in the measurement and ranking of risk. LGD and EAD are assigned based on obligor, product, collateral and instrument characteristics.

Risk ratings are assigned at the time a counterparty or an obligation is approved, renewed, or amended. Risk ratings are reviewed annually or when new information relevant to the rating is received. Risk ratings are utilized for credit underwriting, management reporting, and the calculation of regulatory capital.

The Credit Risk Management function is responsible for the ongoing oversight of each model that supports the internal risk-rating system. Independent model governance and oversight is further supported by the activities of Risk Control.

Loans and Other Extensions of Credit

A significant component of credit risk relates to the loan portfolio, including contractual obligations such as legally binding commitments to extend credit, commercial letters of credit, and standby letters of credit. These contractual obligations and arrangements are discussed in Note 24, "Commitments and Contingent Liabilities," provided in Item 8, "Financial Statements and Supplementary Data."

Undrawn commitments to extend credit generally have fixed expiration dates or other termination clauses. Since a significant portion of the commitments are expected to expire without being drawn upon, the total commitment amount does not necessarily represent future loans or liquidity requirements. The following table provides information about the industry sector and expiration dates of undrawn commitments to extend credit as of December 31, 2024 and 2023.

TABLE 40: UNDRAWN COMMITMENTS TO EXTEND CREDIT BY INDUSTRY SECTOR

(In Millions)	DECEMBER 31, 2024				DECEMBER 31, 2023

⁽¹⁾ The commercial and institutional industry sector information is presented on the basis of the North American Industry Classification System (NAICS).

As part of Northern Trust's credit processes, the Credit Risk Management function oversees a range of portfolio reviews that focus on significant and/or weaker-rated credits. This approach allows management to take remedial action in an effort to deal with potential problems. An integral part of the Credit Risk Management function is a formal review of past due and potential problem loans to determine which credits, if any, need to be placed on nonaccrual status or charged off. Northern Trust maintains a loan portfolio "watch list" for adversely classified credit exposures that includes all nonaccrual credits as well as other loans with elevated risk of default. Independent from the Credit Risk Management function, Credit Review undertakes both on-site and off-site file reviews that evaluate the effectiveness of management's implementation of Credit Risk Management's requirements.

Counterparty Credit Risk

Counterparty credit risk for Northern Trust primarily arises from a variety of funding, treasury, trading and custody-related activities, including trading OTC foreign exchange and interest rate derivatives, indemnified securities lending transactions, and sponsored repurchase and reverse repurchase transactions. Credit exposure to counterparties is managed by use of a framework for setting limits by product type and exposure tenor.

To calculate exposure, Northern Trust treats repurchase agreements, reverse repurchase agreements, indemnified securities lending, and sponsored repurchase and reverse repurchase transactions as repo-style transactions. Foreign exchange exposures and interest rate derivatives are treated as OTC derivatives. The exposure at default measurement methodology for each eligible type of counterparty credit exposure, including the use of netting and collateral as risk mitigants, is determined based on regulatory requirements.

Credit Risk Mitigation

Northern Trust considers cash flow to be the primary source of repayment for client-related credit exposures. However, Northern Trust employs several different types of credit risk mitigants to manage its overall credit risk in the event cash flow is not sufficient to repay a credit exposure. Northern Trust broadly groups its risk mitigation techniques into the following three primary categories.

Physical and Financial Collateral: One of Northern Trust's primary credit risk mitigation approaches is the requirement of collateral. Residential and commercial real estate exposures are typically secured by properly margined mortgages on the property. Various other types of physical and financial collateral are also accepted for certain commercial and personal loans, in line with Northern Trust's lending standards. In cases where loans to clients are secured by marketable securities, the daily values of the securities are monitored closely to ensure adherence to collateral coverage policies.

Netting: On-balance sheet netting is employed where applicable for counterparties with master netting arrangements. Netting is primarily related to foreign exchange transactions with major banks and institutional clients subject to eligible master netting arrangements.

Guarantees: Personal and corporate guarantees are accepted, as warranted, to reduce risk of default, facilitate potential collection efforts, and protect Northern Trust's claims relative to other creditors.

Another important risk management practice is the avoidance of undue concentrations of exposure, such as in any single (or small number of related) obligor/counterparty, loan type, industry, geography, country or risk mitigant. Processes are in place to establish limits on certain concentrations and the monitoring of adherence to the limits.

Operational Risk

Operational risk is the risk of loss from inadequate or failed internal processes, human factors and systems, or from external events.

Operational Risk Overview

Operational risk is inherent in each of Northern Trust's businesses and corporate functions and reflects the potential for inadequate information systems, operating problems, challenges related to reliance on third parties, product design and delivery difficulties, potential legal actions or catastrophes to result in losses. This includes the potential that continuity of service and resilience may be impacted.

Operational risk includes information technology and cybersecurity, compliance, fiduciary and legal risks, which under the Corporation's risk structure are governed and managed explicitly.

Operational Risk Framework and Governance

To monitor and control operational risk, Northern Trust maintains a framework consisting of risk management policies, programs and practices designed to promote a sound operational environment and maintain the Corporation's operational risk profile and losses within approved risk appetites and guidelines. The framework implements a structured approach to establishing and communicating operational risk management practices and responsibilities. This structured approach to measuring and managing operational risk addresses operational resilience which requires that Northern Trust minimize service disruptions and limit systemic impacts from adverse events as well as risk quantification. The framework is deployed consistently and globally across all businesses and its objective is to identify and measure the factors that influence risk and drive action to maintain operational resilience and reduce future loss events. The Operational Risk Management function operates within the independent Non-Financial Risk function and is responsible for defining the operational risk management framework and providing independent oversight of the framework implementation and application across Northern Trust. It is the responsibility of each business and corporate function to implement the enterprise-wide operational risk framework and business and function-specific risk management programs to identify, monitor, measure, manage and report on operational risk and mitigate Northern Trust's exposure to disruption and loss. Several key programs support the operational risk framework, including:

- **Loss Event Data Program** - a program that collects internal and external loss data for use in monitoring operational risk exposure, various business analyses, and operational risk quantification, including the Basel Advanced Measurement Approach (AMA) capital quantification. Both internal and external loss data are used in the operational risk capital quantification. Data is reviewed to increase understanding of Northern Trust's and industry-wide operational risk exposure and to identify action plans to minimize or prevent future events.
- **Risk and Control Self-Assessment** - a comprehensive, structured risk management process used by Northern Trust's businesses and corporate functions to identify, measure, monitor and mitigate operational risk exposures throughout the enterprise.

- **Operational Risk Scenario Analysis** - a systematic process of obtaining expert opinions from business managers and risk management experts to derive reasoned assessments of the likelihood of occurrence and the potential loss impact of plausible operational losses.
- **Product and Process Risk Management Program** - a program used for evaluating and managing risks associated with the introduction of new and modified products and services and with significant changes to operating processes.
- **Operational Resilience** - a program designed to ensure the resilience and continuity of service delivery of Northern Trust's most important business services.
- **Third-Party Risk Management Program** - a program that provides processes for evaluating, quantifying and qualifying appropriate risk assessment, measurement, monitoring and management of third and fourth parties (inclusive of external and internal, e.g., Northern Trust legal entity to legal entity relationships).
- **Global Fraud Risk** - a program designed to prevent, detect and respond to attempted or actual fraud impacting the bank and its clients globally.
- **Data Risk** - a program that includes data management and data governance related activities in Northern Trust processes in order to manage the risk of compromised or degraded data availability and integrity.
- **Data Privacy Program** - a program that sets forth a consistent, global approach to compliance with all applicable laws, rules, and regulations relating to privacy and establishes overarching principles for the responsible use and protection of confidential information.
- **Cyber and Technology Risk Management** - a program that sets forth a consistent, global approach to communicate risk management processes and controls addressing cybersecurity (inclusive of information security), technology, and related compliance risks to the organization. Please see Item 1C, "Cybersecurity," for a detailed discussion of cybersecurity risk management, strategy, and governance.
- **Business Continuity Management Program** - a program designed to protect life safety, minimize and manage the business impact and support the recovery of critical functions for clients following an incident.
- **Physical Security** - a program that provides for the safety of Northern Trust partners, clients, and visitors worldwide by setting and enforcing standards, providing training, establishing partnerships, and encouraging continual improvement in workplace security.
- **Insurance Management Program** - a program designed to reduce the monetary impact of certain operational loss events through the securing of appropriate insurance policy protection.

As discussed in "Risk Control" above, Model Risk Management also is part of the operational risk framework.

The Operational Risk Committee (ORC) is responsible for overseeing the activities of Northern Trust related to the management of operational risk including establishing and maintaining the Corporate Operational Risk Management Policy and approving the operational risk framework and programs. This committee has the expanded role of coordinating operational risk issues related to information technology, cybersecurity, compliance and fiduciary risks. The purpose of this committee is to provide executive management's insight and guidance to the management of existing and emerging operational risks. This includes identification and assessment of evolving risk trends across the operational risk framework and how these can be best managed.

Operational Risk Measurement

Northern Trust utilizes the AMA capital quantification process to estimate required capital for the Corporation and applicable U.S. banking subsidiaries. Northern Trust's AMA capital quantification process incorporates outputs from the Loss Event Data, Risk and Control Self-Assessment and Operational Risk Scenario Analysis programs to derive required capital. While internal loss data is the foundation for the capital quantification, external loss event data and qualitative risk and control self-assessments are also utilized to inform the creation of scenario analysis data employed in the capital quantification process. Business environment factor information is used to estimate loss frequency. The AMA capital quantification process uses a Loss Distribution Approach methodology to combine frequency and severity distributions to arrive at an estimate of the potential aggregate loss at the 99.9th percentile of the aggregate loss distribution over a one-year time horizon.

Operational Resilience and Recovery Management

Northern Trust's operational resilience approach encompasses operational resilience and recovery processes enterprise-wide (including staff, technology and facilities) to anticipate and limit disruptions and to ensure that following a disaster or business interruption Northern Trust is able to resume critical business functions and fulfill all regulatory and legal requirements.

Northern Trust's operational resilience mitigation and preventative measures include sophisticated physical security, resilient designs and peer capacity for its corporate data centers, a highly redundant global network, robust network security, resilience centers that offer alternative workstations and transfer of work and work-from-home programs that provide further capability.

All of Northern Trust's businesses are required to risk-assess all of their functions regularly and develop business continuity plans covering resource requirements (people, systems, vendor relationships and other assets), arrangements for obtaining these resources and prioritizing the resumption of each function in compliance with corporate standards. The business continuity programs of all critical third-party vendors to Northern Trust are reviewed on a regular basis. All of Northern Trust's businesses test their plans at least annually. The ORC annually reviews and presents the corporate business continuity plan to the Business Risk Committee.

Fiduciary Risk

Fiduciary risks are risks arising from the failure: (a) in administering or managing financial and other assets in clients' fiduciary accounts; (b) to adhere to a fiduciary standard of care if required under the terms of governing documents or applicable laws; or (c) to properly discharge fiduciary duties. Fiduciary status may hinge on the nature of a particular function being performed and fiduciary standards may vary by jurisdiction, type of relationship, and governing document.

Fiduciary Risk Overview

The fiduciary risk management framework identifies, assesses, measures, monitors, and reports on fiduciary risk matters deemed significant. Fiduciary risk is best managed at the source of the risk, and is mitigated through internal controls and risk management practices that are designed to identify, understand, and keep such risk at levels consistent with the organization's overall risk appetite while also managing the inherent risk in each client relationship for which Northern Trust serves in a fiduciary capacity. Each business is responsible for complying with all corporate policies and external regulations and for establishing specific procedures, standards, and guidelines to manage fiduciary risk within the desired risk appetite.

Fiduciary Risk Framework and Governance

The FRC is responsible for overseeing activities related to the exercise of fiduciary powers throughout the organization, and for establishing and reviewing the fiduciary risk policies and the fiduciary risk framework that supports the coordination of activities to identify, monitor, manage, and report on fiduciary risk. In addition, the FRC serves as an escalation point for significant issues raised by its subcommittees or elsewhere in the organization.

Compliance Risk

Compliance risk is the risk of legal or regulatory sanctions, financial loss, or damage to reputation resulting from failure to comply with laws, regulations, rules, other regulatory requirements, or codes of conduct and other standards of self-regulatory organizations applicable to Northern Trust. Compliance risk includes the following two subcategories:

- Regulatory risk - risk arising from failure to comply with prudential and conduct of business or other regulatory requirements.
- Financial crime risk - risk arising from financial crime (e.g., money laundering, sanctions violations, fraud, insider dealing, theft, etc.) in relation to the products, services, or accounts of the institution, its clients, or others associated with the same.

Compliance Risk Framework and Governance

The compliance risk management framework identifies, assesses, controls, measures, monitors and reports on compliance risk. The framework is designed to minimize compliance risk and maintain an environment in which criminal or regulatory violations do not occur. The framework includes a comprehensive governance structure and a Compliance and Ethics Program approved by the Business Risk Committee.

Each business is responsible for the implementation and effectiveness of the Compliance and Ethics Program and specific compliance policies within their respective businesses. Each business is responsible for its respective employees' compliance with corporate policies and external regulations and for establishing specific procedures, standards and guidelines to manage compliance risk in accordance with Northern Trust's Compliance and Ethics Program.

The CEOC oversees and provides direction with respect to the implementation of Northern Trust's Compliance and Ethics Program and the coordination of compliance initiatives across the enterprise. The CEOC approves policies necessary to effectively manage Regulatory and Financial Crime Risk. The Chief Compliance and Ethics Officer reports to the Business Risk Committee, as appropriate, and chairs the CEOC.

Liquidity Risk Management

Liquidity Risk Overview

Liquidity risk is the risk of not being able to raise sufficient funds or maintain collateral to meet balance sheet and contingent liability cash flow obligations when due, because of firm-specific or market-wide stress events. Northern Trust is a Category II institution as defined by the Federal Reserve Board which requires us to adhere to the same regulatory liquidity standards as U.S. GSIBs. In adhering to these standards, Northern Trust engages in a range of reporting and other activities with regulators to affirm our financial strength and stability, including but not limited to, daily Liquidity Coverage Ratio (LCR), Net Stable Funding Ratio (NSFR), and monthly Liquidity Stress-Testing calculations to regulators.

Northern Trust maintains a strong liquidity position and liquidity risk profile. Northern Trust's balance sheet is primarily liability-driven. That is, the main driver of balance sheet changes comes from changing levels of client deposits, which are generally related to the level of custody assets serviced and commercial and personal deposits and can also be influenced by market conditions. This liability-driven business model differs from a typical asset-driven business model, where increased levels of deposits and wholesale borrowings are required to support, for example, increased levels of lending. Northern Trust's balance sheet is generally comprised of high-quality assets that are managed to meet anticipated obligations under stress, resulting in low liquidity risk.

Liquidity Risk Framework and Governance

Northern Trust maintains a liquidity risk framework consisting of risk management policies and practices to keep its risk profile within the Board-approved Corporate Risk Appetite Statement. All liquidity risk activities are overseen by the Risk Management function, which is independent of the businesses undertaking the activities.

The Liquidity Management Policy and exposure limits for liquidity risk are set by the Board of Directors, and committee structures have been established to implement and monitor adherence to corporate policies, external regulations and established procedures. Limits are monitored based on measures such as the LCR, the NSFR, and the liquidity stress-testing buffer across a range of time horizons. Treasury, in the first line of defense, proposes liquidity risk management strategies and is responsible for performing liquidity management activities. The Asset and Liability Management Committee (ALCO) provides first-line management oversight and is responsible for approving strategies and activities within the risk appetite, monitoring risk metrics, overseeing balance sheet resources, and reviewing reporting such as cash flows, LCR, NSFR, and stress test results.

Market and Liquidity Risk Management, in the second line of defense, provides challenge to the first-line activities, evaluates compliance with regulatory requirements and process effectiveness, and escalates material items for corrective action. The Market and Liquidity Risk Committee (MLRC) provides second-line oversight and is responsible for reviewing market and liquidity risk exposures, approving and monitoring risk metrics, and approving key methodologies and assumptions that drive liquidity risk measurement.

Liquidity Risk Analysis, Monitoring, and Reporting

Liquidity risk is analyzed and monitored in order to ensure compliance with the approved risk appetite. Various liquidity analysis and monitoring activities are employed by Northern Trust to better understand the nature and sources of its liquidity risks, including: liquidity stress testing, liquidity metric monitoring, collateral management, intraday management, cash flow projections, operational deposit modeling, liquid asset buffer measurement, funds transfer pricing, and contingency funding planning.

The liquidity risk management process is supported through management and regulatory reporting. Both Northern Trust's Treasury and Market and Liquidity Risk Management functions produce management reports that enable oversight bodies to make informed decisions and support management of liquidity risk within the approved risk appetite. Holistic liquidity metrics such as LCR, NSFR and internal liquidity stress testing are actively monitored, along with a suite of other metrics that provide early warning indicators of changes in the risk profile.

Regulatory Environment

Northern Trust actively follows regulatory developments and regularly evaluates its liquidity risk management framework against proposed rule-making and industry best practices in order to comply with applicable regulations and further enhance its liquidity policies. Please refer to "Supervision and Regulation—Liquidity Standards" in Item 1, "Business," for a discussion of applicable liquidity standards.

U.S. Liquidity Coverage Ratio (LCR)

The LCR Final Rule requires covered banking organizations, which include the Corporation, to maintain an amount of high-quality liquid assets (HQLAs) equal to or greater than 100% of the banking organization's total net cash outflows over a 30 calendar-day standardized supervisory liquid stress scenario. The requirements of the LCR Final Rule are intended to promote the short-term resilience of the liquidity risk profile of covered banking organizations, improve the banking industry's ability to absorb shocks arising from financial and economic stress, and improve the measurement and management of liquidity risk. The Corporation and the Bank each satisfied the U.S. liquidity coverage ratio requirements during 2024.

U.S. Net Stable Funding Ratio (NSFR)

The NSFR Final Rule requires covered banking organizations, which include the Corporation, to maintain an amount of available stable funding (ASF) equal to or greater than the banking organization's projected minimum funding needs, or required stable funding (RSF), over a one-year time horizon. The NSFR is designed to reduce the likelihood that disruptions to a banking organization's regular sources of funding will compromise its liquidity position, promote effective liquidity risk management, and support the ability of banking organizations to provide financial intermediation to businesses and households across a range of market conditions. The NSFR supports financial stability by requiring banking organizations to fund their activities with stable sources of funding on an ongoing basis, reducing the possibility that funding shocks would substantially increase distress at individual banking organizations. The Corporation and the Bank each satisfied the NSFR requirements during 2024.

Funding

Northern Trust maintains a very liquid balance sheet, with cash and due from banks, deposits with the Federal Reserve and other central banks, short-term money market assets and investment securities in aggregate representing 62% and 59% of total assets as of December 31, 2024 and 2023, respectively. The market value of unencumbered securities at the Bank, which include those placed at the central bank discount window, totaled \$42.0 billion and \$39.0 billion at December 31, 2024 and 2023, respectively. Northern Trust manages its funding to ensure that liquidity sources are sufficient to meet its ongoing obligations and commitments.

As the Corporation's principal subsidiary encompassing all of Northern Trust's banking activities, the Bank centrally manages liquidity for all U.S. and international banking operations. Liquidity is provided by a variety of sources, including client deposits (institutional and personal) from the Asset Servicing and Wealth Management businesses, wholesale funding from the capital markets, maturities of short-term investments, interest earned on investment securities and money market assets, Federal Home Loan Bank advances, and unencumbered liquid assets that can be sold or pledged to secure additional funds. While management does not view central bank discount windows as primary sources of liquidity, at December 31, 2024 and 2023, the Bank had over \$36.9 billion and \$34.7 billion, respectively of securities and loans readily available as collateral to support discount window borrowings. The Bank also is active in the U.S. interbank funding market, providing an important source of additional liquidity and low-cost funds.

The liquidity of the Corporation is managed separately from that of the Bank. The primary sources of cash for the Corporation are issuances of debt or equity and dividend payments from the Bank. For further information on issuances or redemptions of debt or equity, please refer to Note 12, "Senior Notes and Long-Term Debt" provided in Item 8, "Financial Statements and Supplementary Data." The Corporation received \$3.1 billion of dividends and \$850.0 million from the Bank in 2024 and 2023, respectively. Dividends from the Bank are subject to certain restrictions, as discussed in further detail in Note 30, "Restrictions on Subsidiary Dividends and Loans or Advances," provided in Item 8, "Financial Statements and Supplementary Data."

The Corporation's liquidity, defined as the amount of cash and highly marketable assets, was \$2.4 billion and \$795.6 million at December 31, 2024 and 2023, respectively. During, and at year-end, 2024 and 2023, these assets were comprised almost entirely of cash in a demand deposit account at the Bank or overnight money market placements, both of which were fully available to the Corporation to support its own cash flow requirements or those of its subsidiaries, as needed. Average liquidity during 2024 and 2023 was \$1.7 billion and \$797.2 million, respectively. The cash flows of the Corporation are shown in Note 33, "Northern Trust Corporation (Corporation only)," provided in Item 8, "Financial Statements and Supplementary Data."

Uses of Liquidity

Liquidity supports a variety of activities, including client withdrawals, purchases of securities, net loan growth, and draws on commitments to extend credit.

The Corporation's uses of cash consist mainly of dividend payments to the Corporation's stockholders; the payment of principal and interest to note holders; repurchases of its common stock; and investments in, or loans to, its subsidiaries. The most significant uses of cash by the Corporation during 2024 were \$602.3 million of common stock dividends and \$937.8 million of common stock repurchases. The most significant uses of cash by the Corporation during 2023 were \$621.5 million of common stock dividends and \$347.5 million of common stock repurchases.

Credit Ratings

A significant source of liquidity for both the Corporation and the Bank is the ability to draw funding from capital markets globally. The credit ratings of the Corporation and the Bank as of December 31, 2024, provided in the following table, allow Northern Trust to access capital markets on favorable terms.

TABLE 41: NORTHERN TRUST CREDIT RATINGS AS OF DECEMBER 31, 2024

	CREDIT RATING		
	STANDARD & POOR'S	MOODY'S	FITCH RATINGS
Northern Trust Corporation:			
Senior Debt	A+	A2	A+
Subordinated Debt	A	A2	A+
Preferred Stock	BBB+	Baa1	BBB
Outlook	Stable	Stable	Stable
The Northern Trust Company:			
Short-Term Deposit	A-1+	P-1	F1+
Long-Term Deposit/Debt	AA-	Aa2	AA
Subordinated Debt	A+	A2	A+
Outlook	Stable	Stable	Stable

A significant downgrade in one or more of these ratings could limit Northern Trust's access to capital markets and/or increase the rates paid for short-term borrowings, including deposits, and future long-term debt issuances. The size of these rate increases would depend on multiple factors, including the extent of the downgrade, Northern Trust's relative debt rating compared to other financial institutions, current market conditions, and other factors. In addition, as discussed in Note 27, "Offsetting of Assets and Liabilities," provided in Item 8, "Financial Statements and Supplementary Data," Northern Trust enters into certain master netting arrangements with derivative counterparties that contain credit-risk-related contingent features in which the counterparty has the option to declare Northern Trust in default and accelerate cash settlement of net derivative liabilities with the counterparty in the event Northern Trust's credit rating falls below specified levels. At December 31, 2024, the net maximum amount of these termination payments that Northern Trust could have been required to pay was \$158.8 million. Other than these credit-risk-related contingent derivative counterparty payments, Northern Trust had no long-term debt covenants or other credit-risk-related payments at December 31, 2024, that would be triggered by a significant downgrade in its debt ratings.

Off-Balance Sheet Arrangements

Please refer to Note 24, "Commitments and Contingent Liabilities," provided in Item 8, "Financial Statements and Supplementary Data" for information on off-balance sheet arrangements and the Credit Risk discussion in the "Risk Management" section for further detail on undrawn commitments.

Market Risk

There are two types of market risk, interest rate risk associated with the banking book and trading risk. Interest rate risk associated with the banking book is the potential for movements in interest rates to cause changes in Net Interest Income and the market value of equity, including Accumulated Other Comprehensive Income (Loss) from the AFS debt securities portfolio. Trading risk is the potential for movements in market variables such as foreign exchange and interest rates to cause changes in the value of trading positions.

Market Risk Framework and Governance

Northern Trust maintains a market risk framework consisting of risk management policies and practices to keep its risk profile within the Board-approved Corporate Risk Appetite Statement. All market risk activities are overseen by the Risk Management function, which is independent of the businesses undertaking the activities.

The Asset and Liability Management Policy, Policy on Dealer Trading Activities, and exposure limits for market risk are set by Board-level committees, and committee structures have been established to implement and monitor adherence to corporate policies, external regulations and established procedures. Limits are monitored based on measures such as sensitivity of Net Interest Income (NII), sensitivity of market value of equity (MVE), and value-at-risk (VaR) across a range of time horizons.

Treasury, in the first line of defense, proposes market risk management strategies and is responsible for performing market risk management activities. The ALCO provides first-line management oversight and is responsible for approving strategies and activities within the risk appetite, monitoring risk metrics, overseeing balance sheet resources, overseeing the execution of strategies, and reviewing reporting such as cash flows, the liquidity coverage ratio and stress test results.

The Market and Liquidity Risk Management function, in the second line of defense, provides challenge to the first-line activities, evaluates compliance with regulatory requirements and process effectiveness, and escalates material items for corrective action. The MLRC provides second-line oversight and is responsible for reviewing market risk exposures, establishing and monitoring risk metrics, and approving key methodologies and assumptions that drive market risk measurement.

Interest Rate Risk Overview

Interest rate risk in the banking book is the potential for deterioration in Northern Trust's financial position (e.g., interest income, market value of equity, or capital) due to changes in interest rates. NII and MVE sensitivity are the primary metrics used for measurement and management of interest rate risk. Changes in interest rates can have a positive or negative impact on NII depending on the positioning of assets, liabilities and off-balance sheet instruments. Changes in interest rates also can impact the values of assets, liabilities and off-balance sheet positions, which directly impact the MVE. Higher interest rates may impact the fair value of available for sale debt securities which in turn affects Accumulated Other Comprehensive Income (Loss) that can impact regulatory capital ratios. To mitigate interest rate risk, the structure of the balance sheet is managed so that movements of interest rates on assets and liabilities (adjusted for hedges) are sufficiently correlated, which allows Northern Trust to manage its interest rate risk within its risk appetite.

There are four commonly recognized types of structural interest rate risk in the banking book:

- repricing risk, which arises from differences in the maturity and repricing terms of assets and liabilities;
- yield curve risk, which arises from changes in the shape of the yield curve;
- basis risk, which arises from imperfect correlation in the adjustment of the rates earned and paid on different financial instruments with otherwise similar repricing characteristics; and
- embedded optionality risk, which arises from client or counterparty behavior in response to interest rate changes.

Interest Rate Risk Analysis, Monitoring, and Reporting

Northern Trust uses two primary measurement techniques to manage interest rate risk: NII and MVE sensitivity. NII sensitivity provides management with a short-term view of the impact of interest rate changes on NII. MVE sensitivity provides management with a long-term view of interest rate changes on MVE based on the period-end balance sheet.

Northern Trust limits aggregate interest rate risk (as measured by the NII sensitivity and MVE sensitivity simulation techniques) to an acceptable level within the context of risk appetite. A variety of actions may be used to implement risk management strategies to modify interest rate risk including:

- purchase of investment securities;
- sale of investment securities that are classified as available for sale;
- issuance of senior notes and subordinated notes;
- collateralized borrowings from the Federal Home Loan Bank; and
- hedging with various types of derivative financial instruments.

NII Sensitivity

The modeling of NII sensitivity incorporates on-balance sheet positions, as well as derivative financial instruments (principally interest rate swaps) that are used to manage interest rate risk. Northern Trust uses market implied forward interest rates as the base case and measures the sensitivity (i.e., change) of a static balance sheet to changes in interest rates. Stress testing of interest rates is performed to include such scenarios as immediate parallel shocks to rates, nonparallel (i.e., twist) changes to yield curves that result in their becoming steeper or flatter, and changes to the relationship among the yield curves (i.e., basis risk).

The NII sensitivity analysis incorporates certain critical assumptions such as interest rates and client behaviors under changing rate environments. These assumptions are based on a combination of historical analysis and future expected pricing behavior. The simulation cannot precisely estimate NII sensitivity given uncertainty in the assumptions. The following key assumptions are incorporated into the NII simulation:

- the balance sheet size and mix remains constant over the simulation horizon with maturing assets and liabilities replaced with instruments with similar terms as those that are maturing, with the exception of certain nonmaturity deposits that are considered short-term in nature and therefore receive a more conservative interest-bearing treatment;
- prepayments on mortgage loans and securities collateralized by mortgages are projected under each rate scenario using a third-party mortgage analytics system that incorporates market prepayment assumptions;
- cash flows for structured securities are estimated using a third-party vendor in conjunction with the prepayments provided by the third-party mortgage analytics vendor;
- nonmaturity deposit pricing is projected based on Northern Trust's actual historical patterns and management judgment, depending upon the availability of historical data and current pricing strategies/or judgment; and
- new business rates are based on current spreads to market indices.

The following table shows the estimated NII impact over the next twelve months of 100 and 200 basis point ramps upward and 100 and 200 basis point ramps downward in interest rates relative to forward rates as of December 31, 2024 and 2023. Each rate movement is assumed to occur gradually over a one-year period.

TABLE 42: NET INTEREST INCOME SENSITIVITY

INCREASE (DECREASE) ESTIMATED IMPACT ON NEXT TWELVE MONTHS OF NET INTEREST INCOME			
(In Millions)		DECEMBER 31, 2024	DECEMBER 31, 2023
INCREASE IN INTEREST RATES ABOVE MARKET IMPLIED FORWARD RATES			
100 Basis Points	\$	30	\$ 43
200 Basis Points		53	82
DECREASE IN INTEREST RATES BELOW MARKET IMPLIED FORWARD RATES			
100 Basis Points	\$	(34)	\$ (63)
200 Basis Points		(82)	(150)

The NII sensitivity analysis does not incorporate certain management actions that may be used to mitigate adverse effects of actual interest rate movement. For that reason and others, the estimated impacts do not reflect the likely actual results but serve as estimates of interest rate risk. NII sensitivity is not comparable to actual results disclosed elsewhere or directly predictive of future values of other measures provided.

MVE Sensitivity

MVE is defined as the present value of assets minus the present value of liabilities, net of the value of financial derivatives that are used to manage the interest rate risk of balance sheet items. The MVE looks at the whole balance sheet, which includes AFS debt securities, HTM debt securities, money market accounts, deposits, loans and wholesale borrowings. The potential effect of interest rate changes on MVE is derived from the impact of such changes on projected future cash flows and the present value of these cash flows and is then compared to the established limit. Northern Trust uses current market rates (and the future rates implied by these market rates) as the base case and measures MVE sensitivity under various rate scenarios. Stress testing of interest rates is performed to include such scenarios as immediate parallel shocks to rates, nonparallel (i.e., twist) changes to yield curves that result in their becoming steeper or flatter, and changes to the relationship among the yield curves (i.e., basis risk).

The MVE sensitivity analysis incorporates certain critical assumptions such as interest rates and client behaviors under changing rate environments. These assumptions are based on a combination of historical analysis and future expected pricing behavior. The simulation cannot precisely estimate MVE sensitivity given uncertainty in the assumptions. Many of the assumptions that apply to NII sensitivity also apply to MVE sensitivity simulations, with the following separate key assumptions incorporated into the MVE simulation:

- the present value of nonmaturity deposits are estimated using dynamic decay methodologies or estimated remaining lives, which are based on a combination of Northern Trust's actual historical runoff patterns and management judgment—some balances are assumed to be core and have longer lives while other balances are assumed to be temporary and have comparatively shorter lives;
- the present values of most noninterest-bearing balances (such as receivables, equipment, and payables) are the same as their carrying values; and
- Monte Carlo simulation is used to generate forward interest rate paths.

The following table shows the estimated impact on MVE of 100 and 200 basis point shocks up and 100 and 200 basis point shocks down from current market implied forward rates at December 31, 2024 and 2023. Each rate movement is assumed to occur gradually over a one-year period.

TABLE 43: MARKET VALUE OF EQUITY SENSITIVITY

INCREASE (DECREASE) ESTIMATED IMPACT ON MARKET VALUE OF EQUITY			
(In Millions)		DECEMBER 31, 2024	DECEMBER 31, 2023
INCREASE IN INTEREST RATES ABOVE MARKET IMPLIED FORWARD RATES			
100 Basis Points	\$	(374)	\$ (360)
200 Basis Points		(808)	(817)
DECREASE IN INTEREST RATES BELOW MARKET IMPLIED FORWARD RATES			
100 Basis Points	\$	508	\$ 430
200 Basis Points		951	725

The MVE simulations do not incorporate certain management actions that may be used to mitigate adverse effects of actual interest rate movements. For that reason and others, the estimated impacts do not reflect the likely actual results but serve as estimates of interest rate risk. MVE sensitivity is not comparable to actual results disclosed elsewhere or directly predictive of future values of other measures provided.

Foreign Currency Market Risk

Foreign Currency Non-Trading Risk Overview

Northern Trust's balance sheet is exposed to non-trading foreign currency risk as a result of its holdings of non-U.S.-dollar-denominated assets and liabilities, investment in non-U.S. subsidiaries, and future non-U.S.-dollar-denominated revenue and expense. To manage currency exposures on the balance sheet, Northern Trust attempts to match its assets and liabilities by currency. If those currency offsets do not exist on the balance sheet, Northern Trust will use foreign exchange derivative contracts to mitigate its currency exposure.

Trading Market Risk

Within Market Risk, trading risk arises from providing foreign exchange, interest rate derivatives, and securities brokerage services to clients. Securities positions are limited and their trading risks are *de minimis*. For regulatory capital purposes, trading risk also includes foreign currency balances from business operations.

Trading Book Composition and Risk Drivers

Northern Trust's trading book is composed of positions arising from activity in four business areas: Global Foreign Exchange (GFX), which includes Treasury foreign exchange trades; Interest rate derivative (IRD) trades; Northern Trust Securities Inc. (NTSI) inventory; and foreign currency balances (FCBs) accrued on the balance sheet.

GFX desks execute foreign exchange transactions for client accommodation purposes and mitigate most of the exposure via offsetting trades. In addition, Northern Trust's Treasury department executes foreign exchange transactions to manage balance sheet flows. The risk system includes these within GFX and applies FX and interest rate (IR) drivers to produce VaR for regulatory capital.

Northern Trust's Treasury Department executes IRD trades for client accommodation purposes and mitigates the exposure via offsetting trades. The risk system applies IR and volatility drivers to produce VaR for regulatory capital.

FCBs arise not from executing trades but rather in the course of regular business operations, from non-U.S.-dollar-denominated revenues and expenses accruing onto the Corporation's balance sheet. Prior to September 1, 2023, FX risk from these positions was mitigated through hedging activity. This hedging activity was discontinued on September 1, 2023. The risk system applies FX drivers to produce VaR for regulatory capital.

NTSI, a brokerage subsidiary of the Corporation, executes fixed-income securities trades directly for client accounts. A small inventory of securities remains held in inventory overnight. This portfolio exposure is *de minimis*, and VaR calculations are not required. The valuation of the securities serves as the basis for calculating regulatory capital.

Foreign Currency Trading Risk Overview

Foreign currency or foreign exchange trading positions exist when aggregate obligations to purchase and sell a currency other than the U.S. dollar do not offset each other in amount, or offset each other over different time periods. The GFX trading portfolio at Northern Trust is composed of spot, forward, non-deliverable forward, and foreign exchange rate (FX) swap transactions.

Interest Rate Derivatives Trading Risk Overview

IRD positions exist when aggregate interest cash inflows and outflows do not offset each other in amount or offset each other over different time periods. The IRD trading portfolio at Northern Trust is composed mostly of interest rate swaps entered into to meet clients' interest rate risk management needs, but also including a small number of swaptions, caps, and floors. IRD risk measures during the second quarter of 2023 became temporarily inflated as a result of transitions of IRD contracts from LIBOR to SOFR referencing. The risk measures declined in the third quarter of 2023 as the bulk of transitions was completed.

Other Non-material Trading Activities

Northern Trust's broker-dealer subsidiary, NTSI, maintains a legacy portfolio of trading securities and invests excess cash balances in short-term investment vehicles. The portfolio averaged less than \$0.1 million and less than \$0.5 million for the years ended December 31, 2024 and 2023, respectively.

Trading Book Risk Measurement

For trading book activities other than NTSI, Northern Trust measures daily the risk of loss associated with all non-U.S. currency positions using a VaR model and applying the historical simulation methodology. This statistical model provides estimates, based on high confidence levels, of the potential loss in value that might be incurred if an adverse shift in interest rates and non-U.S. currency exchange rates were to occur over a small number of days. The model incorporates foreign currency and interest rate volatilities and correlations in price movements among the currencies and interest rates. VaR is computed for each trading desk and for the global portfolio.

VaR measures are computed daily in a vendor software application which reads positions from Northern Trust's trading systems and foreign currency balances from the general ledger. Data vendors provide foreign exchange rates, interest rates, and volatilities for all currencies. The Risk Management function monitors on a daily basis VaR model inputs and outputs for reasonableness.

Trading Book Risk Monitoring, Reporting and Analysis

Northern Trust monitors several variations of the VaR measures to meet specific regulatory and internal management needs. Variations include different methodologies (historical simulation, Monte Carlo simulation and Taylor approximation), horizons of one day and ten days, confidence levels of 95% and 99%, subcomponent VaRs using only FX drivers, only IR drivers, and only volatility drivers, and look-back periods of one year, two years, and four years. Those alternative measures provide management an array of corroborating metrics and alternative perspectives on Northern Trust's market risks.

Automated daily reports are produced and distributed to business managers and risk managers. The Risk Management function also reviews and reports several variations of the VaR measures in historical time series format to provide management with a historical perspective on risk.

The following table presents the levels of total regulatory VaR and its subcomponents, covering GFX, foreign currency balances, and interest rate derivatives combined, in the years indicated below, based on the historical simulation methodology, a 99% confidence level, a one-day horizon and equally-weighted volatility. The total VaR is typically less than the sum of its three subcomponents due to diversification benefits derived from interactions among the three drivers.

TABLE 44: VALUE-AT-RISK

(In Millions)	Combined Trading Book VaR		FX VaR (FX DRIVERS ONLY)		IR VaR (IR DRIVERS ONLY)	
	2024	2023	2024	2023	2024	2023
FOR THE YEAR ENDED DECEMBER 31,						
High	\$ 1.7	\$ 2.2	\$ 1.9	\$ 1.9	\$ 0.4	\$ 0.9
Low	0.2	0.1	0.1	—	0.1	—
Average	0.6	0.6	0.5	0.4	0.1	0.2
As of December 31,	0.2	0.2	0.2	1.6	0.1	0.1

During 2024 and 2023, Northern Trust did not incur an actual GFX trading loss in excess of the daily GFX VaR estimate.

Strategic Risk

Strategic risk is the vulnerability of the organization to internal or external developments that render corporate strategy ineffective or unachievable. The consequences of strategic risk can be diminished long-term earnings and capital, as well as reputational damage to the firm. Strategic risk encompasses two main areas:

- Macroeconomic and geopolitical risk centers on external events or developments that would have a detrimental impact on financial markets and/or financial services firms.
- Business risk arises from internal, secular, competitive, or regulatory trends that impact Northern Trust's stated strategy or its achievability.

Strategic Risk Framework and Governance

The Corporate Strategic Risk Framework has been developed in conjunction with the Corporation's risk appetite and risk management policies, and defines the mission and expectations of the Strategic Risk Management function to identify and analyze the sources and consequences of strategic risk.

This is achieved through participation in the establishment and review of business line strategy, coordination of risk input to the evaluation of key strategic opportunities, and developing and maintaining a risk inventory and set of metrics which attempt to gauge the level of strategic risk within the organization.

In addition, the Strategic Risk Management function maintains the Global Event Response Program, which aims to anticipate and prepare for stress scenarios, and provide an outline for responding to them when they occur.

Both GERC and the Business Risk Committee are responsible for reviewing the general methods, guidelines and frameworks by which Northern Trust monitors and evaluates strategic risk.

Climate Risk

Climate risk continues to be an evolving strategic risk for the Corporation. Climate risk refers to the risk of loss arising from climate change and is comprised of physical risk, liability risk and transition risk. Physical risk refers to risks to banks and the financial system emanating from the increased severity of extreme weather events (e.g., cyclones, droughts, floods, and fires). It can also refer to longer-term shifts in precipitation and temperature and increased variability in weather patterns (e.g., sea level rise). Liability risk stems from the potential for litigation in response to institutions' and boards' approach to the impacts of climate change. Transition risk reflects the risks to banks and financial systems of transitioning to a lower-carbon economy that may entail extensive policy, legal, technological, and market changes. Depending on the nature, speed, and focus of these changes, transition risks may pose varying levels of financial and reputational risk to banks and the financial system.

Effective management of climate risk requires coordinated governance, clearly defined roles and responsibilities and well-developed processes to identify, measure, monitor and control risks. We continue to build out and enhance our climate risk management capabilities. Our climate risk management efforts are overseen by the Chief Climate and Sustainability Risk Officer who reports directly to the CRO. The Risk Management function has created a dedicated climate and sustainability risk unit to monitor, oversee and take account of the increasing impact that climate change has, or may in the future have, on financial risk, nonfinancial risk, and regulatory compliance across the globe. The climate and sustainability risk unit works to evolve the risk management framework to ensure the Corporation meets the expectations of all stakeholders as well as all climate-related commitments made by the Corporation to external agencies.

The Board of Directors, and in particular its Corporate Governance Committee, engages in active oversight of ESG matters of significance to the Corporation and its subsidiaries. In addition, the Business Risk Committee provides oversight of certain financial and operational risks associated with climate change and other environmental factors through its oversight of the Corporation's global risk management framework and risk management policies. The Business Risk Committee also engages in periodic discussions with management and members of the Risk Management function regarding strategic risks, including climate-related risk.

The Corporation expects that climate change will increasingly impact the risk types it manages, and the Corporation will continue to integrate climate considerations into its risk management framework as its understanding of climate change and risks driven by it evolve. Various regulatory agencies, investors, and other stakeholders have increased expectations and scrutiny in this area. Given the potential risks from climate change, the Corporation is committed to helping mitigate the impacts from its activities and to partner with key stakeholders to do the same.

FORWARD-LOOKING STATEMENTS

This report may include statements which constitute “forward-looking statements” within the meaning of the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Forward-looking statements are identified typically by words or phrases such as “believe,” “expect,” “anticipate,” “intend,” “estimate,” “project,” “likely,” “plan,” “goal,” “target,” “strategy,” and similar expressions or future or conditional verbs such as “may,” “will,” “should,” “would,” and “could.” Forward-looking statements include statements, other than those related to historical facts, that relate to Northern Trust’s financial results and outlook; capital adequacy; dividend policy and share repurchase program; accounting estimates and assumptions; credit quality including allowance levels; future pension plan contributions; effective tax rate; anticipated expense levels; contingent liabilities; acquisitions; strategies; market and industry trends; and expectations regarding the impact of accounting pronouncements and legislation. These statements are based on Northern Trust’s current beliefs and expectations of future events or future results, and involve risks and uncertainties that are difficult to predict and subject to change. These statements are also based on assumptions about many important factors, including:

- financial market disruptions or economic recession in the U.S. or other countries across the globe resulting from any of a number of factors;
- volatility or changes in financial markets, including debt and equity markets, that impact the value, liquidity, or credit ratings of financial assets in general, or financial assets held in particular investment funds or client portfolios, including those funds, portfolios, and other financial assets with respect to which Northern Trust has taken, or may in the future take, actions to provide asset value stability or additional liquidity;
- the impact of equity markets on fee revenue;
- changes in interest rates or in the monetary or other policies of various regulatory authorities or central banks;
- changes in trade policy, including the imposition of tariffs or the impacts of retaliatory tariffs;
- Northern Trust’s success in controlling the costs and expenses of its business operations and the impacts of any broader inflationary environment thereon;
- a decline in the value of securities held in Northern Trust’s investment portfolio, the liquidity and pricing of which may be negatively impacted by periods of economic turmoil and financial market disruptions;
- Northern Trust’s ability to address operating risks, including those related to cybersecurity, data privacy and security, human errors or omissions, pricing or valuation of securities, fraud, operational resilience (including systems performance), failure to maintain sustainable business practices, and breakdowns in processes or internal controls;
- Northern Trust’s success in responding to and investing in changes and advancements in technology;
- geopolitical risks, risks related to global climate change and the risks of extraordinary events such as pandemics, natural disasters, terrorist events and war (including the expansion or escalation of military conflict between Ukraine and the Russian Federation or the conflict in the Middle East, and tensions between the U.S. and China), and the responses of the U.S. and other countries to those events;
- unexpected deposit outflows;
- the effectiveness of Northern Trust’s management of its human capital, including its success in recruiting and retaining necessary and diverse personnel to support business growth and expansion and maintain sufficient expertise to support increasingly complex products and services;
- changes in the legal, regulatory and enforcement framework and oversight applicable to financial institutions, including Northern Trust;
- changes in foreign exchange trading client volumes and volatility in foreign currency exchange rates, changes in the valuation of the U.S. dollar relative to other currencies in which Northern Trust records revenue or accrues expenses, and Northern Trust’s success in assessing and mitigating the risks arising from all such changes and volatility;
- a significant downgrade of any of Northern Trust’s debt ratings;
- the health and soundness of the financial institutions and other counterparties with which Northern Trust conducts business;
- uncertainties inherent in the complex and subjective judgments required to assess credit risk and establish appropriate allowances therefor;
- increased costs of compliance and other risks associated with changes in regulation, the current regulatory environment, and areas of increased regulatory emphasis and oversight in the U.S. and other countries, such as anti-money laundering, anti-bribery, and data privacy and security;
- failure to satisfy regulatory standards or to obtain regulatory approvals when required, including for the use and distribution of capital;
- Northern Trust’s success in continuing to enhance its risk management practices and controls and managing risks inherent in its businesses, including credit risk, operational risk, market and liquidity risk, fiduciary risk, compliance risk and strategic risk;

- risks and uncertainties inherent in the litigation and regulatory process, including the possibility that losses may be in excess of Northern Trust's recorded liability and estimated range of possible loss for litigation exposures;
- the risk of damage to Northern Trust's reputation which may undermine the confidence of clients, counterparties, rating agencies, and stockholders;
- the downgrade of U.S. government-issued and other securities;
- changes in tax laws, accounting requirements or interpretations and other legislation in the U.S. or other countries that could affect Northern Trust or its clients;
- the pace and extent of continued globalization of investment activity and growth in worldwide financial assets;
- changes in the nature and activities of Northern Trust's competition;
- Northern Trust's success in maintaining existing business and continuing to generate new business in existing and targeted markets and its ability to deploy deposits in a profitable manner consistent with its liquidity requirements;
- Northern Trust's ability to address the complex needs of a global client base and manage compliance with legal, tax, regulatory and other requirements;
- Northern Trust's ability to maintain a product mix that achieves acceptable margins;
- Northern Trust's ability to continue to generate investment results that satisfy clients and to develop an array of investment products;
- uncertainties inherent in Northern Trust's assumptions concerning its pension plan, including discount rates and expected contributions, returns and payouts;
- risks associated with being a holding company, including Northern Trust's dependence on dividends from its principal subsidiary; and
- other factors identified elsewhere in this Annual Report on Form 10-K, including those factors described in Item 1A, "Risk Factors," and other filings with the SEC, all of which are available on Northern Trust's website.

Actual results may differ materially from those expressed or implied by forward-looking statements. The information contained herein is current only as of the date of that information. All forward-looking statements included in this document are based upon information presently available, and Northern Trust assumes no obligation to update its forward-looking statements.

SUPPLEMENTAL INFORMATION

Reconciliation to Fully Taxable Equivalent

The following table presents a reconciliation of Interest Income, Net Interest Income, Net Interest Margin, and Total Revenue prepared in accordance with GAAP to such measures on an FTE basis, which are non-GAAP financial measures. Net Interest Margin is calculated by dividing annualized Net Interest Income by average interest-earning assets. Management believes this presentation provides a clearer indication of these financial measures for comparative purposes. When adjusted to an FTE basis, yields on taxable, nontaxable and partially taxable assets are comparable; however, the adjustment to an FTE basis has no impact on Net Income.

TABLE 45: RECONCILIATION TO FULLY TAXABLE EQUIVALENT

(\$ In Millions)	FOR THE YEAR ENDED DECEMBER 31,		
	2024	2023	2022
Net Interest Income

ITEM 7A – QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The information called for by this item is incorporated herein by reference to the “Risk Management” section of Item 7, “Management’s Discussion and Analysis of Financial Condition and Results of Operations,” in this Annual Report on Form 10-K.

ITEM 8 – FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

Report of Independent Registered Public Accounting Firm

To the Stockholders and Board of Directors
Northern Trust Corporation:

Opinion on the Consolidated Financial Statements

We have audited the accompanying consolidated balance sheets of Northern Trust Corporation and subsidiaries (the Corporation) as of December 31, 2024 and 2023, the related consolidated statements of income, comprehensive income, changes in stockholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2024, and the related notes (collectively, the consolidated financial statements). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Corporation as of December 31, 2024 and 2023, and the results of its operations and its cash flows for each of the years in the three-year period ended December 31, 2024, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Corporation's internal control over financial reporting as of December 31, 2024, based on criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission, and our report dated February 24, 2025 expressed an unqualified opinion on the effectiveness of the Corporation's internal control over financial reporting.

Basis for Opinion

These consolidated financial statements are the responsibility of the Corporation's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Corporation in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. We believe that our audits provide a reasonable basis for our opinion.

Critical Audit Matter

The critical audit matter communicated below is a matter arising from the current period audit of the consolidated financial statements that was communicated or required to be communicated to the audit committee and that: (1) relates to accounts or disclosures that are material to the consolidated financial statements and (2) involved our especially challenging, subjective, or complex judgments. The communication of a critical audit matter does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matter below, providing a separate opinion on the critical audit matter or on the accounts or disclosures to which it relates.

Assessment of the allowance for credit losses for commercial loans evaluated on a collective basis

As discussed in Notes 1 and 6 to the consolidated financial statements, the Corporation's allowance for credit losses for commercial loans evaluated on a collective basis (the collective ACL) was \$137.3 million of a total allowance for credit losses assigned to loans of \$168.0 million as of December 31, 2024. Expected credit losses are measured on a collective basis as long as the financial assets included in the respective pool share similar risk characteristics. The allowance estimation methodology for the collective assessment is based on data representative of the Corporation's financial asset portfolio from a historical observation period that includes both expansionary and recessionary periods. The estimation methodology and the related qualitative adjustment framework segregate the loan portfolio into segments based on loan and obligor specific factors, including loan type, borrower type, collateral type, loan size, and borrower credit quality. The estimation methodology applies probability of default and loss given default assumptions to the projected exposure at default on a pool basis. For each segment, the probability of default (PD) and loss given default (LGD) are derived for each quarter of the remaining life of each instrument. For the first two years (the reasonable and supportable period), these factors are derived by applying quarterly macroeconomic projections using models developed from historical data on macroeconomic factors and loans with similar factors, including the borrower rating assigned to individual obligors, as applicable. For periods beyond the reasonable and supportable period, the Corporation reverts to its own long-run historical loss experience on a straight-line basis over four quarters. The projected exposure at default for every quarter is based on contractual balance projections as of each quarter-end. Estimating expected lifetime credit losses requires the consideration of the effect of future economic conditions. The Corporation employs multiple scenarios over a reasonable and supportable period to project future conditions. The Corporation determines the probability weights assigned to each scenario at each quarter-end. The quantitative allowance is then reviewed within the qualitative adjustment framework, through which the Corporation applies judgment by assessing internal risk factors, potential limitations in the quantitative methodology, and other factors that are not fully contemplated in the forecast to compute adjustments to the quantitative allowance that may impact individual or multiple segments of the loan portfolio.

We identified the assessment of the quantitative component of the collective ACL as a critical audit matter. A high degree of audit effort, including specialized skills and knowledge, and subjective and complex auditor judgment was involved in the assessment of the quantitative component of the collective ACL due to significant measurement uncertainty. Specifically, the assessment encompassed the evaluation of the quantitative component of the collective ACL methodology, including the methods and models used to estimate the PD and LGD and their significant assumptions, the multiple economic forecast scenarios and macroeconomic factors and their respective weightings, and borrower ratings for certain commercial loans. In addition, auditor judgment was required to evaluate the sufficiency of audit evidence obtained.

The following are the primary procedures we performed to address this critical audit matter. We evaluated the design and operating effectiveness of certain internal controls related to the critical audit matter. This included controls related to the Corporation's measurement of the quantitative component of the collective ACL estimate, including controls over:

- development of the quantitative component of the collective ACL methodology
- development, calibration and/or performance monitoring of certain PD and LGD models
- development and approval of the multiple economic forecast scenarios, macroeconomic factors and their respective weightings
- identification and determination of the significant assumptions used in certain PD and LGD models
- analysis of the allowance for credit losses for loans results.

We evaluated the Corporation's process to develop the quantitative component of the collective ACL estimate by testing certain sources of data, factors, and assumptions that the Corporation used, and considered the relevance and reliability of such data, factors and assumptions. In addition, we involved credit risk professionals with specialized skills and knowledge, who assisted in:

- evaluating the quantitative component of the Corporation's collective ACL methodology for compliance with U.S. generally accepted accounting principles
- evaluating judgments made by the Corporation relative to the development, calibration and/or performance monitoring of certain PD and LGD models
- assessing the conceptual soundness and performance testing of certain PD and LGD models by inspecting model documentation to determine whether the models were suitable for their intended use

- assessing the economic forecast scenarios, the economic input variables and their respective weightings through comparison to publicly available forecasts and the Corporation's business environment
- testing individual borrower ratings for a selection of commercial loan relationships by evaluating the financial performance of the borrower, sources of repayment, and any relevant guarantees or underlying collateral.

We also assessed the sufficiency of the audit evidence obtained related to the quantitative component of the collective ACL by evaluating the:

- cumulative results of the procedures
- qualitative aspects of the Corporation's accounting practices
- potential bias in the accounting estimate

KPMG LLP

We have served as the Corporation's auditor since 2002.

Chicago, Illinois

Note 1 – Summary of Significant Accounting Policies

The consolidated financial statements have been prepared in conformity with U.S. generally accepted accounting principles (GAAP) and reporting practices prescribed for the banking industry. A description of the more significant accounting policies follows.

A. Basis of Presentation. The consolidated financial statements include the accounts of Northern Trust Corporation (Corporation) and its wholly-owned subsidiary, The Northern Trust Company (Bank), and various other wholly-owned subsidiaries of the Corporation and Bank. Throughout the notes to the consolidated financial statements, the term “Northern Trust” refers to the Corporation and its subsidiaries. Intercompany balances and transactions have been eliminated in consolidation. The consolidated statements of income include results of acquired subsidiaries from the dates of acquisition. Certain prior-year balances have been reclassified consistent with the current year’s presentation.

B. Nature of Operations. The Corporation is a bank holding company that has elected to be a financial holding company under the Bank Holding Company Act of 1956, as amended. The Bank is an Illinois banking corporation headquartered in Chicago and the Corporation’s principal subsidiary. The Corporation conducts business in the United States (U.S.) and internationally through various U.S. and non-U.S. subsidiaries, including the Bank.

Northern Trust generates the majority of its revenue from its two client-focused reporting segments: Asset Servicing and Wealth Management. Asset management and related services are provided to Asset Servicing and Wealth Management clients primarily by the Asset Management business.

Asset Servicing is a leading global provider of asset servicing and related services to corporate and public retirement funds, foundations, endowments, fund managers, insurance companies, sovereign wealth funds, and other institutional investors around the globe. Asset servicing and related services encompass a full range of capabilities including but not limited to: custody; fund administration; investment operations outsourcing; investment management; investment risk and analytical services; employee benefit services; securities lending; foreign exchange; treasury management; brokerage services; transition management services; banking; and cash management. Client relationships are managed through the Bank and the Bank’s and the Corporation’s other subsidiaries, including support from locations in North America, Europe, the Middle East, and the Asia-Pacific region.

Wealth Management focuses on high-net-worth individuals and families, business owners, executives, professionals, retirees, and established privately-held businesses in its target markets. In supporting these targeted segments, Wealth Management provides trust, investment management, custody, and philanthropic services; financial consulting; guardianship and estate administration; family business consulting; family financial education; brokerage services; and private and business banking. Wealth Management also includes Global Family Office, which provides customized services, including but not limited to: investment management; global custody; fiduciary; and private banking; family office consulting, and technology solutions, to meet the complex financial and reporting needs of ultra-high-net-worth individuals and family offices across the globe. Wealth Management services are delivered by multidisciplinary teams through a network of offices in 19 U.S. states and Washington, D.C., as well as offices in London, Guernsey, Singapore, and Abu Dhabi.

C. Use of Estimates in the Preparation of Financial Statements. The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions in the application of certain of our significant accounting policies that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenue and expense during the reporting period. Actual results could differ from those estimates.

D. Foreign Currency Remeasurement and Translation. Asset and liability accounts denominated in nonfunctional currencies are remeasured into functional currencies at period-end rates of exchange, except for certain balance sheet items including but not limited to buildings and equipment, goodwill and other intangible assets, which are remeasured at historical exchange rates. Results from remeasurement of asset and liability accounts are reported in Other Operating Income on the consolidated statements of income. Income and expense accounts are remeasured at period-average rates of exchange.

Asset and liability accounts of entities with functional currencies that are not the U.S. dollar are translated at period-end rates of exchange. Income and expense accounts are translated at period-average rates of exchange. Translation adjustments, net of applicable taxes, are reported directly to accumulated other comprehensive income (AOCI), a component of stockholders’ equity.

E. Securities. Available for Sale (AFS) Securities are reported at fair value, with unrealized gains and losses credited or charged, net of the tax effect, to AOCI. Realized gains and losses on AFS securities are determined on a specific identification basis and are reported within Investment Security Gains (Losses), net, on the consolidated statements of income. Interest income is recorded on the accrual basis, adjusted for the amortization of premium and accretion of discount.

Held to Maturity (HTM) Securities consist of debt securities that management intends to, and Northern Trust has the ability to, hold until maturity. Such securities are reported at cost, adjusted for amortization of premium and accretion of discount. Interest income is recorded on the accrual basis adjusted for the amortization of premium and accretion of discount.

Trading Account Securities are reported at fair value. Realized and unrealized gains and losses on securities held for trading are reported within Security Commissions and Trading Income on the consolidated statements of income.

Nonmarketable Securities primarily consist of Federal Reserve Bank of Chicago and Federal Home Loan Bank stock and community development investments, each of which are recorded in Other Assets on the consolidated balance sheets. Federal Reserve Bank of Chicago and Federal Home Loan Bank stock are reported at cost, which represents redemption value. Community development investments are typically reported at amortized cost. Those community development investments that are designed to generate a return primarily through realization of tax credits and other tax benefits, which are discussed in further detail in Note 28, "Variable Interest Entities," are amortized over the lives of the related tax credits and other tax benefits.

F. Securities Purchased Under Agreements to Resell and Securities Sold Under Agreements to Repurchase.

Securities purchased under agreements to resell and securities sold under agreements to repurchase are accounted for as collateralized financings and recorded at the amounts at which the securities were acquired or sold plus accrued interest. To minimize any potential credit risk associated with these transactions, the fair value of the securities purchased or sold is monitored, limits are set on exposure with counterparties, and the financial condition of counterparties is regularly assessed. It is Northern Trust's policy to take possession, either directly or via third-party custodians, of securities purchased under agreements to resell. Securities sold under agreements to repurchase are either directly held by, or pledged to the counterparty until the repurchase. Northern Trust nets securities sold under agreements to repurchase against those purchased under agreements to resell when the requirements to net are met.

G. Derivative Financial Instruments. Northern Trust is a party to various derivative financial instruments that are used in the normal course of business to meet the needs of its clients, as part of its trading activity for its own account, and as part of its risk management activities. These instruments generally include foreign exchange contracts, interest rate contracts, total return swap contracts and credit default swap contracts. All derivative financial instruments, whether designated as hedges or not, are recorded at fair value within Other Assets and Other Liabilities on the consolidated balance sheets. Derivative asset and liability positions with the same counterparty are reflected on a net basis on the consolidated balance sheets in cases where legally enforceable master netting arrangements or similar agreements exist. These derivative assets and liabilities are further reduced by cash collateral received from, and deposited with, derivative counterparties. The accounting for changes in the fair value of a derivative on the consolidated statements of income depends on whether or not the contract has been designated as a hedge and qualifies for hedge accounting under GAAP. Derivative financial instruments are recorded within the line item, Other Operating Activities, net, on the consolidated statement of cash flows, except for net investment hedges which are recorded within Other Investing Activities, net.

Changes in the fair value of client-related and trading derivative instruments, which are not designated hedges under GAAP, are recognized currently in either Foreign Exchange Trading Income or Security Commissions and Trading Income on the consolidated statements of income. Changes in the fair value of derivative instruments entered into for risk management purposes but not designated as hedges are recognized currently in Other Operating Income on the consolidated statements of income. Certain derivative instruments used by Northern Trust to manage risk are formally designated and qualify for hedge accounting as fair value, cash flow, or net investment hedges.

Derivatives designated as fair value hedges are used to limit Northern Trust's exposure to changes in the fair value of assets and liabilities due to movements in interest rates. Changes in the fair value of the derivative instrument and changes in the fair value of the hedged asset or liability attributable to the hedged risk are recognized currently in Interest Income or Interest Expense on the consolidated statements of income. For substantially all fair value hedges, Northern Trust applies the "shortcut" method of accounting, available under GAAP. As a result, changes recorded in the fair value of the hedged item are assumed to equal the offsetting gain or loss on the derivative. For fair value hedges that do not qualify for the "shortcut" method of accounting, Northern Trust utilizes regression analysis in assessing whether these hedging relationships are highly effective at inception and quarterly thereafter.

Derivatives designated as cash flow hedges are used to minimize the variability in cash flows of earning assets or forecasted transactions caused by movements in interest or foreign exchange rates. Changes in the fair value of such derivatives are recognized in AOCI, a component of stockholders' equity, and there is no change to the accounting for the hedged item. Balances in AOCI are reclassified to earnings when the hedged forecasted transaction impacts earnings, and are reflected in the same income statement line item. Northern Trust applies the "shortcut" method of accounting for cash flow hedges of certain AFS debt securities. For cash flow hedges of certain other AFS debt securities, foreign currency denominated securities, and forecasted foreign currency denominated revenue and expenditure transactions, Northern Trust closely matches all terms of the hedged item and hedging derivative at inception and on an ongoing basis. For cash flow hedges of AFS debt securities, to the extent all terms are not perfectly matched, effectiveness is assessed using regression analysis. For cash flow hedges of forecasted foreign currency denominated revenue and expenditure transactions and investment securities, to the extent all terms are not perfectly matched, effectiveness is assessed using the dollar-offset method.

Foreign exchange contracts and qualifying non-derivative instruments designated as net investment hedges are used to minimize Northern Trust's exposure to variability in the foreign currency translation of net investments in non-U.S. branches and subsidiaries. Changes in the fair value of the hedging instrument are recognized in AOCI consistent with the related translation gains and losses of the hedged net investment. For net investment hedges, all critical terms of the hedged item and the hedging instrument are matched at inception and on an ongoing basis. Amounts recorded in AOCI are reclassified to earnings only upon the sale or liquidation of an investment in a non-U.S. branch or subsidiary.

Fair value, cash flow, and net investment hedges are designated and formally documented as such contemporaneous with the transaction. The formal documentation describes the hedge relationship and identifies the hedging instruments and hedged items. Included in the documentation is a discussion of the risk management objectives and strategies for undertaking such hedges, the nature of the risk being hedged, and a description of the method for assessing hedge effectiveness at inception and on an ongoing basis. For hedges that do not qualify for the "shortcut" or the critical terms match methods of accounting, a formal assessment is performed on a calendar quarter basis to verify that derivatives used in hedging transactions continue to be highly effective in offsetting the changes in fair value or cash flows of the hedged item. Hedge accounting is discontinued if a derivative ceases to be highly effective, matures, is terminated or sold, if a hedged forecasted transaction is no longer expected to occur, or if Northern Trust removes the derivative's hedge designation. Subsequent gains and losses on these derivatives are included in Foreign Exchange Trading Income or Security Commissions and Trading Income on the consolidated statements of income. For discontinued cash flow hedges, the accumulated gain or loss on the derivative remains in AOCI and is reclassified to earnings in the period in which the previously hedged forecasted transaction impacts earnings or is no longer probable of occurring. For discontinued fair value hedges, the previously hedged asset or liability ceases to be adjusted for changes in its fair value. Previous adjustments to the hedged item are amortized over the remaining life of the hedged item.

H. Loans. Loans are recognized assets that represent a contractual right to receive money either on demand or on fixed or determinable dates. Loans are disaggregated for disclosure purposes by portfolio segment (segment) and by class. Northern Trust has defined its segments as commercial and personal. A class of loans is a subset of a segment, the components of which have similar risk characteristics, measurement attributes, or risk monitoring methods. The classes within the commercial segment have been defined as commercial and institutional, commercial real estate, non-U.S. and other. The classes within the personal segment have been defined as private client, residential real estate, non-U.S. and other.

Loan Classification. Loans that are held for investment are reported at the principal amount outstanding, net of unearned income. Loans classified as held for sale are reported at the lower of cost or fair value.

Nonaccrual Loans and Recognition of Income. Interest income on loans is recorded on an accrual basis unless, in the opinion of management, there is a question as to the ability of the debtor to meet the terms of the loan agreement, or interest or principal is 90 days or more contractually past due and the loan is not well-secured and in the process of collection. Loans meeting such criteria are classified as nonaccrual, and interest income is recorded on a cash basis. Past due status is based on how long since the contractual due date a principal or interest payment has been past due. For disclosure purposes, loans that are 29 days past due or less are reported as current. At the time a loan is determined to be nonaccrual, interest accrued but not collected is reversed against interest income in the current period. Interest collected on nonaccrual loans is applied to principal unless, in the opinion of management, collectability of principal is not in doubt. Management's assessment of indicators of loan collectability, and its policies relative to the recognition of interest income, including the suspension and subsequent resumption of income recognition, do not meaningfully vary between the different loan classes. Nonaccrual loans are returned to performing status when factors indicating doubtful collectability no longer exist. Factors considered in returning a loan to performing status are consistent across all classes of loans and, in accordance with regulatory guidance, relate primarily to expected payment performance. A loan is eligible to be returned to performing status when: (i) no principal or interest that is due is unpaid and repayment of the remaining contractual principal and interest is expected or (ii) the loan has otherwise become well-secured (possessing realizable value sufficient to discharge the debt, including accrued interest, in full) and is in the process of collection (through action reasonably

expected to result in debt repayment or restoration to a current status in the near future). A loan that has not been brought fully current may be restored to performing status provided there has been a sustained period of repayment performance (generally a minimum of six payment periods) by the borrower in accordance with the contractual terms, and Northern Trust is reasonably assured of repayment within a reasonable period of time. Additionally, a loan that has been formally restructured so as to be reasonably assured of repayment and performance according to its modified terms may be returned to accrual status, provided there was a well-documented credit evaluation of the borrower's financial condition and prospects of repayment under the revised terms, and there has been a sustained period of repayment performance (generally a minimum of six payment periods) under the revised terms.

Loan Modifications to Borrowers Experiencing Financial Difficulty. For borrowers experiencing financial difficulties, Northern Trust may provide payment relief by modifying the terms of the original loan. Loan modifications to borrowers experiencing financial difficulty involve primarily the extensions of term, deferrals of principal and interest payments, interest rate concessions, and other modifications or a combination thereof. Northern Trust considers payment deferrals of less than 90 days as insignificant, absent any material modifications to other loan terms.

The expected credit loss for modifications to borrowers experiencing financial difficulty is measured based on either the expected future cash flows, the value of collateral, or other factors that may impact the borrower's ability to pay. When the discounted cash flow method is applied, the expected credit loss reflects the difference between the amortized cost basis and the present value of the expected cash flows and is measured based upon the present value of expected future cash flows, discounted at the post-modification effective interest rate and contractual terms. If a loan's contractual interest rate varies based on subsequent changes in an independent factor, such as an index or rate, the loan's effective interest rate is calculated based on the factor as it changes over the life of the loan. Northern Trust elected not to project changes in the factor for purposes of estimating expected future cash flows. If the loan is collateral dependent, the expected loss is measured based on the fair value of the collateral at the reporting date.

If the loan valuation is less than the recorded value of the loan, either an allowance is established or a charge-off is recorded for the difference. The nature and extent of further deterioration in credit quality, including a subsequent default, is considered in the determination of an appropriate level of allowance for credit losses for all loan modifications to borrowers experiencing financial difficulty.

Collateral Dependent Financial Assets. A financial asset is collateral-dependent when the borrower is experiencing financial difficulty and repayment is expected to be provided substantially through the sale or operation of the collateral. Most of Northern Trust's collateral dependent credit exposure relates to its residential real estate portfolio for which the collateral is usually the underlying real estate property. For collateral dependent financial assets, it is Northern Trust's policy to reserve or charge-off the difference between the amortized cost basis of the loan and the value of the collateral.

Premium, Discounts, Origination Costs and Fees. Premiums and discounts on loans are recognized as an adjustment of yield using the interest method based on the contractual terms of the loan. Certain direct origination costs and fees are netted, deferred and amortized over the life of the related loan as an adjustment to the loan's yield.

I. Allowance for Credit Losses. The allowance for credit losses represents management's best estimate of lifetime expected credit losses related to various financial assets subject to credit risk and off-balance sheet credit exposure.

Northern Trust measures expected credit losses of financial assets with similar risk characteristics on a collective basis. A financial asset is measured individually if it does not share similar risk characteristics with other financial assets and the related allowance is determined through an individual evaluation.

Management's estimates utilized in establishing an appropriate level of allowance for credit losses are not dependent on any single assumption. In determining an appropriate allowance level, management evaluates numerous variables, many of which are interrelated or dependent on other assumptions and estimates, and takes into consideration past events, current conditions and reasonable and supportable forecasts.

Forecasting and Reversion. Estimating expected lifetime credit losses requires the consideration of the effect of future economic conditions. Northern Trust employs multiple scenarios over a reasonable and supportable period (currently two years) to project future conditions. Key variables determined to be relevant for projecting credit losses on the portfolios in scope include macroeconomic factors, such as corporate profits, GDP, unemployment rate, consumer spending, and real estate price indices, as well as financial market factors such as equity prices, volatility, and credit spreads. For periods beyond the reasonable and supportable period, Northern Trust reverts to its own historical loss experiences on a straight-line basis over four quarters.

Allowance for Loans. The allowance estimation methodology for the collective assessment is based on data representative of the Corporation's financial asset portfolio from a historical observation period that includes both expansionary and recessionary periods. The estimation methodology and the related qualitative adjustment framework segregate the loan portfolio into segments and classes based on similar risk characteristics or risk monitoring methods.

Northern Trust utilizes a quantitative probability of default/loss given default approach for the calculation of its credit allowance on a collective basis. For each of the different parameters, specific credit models or qualitative estimation methodologies for the individual loan classes were developed. For each class, the probability of default and the loss given default are applied to the exposure at default for each projected quarter to determine the quantitative component of the allowance. The quantitative allowance is then reviewed within a comprehensive qualitative adjustment framework, through which management applies judgment by assessing internal risk factors, potential limitations in the quantitative methodology, and other factors that are not fully contemplated in the forecast to compute an adjustment to the quantitative allowance for each segment and class of the loan portfolio.

The allowance related to credit exposures evaluated on an individual basis is determined through individual evaluations of loans and lending-related commitments that have defaulted, generally those with Borrower Ratings of 8 and 9. These evaluations are based on expected future cash flows, the value of collateral, and other factors that may impact the borrowers' ability to pay. For defaulted loans for which the amount of allowance, if any, is determined based on the value of the underlying collateral, third-party appraisals are typically obtained and utilized by management. These appraisals are generally less than twelve months old and are subject to adjustments to reflect management's judgment as to the realizable value of the collateral.

Northern Trust analyzes its exposure to credit losses from both on-balance sheet and off-balance sheet activity using a consistent methodology for the quantitative as well as the qualitative framework. For purposes of estimating the allowance for credit losses for undrawn loan commitments and standby letters of credit, the exposure at default includes estimated draw downs of the undrawn commitments based on credit utilization factors, resulting in a proportionate amount of expected credit losses.

Allowance for HTM Securities. HTM debt securities classified as U.S. government, government sponsored agency, and certain securities classified as obligations of states and political subdivisions are considered to be guarantees of the U.S. government or an agency of the U.S. government, and therefore an allowance for credit losses is not estimated for such investments as the expected probability of non-payment of the amortized cost basis is zero.

HTM debt securities classified as "other asset-backed securities" represent pools of underlying receivables from which the cash flows are used to pay the bonds that vary in seniority. Utilizing a qualitative estimation approach, the allowance for other asset-backed securities is assessed by evaluating underlying pool performance based on delinquency rates and available credit support.

HTM debt securities classified as "other" relate to investments purchased by Northern Trust to fulfill its obligations under the Community Reinvestment Act (CRA). Northern Trust fulfills its obligations under the CRA by making qualified investments for purposes of supporting institutions and programs that benefit low-to-moderate income communities within Northern Trust's market area. The allowance for CRA investments is assessed using a qualitative estimation approach primarily based on historical performance experience and default history of the underlying CRA loans to determine the quantitative allowance.

The allowance estimation methodology for all other HTM debt securities is developed using a combination of external and internal data. The estimation methodology groups securities with shared characteristics for which the probability of default and the loss given default are applied to the total exposure at default to determine a quantitative component of the allowance.

Allowance for AFS Securities. AFS debt securities impairment reviews are conducted quarterly to identify and evaluate securities that have indications of possible credit losses. The determination as to whether a security's decline in market value is related to credit impairment takes into consideration numerous factors and the relative significance of any single factor can vary by security. Factors Northern Trust considers in determining whether impairment is credit related include, but are not limited to, the severity of the impairment; the cause of the impairment; the financial condition and near-term prospects of the issuer; activity in the market of the issuer, which may indicate adverse credit conditions; Northern Trust's intent regarding the sale of the security as of the balance sheet date; and the likelihood that Northern Trust will not be required to sell the security for a period of time sufficient to allow for the recovery of the security's amortized cost basis. For each security meeting the requirements of Northern Trust's internal screening process, an extensive review is conducted to determine if a credit loss has occurred that is then based on the best estimate of cash flows to be collected from the security, discounted using the security's effective interest rate. If the present value of the expected cash flows is found to be less than the current amortized cost of the security, an allowance for credit losses is generally recorded equal to the difference between the two amounts, limited to the amount the amortized cost basis exceeds the fair value of the security.

If management intends to sell, or will more likely than not be required to sell, an AFS debt security prior to recovery of its amortized cost basis, the security is written down to fair value with unrealized losses recognized in Investment Security Gains (Losses), net on the consolidated statements of income.

Allowance for Other Financial Assets. The allowance for other financial assets covers assets categorized as Due from Banks, Other Central Bank Deposits, Interest-Bearing Deposits with Banks, Federal Funds Sold, and Other Assets. The Other Assets category includes other miscellaneous credit exposures reported in Other Assets on the consolidated balance sheets. The allowance estimation methodology for other financial assets primarily utilizes a similar approach as the one used for the HTM debt securities portfolio. It consists of a combination of externally and internally developed loss data, adjusted for the appropriate contractual term. Northern Trust's portfolio is composed mostly of institutions within the "1 to 3" internal borrower rating category and is expected to exhibit minimal to modest likelihood of loss.

The portion of the allowance assigned to loans, HTM debt securities, and other financial assets is presented as a contra asset in Allowance for Credit Losses on the consolidated balance sheets. The portion of the allowance assigned to undrawn loan commitments and standby letters of credit is reported in Other Liabilities on the consolidated balance sheets. The allowance for AFS securities is presented parenthetically with the amortized cost basis of AFS debt securities on the consolidated balance sheets.

Provision for Credit Losses. Provision for Credit Losses on the consolidated statements of income represents the change in the Allowance for Credit Losses, after consideration of charge-offs and recoveries, on the consolidated balance sheets and is the charge to current period earnings. It represents the amount needed to maintain the Allowance for Credit Losses on the consolidated balance sheets at an appropriate level to absorb lifetime expected credit losses related to financial assets in scope. Actual losses may vary from current estimates.

Contractual Term. Northern Trust estimates expected credit losses over the contractual term of the financial assets adjusted for prepayments, unless prepayments are not relevant to specific portfolios or sub-portfolios. Extension and renewal options are typically not considered since it is not Northern Trust's practice to enter into arrangements where the borrower has the unconditional option to renew, or a conditional extension option whereby the conditions are beyond Northern Trust's control.

Accrued Interest. Northern Trust elected not to measure an allowance for credit losses for accrued interest receivables related to its loan and securities portfolios as its policy is to write-off uncollectible accrued interest receivable balances in a timely manner. Accrued interest is written off by reversing interest income during the quarter the financial asset is moved from an accrual to a nonaccrual status.

J. Standby Letters of Credit. Fees on standby letters of credit are recognized in Other Operating Income on the consolidated statements of income using the straight-line method over the lives of the underlying agreements.

K. Buildings and Equipment. Buildings and equipment owned are carried at original cost less accumulated depreciation. The charge for depreciation is computed using the straight-line method based on the following range of lives: buildings – up to 30 years; equipment – 3 to 10 years; and leasehold improvements – the shorter of the lease term or 15 years.

L. Other Real Estate Owned (OREO). OREO is comprised of commercial and residential real estate properties acquired in partial or total satisfaction of loans. OREO assets are carried at the lower of cost or fair value less estimated costs to sell and are recorded in Other Assets on the consolidated balance sheets. Fair value is typically based on third-party appraisals. Appraisals of OREO properties are updated on an annual basis and are subject to adjustments to reflect management's judgment as to the realizable value of the properties. Losses identified during the 90-day period after the acquisition of such properties are charged against the Allowance for Credit Losses assigned to Loans. Subsequent write-downs to the carrying value of these assets that may be required and gains or losses realized from asset sales are recorded within Other Operating Expense on the consolidated statements of income.

M. Goodwill and Other Intangible Assets. Goodwill is not subject to amortization. Separately identifiable acquired intangible assets with finite lives are amortized over their estimated useful lives, primarily on a straight-line basis. Costs related to purchased software and internal-use software development projects that result in new or enhanced functionality, including compensation and other allowable internal costs, are capitalized. Software is amortized using the straight-line method over the estimated useful lives of the assets, generally ranging from 3 to 10 years. Fees paid for the use of software services that do not convey a software license are expensed as incurred.

Goodwill and other intangible assets are reviewed for impairment on an annual basis or more frequently if events or changes in circumstances indicate the carrying amounts may not be recoverable.

N. Trust, Investment and Other Servicing Fees. Trust, Investment and Other Servicing Fees are recorded on an accrual basis, over the period in which the service is provided. Fees are primarily a function of the market value of assets custodied, managed and serviced, transaction volumes, number of accounts, and securities lending volume and spreads, as set forth in the underlying client agreement. This revenue recognition involves the use of estimates and assumptions, including components that are calculated based on estimated asset valuations and transaction volumes.

O. Client Security Settlement Receivables. These receivables result from custody client security sales executed under contractual settlement date accounting that have not yet settled as well as custody client withdrawals from short-term investment funds that settle on the following business day. Northern Trust advances cash to the client on the date of either trade execution or client withdrawal and awaits collection from either the settled trade or short-term investment funds.

P. Income Taxes. Northern Trust follows an asset and liability approach to account for income taxes. The objective is to recognize the amount of taxes payable or refundable for the current year, and to recognize deferred tax assets and liabilities for future tax consequences of temporary differences between the amounts reported in the financial statements and the tax bases of assets and liabilities. The measurement of tax assets and liabilities is based on enacted tax laws and applicable tax rates. It is Northern Trust's policy to release income tax effects from accumulated other comprehensive income on an aggregate portfolio basis.

Tax positions taken or expected to be taken on a tax return are evaluated based on their likelihood of being sustained upon examination by tax authorities. Only tax positions that are considered more-likely-than-not to be sustained are recorded on the consolidated financial statements. A valuation allowance is established for deferred tax assets if it is more-likely-than-not that all or a portion will not be realized. Northern Trust recognizes any interest and penalties related to unrecognized tax benefits in the Provision for Income Taxes on the consolidated statements of income.

Q. Cash Flow Statements. Cash and cash equivalents in the cash flow statements have been defined as "Cash and Due from Banks" on the consolidated balance sheets.

R. Pensions. Northern Trust records the funded status of its defined benefit pension plans on the consolidated balance sheets. Overfunded pension benefits are reported in Other Assets and underfunded pension benefits are reported in Other Liabilities on the consolidated balance sheets. Plan assets and benefit obligations are measured annually at December 31, unless specific circumstances require an interim remeasurement. Plan assets are determined based on fair value generally representing observable market prices. The projected benefit obligations are determined based on the present value of projected benefit distributions at an assumed discount rate. Actuarial gains and losses accumulated in AOCI are amortized as a component of net periodic pension cost if they exceed 10% of the greater of the projected benefit obligation or the market-related value of plan assets as of the beginning of the year. Amortization is recognized on a straight-line basis over the expected average remaining service period of the active employees or over the expected remaining lifetime of plan participants for plans that have been previously frozen.

S. Share-Based Compensation Plans. Northern Trust recognizes expense for share-based compensation on a straight-line basis based on the grant date fair value over the requisite service period. The fair values of stock and stock unit awards, including performance stock unit awards and director awards, are based on the closing price of the Corporation's stock on the date of grant adjusted for certain awards that do not accrue dividends while vesting. The expense for share-based compensation is included in Compensation on the consolidated statements of income.

Compensation expense for share-based award grants with terms that provide for a graded vesting schedule, whereby portions of the award vest in increments over the requisite service period, are recognized on a straight-line basis over the requisite service period for the entire award. Compensation expense for performance stock unit awards are recognized on a straight-line basis over the requisite service period of the award based on expected achievement of the performance condition. Adjustments are made for employees that meet certain retirement eligibility criteria at the grant date or during the requisite service period.

Northern Trust does not include an estimate of future forfeitures in its recognition of share-based compensation expense. Share-based compensation expense is adjusted based on forfeitures as they occur. Dividend equivalents are accrued for performance stock unit awards, most restricted stock unit awards, and director awards not yet vested, and are paid upon vesting. Certain restricted stock units are not entitled to dividend equivalents during the vesting period. Cash flows resulting from the realization of excess tax benefits are classified as operating cash flows on the consolidated statements of cash flows.

T. Net Income Per Common Share. Basic net income per common share is computed by dividing net income/loss applicable to common stock by the weighted average number of common shares outstanding during each period. Diluted net income per common share is computed by dividing net income applicable to common stock and potential common shares by the aggregate of the weighted average number of common shares outstanding during the period and common share equivalents calculated for stock options outstanding using the treasury stock method. In a period of a net loss, diluted net income per common share is calculated in the same manner as basic net income per common share.

Northern Trust calculates net income applicable to common stock using the two-class method, whereby net income is allocated between common stock and participating securities.

Note 2 – Recent Accounting Pronouncements

On January 1, 2024, Northern Trust adopted Accounting Standards Update (ASU) No. 2023-02, “Investments—Equity Method and Joint Ventures (Topic 323): Accounting for Investments in Tax Credit Structures Using the Proportional Amortization Method—a consensus of the Emerging Issues Task Force” (ASU 2023-02). The amendments in ASU 2023-02 allow entities to elect the proportional amortization method to account for tax equity investments if certain conditions are met regardless of the tax credit program from which the income tax credits are received. Under the proportional amortization method, an entity amortizes the initial cost of the investment in proportion to the income tax credits and other income tax benefits received and recognizes the net amortization and income tax credits and other income tax benefits in the income statement as a component of income tax expense (benefit). In addition, ASU 2023-02 requires specific disclosures that must be applied to all investments that generate income tax credits and other income tax benefits for which the entity has elected to apply the proportional amortization method in accordance with Subtopic 323-740. Upon adoption of ASU 2023-02, there was no significant impact to Northern Trust’s consolidated balance sheets or consolidated statements of income. Please refer to Note 28 - Variable Interest Entities for further information.

On January 1, 2024, Northern Trust adopted ASU No. 2022-03, “Fair Value Measurement (Topic 820): Fair Value Measurement of Equity Securities Subject to Contractual Sale Restrictions” (ASU 2022-03). The amendments in ASU 2022-03 clarify that a contractual restriction on the sale of an equity security is not considered part of the unit of account of the equity security and, therefore, is not considered in measuring fair value. ASU 2022-03 also clarifies that an entity cannot, as a separate unit of account, recognize and measure a contractual sale restriction. Additionally, ASU 2022-03 introduces new disclosure requirements to provide investors with information about contractual sale restrictions including the nature and remaining duration of these restrictions. Upon adoption of ASU 2022-03, there was no impact to Northern Trust’s consolidated balance sheets or consolidated statements of income.

On December 31, 2024, Northern Trust adopted ASU No. 2023-07, “Segment Reporting (Topic 280): Improvements to Reportable Segment Disclosures” (ASU 2023-07). ASU 2023-07 significantly expands disclosures about a public entity’s reportable segments, primarily through more frequent and enhanced disclosures about significant segment expenses. Additionally, ASU 2023-07 requires disclosure of the title and position of the Chief Operating Decision Maker (CODM) and how the CODM uses the reported measure of a segment’s profit or loss. Upon adoption of ASU 2023-07, the impact was limited to certain enhancements within the notes to the consolidated financial statements and did not impact Northern Trust’s consolidated balance sheets or consolidated statements of income. Please refer to Note 31 – Reporting Segments and Related Information for further information.

Note 3 – Fair Value Measurements

Fair value under GAAP is defined as the price that would be received to sell an asset or paid to transfer a liability (an exit price) in an orderly transaction between market participants on the measurement date.

Fair Value Hierarchy. The following describes the hierarchy of valuation inputs (Levels 1, 2, and 3) used to measure fair value and the primary valuation methodologies used by Northern Trust for financial instruments measured at fair value on a recurring basis. Observable inputs reflect market data obtained from sources independent of the reporting entity; unobservable inputs reflect the entity’s own assumptions about how market participants would value an asset or liability based on the best information available. GAAP requires an entity measuring fair value to maximize the use of observable inputs and minimize the use of unobservable inputs and establishes a fair value hierarchy of inputs. Financial instruments are categorized within the hierarchy based on the lowest level input that is significant to their valuation. Northern Trust’s policy is to recognize transfers into and transfers out of fair value levels as of the end of the reporting period in which the transfer occurred. No transfers into or out of Level 3 occurred during the years ended December 31, 2024, or 2023.

Level 1 – Quoted, active market prices for identical assets or liabilities. Northern Trust’s Level 1 assets are comprised primarily of AFS investments in U.S. Treasury securities.

Level 2 – Observable inputs other than Level 1 prices, such as quoted active market prices for similar assets or liabilities, quoted prices for identical or similar assets in inactive markets, and model-derived valuations in which all significant inputs are observable in active markets. Northern Trust’s Level 2 assets include AFS debt securities, the fair values of which are determined predominantly by external pricing vendors. Prices received from vendors are compared to other vendor and third-party prices. If a security price obtained from a pricing vendor is determined to exceed pre-determined tolerance levels that are assigned based on an asset type’s characteristics, the exception is researched and, if the price is not able to be validated, an alternate pricing vendor is utilized, consistent with Northern Trust’s pricing source hierarchy. As of December 31, 2024, Northern Trust’s AFS debt securities portfolio included 940 Level 2 securities with an aggregate market value of \$21.6 billion. All 940 debt securities were valued by external pricing vendors. As of December 31, 2023, Northern Trust’s AFS debt securities portfolio included 929 Level 2 debt securities with an aggregate market value of \$19.5 billion. All 929 debt securities were valued by external pricing vendors.

Northern Trust has established processes and procedures to assess the suitability of valuation methodologies used by external pricing vendors, including reviews of valuation techniques and assumptions used for selected securities. On a daily basis, periodic quality control reviews of prices received from vendors are conducted which include comparisons to prices on similar security types received from multiple pricing vendors and to the previous day's reported prices for each security. Predetermined tolerance level exceptions are researched and may result in additional validation through available market information or the use of an alternate pricing vendor. Quarterly, Northern Trust reviews documentation from third-party pricing vendors regarding the valuation processes and assumptions used in their valuations and assesses whether the fair value levels assigned by Northern Trust to each security classification are appropriate. Annually, third-party pricing vendor valuations are reviewed on a sample basis. The specific inputs and assumptions used by third-party pricing vendors are assessed to verify appropriate classification within the fair value level hierarchy.

Level 2 assets and liabilities also include derivative contracts which are valued internally using widely accepted income-based models that incorporate inputs readily observable in actively quoted markets and reflect the contractual terms of the contracts. Observable inputs include foreign exchange rates and interest rates for foreign exchange contracts; interest rates for interest rate swap contracts and forward contracts; and interest rates and volatility inputs for interest rate option contracts. Northern Trust evaluates the impact of counterparty credit risk and its own credit risk on the valuation of its derivative instruments. Factors considered include the likelihood of default by Northern Trust and its counterparties, the remaining maturities of the instruments, net exposures after giving effect to master netting arrangements or similar agreements, available collateral, and other credit enhancements in determining the appropriate fair value of derivative instruments. The resulting valuation adjustments have not been considered material.

Visa Class C common shares are also categorized as Level 2 assets and are valued using quoted active market prices for similar securities (Visa Class A common shares). See "Visa Class B Common Shares and Makewhole Agreement" under Note 24, "Commitments and Contingent Liabilities," for further information.

Level 3 – Valuation techniques in which one or more significant inputs are unobservable in the marketplace.

Northern Trust's Level 3 liabilities consist of swaps that Northern Trust entered into with the purchaser of 1.1 million and 1.0 million shares of Visa Class B common shares previously held by Northern Trust and sold in June 2016 and 2015, respectively. Pursuant to the swaps, Northern Trust retains the risks associated with the ultimate conversion of the Visa Class B common shares into shares of Visa Class A common shares, such that the counterparty will be compensated for any dilutive adjustments to the conversion ratio and Northern Trust will be compensated for any anti-dilutive adjustments to the ratio. The swaps also require periodic payments from Northern Trust to the counterparty calculated by reference to the market price of Visa Class A common shares and a fixed rate of interest. The fair value of the swaps is determined using a discounted cash flow methodology. The significant unobservable inputs used in the fair value measurement are Northern Trust's own assumptions about estimated changes in the conversion rate of the Visa Class B common shares into Visa Class A common shares, the date on which such conversion is expected to occur and the estimated appreciation of the Visa Class A common share price. See "Visa Class B Common Shares and Makewhole Agreement" under Note 24, "Commitments and Contingent Liabilities," for further information.

Northern Trust believes its valuation methods for its assets and liabilities carried at fair value are appropriate; however, the use of different methodologies or assumptions, particularly as applied to Level 3 assets and liabilities, could have a material effect on the computation of their estimated fair values.

Management of various businesses and departments of Northern Trust (including Corporate Market Risk, Credit Risk Management, Corporate Finance, Asset Servicing and Wealth Management) reviews valuation methods and models for Level 3 assets and liabilities. Fair value measurements are performed upon acquisitions of an asset or liability. Management of the appropriate business or department reviews assumed inputs, especially when unobservable in the marketplace, in order to substantiate their use in each fair value measurement. When appropriate, management reviews forecasts used in the valuation process considering other relevant financial projections to understand any variances between current and previous fair value measurements. In certain circumstances, third-party information is used to support the fair value measurements. If certain third-party information seems inconsistent with consensus views, a review of the information is performed by management of the respective business or department to determine the appropriate fair value of the asset or liability.

The following table presents the fair values of Northern Trust’s Level 3 liabilities as of December 31, 2024 and 2023, as well as the valuation techniques, significant unobservable inputs, and quantitative information used to develop significant unobservable inputs for such liabilities as of such dates.

TABLE 46: LEVEL 3 SIGNIFICANT UNOBSERVABLE INPUTS

DECEMBER 31, 2024					
FINANCIAL INSTRUMENT	FAIR VALUE	VALUATION TECHNIQUE	UNOBSERVABLE INPUTS	INPUT VALUES	WEIGHTED-AVERAGE INPUT VALUES ⁽¹⁾
Swaps Related to Sale of Certain Visa Class B Common Shares	\$27.2 million	Discounted Cash Flow	Conversion Rate	1.54x	1.54x
			Visa Class A Appreciation	8.66%	8.66%
			Expected Duration	10 - 32.5 months	23.5 months

⁽¹⁾ Weighted average of expected duration based on scenario probability.

DECEMBER 31, 2023					
FINANCIAL INSTRUMENT	FAIR VALUE	VALUATION TECHNIQUE	UNOBSERVABLE INPUTS	INPUT VALUES	WEIGHTED-AVERAGE INPUT VALUES ⁽¹⁾
Swaps Related to Sale of Certain Visa Class B Common Shares	\$25.4 million	Discounted Cash Flow	Conversion Rate	1.59x	1.59x
			Visa Class A Appreciation	10.49%	10.49%
			Expected Duration	9 - 27 months	13 months

⁽¹⁾ Weighted average of expected duration based on scenario probability.

The following presents assets and liabilities measured at fair value on a recurring basis as of December 31, 2024 and 2023, segregated by fair value hierarchy level.

TABLE 47: RECURRING BASIS HIERARCHY LEVELING

⁽¹⁾ This line consists of swaps related to the sale of certain Visa Class B common shares.

The following table presents the changes in Level 3 liabilities for the years ended December 31, 2024 and 2023.

TABLE 48: CHANGES IN LEVEL 3 LIABILITIES

LEVEL 3 LIABILITIES (In Millions)	SWAPS RELATED TO SALE OF CERTAIN VISA CLASS B COMMON SHARES	
	2024	2023
Fair Value at January 1	\$ 25.4	\$ 34.8
Total (Gains) Losses:		
Included in Earnings ⁽¹⁾	33.5	18.9
Purchases, Issues, Sales, and Settlements		
Settlements	(31.7)	(28.3)
Fair Value at December 31	\$ 27.2	\$ 25.4
Unrealized Losses (Gains) Included in Earnings Related to Financial Instruments Held at December 31 ⁽¹⁾	\$ 18.8	\$ 15.4

⁽¹⁾ Gains (losses) are recorded in Other Operating Income on the consolidated statements of income.

Carrying values of assets and liabilities that are not measured at fair value on a recurring basis may be adjusted to fair value in periods subsequent to their initial recognition, for example, to record an impairment of an asset. GAAP requires entities to separately disclose these subsequent fair value measurements and to classify them under the fair value hierarchy.

Assets measured at fair value on a nonrecurring basis at December 31, 2024 and 2023, all of which were categorized as Level 3 under the fair value hierarchy, were comprised of nonaccrual loans whose values were based on real estate and other available collateral. Assets measured at fair value on a nonrecurring basis at December 31, 2023, also includes other real estate owned (OREO) properties, categorized as Level 3 under the fair value hierarchy.

Fair values of real estate loan collateral were estimated using a market approach typically supported by third-party valuations and property-specific fees and taxes. As of December 31, 2024, the fair values of real estate loan collateral were subject to adjustments to reflect management’s judgment as to realizable value and consisted of a discount factor of 20.0% with a weighted average based on fair values of 20.0%. As of December 31, 2023, the fair value of real estate loan collateral consisted of discount factors ranging from 0.0% to 20.0% with a weighted average based on fair values of 2.0%. Other loan collateral, which typically consists of accounts receivable, inventory and equipment, is valued using a market approach adjusted for asset-specific characteristics and in limited instances third-party valuations are used. OREO assets are carried at the lower of cost or fair value less estimated costs to sell, with fair value typically based on third-party appraisals.

Collateral-dependent nonaccrual loans that have been adjusted to fair value totaled \$19.1 million and \$43.3 million at December 31, 2024 and 2023, respectively.

The following table presents the fair values of Northern Trust’s Level 3 assets that were measured at fair value on a nonrecurring basis as of December 31, 2024 and 2023, as well as the valuation technique, significant unobservable inputs, and quantitative information used to develop the significant unobservable inputs for such assets as of such dates.

TABLE 49: LEVEL 3 NONRECURRING BASIS SIGNIFICANT UNOBSERVABLE INPUTS

DECEMBER 31, 2024

FINANCIAL INSTRUMENT	FAIR VALUE ⁽¹⁾	VALUATION TECHNIQUE	UNOBSERVABLE INPUTS	INPUT VALUES	WEIGHTED-AVERAGE INPUT VALUES
Loans	19.1 million	Market Approach	Discount factor applied to real estate collateral-dependent loans to reflect realizable value	20.0%	20.0%

⁽¹⁾ Includes real estate collateral-dependent loans and other collateral-dependent loans.

DECEMBER 31, 2023

FINANCIAL INSTRUMENT	FAIR VALUE ⁽¹⁾	VALUATION TECHNIQUE	UNOBSERVABLE INPUTS	INPUT VALUES	WEIGHTED-AVERAGE INPUT VALUES
Loans	\$43.3 million	Market Approach	Discount factor applied to real estate collateral-dependent loans to reflect realizable value	0.0% – 20.0%	2.0%

⁽¹⁾ Includes real estate collateral-dependent loans and other collateral-dependent loans.

The following tables presents the carrying value and estimated fair value, including the fair value hierarchy level, of Northern Trust's financial instruments that are not measured at fair value on the consolidated balance sheets as of December 31, 2024 and 2023. The following tables exclude those items measured at fair value on a recurring basis.

Note: Mortgage-backed and asset-backed securities are included in the above table taking into account anticipated future prepayments.

Credit Quality. AFS debt securities impairment reviews are conducted quarterly to identify and evaluate securities that have indications of possible credit losses. A determination as to whether a security's decline in market value is related to credit impairment takes into consideration numerous factors and the relative significance of any single factor can vary by security. Factors Northern Trust considers in determining whether impairment is credit-related include, but are not limited to, the severity of the impairment; the cause of the impairment; the financial condition and near-term prospects of the issuer; activity in the market of the issuer, which may indicate adverse credit conditions; Northern Trust's intent regarding the sale of the security as of the balance sheet date; and the likelihood that Northern Trust will not be required to sell the security for a period of time sufficient to allow for the recovery of the security's amortized cost basis. For each security meeting the requirements of Northern Trust's internal screening process, an extensive review is conducted to determine if a credit loss has occurred.

There was a \$0.2 million allowance for credit losses for AFS securities for the year ended December 31, 2024, reflecting a \$1.0 million release from December 31, 2023. There was a \$1.2 million allowance for credit losses for AFS securities for the year ended December 31, 2023, reflecting a \$0.1 million release from December 31, 2022. The process for identifying credit losses for AFS securities is based on the best estimate of cash flows to be collected from the security, discounted using the security's effective interest rate. If the present value of the expected cash flows is found to be less than the current amortized cost of the security, an allowance for credit losses is generally recorded equal to the difference between the two amounts, limited to the amount the amortized cost basis exceeds the fair value of the security. For additional information, please refer to Note 6, "Allowance for Credit Losses."

The following table provides information regarding AFS debt securities with no credit losses reported that had been in a continuous unrealized loss position for less than twelve months and for twelve months or longer as of December 31, 2024 and 2023.

TABLE 53: AVAILABLE FOR SALE DEBT SECURITIES IN UNREALIZED LOSS POSITION WITH NO CREDIT LOSSES REPORTED

Other Asset-Backed	19.8	2.0	1,998.7	98.0	2,018.5	100.0
Commercial Mortgage-Backed	60.0	4.6	776.6	43.8	836.6	48.4
Total	\$ 503.0	\$ 24.1	\$ 18,932.3	\$ 544.2	\$ 19,435.3	\$ 568.3

Note: Three corporate debt AFS securities with a fair value of \$98.4 million and unrealized losses of \$5.9 million and one sub-sovereign, supranational and non-U.S. agency bonds AFS security with a fair value of \$71.0 million and unrealized loss of \$8.2 million have been excluded from the table above as these AFS securities have a \$1.2 million allowance for credit losses reported as of December 31, 2023. Refer to the discussion further above and Note 6, "Allowance for Credit Losses" for further information.

As of December 31, 2024, there were 767 AFS debt securities with a combined fair value of \$17.8 billion in an unrealized loss position without an allowance for credit losses, with their unrealized losses totaling \$255.1 million. As of December 31, 2023, there were 898 AFS debt securities with a combined fair value of \$19.4 billion in an unrealized loss position without an allowance for credit losses, with their unrealized losses totaling \$568.3 million. Unrealized losses on AFS debt securities without an allowance for credit losses are primarily attributable to changes in market interest rates and credit spreads since their purchase.

The following table provides the amortized cost of HTM debt securities by credit rating using ratings from Moody's, S&P Global or Fitch Ratings. Securities not explicitly rated were grouped where possible under the credit rating of the issuer of the security.

Credit quality indicators are metrics that provide information regarding the relative credit risk of debt securities. Northern Trust maintains a high quality debt securities portfolio, with 96% and 97% of the HTM portfolio at December 31, 2024 and December 31, 2023, respectively, comprised of securities rated A or higher.

Investment Security Gains and Losses. Proceeds of \$2.0 billion, \$5.2 billion and \$138.7 million in 2024, 2023 and 2022, respectively, from the sale of debt securities resulted in the pre-tax Investment Security Gains (Losses), net shown in the following tables.

TABLE 55: INVESTMENT SECURITY GAINS AND LOSSES

Note 5 – Loans

Amounts outstanding for Loans, by segment and class, are shown in the following table.

TABLE 57: LOANS

(In Millions)	DECEMBER 31,	
	2024	2023
Commercial		
Commercial and Institutional ⁽¹⁾	\$ 10,537.1	\$ 11,555.3
Commercial Real Estate	5,314.2	5,134.2
Non-U.S. ⁽¹⁾	2,113.9	2,778.5
Other	2,313.6	5,944.8
Total Commercial	20,278.8	25,412.8
Personal		
Private Client	15,848.8	14,360.0
Residential Real Estate	6,109.9	6,327.1
Non-U.S.	674.7	428.8
Other	478.4	1,088.3
Total Personal	23,111.8	22,204.2
Total Loans	\$ 43,390.6	\$ 47,617.0

⁽¹⁾ Commercial and institutional and commercial-non-U.S. combined include \$4.1 billion and \$4.5 billion of private equity capital call finance loans at December 31, 2024 and 2023, respectively.

Residential real estate loans consist of traditional first lien mortgages and equity credit lines that generally require a loan-to-collateral value ratio of 65% to 80% at inception. Northern Trust's equity credit line products generally have draw periods of up to 10 years and a balloon payment of any outstanding balance is due at maturity. Payments are interest-only with variable interest rates. Northern Trust does not offer equity credit lines that include an option to convert the outstanding balance to an amortizing payment loan. As of December 31, 2024 and 2023, equity credit lines totaled \$250.3 million and \$228.7 million, respectively. Equity credit lines for which first liens were held by Northern Trust represented 97% and 96% of the total equity credit lines as of December 31, 2024 and 2023, respectively.

Included within the other commercial, non-U.S. commercial, and other personal classes are short duration advances, primarily related to the processing of custodied client investments, totaling \$3.8 billion and \$8.4 billion at December 31, 2024 and 2023, respectively. The \$8.4 billion short duration advances at December 31, 2023 primarily reflected higher levels of year-end trading and settlement activity. Demand deposit overdrafts reclassified as loan balances, primarily in personal-other, totaled \$47.6 million and \$12.1 million at December 31, 2024 and 2023, respectively. There were no loans classified as held for sale on either December 31, 2024 or December 31, 2023. Loans classified as held for sale are recorded at the lower of cost or fair value. There were no loans sold during the year ended December 31, 2024. There was a \$2.5 million commercial real estate loan sold during the year ended December 31, 2023.

Credit Quality Indicators. Credit quality indicators are statistics, measurements or other metrics that provide information regarding the relative credit risk of loans. Northern Trust uses a variety of credit quality indicators to assess the credit risk of loans at the segment, class, and individual credit exposure levels.

As part of its credit process, Northern Trust utilizes an internal borrower risk rating system to support identification, approval, and monitoring of credit risk. Borrower risk ratings are used in credit underwriting and management reporting. Risk ratings are used for ranking the credit risk of borrowers and their probability of default. Each borrower is rated using one of a number of ratings models or subjective assessment tools, which consider both quantitative and qualitative factors. The ratings models vary among classes of loans in order to capture the unique risk characteristics inherent within each particular type of credit exposure. Provided below are the more significant performance indicator attributes considered within Northern Trust's borrower rating models, by loan class:

- Commercial and Institutional: leverage, profit margin, liquidity, asset size and capital levels;
- Commercial Real Estate: debt service coverage, loan-to-collateral value ratio, leasing status and guarantor support;
- Commercial-Other: leverage, profit margin, liquidity, asset size and capital levels;
- Non-U.S.: leverage, profit margin, liquidity, return on assets and capital levels;
- Residential Real Estate: payment history, credit bureau scores and loan-to-collateral value ratio;
- Private Client: cash-flow-to-debt and net worth ratios, leverage and liquidity; and
- Personal-Other: cash-flow-to-debt and net worth ratios.

While the criteria vary by model, the objective is for the borrower ratings to be consistent in both the measurement and ranking of risk. Each model is calibrated to a master rating scale to support this consistency. Ratings for borrowers not in default range from "1" for the strongest credits to "7" for the weakest non-defaulted credits. Ratings of "8" or "9" are used for defaulted borrowers. Borrower risk ratings are monitored and are revised when events or circumstances indicate a change is required. Risk ratings are generally validated at least annually.

Loans in the "1 to 3" category are expected to exhibit minimal to modest probabilities of default and are characterized by borrowers having the strongest financial qualities, including above average financial flexibility, cash flows and capital levels. Borrowers assigned these ratings are anticipated to experience very little to moderate financial pressure in adverse down-cycle scenarios. As a result of these characteristics, borrowers within this category exhibit a minimal to modest likelihood of loss. Loans in the "4 to 5" category are expected to exhibit moderate to acceptable probabilities of default and are characterized by borrowers with less financial flexibility than those in the "1 to 3" category. Cash flows and capital levels are generally sufficient to allow for borrowers to meet current requirements, but have fewer financial resources to manage through economic downturns. As a result of these characteristics, borrowers within this category exhibit a moderate likelihood of loss. Loans in the "6 to 9" category have elevated credit risk profiles that are monitored through internal watch lists. Borrowers associated with these risk profiles may have limited financial flexibility. Cash flows and capital levels range from acceptable to potentially insufficient to meet current requirements, particularly in adverse economic cycles. As a result of these characteristics, these credits, which include all nonaccrual credits, have elevated risk of default or are currently in default.

Loan segment and class balances as of December 31, 2024 are provided in the following table, segregated by borrower ratings into "1 to 3," "4 to 5" and "6 to 9" (watch list and nonaccrual status) categories by year of origination at amortized cost basis. Loans that are held for investment are reported at the principal amount outstanding, net of unearned income.

Past Due Status. Past due status is based on the length of time from the contractual due date a principal or interest payment has been past due. For disclosure purposes, loans that are 29 days past due or less are reported as current. The following table provides balances and delinquency status of accrual and nonaccrual loans by segment and class, as well as the other real estate owned and nonaccrual asset balances, as of December 31, 2024 and 2023.

Interest income that would have been recorded for nonaccrual loans and leases in accordance with their original terms was \$2.1 million in 2024, \$3.4 million in 2023, and \$4.1 million in 2022.

Northern Trust may obtain physical possession of real estate via foreclosure on an in-substance repossession. As of December 31, 2024 and 2023, Northern Trust held foreclosed real estate properties with an immaterial carrying value for both years as a result of obtaining physical possession. As of both December 31, 2024 and 2023, Northern Trust had loans with a carrying value of \$3.5 million for which formal foreclosure proceedings were in process.

Loan Modifications to Borrowers Experiencing Financial Difficulty

Northern Trust may provide payment relief by modifying the terms of the original loans for borrowers experiencing financial difficulties. Loan modifications to borrowers experiencing financial difficulty involve primarily extension of term, deferrals of principal and interest, interest rate concessions, and other modifications or a combination thereof and totaled \$7.2 million and \$40.7 million for the years ended December 31, 2024 and 2023, respectively. Northern Trust considers payment deferrals of less than 90 days as insignificant, absent any material modifications to other loan terms.

The effectiveness of Northern Trust's modification efforts is measured by the loans' respective past-due status under the modified terms as of the end of the period. As of December 31, 2024, of loans that were modified in the previous 12 months, there were no loans 30-89 days past due and \$1.3 million 90 days and greater past due in accordance with their modified terms. As of December 31, 2023, of the loans that were modified in the previous 12 months, there were \$4.7 million 30-89 days past due and \$16.2 million 90 days and greater past due in accordance with their modified terms. Northern Trust charged off \$8.5 million and \$2.0 million related to loan modifications to borrowers experiencing financial difficulty for the years ended December 31, 2024 and 2023, respectively.

There were no undrawn loan commitments or standby letters of credit issued to financially distressed borrowers for which Northern Trust had modified the payment terms of the loans as of December 31, 2024 and 2023, respectively.

Note 6 – Allowance for Credit Losses

Allowance and Provision for Credit Losses. The allowance for credit losses—which represents management's best estimate of lifetime expected credit losses related to various portfolios subject to credit risk, off-balance sheet credit exposures, and specific borrower relationships—is determined by management through a disciplined credit review process. Northern Trust measures expected credit losses of financial assets with similar risk characteristics on a collective basis. A financial asset is measured individually if it does not share similar risk characteristics with other financial assets and the related allowance is determined through an individual evaluation.

Management's estimates utilized in establishing an appropriate level of allowance for credit losses are not dependent on any single assumption. In determining an appropriate allowance level, management evaluates numerous variables and takes into consideration past events, current conditions, and reasonable and supportable forecasts. The primary forecast reflects an outlook of steady growth, with interest rate cuts continuing as inflation and unemployment rates stabilize. An alternative scenario is also considered, which reflects a recession that incorporates the experiences of a wider set of historical economic cycles.

The results of the credit reserve estimation methodology are reviewed quarterly by Northern Trust's Credit Loss Reserve Committee, which receives input from Financial Risk Management, Treasury, Corporate Finance, the Economic Research Department, and each of Northern Trust's reporting business units. The Credit Loss Reserve Committee determines the probability weights applied to each forecast approved by Northern Trust's Macroeconomic Scenario Development Committee, as well as, reviews and approves qualitative adjustments to the collective allowance in line with Northern Trust's qualitative adjustment framework.

Material qualitative adjustments in 2024 relate to a higher likelihood of a recession within the CRE portfolio due to continued concerns around office occupancy rates and high interest rates, the potential impact of climate-related risks on underlying property values within the CRE and RRE portfolios, and the potential for higher-than-expected losses on large individual exposures. Relative to the quantitative reserve, the qualitative component increased slightly year-over-year, primarily due to higher adjustments related to the CRE portfolio.

The following table provides information regarding changes in the total allowance for credit losses.

TABLE 60: CHANGES IN THE ALLOWANCE FOR CREDIT LOSSES

⁽¹⁾ The table excludes a negative provision for credit losses of \$0.1 million for the year ended December 31, 2023 for AFS debt securities. See further detail in Note 4, "Securities."

2022

(In Millions)	LOANS AND LEASES	UNDRAWN LOAN COMMITMENTS AND STANDBY LETTERS OF CREDIT	HELD TO MATURITY DEBT SECURITIES	OTHER FINANCIAL ASSETS	TOTAL
Balance at Beginning of Period	\$ 138.4	\$ 34.1	\$ 11.2	\$ 1.0	\$ 184.7
Charge-Offs	(6.0)	—	—	—	(6.0)
Recoveries	10.2	—	—	—	10.2
Net Recoveries (Charge-Offs)	4.2	—	—	—	4.2
Provision for Credit Losses ⁽¹⁾	1.7	4.4	4.8	(0.2)	10.7
Balance at End of Period	\$ 144.3	\$ 38.5	\$ 16.0	\$ 0.8	\$ 199.6

⁽¹⁾ The table excludes a provision for credit losses of \$1.3 million for the year ended December 31, 2022 for AFS debt securities.

Excluding the negative provisions for AFS debt securities, Northern Trust recognized a negative Provision for Credit Losses of \$2.0 million for the year ended December 31, 2024, as compared to a Provision for Credit Losses of \$24.6 million and \$10.7 million for the year ended December 31, 2023 and 2022, respectively. The negative provision in 2024 was due to decreases in both individual and collective reserves. The decrease in individual reserves was driven by one commercial loan charge-off. The decrease in collective reserves related primarily to the HTM debt securities portfolio and was driven by methodology updates and changes in portfolio quality, partially offset by an increase in the reserve for the CRE portfolio, due to changes in portfolio quality during the year. There were net charge-offs of \$11.3 million and \$5.0 million for the year ended December 31, 2024 and December 31, 2023, respectively, and net recoveries of \$4.2 million for the year ended December 31, 2022. For further detail, please see the Allowance for the Loan Portfolio and the Allowance for Held to Maturity Debt Securities Portfolio sections below.

For credit exposure and the associated allowance related to fee receivables, please refer to Note 16, "Revenue from Contracts with Clients." For information related to the allowance for AFS debt securities, please refer to Note 4, "Securities." For the allowance pertaining to all other financial assets recognized at amortized cost, which include Due from Banks, Other Central Bank Deposits, Interest Bearing Deposits with Banks, and Other Assets, please refer to the Allowance for Other Financial Assets section within this footnote.

Allowance for the Loan Portfolio. The following table provides information regarding changes in the total allowance for credit losses related to loans, including undrawn loan commitments and standby letters of credit, by segment.

⁽¹⁾ The allowance for Obligations of States and Political Subdivisions is related to (non pre-refunded) municipal securities that do not fall under Northern Trust's zero-loss assumption.

(In Millions)	2022							TOTAL
	CORPORATE DEBT	NON-U.S. GOVERNMENT	SUB-SOVEREIGN, SUPRANATIONAL, AND NON-U.S. AGENCY BONDS	OBLIGATIONS OF STATES AND POLITICAL SUBDIVISIONS ⁽¹⁾	COVERED BONDS	OTHER		
Balance at Beginning of Period	\$ 1.4	\$ 1.9	\$ 3.0	\$ —	\$ 0.1	\$ 4.8	\$ 11.2	
Provision for Credit Losses	0.5	1.7	1.0	1.5	—	0.1	4.8	
Balance at End of Period	\$ 1.9	\$ 3.6	\$ 4.0	\$ 1.5	\$ 0.1	\$ 4.9	\$ 16.0	

⁽¹⁾ The allowance for Obligations of States and Political Subdivisions is related to (non pre-refunded) municipal securities that do not fall under Northern Trust's zero-loss assumption.

Allowance for Other Financial Assets. The allowance for other financial assets consists of the allowance for Due from Banks, Other Central Bank Deposits, Interest Bearing Deposits with Banks, and Other Assets. Northern Trust's portfolio is composed mostly of institutions within the "1 to 3" internal borrower rating category and is expected to exhibit minimal to modest likelihood of loss. The Allowance for Credit Losses related to other financial assets was \$1.0 million and \$0.9 million as of December 31, 2024 and 2023, respectively.

Accrued Interest. Accrued interest balances are reported within Other Assets on the consolidated balance sheets. Northern Trust elected not to measure an allowance for credit losses for accrued interest receivables related to its loans and securities portfolios as its policy is to write-off uncollectible accrued interest receivable balances in a timely manner. Accrued interest is written off by reversing interest income during the period the financial asset is moved from an accrual to a nonaccrual status.

The following table provides the amount of accrued interest excluded from the amortized cost basis of the following portfolios.

TABLE 64: ACCRUED INTEREST

(In Millions)		DECEMBER 31, 2024	DECEMBER 31, 2023
Loans	\$	211.7	\$ 241.7
Debt Securities			
Held to Maturity		58.9	72.0
Available for Sale		173.9	129.2
Other Financial Assets		53.1	86.0
Total	\$	497.6	\$ 528.9

The amount of accrued interest reversed through interest income for loans and securities was immaterial and there was no accrued interest reversed through interest income related to any other financial assets during the years ended 2024 and 2023.

Note 7 – Concentrations of Credit Risk

Concentrations of credit risk exist if a number of borrowers or other counterparties are engaged in similar activities and have similar economic characteristics that would cause their ability to meet contractual obligations to be similarly affected by changes in economic or other conditions. The fact that a credit exposure falls into one of these groups does not necessarily indicate that the credit has a higher than normal degree of credit risk. These groups are: banks and bank holding companies, residential real estate, and commercial real estate.

Banks and Bank Holding Companies. At December 31, 2024, on-balance sheet credit risk to banks and bank holding companies, both U.S. and non-U.S., consisted primarily of Interest-Bearing Deposits with Banks of \$1.9 billion, demand balances maintained at correspondent banks of \$4.7 billion and Securities Purchased under Agreements to Resell of \$426.0 million. At December 31, 2023, on-balance sheet credit risk to banks and bank holding companies, both U.S. and non-U.S., consisted primarily of Interest-Bearing Deposits with Banks of \$1.9 billion, demand balances maintained at correspondent banks of \$4.7 billion, and Securities Purchased under Agreements to Resell of \$784.7 million. Credit risk associated with U.S. and non-U.S. banks and bank holding companies deemed to be counterparties by Credit Risk Management is managed by the Capital Markets Credit Committee. Credit limits are established through a review process that includes an internally-prepared financial analysis, use of an internal risk rating system, and consideration of external market indicators as well as regulatory single counterparty credit limits. Northern Trust places deposits with banks that have strong internal and external credit ratings, and the average life to maturity of deposits with banks is maintained on a short-term basis in order to respond quickly to changing credit conditions.

Residential Real Estate. Residential real estate loans totaled \$6.1 billion at December 31, 2024 and \$6.3 billion at December 31, 2023, representing 15% and 14%, respectively, of total U.S. loans. Residential real estate loans consist of traditional first lien mortgages and equity credit lines, which generally require a loan-to-collateral value ratio of 65% to 80% at inception. Revaluations of supporting collateral are obtained upon refinancing or default or when otherwise considered warranted. Collateral revaluations for mortgages are performed by independent third parties. Legally binding undrawn commitments to extend residential real estate credit, which are primarily equity credit lines, totaled \$679.5 million and \$804.2 million at December 31, 2024 and 2023, respectively. The table below provides additional detail regarding residential real estate loans by geographic region.

TABLE 65: RESIDENTIAL REAL ESTATE LOANS BY GEOGRAPHIC REGION

(In Millions)	DECEMBER 31,	
	2024	2023
Residential Real Estate by geographic region:		
Florida	\$ 1,636.5	\$ 1,648.1
California	1,371.9	1,463.8
Illinois	591.3	640.3
New York	510.8	505.4
Colorado	309.9	344.1
Texas	308.7	318.7
All other ⁽¹⁾	1,380.8	1,406.7
Total Residential Real Estate	\$ 6,109.9	\$ 6,327.1

⁽¹⁾ The remainder is distributed throughout the other geographic regions within the U.S. served by Northern Trust.

Commercial Real Estate. Commercial real estate loans totaled \$5.3 billion at December 31, 2024 and \$5.1 billion at December 31, 2023, representing 13% and 12%, respectively, of total U.S. loans. In managing its credit exposure, management has defined a commercial real estate loan as one where: (1) the borrower's principal business activity is the acquisition or the development of real estate for commercial purposes; (2) the principal collateral is real estate held for commercial purposes, and loan repayment is expected to flow from the operation of the property; or (3) the loan repayment is expected to flow from the sale or refinance of real estate as a normal and ongoing part of the business. The commercial real estate portfolio consists of commercial mortgages and construction, acquisition and development loans extended primarily to experienced investors well known to Northern Trust.

Underwriting standards generally reflect conservative loan-to-collateral value (LTV) ratios and debt service coverage requirements. LTV ratios, calculated as the outstanding amount of the loan divided by the estimated value of the property, are a critical component of Northern Trust's underwriting standards. Northern Trust utilizes LTV ratios in various stages of the lending and risk management process. Northern Trust's policy related to LTV limits is more conservative than what is prescribed by current supervisory regulations. LTV ratios are monitored and updated on a quarterly basis utilizing the most recent outstanding amounts and appraisal values based on models, automated valuation services, or updated appraisals.

All commercial real estate transactions, regardless of size, require an independent appraisal at loan origination, unless permissible and approved regulatory exemptions can be applied. Real estate appraisals are, at a minimum, performed in accordance with generally accepted appraisal standards as applicable under local regulations. Northern Trust considers obtaining a new appraisal as part of the loan renewal process or whenever credit quality or market conditions have materially and adversely changed to the point where it is prudent to reassess the value of the real estate collateral. For defaulted loans, appraisals are updated on an, at least, annual basis. Appraisal values might be discounted based upon Northern Trust's experience with actual liquidation values and management's judgement as to the realizable value of the property.

Recourse to borrowers through guarantees is also generally required. Commercial mortgage financing is provided for the acquisition or refinancing of income-producing properties. Cash flows from the properties generally are sufficient to amortize the loan. These loans are primarily located in the California, Illinois, Florida, Texas, and New York markets. Construction, acquisition and development loans provide financing for commercial real estate prior to rental income stabilization. The intent is generally that the borrower will sell the project or refinance the loan through a commercial mortgage with Northern Trust or another financial institution upon completion. At December 31, 2024, legally binding commitments to extend credit and standby letters of credit to commercial real estate borrowers totaled \$376.5 million and \$81.9 million, respectively. At December 31, 2023, legally binding commitments to extend credit and standby letters of credit to commercial real estate borrowers totaled \$413.0 million and \$82.1 million, respectively.

The table below provides additional detail regarding commercial real estate loan types.

TABLE 66: COMMERCIAL REAL ESTATE LOANS

(In Millions)	DECEMBER 31,	
	2024	2023
Commercial Mortgages		
Office	\$ 944.4	\$ 1,035.1
Apartment/ Multi-family	1,599.9	1,633.9
Retail	665.6	620.9
Industrial/ Warehouse	906.1	687.1
Other	630.3	575.3
Total Commercial Mortgages	4,746.3	4,552.3
Construction, Acquisition and Development Loans	567.9	581.9
Total Commercial Real Estate Loans	\$ 5,314.2	\$ 5,134.2

Note 8 – Buildings and Equipment

A summary of Buildings and Equipment is presented in the following table.

TABLE 67: BUILDINGS AND EQUIPMENT

(In Millions)	DECEMBER 31, 2024		
	ORIGINAL COST	ACCUMULATED DEPRECIATION	NET BOOK VALUE
Land and Improvements	\$ 11.5	\$ 0.3	\$ 11.2
Buildings	226.5	143.4	83.1
Equipment	539.6	343.4	196.2
Leasehold Improvements	553.5	353.7	199.8
Total Buildings and Equipment	\$ 1,331.1	\$ 840.8	\$ 490.3

(In Millions)	DECEMBER 31, 2023		
	ORIGINAL COST	ACCUMULATED DEPRECIATION	NET BOOK VALUE
Land and Improvements	\$ 11.5	\$ 0.3	\$ 11.2
Buildings	253.1	141.4	111.7
Equipment	536.5	337.5	199.0
Leasehold Improvements	530.0	349.7	180.3
Total Buildings and Equipment	\$ 1,331.1	\$ 828.9	\$ 502.2

The charge for depreciation amounted to \$110.0 million in 2024, \$115.9 million in 2023, and \$110.1 million in 2022 on the consolidated statements of income.

Note 9 – Lease Commitments

As of December 31, 2024, Northern Trust was obligated under a number of non-cancelable operating leases, primarily for real estate. Certain leases contain rent escalation clauses based on market indices, renewal option clauses calling for increased rentals, and rental payments based on usage. There are no restrictions imposed by any lease agreement regarding the payment of dividends, debt financing or Northern Trust entering into further lease agreements.

The components of lease costs for the years ended December 31, 2024 and 2023 were as follows.

TABLE 68: LEASE COST COMPONENTS

(In Millions)	FOR THE YEAR ENDED DECEMBER 31,	
	2024	2023
Operating Lease Cost	\$ 93.5	\$ 109.2
Variable Lease Cost ⁽¹⁾	49.3	54.7
Sublease Income	(3.0)	(2.7)
Total Lease Cost	\$ 139.8	\$ 161.2

⁽¹⁾ Variable Lease Cost includes rental payments based on usage, common-area maintenance costs and property taxes.

The following table presents a maturity analysis of lease liabilities as of December 31, 2024.

TABLE 69: MATURITY OF LEASE LIABILITIES

(In Millions)	MATURITY OF LEASE LIABILITIES	
2025	\$	105.0
2026		90.8
2027		89.1
2028		76.3
2029		61.0
Later Years		349.5
Total Lease Payments		771.7
Less: Imputed Interest		(122.9)
Present Value of Lease Liabilities	\$	648.8

As of December 31, 2024, Northern Trust had a commitment for an operating lease in addition to the above that has not yet commenced for approximately \$5.8 million. The operating lease is for the use of office space with a lease term of 10 years and is expected to commence in the first quarter of 2025.

Northern Trust uses its incremental borrowing rate to determine the present value of lease payments for operating leases. Operating lease right-of-use (ROU) assets and lease liabilities may include options to extend or terminate the lease only when it is reasonably certain that Northern Trust will exercise that option. Northern Trust elects not to separate lease and non-lease components of a contract for its real estate leases. The location and amount of ROU assets and lease liabilities recorded on the consolidated balance sheets as of December 31, 2024 and 2023 are presented in the following table.

TABLE 70: LOCATION AND AMOUNT OF LEASE ASSETS AND LIABILITIES

(In Millions)	LOCATION OF LEASE ASSETS AND LEASE LIABILITIES ON THE BALANCE SHEET	DECEMBER 31, 2024	DECEMBER 31, 2023
Assets			
Operating Lease Right-of-Use Asset	Other Assets	\$ 478.0	\$ 522.8
Liabilities			
Operating Lease Liability	Other Liabilities	\$ 648.8	\$ 692.8

The weighted-average remaining lease term and weighted-average discount rate applied to leases as of December 31, 2024 and 2023 were as follows:

TABLE 71: WEIGHTED-AVERAGE REMAINING LEASE TERM AND DISCOUNT RATE

	DECEMBER 31, 2024	DECEMBER 31, 2023
Operating Leases		
Weighted-Average Remaining Lease Term	9.7 years	10.1 years
Weighted-Average Discount Rate	3.4 %	3.3 %

The following table provides supplemental cash flow information related to leases for the years ended December 31, 2024 and 2023.

TABLE 72: SUPPLEMENTAL CASH FLOW INFORMATION

(In Millions)	FOR THE YEAR ENDED DECEMBER 31,	
	2024	2023
Supplemental cash flow information		
Cash paid for amounts included in the measurement of lease liabilities - operating cash flows	\$ 94.5	\$ 91.4
Supplemental non-cash information		
Right-of-use assets obtained in exchange for new operating lease liabilities	\$ 36.5	\$ 122.6

Note 10 – Goodwill and Other Intangibles

Goodwill. Changes by reporting segment in the carrying amount of Goodwill for the years ended December 31, 2024 and 2023, including the effect of foreign exchange rates on non-U.S.-dollar denominated balances, were as follows.

TABLE 73: GOODWILL

(In Millions)	ASSET SERVICING		WEALTH MANAGEMENT		TOTAL
Balance at December 31, 2022	\$	611.0	\$	80.3	\$ 691.3
Foreign Exchange Rates		10.9		0.1	11.0
Balance at December 31, 2023	\$	621.9	\$	80.4	\$ 702.3
Foreign Exchange Rates		(7.3)		(0.1)	(7.4)
Balance at December 31, 2024	\$	614.6	\$	80.3	\$ 694.9

The goodwill impairment test is performed at least annually at the reporting-unit level. The Corporation has determined its reporting units for this purpose to be Asset Servicing and Wealth Management. Goodwill was tested for impairment during the fourth quarter of 2024 using a quantitative assessment in which the estimated fair values of the reporting units are compared to their carrying values. Impairment is deemed to exist if the carrying value of a reporting unit exceeds its estimated fair value. Based upon the quantitative assessments, there were no impairments to goodwill in 2024.

Other Intangible Assets Subject to Amortization. The gross carrying amount and accumulated amortization of other intangible assets subject to amortization as of December 31, 2024 and 2023 were as follows.

TABLE 74: OTHER INTANGIBLE ASSETS SUBJECT TO AMORTIZATION

(In Millions)	DECEMBER 31,	
	2024	2023
Gross Carrying Amount	\$ 127.0	\$ 135.0
Less: Accumulated Amortization	68.9	63.4
Net Book Value	\$ 58.1	\$ 71.6

TABLE 75: CHANGES IN OTHER INTANGIBLE ASSETS

(In Millions)		
Balance at December 31, 2022	\$	77.6
Amortization		(9.3)
Foreign Exchange Rates		3.3
Balance at December 31, 2023		71.6
Amortization		(9.2)
Foreign Exchange Rates		(4.3)
Balance at December 31, 2024	\$	58.1

Other intangible assets consist primarily of the value of acquired client relationships and are included in Other Assets on the consolidated balance sheets. Amortization for the years 2025, 2026, 2027, 2028, and 2029 is estimated to be \$8.4 million, \$8.0 million, \$7.8 million, \$7.2 million, and \$7.2 million, respectively.

Capitalized Software. The gross carrying amount and accumulated amortization of capitalized software as of December 31, 2024 and 2023 were as follows.

TABLE 76: CAPITALIZED SOFTWARE

(In Millions)	DECEMBER 31,	
	2024	2023
Gross Carrying Amount	\$ 4,259.6	\$ 3,781.7
Less: Accumulated Amortization	2,104.5	1,754.2
Net Carrying Value	\$ 2,155.1	\$ 2,027.5

Capitalized software, which is included in Other Assets on the consolidated balance sheets, consists primarily of costs related to purchased software and internal-use software development projects that result in new or enhanced functionality, including compensation and other allowable internal costs. Fees paid for the use of software services that do not convey a software license are expensed as incurred. Amortization expense, which is included in Equipment and Software on the consolidated statements of income, totaled \$597.6 million in 2024, \$509.4 million in 2023, and \$434.2 million in 2022.

Note 11 – Deposits

The following table provides the scheduled maturity of total time deposits in denominations of \$250,000 or greater at December 31, 2024.

TABLE 77: REMAINING MATURITY OF TIME DEPOSITS \$250,000 OR MORE

(In Millions)	DECEMBER 31, 2024		TOTAL
	U.S. OFFICE CERTIFICATES OF DEPOSIT	NON-U.S. OFFICES OTHER TIME	
1 Year or Less	\$ 4,845.1	\$ 2,166.9	\$ 7,012.0
Over 1 Year to 2 Years	83.8	—	83.8
Over 2 Years to 3 Years	5.3	—	5.3
Over 3 Years to 4 Years	10.2	—	10.2
Over 4 Years to 5 Years	2.1	—	2.1
Over 5 Years	—	—	—
Total	\$ 4,946.5	\$ 2,166.9	\$ 7,113.4

As of December 31, 2023, there were \$6.0 billion of time deposits in denominations of \$250,000 or greater, of which, \$3.5 billion were Certificates of Deposit and \$2.6 billion were non-U.S.

Note 12 – Senior Notes and Long-Term Debt

Senior Notes. A summary of Senior Notes outstanding at December 31, 2024 and 2023 is presented in the following table.

TABLE 78: SENIOR NOTES

(\$ In Millions)	RATE	DECEMBER 31,	
		2024	2023
Corporation-Senior Notes			
Fixed Rate Due May 2027 ⁽¹⁾	4.00 %	\$ 998.3	\$ 997.6
Fixed Rate Due Aug. 2028 ⁽²⁾⁽³⁾	3.65	479.6	483.3
Fixed Rate Due May 2029 ⁽²⁾⁽³⁾	3.15	465.3	469.1
Fixed Rate Due May 2030 ⁽²⁾⁽³⁾	1.95	826.5	823.2
Total Senior Notes		\$ 2,769.7	\$ 2,773.2

⁽¹⁾ Redeemable within one month of maturity.

⁽²⁾ Redeemable within three months of maturity.

⁽³⁾ Interest rate swap contracts were entered into to modify the interest expense from fixed rates to floating rates. The swaps are recorded as fair value hedges and (decreases) increases in the carrying values of senior notes outstanding of \$(224.2) million and \$(219.1) million were recorded as of December 31, 2024 and 2023, respectively. See further detail in Note 25, "Derivative Financial Instruments."

Long-Term Debt. A summary of Long-Term Debt, defined as debt with original maturities of one year or more, outstanding at December 31, 2024 and 2023 is presented in the following table. We do not reclassify long-term debt to short-term borrowings within a year of maturity.

TABLE 79: LONG-TERM DEBT

(\$ In Millions)	RATE	DECEMBER 31,	
		2024	2023
Corporation-Subordinated Debt			
Fixed Rate Notes due October 2025 ⁽¹⁾	3.950 % \$	736.0 \$	720.3
Fixed-to-Floating Rate Notes due May 2032 ⁽²⁾	3.375	349.8	349.7
Fixed Rate Notes due November 2032 ⁽³⁾	6.125	995.5	995.0
Total Corporation-Subordinated Debt	\$	2,081.3 \$	2,065.0
Federal Home Loan Bank (FHLB) Advances			
FHLB Fixed Rate Advance due December 2025	5.13 % \$	30.0 \$	30.0
FHLB Fixed Rate Advance due December 2025	5.18	570.0	570.0
FHLB Fixed Rate Advance due March 2026	5.13	600.0	600.0
FHLB Fixed Rate Advance due June 2026	5.09	800.0	800.0
Total FHLB Advances	\$	2,000.0 \$	2,000.0
Total Long-Term Debt	\$	4,081.3 \$	4,065.0
Long-Term Debt Qualifying as Risk-Based Capital	\$	1,347.1 \$	1,490.8

⁽¹⁾ Not redeemable prior to maturity.

⁽²⁾ The subordinated notes will bear interest from the date they were issued to, but excluding, May 8, 2027, at an annual rate of 3.375%, payable semi-annually in arrears. Effective February 27, 2023, the Board of Governors of the Federal Reserve adopted a final rule to implement the Adjustable Interest Rate (LIBOR) Act (the "LIBOR Act"). The final rule establishes benchmark replacements for contracts governed by U.S. law that reference certain tenors of U.S. dollar LIBOR after June 30, 2023. Pursuant to the final rule, three-month LIBOR will be replaced by the three-month CME Term SOFR Reference Rate, as administered by CME Group Benchmark Administration, Ltd. ("three-month CME Term SOFR") plus the statutory spread adjustment of 0.26161% as set forth in the final rule. As a result, from, and including, May 8, 2027, the subordinated notes will bear interest at an annual rate equal to three-month CME Term SOFR plus 0.26161% plus 1.131%, payable quarterly in arrears. The subordinated notes are unsecured and may be redeemed, in whole but not in part, on, and only on, May 8, 2027, at a redemption price equal to 100% of the principal amount of the subordinated notes to be redeemed, plus accrued and unpaid interest, if any, up to but excluding the redemption date.

⁽³⁾ Redeemable within three months of maturity.

Note 13 – Stockholders' Equity

Preferred Stock. The Corporation is authorized to issue 10 million shares of preferred stock without par value. The Board of Directors is authorized to fix the particular designations, preferences and relative, participating, optional and other special rights and qualifications, limitations or restrictions for each series of preferred stock issued.

As of December 31, 2024, 5,000 shares of Series D Non-Cumulative Perpetual Preferred Stock ("Series D Preferred Stock") and 16,000 shares of Series E Non-Cumulative Perpetual Preferred Stock ("Series E Preferred Stock") were outstanding.

Series D Preferred Stock. As of December 31, 2024, the Corporation had issued and outstanding 500,000 depository shares, each representing a 1/100th ownership interest in a share of Series D Preferred Stock, issued in August 2016. Equity related to Series D Preferred Stock as of December 31, 2024 and 2023 was \$493.5 million. Shares of the Series D Preferred Stock have no par value and a liquidation preference of \$100,000 per share (equivalent to \$1,000 per depository share).

Dividends on the Series D Preferred Stock, which are not mandatory, accrue and are payable on the liquidation preference amount, on a non-cumulative basis, at a rate per annum equal to (i) 4.60% from the original issue date of the Series D Preferred Stock to but excluding October 1, 2026; and (ii) a floating rate equal to three-month CME Term SOFR, plus a statutory spread adjustment of 0.26161% (as set forth in the final rule to implement the LIBOR Act) plus 3.202% from and including October 1, 2026. Fixed rate dividends are payable in arrears on the first day of April and October of each year, through and including October 1, 2026, and floating rate dividends will be payable in arrears on the first day of January, April, July and October of each year, commencing on January 1, 2027.

The Series D Preferred Stock has no maturity date and is redeemable at the Corporation's option in whole, or in part, on any dividend payment date on or after October 1, 2026. The Series D Preferred Stock is redeemable at the Corporation's option in whole, but not in part, including prior to October 1, 2026, within 90 days of a regulatory capital treatment event, as described in the Series D Preferred Stock Certificate of Designation.

Shares of the Series D Preferred Stock rank senior to the Corporation's common stock, and will rank at least equally with any other series of preferred stock it may issue (except for any senior series that may be issued with the requisite consent of the holders of the Series D Preferred Stock) and all other parity stock, with respect to the payment of dividends and distributions upon liquidation, dissolution or winding up.

Series E Preferred Stock. As of December 31, 2024, the Corporation had issued and outstanding 16 million depositary shares, each representing 1/1,000th ownership interest in a share of Series E Preferred Stock, issued in November 2019. Equity related to Series E Preferred Stock as of December 31, 2024 and 2023 was \$391.4 million. Shares of the Series E Preferred Stock have no par value and a liquidation preference of \$25,000 per share (equivalent to \$25 per depositary share).

Dividends on the Series E Preferred Stock, which are not mandatory, accrue and are payable on the liquidation preference amount, on a non-cumulative basis, quarterly in arrears on the first day of January, April, July and October of each year, at a rate per annum equal to 4.70%. On October 22, 2024, the Corporation declared a cash dividend of \$293.75 per share of Series E Preferred Stock payable on January 1, 2025, to stockholders of record as of December 15, 2024.

The Series E Preferred Stock has no maturity date and is redeemable at the Corporation's option in whole, or in part, on any dividend payment date on or after January 1, 2025. The Series E Preferred Stock is redeemable at the Corporation's option in whole, but not in part, including prior to January 1, 2025, within 90 days of a regulatory capital treatment event, as described in the Series E Preferred Stock Certificate of Designation.

Shares of the Series E Preferred Stock rank senior to the Corporation's common stock, and will rank at least equally with any other series of preferred stock it may issue (except for any senior series that may be issued with the requisite consent of the holders of the Series E Preferred Stock) and all other parity stock, with respect to the payment of dividends and distributions upon liquidation, dissolution or winding up.

Common Stock. The Corporation's current stock repurchase authorization to repurchase up to 25.0 million shares was approved by the Board of Directors in October 2021. Shares are repurchased by the Corporation to, among other things, manage the Corporation's capital levels. Repurchased shares are used for general purposes, including the issuance of shares under stock option and other incentive plans. The repurchase authorization approved by the Board of Directors has no expiration date. During the year ended December 31, 2024, the Corporation repurchased 10,489,770 shares of common stock, including 424,806 shares withheld to satisfy tax withholding obligations related to share-based compensation, at a total cost of \$937.8 million. During the year ended December 31, 2023, the Corporation repurchased 4,384,678 shares of common stock, including 378,130 shares withheld to satisfy tax withholding obligations related to share-based compensation at a total cost of \$347.5 million. During the year ended December 31, 2022, the Corporation repurchased 311,536 shares of common stock, all of which were shares withheld to satisfy tax withholding obligations related to share-based compensation, at a total cost of \$35.4 million.

The average price paid per share for common stock repurchased in 2024, 2023, and 2022 was \$89.41, 79.26, and 113.70, respectively.

An analysis of changes in the number of shares of common stock outstanding follows:

TABLE 80: SHARES OF COMMON STOCK

	2024	2023	2022
Balance at January 1	205,126,224	208,428,309	207,761,875

⁽¹⁾ The before-tax reclassification adjustment is related to the unrealized gains (losses) amortization on AFS debt securities that were transferred to HTM debt securities during the second quarter of 2021 and third quarter of 2022. Upon transfer of a debt security from the AFS to HTM classification, the amortized cost is reset to fair value. Any net unrealized gain or loss at the date of transfer will remain in AOCI and be amortized into Net Interest Income over the remaining life of the securities using the effective interest method. The amortization of amounts retained in AOCI will offset the effect on interest income of the amortization of the premium or discount resulting from transferring the securities at fair value.

⁽²⁾ The net losses on AFS debt securities before-tax reclassification adjustment is recorded in Investment Security Gains (Losses), net on the consolidated statements of income. Refer to Note 4, "Securities" for further information.

⁽³⁾ See Note 25, "Derivative Financial Instruments" for the location of the reclassification adjustment related to cash flow hedges.

⁽⁴⁾ The pension and other postretirement benefit before-tax reclassification adjustment is recorded in Employee Benefits expense on the consolidated statements of income.

Note 15 – Net Income per Common Share

The computations of net income per common share are presented in the following table.

TABLE 83: NET INCOME PER COMMON SHARE

(\$ In Millions Except Per Common Share Information)	FOR THE YEAR ENDED DECEMBER 31,		
	2024	2023	2022
BASIC NET INCOME PER COMMON SHARE			
Average Number of Common Shares Outstanding	201,263,646	207,248,094	208,309,331
Net Income	\$ 2,031.1	\$ 1,107.3	\$ 1,336.0
Less: Dividends on Preferred Stock	41.8	41.8	41.8
Net Income Applicable to Common Stock	1,989.3	1,065.5	1,294.2
Less: Earnings Allocated to Participating Securities	16.9	11.6	11.8
Earnings Allocated to Common Shares Outstanding	\$ 1,972.4	\$ 1,053.9	\$ 1,282.4
Basic Net Income Per Common Share	9.80	5.09	6.16
DILUTED NET INCOME PER COMMON SHARE			
Average Number of Common Shares Outstanding	201,263,646	207,248,094	208,309,331
Plus Dilutive Effect of Share-based Compensation	606,459	315,652	557,933
Average Common and Potential Common Shares	201,870,105	207,563,746	208,867,264
Earnings Allocated to Common and Potential Common Shares	\$ 1,972.3	\$ 1,053.9	\$ 1,282.4
Diluted Net Income Per Common Share	9.77	5.08	6.14

Note: Common stock equivalents of 0.1 million for the year ended December 31, 2024, were not included in the computation of diluted net income per common share because their inclusion would have been antidilutive. For the years ended December 31, 2023 and 2022, respectively, there were 0.1 million and de minimis common stock equivalents excluded in the computation of diluted net income per share.

Note 16 – Revenue from Contracts with Clients

Trust, Investment, and Other Servicing Fees. Custody and Fund Administration fees is comprised of revenues received from our core asset servicing business for providing custody, fund administration, and middle-office-related services, primarily to Asset Servicing clients. Investment Management and Advisory income contains revenue received from providing asset management and related services to Wealth Management and Asset Servicing clients and to Northern Trust sponsored funds. Securities Lending income represents revenues generated from securities lending arrangements that Northern Trust enters into as agent, mainly with Asset Servicing clients. Other fees largely consists of revenues received from providing employee benefit, investment risk and analytic and other services to Asset Servicing and Wealth Management clients.

Other Noninterest Income. Treasury Management income represents revenues received from providing cash and liquidity management services to Asset Servicing and Wealth Management clients. The portion of Security Commissions and Trading Income that relates to revenue from contracts with clients is primarily comprised of commissions earned from providing securities brokerage services to Wealth Management and Asset Servicing clients. The portion of Other Operating Income that relates to revenue from contracts with clients is mainly comprised of service fees for banking-related services provided to Wealth Management and Asset Servicing clients.

Performance Obligations. Clients are typically charged monthly or quarterly in arrears based on the fee arrangement agreed to with each client; payment terms will vary depending on the client and services offered.

Substantially all revenues generated from contracts with clients for asset servicing, asset management, securities lending, treasury management and banking-related services are recognized on an accrual basis, over the period in which services are provided. The nature of Northern Trust's performance obligations is to provide a series of distinct services in which the customer simultaneously receives and consumes the benefits of the promised services as they are performed. Fee arrangements are mainly comprised of variable amounts based on market value of client assets managed and serviced, transaction volumes, number of accounts, and securities lending volume and spreads. Revenue is recognized using the output method in an amount that reflects the consideration to which Northern Trust expects to be entitled in exchange for providing each month or quarter of service. For contracts with multiple performance obligations, revenue is allocated to each performance obligation based on the price agreed to with the client, representing its relative standalone selling price.

Security brokerage revenue is primarily represented by securities commissions received in exchange for providing trade execution related services. Control is transferred at a point in time, on the trade date of the transaction, and fees are typically variable based on transaction volumes and security types.

Northern Trust's contracts with its clients are typically open-ended arrangements and are therefore considered to have an original duration of less than one year. Northern Trust has elected the practical expedient to not disclose the value of remaining performance obligations for contracts with an original expected duration of one year or less.

The following table presents revenues disaggregated by major revenue source.

TABLE 84: REVENUE DISAGGREGATION

(In Millions)	FOR THE YEAR ENDED DECEMBER 31,		
	2024	2023	2022
Noninterest Income			
Trust, Investment and Other Servicing Fees			
Custody and Fund Administration	\$ 1,915.2	\$ 1,805.3	\$ 1,816.0
Investment Management and Advisory	2,491.5	2,232.3	2,299.1
Securities Lending	74.3	83.9	81.6
Other	246.8	240.3	235.9

Other Noninterest Income			
Foreign Exchange Trading Income	\$ 231.2	\$ 203.9	\$ 288.6
Treasury Management Fees	35.7	31.6	39.3
Security Commissions and Trading Income	150.5	135.0	136.2
Other Operating Income	1,157.4	228.7	191.3
Investment Security Gains (Losses), net	(189.3)	(169.5)	(214.0)
Total Other Noninterest Income	\$ 1,385.5	\$ 429.7	\$ 441.4
Total Noninterest Income	\$ 6,113.3	\$ 4,791.5	\$ 4,874.0

On the consolidated statements of income, Trust, Investment and Other Servicing Fees and Treasury Management Fees represent revenue from contracts with clients. For the year ended December 31, 2024, revenue from contracts with clients also includes \$143.7 million of the \$150.5 million total Security Commissions and Trading Income and \$39.3 million of the \$1,157.4 million total Other Operating Income. For the year ended December 31, 2023, revenue from contracts with clients also includes \$115.9 million of the \$135.0 million total Security Commissions and Trading Income and \$38.9 million of the \$228.7 million total Other Operating Income. For the year ended December 31, 2022, revenue from contracts with clients also includes \$116.8 million of the \$136.2 million total Security Commissions and Trading Income and \$37.2 million of the \$191.3 million total Other Operating Income.

Receivables Balances. The following table represents receivables balances from contracts with clients, which are included in Other Assets on the consolidated balance sheets, at December 31, 2024 and 2023.

TABLE 85: CLIENT RECEIVABLES

(In Millions)	DECEMBER 31,	
	2024	2023
Trust Fees Receivable, net ⁽¹⁾	\$ 932.3	\$ 863.5
Other	64.5	64.9
Total Client Receivables	\$ 996.8	\$ 928.4

⁽¹⁾Trust Fees Receivable is net of a \$12.0 million and \$15.9 million fee receivable allowance as of December 31, 2024 and 2023, respectively.

Note 17 – Net Interest Income

The components of Net Interest Income were as follows.

TABLE 86: NET INTEREST INCOME

(In Millions)	FOR THE YEAR ENDED DECEMBER 31,		
	2024	2023	2022
Interest Income			
Federal Reserve and Other Central Bank Deposits	\$ 1,735.9	\$ 1,462.3	\$ 472.0
Interest-Bearing Due from and Deposits with Banks ⁽¹⁾	122.6	130.1	46.6

Federal Funds Purchased	129.2	256.9	34.1
Securities Sold under Agreements to Repurchase	3,280.4	1,541.1	90.7
Other Borrowings	362.7	542.5	126.2
Senior Notes	173.5	170.0	92.7
Long-Term Debt	223.5	147.2	44.0
Total Interest Expense	\$ 7,585.2	\$ 5,343.0	\$ 990.5
Net Interest Income	\$ 2,177.1	\$ 1,982.0	\$ 1,887.2

⁽¹⁾ Interest-Bearing Due from and Deposits with Banks includes the interest-bearing component of Cash and Due from Banks and Interest-Bearing Deposits with Banks as presented on the consolidated balance sheets.

⁽²⁾ Non-taxable Securities represent securities that are exempt from U.S. federal income taxes.

⁽³⁾ Other Interest-Earning Assets include certain community development investments, collateral deposits with certain securities depositories and clearing houses, Federal Home Loan Bank and Federal Reserve stock, and money market investments which are classified in Other Assets on the consolidated balance sheets.

Note 18 – Other Operating Income

The components of Other Operating Income were as follows.

TABLE 87: OTHER OPERATING INCOME

(In Millions)	FOR THE YEAR ENDED DECEMBER 31,		
	2024	2023	2022
Loan Service Fees	\$ 55.0	\$ 83.1	\$ 71.5
Banking Service Fees	55.0	53.0	49.8
Bank Owned Life Insurance	79.1	69.5	61.0
Other Income ⁽¹⁾⁽²⁾	968.3	23.1	9.0
Total Other Operating Income	\$ 1,157.4	\$ 228.7	\$ 191.3

⁽¹⁾ Other Income for the year ended December 31, 2024 includes the mark-to-market loss on derivative swap activity related to previous sales of certain Visa Class B common shares, realized gains related to sales of certain Visa Class C common shares, and mark-to-market gains on Visa Class C common shares still held at December 31, 2024. Refer to Note 24—Commitments and Contingent Liabilities for further information.

⁽²⁾ Other Income for the year ended December 31, 2024 includes a \$68.1 million pre-tax gain related to the sale of an equity investment.

Note 19 – Other Operating Expense

The components of Other Operating Expense were as follows.

TABLE 88: OTHER OPERATING EXPENSE

(In Millions)	FOR THE YEAR ENDED DECEMBER 31,		
	2024	2023	2022
Business Promotion	\$ 81.3	\$ 74.8	\$ 76.7
Staff Related	46.4	35.0	34.6
FDIC Insurance Premiums ⁽¹⁾	43.0	112.0	17.8
Charitable Contributions ⁽²⁾	83.8	15.6	19.4
Other Expenses	200.7	235.5	210.8
Total Other Operating Expense	\$ 455.2	\$ 472.9	\$ 359.3

⁽¹⁾ FDIC Insurance Premiums for the years ended December 31, 2024 and December 31, 2023 includes amounts related to the FDIC Insurance Premium Special Assessment. Refer to Note 24—Commitments and Contingent Liabilities for further information.

⁽²⁾ Charitable Contributions includes a \$70.0 million charitable contribution to the Northern Trust Foundation for the year ended December 31, 2024.

Note 20 – Income Taxes

The following table reconciles the statutory federal tax rate with the effective tax rate for the periods presented below.

TABLE 89: INCOME TAXES

	FOR THE YEAR ENDED DECEMBER 31,		
	2024	2023	2022
Statutory Federal Tax Rate	21.0 %	21.0 %	21.0 %
State Taxes, net	2.5	3.4	3.3
Foreign Tax Rate Differential	0.3	0.6	0.1
Excess Tax Benefit Related to Share-Based Compensation	—	(0.1)	(0.2)
Tax Credits	(0.7)	(2.7)	(2.0)
Tax Exempt Income	(0.8)	(1.4)	(0.9)
Valuation Allowance	1.4	1.8	1.5
Other, net	(0.1)	1.8	1.6
Effective Tax Rate	23.6 %	24.4 %	24.4 %

Income tax expense for the year ended December 31, 2024, 2023, and 2022 was \$628.4 million, \$357.5 million, and \$430.3 million, representing an effective tax rate of 23.6%, 24.4%, and 24.4% respectively.

For the year ended December 31, 2024, the decrease in the effective tax rate was primarily driven by higher current year benefits and a lower state tax provision, partially offset by a lower level of tax benefits from tax-credit investments.

The Corporation files income tax returns in the U.S. federal, various state, and foreign jurisdictions. The Corporation is no longer subject to income tax examinations by U.S. federal tax authorities before 2015, U.S. state or local tax authorities for years before 2011, or non-U.S. tax authorities for years before 2015.

Included in Other Liabilities on the consolidated balance sheets at December 31, 2024 and 2023 were \$58.5 million and \$60.7 million of unrecognized tax benefits, respectively. If recognized, the amounts would reduce 2024 and 2023 income tax expense by \$51.9 million and \$54.4 million, respectively. A reconciliation of the beginning and ending amount of unrecognized tax benefits is as follows.

TABLE 90: UNRECOGNIZED TAX BENEFITS

(In Millions)	FOR THE YEAR ENDED DECEMBER 31,		
	2024	2023	2022
Balance at January 1	\$ 60.7	\$ 40.7	\$ 25.3
Additions for Tax Positions Taken in the Current Year	2.0	2.1	1.7
Additions for Tax Positions Taken in Prior Years	10.8	24.0	13.7
Reductions for Tax Positions Taken in Prior Years	(10.9)	(5.1)	—
Reductions Resulting from Settlements with Taxing Authorities	(2.5)	—	—
Reductions Resulting from Expiration of Statutes	(1.6)	(1.0)	—
Balance at December 31	\$ 58.5	\$ 60.7	\$ 40.7

It is possible that changes in the amount of unrecognized tax benefits could occur in the next 12 months due to changes in judgment related to recognition or measurement, settlements with taxing authorities, or expiration of statute of limitations. Management does not believe that future changes, if any, would have a material effect on the consolidated financial position or liquidity of Northern Trust, although they could have a material effect on operating results for a particular period.

A benefit for interest and penalties of \$4.7 million, net of tax, was included in the Provision for Income Taxes for the year ended December 31, 2024. This compares to a provision for interest and penalties of \$0.2 million, net of tax, and a provision of \$11.1 million, net of tax, for the year ended December 31, 2023 and 2022, respectively. As of December 31, 2024 and 2023, the liability for the potential payment of interest and penalties totaled \$16.0 million and \$22.7 million, net of tax, respectively.

The components of the consolidated Provision for Income Taxes for each of the three years ended December 31 are as follows.

TABLE 91: PROVISION FOR INCOME TAXES

(In Millions)	FOR THE YEAR ENDED DECEMBER 31,		
	2024	2023	2022
Current Tax Provision:			
Federal	\$ 400.2	\$ 250.5	\$ 357.7
State	66.7	63.2	84.7
Non-U.S.	140.8	92.0	130.6
Total	\$ 607.7	\$ 405.7	\$ 573.0
Deferred Tax Provision:			
Federal	\$ (1.1)	\$ (54.0)	\$ (126.0)
State	17.5	(1.4)	(10.7)
Non-U.S.	4.3	7.2	(6.0)
Total	\$ 20.7	\$ (48.2)	\$ (142.7)
Provision for Income Taxes	\$ 628.4	\$ 357.5	\$ 430.3

In addition to the amounts shown above, tax charges (benefits) have been recorded directly to Stockholders' Equity for the following. For further detail, refer to Note 14, "Accumulated Other Comprehensive Income (Loss)."

TABLE 92: TAX CHARGES (BENEFITS) RECORDED DIRECTLY TO STOCKHOLDERS' EQUITY

(In Millions)	FOR THE YEAR ENDED DECEMBER 31,		
	2024	2023	2022
Tax Effect of Other Comprehensive Income	\$ 156.5	\$ 120.2	\$ (471.3)

Deferred taxes result from temporary differences between the amounts reported on the consolidated financial statements and the tax bases of assets and liabilities. Deferred tax assets and liabilities have been computed as follows.

TABLE 93: DEFERRED TAX ASSETS AND LIABILITIES

(In Millions)	DECEMBER 31,	
	2024	2023
Deferred Tax Liabilities:		
Software Development	419.9	394.9
Depreciation and Amortization	—	23.9
Compensation and Benefits	9.5	—
State Taxes, net	46.7	46.8
Other Liabilities	85.2	53.4
Gross Deferred Tax Liabilities	561.3	519.0
Deferred Tax Assets:		
Depreciation and Amortization	38.4	—
Allowance for Credit Losses	43.2	46.2
Unrealized Losses on Securities, net	143.3	244.6
Compensation and Benefits	—	70.2
Tax Credit and Loss Carryforwards	157.9	121.2
Other Assets	117.2	116.0
Gross Deferred Tax Assets	500.0	598.2
Valuation Reserve	(157.9)	(121.2)
Deferred Tax Assets, net of Valuation Reserve	342.1	477.0
Net Deferred Tax Assets (Liabilities)	\$ (219.2)	\$ (42.0)

The Corporation generated a foreign tax credit carryforward during the years ended December 31, 2024 and 2023, expiring in 2034 and 2033, respectively. A cumulative valuation allowance related to the credit carryforward of \$157.5 million and \$120.7 million was recorded at December 31, 2024 and 2023, respectively, as management believes the foreign tax credit carryforwards will not be fully realized.

Northern Trust had various state net operating loss carryforwards as of December 31, 2024 and 2023. The income tax benefits associated with these loss carryforwards were approximately \$0.4 million as of both December 31, 2024 and 2023. A valuation allowance related to the loss carryforwards of \$0.4 million was recorded at both December 31, 2024 and 2023, as management believes the net operating losses will not be fully realized.

Note 21 – Employee Benefits

The Corporation and certain of its subsidiaries provide various benefit programs, including defined benefit pension and defined contribution plans. A description of each major plan and related disclosures are provided below.

Pension. A noncontributory qualified defined benefit pension plan covers substantially all U.S. employees of Northern Trust. Employees of certain European subsidiaries retain benefits in local defined benefit plans, although those plans are closed to new participants and to future benefit accruals. Employees continue to accrue benefits under the Swiss pension plan, which is accounted for as a defined benefit plan under U.S. GAAP.

Northern Trust also maintains a noncontributory supplemental pension plan for participants whose retirement benefits under the U.S. Qualified Plan are expected to exceed the limits imposed by federal tax law. Northern Trust has a nonqualified trust, referred to as a “Rabbi” Trust, used to hold assets designated for the funding of benefits in excess of those permitted in certain of its qualified retirement plans. This arrangement offers participants a degree of assurance for payment of benefits in excess of those permitted in the related qualified plans. As the “Rabbi” Trust assets remain subject to the claims of creditors and are not the property of the employees, they are accounted for as corporate assets and are included in Other Assets on the consolidated balance sheets. Total assets in the “Rabbi” Trust related to the nonqualified pension plan at December 31, 2024 and 2023 amounted to \$83.3 million and \$90.3 million, respectively. Contributions of \$8.0 million and \$16.5 million were made to the “Rabbi” Trust in 2024 and 2023, respectively.

The following tables set forth the status, amounts included in AOCI, and net periodic pension expense of the U.S. Qualified Plan, Non-U.S. Pension Plans, and U.S. Non-Qualified Plan.

TABLE 94: EMPLOYEE BENEFIT PLAN STATUS

(\$ In Millions)	U.S. QUALIFIED PLAN		NON-U.S. PENSION PLANS		U.S. NON-QUALIFIED PLAN

				6.50						

⁽¹⁾ Assumptions utilized to determine net periodic pension expense for 2024 and 2023 are as of December 31, 2023 and 2022, respectively.

⁽²⁾ In determining the pension expense for the U.S. Qualified Plan for 2022, Northern Trust utilized a discount rate of 3.03% as of December 31, 2021, 4.81% as of June 30, 2022, 5.49% as of September 30, 2022, and 5.22% as of December 31, 2022 and the expected long-term rate of return was 5.25% as of December 31, 2021, 6.00% as of June 30, 2022, and 6.50% as of September 30, 2022. The rate utilized for the increase in compensation level was as of December 31, 2021.

Northern Trust's U.S. Qualified Plan provides participants the option to select lump-sum benefit payments upon retirement and termination of service. In the second quarter of 2022, it became probable that total lump-sum payments during the year would exceed the settlement threshold of the sum of annual service and interest cost. Therefore, Northern Trust recognized settlement charges related to its U.S. Qualified Plan in the second, third, and fourth quarter of 2022, which required interim remeasurements of the U.S. Qualified Plan as of each respective quarter-end. The settlement charge represents the pro rata amount of the net loss in AOCI that is charged to income based on the proportion of the Projected Benefit Obligation settled to the total Projected Benefit Obligation and amounted to a total of \$44.1 million.

The components of net periodic pension expense are included in Employee Benefits expense on the consolidated statements of income.

TABLE 97: CHANGE IN PROJECTED BENEFIT OBLIGATION

(In Millions)	U.S. QUALIFIED PLAN		NON-U.S. PENSION PLANS		U.S. NON-QUALIFIED PLAN	
	2024	2023	2024	2023	2024	2023
Beginning Balance	\$ 1,151.7	\$ 1,077.7	\$ 148.6	\$ 129.0	\$ 109.2	\$ 113.6
Service Cost	53.6	46.0	1.9	1.6	4.7	4.8
Interest Cost	55.6	53.9	4.5	4.8	5.0	5.3
Employee Contributions	—	—	0.8	0.8	—	—
Plan Amendment	—	—	(0.4)	(0.2)	—	—
Actuarial Loss (Gain)	(60.9)	36.8	(11.9)	8.1	(0.8)	8.4
Settlements	—	—	(1.7)	—	—	—
Benefits Paid	(61.0)	(62.7)	(4.3)	(4.1)	(14.3)	(22.9)
Foreign Exchange Rate Changes	—	—	(6.8)	8.6	—	—
Ending Balance	\$ 1,139.0	\$ 1,151.7	\$ 130.7	\$ 148.6	\$ 103.8	\$ 109.2

Actuarial gains of \$73.6 million in 2024 were primarily caused by increases in discount rates, while actuarial losses of \$53.3 million in 2023 were primarily caused by decreases in discount rates.

The minimum required and remaining maximum deductible contributions for the U.S. Qualified Plan in 2025 are estimated to be zero and \$380.0 million, respectively. The remaining 2025 maximum deductible contribution, after considering a cash contribution of \$125.0 million made to the U.S. Qualified Plan during January 2025, is estimated at \$255.0 million. A cash contribution of \$200.0 million for the 2024 plan year was made to the U.S. Qualified Plan during January 2024.

The investment strategy employed for Northern Trust's U.S. Qualified Plan utilizes a dynamic glide path based on a set of pre-approved asset allocations to return-seeking and liability-hedging assets that vary in accordance with the U.S. Qualified Plan's projected benefit obligation funded ratio. In general, as the U.S. Qualified Plan's projected benefit obligation funded ratio increases beyond an established threshold, the U.S. Qualified Plan's allocation to liability-hedging assets will increase while the allocation to return-seeking assets will decrease. Conversely, a decrease in the U.S. Qualified Plan's projected benefit obligation funded ratio beyond an established threshold will generally result in a decrease in the U.S. Qualified Plan's allocation to liability-hedging assets and increase in the allocation to return-seeking assets. Liability-hedging assets include U.S. long credit bonds, U.S. long government bonds, and a custom completion strategy used to hedge more closely the liability duration of projected plan benefits with bond duration across all durations. Return-seeking assets include: U.S. equity, international developed equity, emerging markets equity, real estate, high yield bonds, global listed infrastructure, emerging market debt, private equity and hedge funds. In early 2023 the asset allocation of the U.S. Qualified Plan was adjusted to a stage of the glide path that allowed for a greater component of return-seeking assets, and was kept consistent throughout 2023 and 2024.

Northern Trust utilizes an asset/liability methodology to determine the investment policies that will best meet its short and long-term objectives. The process is performed by modeling current and alternative strategies for asset allocation, funding policy and actuarial methods and assumptions. The financial modeling uses projections of expected capital market returns and expected volatility of those returns to determine alternative asset mixes having the greatest probability of meeting the U.S. Qualified Plan's investment objectives. Risk tolerance is established through careful consideration of the U.S. Qualified Plan liabilities, funded status, and corporate financial condition. The intent of this strategy is to protect the U.S. Qualified Plan's funded status and generate returns, which in combination with voluntary contributions are expected to outpace the U.S. Qualified Plan's liability growth over the long run.

As of December 31, 2024, the target allocation of the U.S. Qualified Plan assets consisted of 45% U.S. long credit bonds, 20% global equities (developed and emerging markets), 10% custom completion, 5% private equity, 5% high yield bonds, 4% emerging market debt, 4% global listed infrastructure, 4% private real estate, and 3% hedge funds.

Global equity investments include common stocks that are listed on an exchange and investments in commingled funds that invest primarily in publicly traded equities. Equity investments are diversified across country, region, investment style and market capitalization. Fixed income securities held include U.S. treasury securities, corporate bonds, and investments in commingled funds that invest in a diversified blend of longer duration fixed income securities; the custom completion strategy uses U.S. treasury securities and interest rate futures (or similar instruments) to align more closely with the target hedge ratio across maturities. Diversifying investments, including private equity, hedge funds, private real estate, emerging market debt, high yield bonds, and global listed infrastructure, are used judiciously to enhance long-term returns while improving portfolio diversification. Private equity assets consist primarily of investments in limited partnerships that invest in individual companies in the form of non-public equity or non-public debt positions. Direct or co-investment in non-public stock by the U.S. Qualified Plan is prohibited. The U.S. Qualified Plan's private equity investments are limited to 20% of each of the total limited partnership or fund of funds and the maximum allowable loss cannot exceed the commitment amount. The U.S. Qualified Plan invests in a hedge fund of funds, which invests, either directly or indirectly, in diversified portfolios of funds or other pooled investment vehicles. Investments in private real estate, high yield bonds, emerging market debt, and global listed infrastructure are designed to provide income and added diversification.

Derivatives may be used, depending on the nature of the asset class to which they relate, to gain market exposure in an efficient and timely manner, to hedge foreign currency exposure or interest rate risk, or to alter the duration of a portfolio. There were four fixed income derivatives held by the U.S. Qualified Plan at both December 31, 2024 and 2023.

Investment risk is measured and monitored on an ongoing basis through monthly liability measurements, periodic asset/liability studies, and quarterly investment portfolio reviews. Standards used to evaluate the U.S. Qualified Plan's investment manager performance include, but are not limited to, the achievement of objectives, operation within guidelines and policy, and comparison against a benchmark. In addition, each manager of the investment funds held by the U.S. Qualified Plan is ranked against a universe of peers and compared to a benchmark. Total U.S. Qualified Plan performance analysis includes an analysis of the market environment, asset allocation impact on performance, risk and return relative to other ERISA plans, and manager impacts upon U.S. Qualified Plan performance.

The following describes the hierarchy of inputs used to measure fair value and the primary valuation methodologies used by Northern Trust for the U.S. Qualified Plan assets measured at fair value.

Level 1 – Quoted, active market prices for identical assets or liabilities. The U.S. Qualified Plan's Level 1 assets are comprised primarily of U.S. treasury securities, mutual funds, and common stocks. The U.S. Qualified Plan's Level 1 investments that are exchange traded are valued at the closing price reported by the respective exchanges on the day of valuation.

Level 2 – Observable inputs other than Level 1 prices, such as quoted active market prices for similar assets or liabilities, quoted prices for identical or similar assets in inactive markets, and model-derived valuations in which all significant inputs are observable in active markets. The U.S. Qualified Plan's Level 2 assets are comprised of collective trust funds, corporate bonds, non-U.S. government obligations, and municipal and provincial bonds. The investments in collective trust funds fair values are calculated on a scheduled basis using the closing market prices and accruals of securities in the funds (total value of the funds) divided by the number of fund shares currently issued and outstanding. Redemptions of the collective trust funds occur by contract at the respective fund's redemption date net asset value (NAV).

Level 3 – Valuation techniques in which one or more significant inputs are unobservable in the marketplace. The U.S. Qualified Plan did not hold Level 3 assets as of December 31, 2024 and 2023.

Assets valued at fair value using NAV per share - The U.S. Qualified Plan's assets valued at fair value using NAV per share include investments in private equity funds and a hedge fund, which invest in underlying groups of investment funds or other pooled investment vehicles that are selected by the respective funds' investment managers. The investment funds and the underlying investments held by these investment funds are valued at fair value. In determining the fair value of the underlying investments of each fund, the fund's investment manager or general partner takes into account the estimated value reported by the underlying funds as well as any other considerations that may, in their judgment, increase or decrease such estimated value. The investments in the private equity funds and a hedge fund are considered to be long-term investments. There are no capital withdrawal options related to the investments in the private equity funds. However, capital is periodically distributed as underlying investments are sold. It is estimated that the current private equity investments would be liquidated over 1 year to 15 years, depending on the vintage year of a particular fund. With sixty days advance notice, the Plan's investment in the hedge fund can be withdrawn at the next calendar quarter end.

The U.S. Qualified Plan's assets valued at fair value using NAV per share also include investments in real estate funds, which invest in real estate assets. The investment in properties by the real estate funds are carried at fair value, which is estimated based on the price that would be received to sell an asset in an orderly transaction between marketplace participants at the measurement date. The valuation plan for each real estate investment is subject to review on an annual basis which is based on either an external appraisal from appraisal firms or internal valuations prepared by the real estate fund's investment advisor. The Plan's investment in real estate funds are considered to be long-term investments and, with forty-five days advance notice, can be withdrawn at the next calendar quarter end to the extent the real estate funds have liquid assets, as determined at the sole discretion of the fund manager.

As investments in the private equity funds, hedge fund, and real estate fund are valued at fair value using NAV per share, they are not required to be categorized within the fair value hierarchy.

While Northern Trust believes its valuation methods for U.S. Qualified Plan assets are appropriate and consistent with other market participants, the use of different methodologies or assumptions could have a material effect on the computation of the estimated fair values.

The following table presents the fair values of Northern Trust's U.S. Qualified Plan assets, by major asset category, and their level within the fair value hierarchy defined by GAAP as of December 31, 2024 and 2023.

TABLE 100: FAIR VALUE OF U.S. QUALIFIED PLAN ASSETS

(In Millions)	DECEMBER 31, 2024

Real Estate Funds				82.9
Total Assets at Fair Value			\$	1,200.8

⁽¹⁾ Northern Trust reclassified its leveling interpretation for U.S. Government Obligations from Level 2 to Level 1 during 2024 and adjusted 2023 disclosures accordingly.

⁽²⁾ Negative balance in Cash and Other as of December 31, 2023 primarily relates to the timing of transfers between cash accounts and short-term investment funds presented in Collective Trust Funds.

A building block approach is employed for Northern Trust's U.S. Qualified Plan in determining the long-term rate of return for plan assets. Historical markets and long-term historical relationships between equities, fixed income and other asset classes are studied using the widely accepted capital market principle that assets with higher volatility generate a greater return over the long-run. Current market factors such as inflation expectations and interest rates are evaluated before long-term capital market assumptions are determined. The long-term portfolio rate of return is established with consideration given to diversification and rebalancing. The rate is reviewed against peer data and historical returns to verify the return is reasonable and appropriate. Based on this approach and the U.S. Qualified Plan's target asset allocation, the expected long-term rate of return on assets as of the U.S. Qualified Plan's December 31, 2024 measurement date was set at 7.25%.

Defined Contribution Plans. The Corporation and its subsidiaries maintain various defined contribution plans covering substantially all employees. The Corporation's contribution to the U.S. plan and to certain European-based plans includes a matching component. The expense associated with defined contribution plans is charged to Employee Benefits expense on the consolidated statements of income and totaled \$78.8 million in 2024, \$72.4 million in 2023, and \$67.2 million in 2022.

Note 22 – Share-Based Compensation Plans

Northern Trust recognizes as expense the grant-date fair value of share-based compensation granted to employees and non-employee directors as Compensation on the Consolidated Statement of Income.

Total Compensation expense for share-based compensation arrangements to employees and the associated tax impacts were as follows for the periods presented.

TABLE 101: TOTAL COMPENSATION EXPENSE FOR SHARE-BASED COMPENSATION ARRANGEMENTS TO EMPLOYEES

(In Millions)	FOR THE YEAR ENDED DECEMBER 31,		
	2024	2023	2022
Restricted Stock Unit Awards	\$ 91.4	\$ 95.7	\$ 96.4
Performance Stock Units	28.0	22.5	28.8
Total Share-Based Compensation Expense	\$ 119.4	\$ 118.2	\$ 125.2
Tax Benefits Recognized	\$ 29.3	\$ 29.9	\$ 31.4

As of December 31, 2024, there was \$93.7 million of unrecognized compensation cost related to unvested share-based compensation arrangements granted under the Corporation's share-based compensation plans. That cost is expected to be recognized as expense over a weighted-average period of approximately 3 years.

The Northern Trust Corporation 2017 Long-Term Incentive Plan (2017 Plan) is administered by the Human Capital and Compensation Committee (Committee) of the Board of Directors. All employees of the Corporation and its subsidiaries and all directors of the Corporation are eligible to receive awards under the 2017 Plan. The 2017 Plan provides for the grant of non-qualified and incentive stock options; tandem and free-standing stock appreciation rights; stock awards in the form of restricted stock, restricted stock units and other stock awards; and performance awards.

Restricted stock unit and performance stock unit grants continue to vest in accordance with the original terms of the award if the applicable employee retires after satisfying applicable age and service requirements.

Grants are outstanding under the 2017 Plan, the Northern Trust Corporation 2012 Stock Plan (2012 Plan), and the Amended and Restated Northern Trust Corporation 2002 Stock Plan (2002 Plan). The 2017 Plan was approved by stockholders in April 2017. Upon approval of the 2017 Plan, no additional shares have been or will be granted under the 2012 Plan or 2002 Plan. The total number of shares of the Corporation's common stock authorized for issuance under the 2017 Plan is 20,000,000 plus shares forfeited under the 2012 Plan and 2002 Plan. As of December 31, 2024, shares available for future grant under the 2017 Plan, including shares forfeited under the 2012 Plan and 2002 Plan, totaled 12,297,075.

The following describes Northern Trust's share-based payment arrangements and applies to awards under the 2017 Plan, 2012 Plan and the 2002 Plan, as applicable.

Stock Options. Stock options consist of options to purchase common stock of the Corporation at prices not less than 100% of the fair value thereof on the date the options are granted. Options have a maximum 10 year life and generally vest and become exercisable in 1 year to 4 years after the date of grant. All options terminate at such time as determined by the Committee and as provided in the terms and conditions of the respective option grants. There were no options granted during the years ended December 31, 2024, 2023, and 2022.

The following table provides information about stock options exercised in the years ended December 31, 2024, 2023, and 2022.

TABLE 102: STOCK OPTIONS EXERCISED

(In Millions)	FOR THE YEAR ENDED DECEMBER 31,		
	2024	2023	2022
Stock Options Exercised			
Intrinsic Value as of Exercise Date	2.9	1.6	3.6
Cash Received	9.4	2.3	3.9
Tax Deduction Benefits Realized	2.9	1.6	3.5

A summary of the status of stock options at December 31, 2024, and changes during the year then ended, are presented in the following table.

TABLE 103: STATUS OF STOCK OPTIONS AND CHANGES

(\$ In Millions Except Per Share Information)	SHARES	WEIGHTED AVERAGE EXERCISE PRICE PER SHARE	WEIGHTED AVERAGE REMAINING CONTRACTUAL TERM (YEARS)	AGGREGATE INTRINSIC VALUE
Options Outstanding, December 31, 2023	399,404	\$ 74.45		
Granted	—	—		
Exercised	(154,476)	71.77		
Forfeited, Expired or Cancelled	(31,746)	88.06		
Options Outstanding, December 31, 2024	213,182	\$ 74.36	1.5	\$ 6.0
Options Exercisable, December 31, 2024	213,182	\$ 74.36	1.5	\$ 6.0

Restricted Stock Unit Awards. Restricted stock units may be granted to participants and entitles them to receive a payment in the Corporation's common stock or cash and such other terms and conditions as the Committee deems appropriate. Each restricted stock unit provides the recipient the opportunity to receive one share of common stock for each restricted stock unit that vests. The restricted stock units granted in 2024 predominately vest at a rate equal to 25% per year for four years on the first day of the month following the month in which the grant date falls. Restricted stock unit grants totaled 1,182,007, 1,166,376, and 1,061,573, with weighted average grant-date fair values of \$79.96, \$91.56, and \$110.99 per share, for the years ended December 31, 2024, 2023, and 2022, respectively. The total fair value of restricted stock units vested during the years ended December 31, 2024, 2023, and 2022, was \$89.6 million, \$85.9 million, and \$75.6 million, respectively.

A summary of the status of outstanding restricted stock unit awards at December 31, 2024, and changes during the year then ended, is presented in the following table.

TABLE 104: OUTSTANDING RESTRICTED STOCK UNIT AWARDS

(\$ In Millions)	NUMBER	AGGREGATE INTRINSIC VALUE
Restricted Stock Unit Awards Outstanding, December 31, 2023	2,500,058	\$ 211.0
Granted	1,182,007	
Distributed	(900,567)

Restricted Stock Unit Awards Outstanding, December 31, 2024	2,715,437	\$ 278.3
Units Convertible, December 31, 2024	18,887	\$ 1.9

The following is a summary of nonvested restricted stock unit awards at December 31, 2024, and changes during the year then ended.

TABLE 105: NONVESTED RESTRICTED STOCK UNIT AWARDS

NONVESTED RESTRICTED STOCK UNITS	NUMBER	WEIGHTED AVERAGE GRANT-DATE FAIR VALUE PER UNIT	WEIGHTED AVERAGE REMAINING VESTING TERM (YEARS)
Nonvested at December 31, 2023	2,481,171	\$ 98.62	2.4
Granted	1,182,007	79.96	
Vested	(900,567)	99.46	
Forfeited or Cancelled	(66,061)	92.11	
Nonvested at December 31, 2024	2,696,550	\$ 90.33	2.4

Performance Stock Units. Each performance stock unit provides the recipient the opportunity to receive one share of the Corporation's common stock for each stock unit based on the attainment of certain performance criteria over a three-year period. The number of units that will vest are subject to the attainment of specified performance targets that are a function of average return on equity goals and average return on equity performance relative to that of a performance peer group, each measured over a three-year period. For performance stock units outstanding as of December 31, 2024, the number of performance stock units that will vest ranges from 0% to 150% of the original award granted based on the achievement of both absolute and relative return on equity goals over a three-year period compared to performance targets. Distribution of the shares is then made after vesting.

Performance stock unit grants totaled 262,557, 219,314, and 211,906 for the years ended December 31, 2024, 2023, and 2022, respectively, with weighted average grant-date fair values of \$79.89, \$93.97, and \$113.64. Performance stock units outstanding at target level performance totaled 675,690, 613,450, and 607,892 at December 31, 2024, 2023, and 2022, respectively. Performance stock units had aggregate intrinsic values of \$69.3 million, \$51.8 million, and \$53.8 million, and weighted average remaining vesting terms of 1.1 years at December 31, 2024, and 1.0 year at December 31, 2023, and 2022, respectively.

Non-employee Director Stock Awards. Director stock units with total values of \$1.5 million (18,220 units), \$1.6 million (20,405 units), and \$1.6 million (14,773 units) were granted to non-employee directors in 2024, 2023, and 2022, respectively, which vest or vested on the date of the annual meeting of the Corporation's stockholders in the following years. Total Compensation expense recognized on these grants was \$1.6 million, \$1.7 million, and \$1.7 million in 2024, 2023, and 2022, respectively. Stock units granted to non-employee directors do not have voting rights. Each stock unit entitles a director to one share of common stock at vesting, unless a director elects to defer receipt of the shares. Directors may elect to defer the payment of their annual stock unit grant and cash-based compensation until termination of services as director. Deferred cash compensation is converted into stock units representing shares of common stock of the Corporation. Distributions of deferred stock units are made in common stock. For compensation deferred prior to January 1, 2018, distributions of the stock unit accounts that relate to cash-based compensation are made in cash based on the fair value of the stock units at the time of distribution. For compensation deferred on or after January 1, 2018, distributions of the stock unit accounts that relate to cash-based compensation are made in common stock.

Note 23 – Cash-Based Compensation Plans

Various incentive plans provide for cash incentives and bonuses to selected employees based upon accomplishment of corporate net income objectives, goals of the reporting segments and support functions, and individual performance. The provision for awards under these plans is charged to Compensation expense and totaled \$381.7 million in 2024, \$358.7 million in 2023, and \$392.7 million in 2022.

Note 24 – Commitments and Contingent Liabilities

Off-Balance Sheet Financial Instruments, Guarantees and Other Commitments. Northern Trust, in the normal course of business, enters into various types of commitments and issues letters of credit to meet the liquidity and credit enhancement needs of its clients. The contractual amounts of these instruments represent the maximum potential credit exposure should the instrument be fully drawn upon and the client default. To control the credit risk associated with entering into commitments and issuing letters of credit, Northern Trust subjects such activities to the same credit quality and monitoring controls as its lending activities. Northern Trust does not believe the total contractual amount of these instruments to be representative of its future credit exposure or funding requirements.

The following table provides details of Northern Trust's off-balance sheet financial instruments as of December 31, 2024 and 2023.

TABLE 106: SUMMARY OF OFF-BALANCE SHEET FINANCIAL INSTRUMENTS

(In Millions)	DECEMBER 31,					
	2024			2023		
	ONE YEAR AND LESS	OVER ONE YEAR	TOTAL	ONE YEAR AND LESS	OVER ONE YEAR	TOTAL
Undrawn Commitments ⁽¹⁾	\$ 10,849.6	\$ 17,293.2	\$ 28,142.8	\$ 11,849.5	\$ 18,909.6	\$ 30,759.1
Standby Letters of Credit and Financial Guarantees ⁽²⁾⁽³⁾	112,256.3	490.1	112,746.4	85,752.0	639.0	86,391.0
Commercial Letters of Credit	20.3	0.2	20.5	29.2	1.3	30.5
Securities Lent with Indemnification	144,543.7	—	144,543.7	140,539.1	—	140,539.1
Unsettled Reverse Repurchase Agreements	—	—	—	27,667.7	—	27,667.7
Total Off-Balance Sheet Financial Instruments	\$ 267,669.9	\$ 17,783.5	\$ 285,453.4	\$ 265,837.5	\$ 19,549.9	\$ 285,387.4

⁽¹⁾ These amounts exclude \$268.5 million and \$222.2 million of commitments participated to others at December 31, 2024 and 2023, respectively.

⁽²⁾ These amounts include \$109.4 million and \$39.1 million of standby letters of credit secured by cash deposits or participated to others as of December 31, 2024 and 2023, respectively.

⁽³⁾ This amount includes a \$110.8 billion guarantee to the Fixed Income Clearing Corporation (FICC) under the sponsored member program, without taking into consideration the related collateral, as of December 31, 2024. As of December 31, 2023, there was a \$84.6 billion guarantee to the FICC.

Undrawn Commitments generally have fixed expiration dates or other termination clauses. Since commitments can expire without being drawn upon, the total commitment amount does not necessarily represent future loans or liquidity requirements.

Standby Letters of Credit obligate Northern Trust to meet certain financial obligations of its clients, if, under the contractual terms of the agreement, the clients are unable to do so. These instruments are primarily issued to support public and private financial commitments, including commercial paper, bond financing, initial margin requirements on futures exchanges, and similar transactions. Northern Trust is obligated to meet the entire financial obligation of these agreements and in certain cases is able to recover the amounts paid through recourse against collateral received or other participants. Since the vast majority of the standby letters of credit are never drawn, the total standby letters of credit amount does not necessarily represent future loans or liquidity requirements.

Financial Guarantees are issued by Northern Trust to guarantee the performance of a client to a third party under certain arrangements.

Commercial Letters of Credit are instruments issued by Northern Trust on behalf of its clients that authorize a third party (the beneficiary) to draw drafts up to a stipulated amount under the specified terms and conditions of the agreement and other similar instruments. Commercial letters of credit are issued primarily to facilitate international trade.

Securities Lent with Indemnification involves Northern Trust lending securities owned by clients to borrowers who are reviewed and approved by the Northern Trust Capital Markets Credit Committee, as part of its securities custody activities and at the direction of its clients. In connection with these activities, Northern Trust has issued indemnifications to certain clients against certain losses that are a direct result of a borrower's failure to return securities when due, should the value of such securities exceed the value of the collateral required to be posted. Borrowers are required to fully collateralize securities received with cash or marketable securities. As securities are loaned, collateral is maintained at a minimum of 100% of the fair value of the securities plus accrued interest. The collateral is revalued on a daily basis. The amount of securities loaned subject to indemnification as of December 31, 2024 and December 31, 2023, was \$144.5 billion and \$140.5 billion, respectively. Because of the credit quality of the borrowers and the requirement to fully collateralize securities borrowed, management believes that the exposure to credit loss from this activity is not significant and no liability was recorded at December 31, 2024, or 2023 related to these indemnifications.

Unsettled Repurchase and Reverse Repurchase Agreements. Northern Trust enters into repurchase agreements and reverse repurchase agreements which may settle at a future date. In repurchase agreements, Northern Trust receives cash from and provides securities as collateral to a counterparty. In reverse repurchase agreements, Northern Trust advances cash to and receives securities as collateral from a counterparty. These transactions are recorded on the consolidated balance sheets on the settlement date. As of December 31, 2024, and 2023, there were no unsettled reverse repurchase agreements and \$27.7 billion of unsettled reverse repurchase agreements, respectively. As of December 31, 2024, and 2023, there were no unsettled repurchase agreements.

Sponsored Member Program. Northern Trust is an approved Government Securities Division (GSD) netting and sponsoring member in the Fixed Income Clearing Corporation (FICC) sponsored member program, through which Northern Trust submits eligible repurchase and reverse repurchase transactions in U.S. government securities between Northern Trust and its sponsored member clients for novation and clearing. Northern Trust may sponsor clients to clear their eligible repurchase transactions with the FICC. As a sponsoring member, Northern Trust guarantees to the FICC the prompt and full payment and performance of its sponsored member clients' respective obligations under the FICC GSD's rules. To mitigate Northern Trust's credit exposure under this guarantee, Northern Trust obtains a security interest in its sponsored member clients' collateral. Please refer to Note 27, "Offsetting of Assets and Liabilities" for additional information on Northern Trust's repurchase and reverse repurchase agreements.

Clearing and Settlement Organizations. The Bank is a participating member of various cash, securities and foreign exchange clearing and settlement organizations. It participates in these organizations on behalf of its clients and on its own behalf as a result of its own activities. A wide variety of cash and securities transactions are settled through these organizations, including those involving U.S. Treasuries, obligations of states and political subdivisions, asset-backed securities, commercial paper, dollar placements, and securities issued by the Government National Mortgage Association.

Certain of these industry clearing and settlement exchanges require their members to guarantee their obligations and liabilities and/or to provide liquidity support in the event other members do not honor their obligations as stipulated in each clearing organization's membership agreement. Exposure related to these agreements varies, primarily as a result of fluctuations in the volume of transactions cleared through the organizations. At December 31, 2024 and 2023, Northern Trust has not recorded any material liabilities under these arrangements as Northern Trust believes the likelihood that a clearing or settlement exchange (of which Northern Trust is a member) would become insolvent is remote. Controls related to these clearing transactions are closely monitored by management to protect the assets of Northern Trust and its clients.

FDIC Special Assessment. In November 2023, the Federal Deposit Insurance Corporation (FDIC) issued a final rule to implement a special assessment to recoup losses to the deposit insurance fund associated with bank failures in the first half of 2023. In conjunction with the special assessment, \$84.6 million was recorded to Other Operating Expense in 2023. During the first half of 2024, the FDIC published revised estimated losses as well as estimated recoveries from the related bank failures. As a result, Northern Trust recognized additional expense of \$14.7 million in 2024, recorded to Other Operating Expense. As of December 31, 2024, Northern Trust estimates its total liability related to the special assessment to be \$99.3 million.

Legal Proceedings. In the normal course of business, the Corporation and its subsidiaries are routinely defendants in or parties to pending and threatened legal actions, and are subject to regulatory examinations, information-gathering requests, investigations, and proceedings, both formal and informal. In certain legal actions, claims for substantial monetary damages are asserted. In regulatory matters, claims for disgorgement, restitution, penalties and/or other remedial actions or sanctions may be sought.

Based on current knowledge, after consultation with legal counsel and after taking into account current accruals, management does not believe that losses, fines or penalties, if any, arising from pending litigation or threatened legal actions or regulatory matters either individually or in the aggregate, after giving effect to applicable reserves and insurance coverage will have a material adverse effect on the consolidated financial position or liquidity of the Corporation, although such matters could have a material adverse effect on the Corporation's operating results for a particular period.

Under GAAP, (i) an event is "probable" if the "future event or events are likely to occur"; (ii) an event is "reasonably possible" if "the chance of the future event or events occurring is more than remote but less than likely"; and (iii) an event is "remote" if "the chance of the future event or events occurring is slight."

The outcome of litigation and regulatory matters is inherently difficult to predict and/or the range of loss often cannot be reasonably estimated, particularly for matters that (i) will be decided by a jury, (ii) are in early stages, (iii) involve uncertainty as to the likelihood of a class being certified or the ultimate size of the class, (iv) are subject to appeals or motions, (v) involve significant factual issues to be resolved, including with respect to the amount of damages, (vi) do not specify the amount of damages sought or (vii) seek very large damages based on novel and complex damage and liability legal theories. Accordingly, the Corporation cannot reasonably estimate the eventual outcome of these pending matters, the timing of their ultimate resolution or what the eventual loss, fines or penalties, if any, related to each pending matter will be.

In accordance with applicable accounting guidance, the Corporation records accruals for litigation and regulatory matters when those matters present loss contingencies that are both probable and reasonably estimable. When loss contingencies are not both probable and reasonably estimable, the Corporation does not record accruals. No material accruals have been recorded for pending litigation or threatened legal actions or regulatory matters.

For a limited number of matters for which a loss is reasonably possible in future periods, whether in excess of an accrued liability or where there is no accrued liability, the Corporation is able to estimate a range of possible loss. As of December 31, 2024, the Corporation has estimated the range of reasonably possible loss for these matters to be from zero to approximately \$25 million in the aggregate. The Corporation's estimate with respect to the aggregate range of reasonably possible loss is based upon currently available information and is subject to significant judgment and a variety of assumptions and known and unknown uncertainties. The matters underlying the estimated range will change from time to time, and actual results may vary significantly from the current estimate.

In certain other pending matters, there may be a range of reasonably possible loss (including reasonably possible loss in excess of amounts accrued) that cannot be reasonably estimated for the reasons described above. Such matters are not included in the estimated range of reasonably possible loss discussed above.

In 2015, Northern Trust Fiduciary Services (Guernsey) Limited (NTFS), an indirect subsidiary of the Corporation, was charged by a French investigating magistrate judge with complicity in estate tax fraud in connection with the administration of two trusts for which it serves as trustee. Charges also were brought against a number of other persons and entities related to this matter. In 2017, a French court found no estate tax fraud had occurred and NTFS and all other persons and entities charged were acquitted. The Public Prosecutor's Office of France appealed the court decision and in June 2018 a French appellate court issued its opinion on the matter, acquitting all persons and entities charged, including NTFS. In January 2021, the Cour de Cassation, the highest court in France, reversed the June 2018 appellate court ruling, requiring a re-trial at the appellate court level. This re-trial concluded in October 2023. On March 5, 2024 the appellate court rendered a judgment against all defendants, including NTFS. NTFS was ordered to pay a fine of €187,500 in conjunction with the judgment. In addition, the court ordered that certain of those convicted in relation to tax fraud or aiding and abetting tax fraud, including NTFS, are jointly and severally liable for any allegedly unpaid estate taxes owing, plus penalties and interest. NTFS provided no tax advice and was not involved in the preparation or filing of the challenged estate tax filings in this case. Further, NTFS believes it acted in accordance with all applicable laws and fully complied with its fiduciary duties. Accordingly, NTFS filed an appeal of the judgment on March 5, 2024. Under applicable law, upon the filing by NTFS of its appeal, the judgment, as well as its effects (including the fine and joint and several liability) will be stayed pending the outcome of the appeal.

Visa Class B Common Shares and Makewhole Agreement. Northern Trust, as a member of Visa U.S.A. Inc. (Visa U.S.A.) and in connection with the 2007 restructuring of Visa U.S.A. and its affiliates and the 2008 initial public offering of Visa Inc. (Visa), received certain Visa Class B common shares. The Visa Class B common shares are subject to certain transfer restrictions until the final resolution of certain litigation related to interchange fees involving Visa (the covered litigation), at which time the shares are convertible into Visa Class A common shares based on a conversion rate dependent upon the ultimate cost of resolving the covered litigation. Since 2018, Visa has deposited an additional \$4.3 billion into an escrow account previously established with respect to the covered litigation. As a result of the additional contributions to the escrow account, the rate at which Visa Class B common shares will convert into Visa Class A common shares is 1.5430 as of December 31, 2024.

In September 2018, Visa reached a proposed class settlement agreement covering damage claims but not injunctive relief claims regarding the covered litigation. In December 2019, the district court granted final approval for the proposed class settlement agreement. In March 2023, the Second Circuit Court of Appeals affirmed the district court's approval of the class settlement agreement. Certain merchants have opted out of the class settlement and are pursuing claims separately. The ultimate resolution of the covered litigation, the timing for removal of the selling restrictions on the Visa Class B common shares and the rate at which such shares will ultimately convert into Visa Class A common shares are uncertain.

In May 2024, Northern Trust received 2.1 million Visa Class B-2 common shares and 819.5 thousand Visa Class C common shares via its full participation in an offer to exchange outstanding shares of Visa's Class B common stock (Exchange Offer). The newly issued series of Visa Class B common shares are subject to the same transfer and convertibility restrictions as the previously outstanding Visa Class B common shares. The Visa Class C common shares will automatically be converted at the then-applicable conversion rate into shares of Visa Class A common stock if transferred to a person other than a Visa member or an affiliate of a Visa member. After the initial exchange offer, Visa can, at its discretion, conduct up to three successive potential exchange offers, in each case, if more than 12 months have passed since the previous exchange offer and after a further 50% reduction of interchange fees at issue in the unresolved claims for damages in the covered litigation.

Northern Trust holds the Visa Class B-2 common shares received in the Exchange Offer at their carryover basis of zero as of December 31, 2024. Based upon the December 31, 2024, closing price of \$316.04 for a Visa Class A common share, the estimated value of Northern Trust's Visa Class B-2 common shares was approximately \$1.0 billion at the current conversion rate of Visa Class B to Visa Class A common shares. The estimated value does not represent fair value given the shares' limited transferability.

As of December 31, 2024, Northern Trust had sold 798.7 thousand Visa Class C common shares of the 819.5 thousand it had received in the Exchange Offer and recorded a realized gain of \$870.4 million on the sales through Other Operating Income for the twelve months ended December 31, 2024. The remaining Visa Class C common shares are recorded at their fair value of \$26.3 million in Other Assets on the consolidated balance sheets with changes in fair value recorded in Other Operating Income on the consolidated statement of income.

In conjunction with Northern Trust's participation in the Exchange Offer, Northern Trust was required to enter into the Makewhole Agreement whereby if all the Visa Class B-2 common share value is exhausted via additional escrow contributions, the Visa Class B-2 shareholders have to step in and make whole what the original Visa Class B common shares would have been obligated to cover absent the Exchange Offer. At December 31, 2024, Northern Trust has not recorded a liability under this agreement as Northern Trust believes the likelihood that a payment under the Makewhole Agreement will have to be made is remote.

Note 25 – Derivative Financial Instruments

Northern Trust is a party to various derivative financial instruments that are used in the normal course of business to meet the needs of its clients, as part of its trading activity for its own account; and as part of its risk management activities. These instruments may include foreign exchange contracts, interest rate contracts, total return swap contracts, and swaps related to the sale of certain Visa Class B common shares. Please refer to Note 1, "Summary of Significant Accounting Policies" for the significant accounting policies for derivative financial instruments.

Foreign exchange contracts are agreements to exchange specific amounts of currencies at a future date, at a specified rate of exchange. Foreign exchange contracts are entered into primarily to meet the foreign exchange needs of clients. Foreign exchange contracts are also used for trading and risk management purposes. For risk management purposes, Northern Trust uses foreign exchange contracts to reduce its exposure to changes in foreign exchange rates relating to certain forecasted non-functional-currency-denominated revenue and expenditure transactions and foreign-currency-denominated assets and liabilities, including debt securities and net investments in non-U.S. affiliates.

Interest rate contracts include swap and option contracts. Interest rate swap contracts involve the exchange of fixed and floating rate interest payment obligations without the exchange of the underlying principal amounts. Northern Trust enters into interest rate swap contracts with its clients and also may utilize such contracts to reduce or eliminate the exposure to changes in the cash flows or fair value of hedged assets or liabilities due to changes in interest rates. Interest rate option contracts may include caps, floors, collars and swaptions, and provide for the transfer or reduction of interest rate risk, typically in exchange for a fee. Northern Trust enters into option contracts primarily as a seller of interest rate protection to clients. Northern Trust receives a fee at the outset of the agreement for the assumption of the risk of an unfavorable change in interest rates. This assumed interest rate risk is then mitigated by entering into an offsetting position with an outside counterparty. Northern Trust may also purchase or enter into option contracts for risk management purposes including to reduce the exposure to changes in the cash flows of hedged assets due to changes in interest rates.

The following table shows the notional and fair values of all derivative financial instruments as of December 31, 2024 and 2023.

TABLE 107: NOTIONAL AND FAIR VALUES OF DERIVATIVE FINANCIAL INSTRUMENTS

(In Millions)	DECEMBER 31, 2024			DECEMBER 31, 2023

Total Derivative Financial Instruments		\$ 3,448.1	\$ 958.8		\$ 441.5	\$ 1,444.4

⁽¹⁾ Derivative assets are reported in Other Assets on the consolidated balance sheets.

⁽²⁾ Derivative liabilities are reported in Other Liabilities on the consolidated balance sheets.

⁽³⁾ This line includes swaps related to sales of certain Visa Class B common shares and total return swap contracts.

⁽⁴⁾ See further detail in Note 27, "Offsetting of Assets and Liabilities."

Notional amounts of derivative financial instruments do not represent credit risk, and are not recorded on the consolidated balance sheets. They are used merely to express the volume of this activity. Northern Trust's credit-related risk of loss is limited to the positive fair value of the derivative instrument, net of any collateral received, which is significantly less than the notional amount.

Hedging Derivative Instruments Designated under GAAP. Northern Trust uses derivative instruments to hedge its exposure to foreign currency and interest rate risk. Certain hedging relationships are formally designated and qualify for hedge accounting under GAAP as fair value, cash flow or net investment hedges.

Fair Value Hedges. Derivatives are designated as fair value hedges to limit Northern Trust's exposure to changes in the fair value of assets and liabilities due to movements in interest rates.

Cash Flow Hedges. Derivatives are also designated as cash flow hedges in order to minimize the variability in cash flows of earning assets or forecasted transactions caused by movements in interest or foreign exchange rates.

There were no material gains or losses reclassified into earnings during the years ended December 31, 2024, 2023, and 2022 as a result of the discontinuance of cash flow hedges of forecasted transactions that were no longer probable of occurring. It is estimated that net gains of \$8.3 million will be reclassified into Net Income within the next twelve months relating to cash flow hedges of foreign-currency-denominated debt securities. As of December 31, 2024, 6 months was the maximum length of time over which the exposure to variability in future cash flows of forecasted foreign-currency-denominated debt securities was being hedged.

The following table provides fair value and cash flow hedge derivative gains and losses recognized in income during the years ended December 31, 2024, 2023 and 2022.

TABLE 108: LOCATION AND AMOUNT OF FAIR VALUE AND CASH FLOW HEDGE DERIVATIVE GAINS AND LOSSES RECORDED IN INCOME

Available for Sale Debt Securities ⁽⁴⁾	\$ 7,567.3	\$ (48.7)	\$	5,048.8	\$ 77.5	\$
Senior Notes and Long-Term Subordinated Debt	2,507.5	(238.0)		2,495.9	(248.7)	

⁽¹⁾ The cumulative hedge accounting basis adjustment includes \$1.8 million related to discontinued hedging relationships of AFS debt securities and \$13.8 million related to discontinued hedging relationships in the cumulative hedge accounting basis adjustment of senior notes and long-term debt as of December 31, 2024.

⁽²⁾ The cumulative hedge accounting basis adjustment includes \$2.2 million related to discontinued hedging relationships of AFS debt securities and \$29.6 million related to discontinued hedging relationships in the cumulative hedge accounting basis adjustment of senior notes and long-term debt as of December 31, 2023.

⁽³⁾ Positive (negative) amounts related to AFS securities represent cumulative fair value hedge basis adjustments that will reduce (increase) net interest income in future periods. Positive (negative) amounts related to Senior Notes and Long-Term Subordinated Debt represent cumulative fair value hedge basis adjustments that will increase (reduce) net interest income in future periods.

⁽⁴⁾ Carrying value represents amortized cost.

Net Investment Hedges. Certain foreign exchange contracts are designated as net investment hedges to minimize Northern Trust's exposure to variability in the foreign currency translation of net investments in non-U.S. branches and subsidiaries. Net investment hedge gains of \$233.1 million and net investment hedge losses of \$77.4 million were recognized in AOCI related to foreign exchange contracts for the years ended December 31, 2024 and 2023, respectively.

Derivative Instruments Not Designated as Hedging under GAAP. Northern Trust's derivative instruments that are not designated as hedging under GAAP include derivatives for purposes of client-related and trading activities, as well as other risk management purposes. These activities consist principally of providing foreign exchange services to clients in connection with Northern Trust's global custody business. However, in the normal course of business, Northern Trust also engages in trading of currencies for its own account.

Non-designated risk management derivatives include foreign exchange contracts entered into to manage the foreign currency risk of non-U.S.-dollar-denominated assets and liabilities, the net investment in certain non-U.S. affiliates, commercial loans, and forecasted foreign-currency-denominated transactions. Swaps related to sales of certain Visa Class B common shares were entered into pursuant to which Northern Trust retains the risks associated with the ultimate conversion of the Visa Class B common shares into Visa Class A common shares. Total return swaps are entered into to manage the equity price risk associated with certain investments.

Changes in the fair value of derivative instruments not designated as hedges under GAAP are recognized currently in income. The following table provides the location and amount of gains and losses recorded on the consolidated statements of income for the years ended December 31, 2024, 2023, and 2022 for derivative instruments not designated as hedges under GAAP.

TABLE 110: LOCATION AND AMOUNT OF GAINS AND LOSSES RECORDED IN INCOME FOR DERIVATIVES NOT DESIGNATED AS HEDGING UNDER GAAP

(In Millions)	DERIVATIVE GAINS (LOSSES) LOCATION RECOGNIZED IN INCOME	AMOUNT OF DERIVATIVE GAINS (LOSSES) RECOGNIZED IN INCOME		
		2024	2023	2022
Non-designated risk management derivatives				
Foreign Exchange Contracts	Other Operating Income	\$ (0.2)	\$ 1.8	\$ (3.1)
Other Financial Derivatives ⁽¹⁾	Other Operating Income	(33.5)	(21.2)	(22.2)
Gains (Losses) from non-designated risk management derivatives		\$ (33.7)	\$ (19.4)	\$ (25.3)
Client-related and trading derivatives				
Foreign Exchange Contracts	Foreign Exchange Trading Income	\$ 231.2	\$ 203.9	\$ 288.6
Interest Rate Contracts	Security Commissions and Trading Income	4.0	8.9	9.6
Gains (Losses) from client-related and trading derivatives		\$ 235.2	\$ 212.8	\$ 298.2
Total gains (losses) from derivatives not designated as hedging under GAAP		\$ 201.5	\$ 193.4	\$ 272.9

⁽¹⁾ This line includes swaps related to the sale of certain Visa Class B common shares and total return swap contracts.

Note 26 – Securities Purchased Under Agreements to Resell and Securities Sold Under Agreements to Repurchase

Securities purchased under agreements to resell and securities sold under agreements to repurchase are accounted for as collateralized financings and recorded at the amounts at which the securities were acquired or sold plus accrued interest. To minimize any potential credit risk associated with these transactions, the fair value of the securities purchased or sold is monitored, limits are set on exposure with counterparties, and the financial condition of counterparties is regularly assessed. It is Northern Trust's policy to take possession, either directly or via third-party custodians, of securities purchased under agreements to resell. Securities sold under agreements to repurchase are either directly held by, or pledged to the counterparty until the repurchase. Northern Trust nets securities sold under repurchase agreements against those purchased under resale agreements when there is a legally enforceable master netting arrangement and the other conditions to net are met.

The following tables summarize information related to Securities Purchased under Agreements to Resell and Securities Sold under Agreements to Repurchase.

TABLE 111: SECURITIES PURCHASED UNDER AGREEMENTS TO RESELL

(\$ In Millions)	2024	2023
Balance at December 31	\$ 426.0	\$ 784.7
Average Balance During the Year	727.5	950.9
Average Interest Rate Earned During the Year	459.13 %	166.71 %
Maximum Month-End Balance During the Year	\$ 1,034.6	\$ 1,326.2

Note: The table above includes the impact of balance sheet netting of approximately \$62.4 billion and \$29.1 billion in 2024 and 2023, respectively. Excluding the impact of netting, the average interest rate on Securities Purchased under Agreements to Resell would be approximately 5.29% and 5.27% in 2024 and 2023, respectively. Northern Trust nets securities sold under repurchase agreements against those purchased under resale agreements when there is a legally enforceable master netting arrangement.

TABLE 112: SECURITIES SOLD UNDER AGREEMENTS TO REPURCHASE

(\$ In Millions)	2024	2023
Balance at December 31	\$ 462.0	\$ 784.7
Average Balance During the Year	518.5	401.5
Average Interest Rate Paid During the Year	632.65 %	383.84 %
Maximum Month-End Balance During the Year	\$ 811.8	\$ 988.1

Note: The table above includes the impact of balance sheet netting of approximately \$62.4 billion and \$29.1 billion in 2024 and 2023, respectively. Excluding the impact of netting, the average interest rate on Securities Sold under Agreements to Repurchase would be approximately 5.21% and 5.22% in 2024 and 2023, respectively. Northern Trust nets securities sold under repurchase agreements against those purchased under resale agreements when there is a legally enforceable master netting arrangement.

The following table provides information regarding the offsetting of derivative liabilities and of securities sold under agreements to repurchase within the consolidated balance sheets as of December 31, 2024 and 2023.

TABLE 115: OFFSETTING OF DERIVATIVE LIABILITIES AND SECURITIES SOLD UNDER AGREEMENTS TO REPURCHASE

(In Millions)	DECEMBER 31, 2024					NET AMOUNT ⁽⁵⁾

Total Derivatives Not Subject to a Master Netting Arrangement	843.5	—	843.5	—	843.5	
Total Derivatives	3,649.8	2,205.4	1,444.4	—	1,444.4	
Securities Sold under Agreements to Repurchase ⁽²⁾	\$ 62,860.2	\$ 62,075.5	\$ 784.7	\$ 784.7	\$ —	

⁽¹⁾ Derivative liabilities are reported in Other Liabilities on the consolidated balance sheets.

⁽²⁾ Offsetting of Securities Sold under Agreements to Repurchase primarily relates to our involvement in the FICC.

⁽³⁾ Including cash collateral deposited with counterparties.

⁽⁴⁾ Including financial assets accepted as collateral which are deposited with counterparties.

⁽⁵⁾ Northern Trust did not place any cash collateral with counterparties that was not offset on the consolidated balance sheets that could have been used to offset the net amounts presented on the consolidated balance sheets as of December 31, 2024 and 2023.

All of Northern Trust's securities sold under agreements to repurchase (repurchase agreements) and securities purchased under agreements to resell (reverse repurchase agreements) involve the transfer of financial assets in exchange for cash subject to a right and obligation to repurchase those assets for an agreed upon amount. In the event of a repurchase failure, the cash or financial assets are available for offset. All of Northern Trust's repurchase agreements and reverse repurchase agreements are subject to a master netting arrangement, which sets forth the rights and obligations for repurchase and offset. Under the master netting arrangement, Northern Trust is entitled to set off receivables from and collateral placed with a single counterparty against obligations owed to that counterparty. In addition, collateral held by Northern Trust can be offset against receivables from that counterparty. Northern Trust has elected to net securities sold under repurchase agreements against those purchased under resale agreements when the GAAP requirements to net are met.

Derivative asset and liability positions with a single counterparty can be offset against each other in cases where legally enforceable master netting arrangements or similar agreements exist. Derivative assets and liabilities can be further offset by cash collateral received from, and deposited with, the transacting counterparty. The basis for this view is that, upon termination of transactions subject to a master netting arrangement or similar agreement, the individual derivative receivables do not represent resources to which general creditors have rights and individual derivative payables do not represent claims that are equivalent to the claims of general creditors. Northern Trust has elected to net derivative assets

and liabilities when legally enforceable master netting arrangements or similar agreements exist between Northern Trust and the counterparty.

Credit risk associated with derivative instruments relates to the failure of the counterparty and the failure of Northern Trust to pay based on the contractual terms of the agreement, and is generally limited to the unrealized fair value gains and losses on these instruments, net of any collateral received or deposited. The amount of credit risk will increase or decrease during the lives of the instruments as interest rates, foreign exchange rates, or equity prices fluctuate. Northern Trust's risk is controlled by limiting such activity to an approved list of counterparties and by subjecting such activity to the same credit and quality controls as are followed in lending and investment activities. Credit support annexes and other similar agreements are currently in place with a number of Northern Trust's counterparties which mitigate the aforementioned credit risk associated with derivative activity conducted with those counterparties by requiring that significant net unrealized fair value gains be supported by collateral placed with Northern Trust.

Additional cash collateral received from and deposited with derivative counterparties totaling \$140.6 million and \$36.4 million, respectively, as of December 31, 2024, and \$373.1 million and \$21.3 million, respectively, as of December 31, 2023, was not offset against derivative assets and liabilities on the consolidated balance sheets as the amounts exceeded the net derivative positions with those counterparties.

Certain master netting arrangements Northern Trust enters into with derivative counterparties contain credit risk-related contingent features in which the counterparty has the option to declare Northern Trust in default and accelerate cash settlement of net derivative liabilities with the counterparty in the event Northern Trust's credit rating falls below specified levels. The aggregate fair value of all derivative instruments with credit-risk-related contingent features that were in a liability position was \$1.6 billion and \$1.2 billion at December 31, 2024 and 2023, respectively. Cash collateral amounts deposited with derivative counterparties on those dates included \$1.4 billion and \$1.1 billion, respectively, posted against these liabilities, resulting in a net maximum amount of termination payments that could have been required at December 31, 2024 and 2023 of \$158.8 million and \$52.2 million, respectively. Accelerated settlement of these liabilities would not have a material effect on the consolidated financial position or liquidity of Northern Trust.

Note 28 – Variable Interest Entities

Northern Trust is involved with various entities in the normal course of business that are deemed to be variable interest entities (VIEs). VIEs are defined within GAAP as entities which either (1) lack sufficient equity at risk to permit the entity to finance its activities without additional subordinated financial support, (2) have equity investors that lack attributes typical of an equity investor, such as the ability to make significant decisions through voting rights affecting the entity's operations, or the obligation to absorb expected losses or the right to receive residual returns of the entity, or (3) are structured with voting rights that are disproportionate to the equity investor's obligation to absorb losses or right to receive returns, and substantially all of the activities are conducted on behalf of the holder of the equity investment at risk with disproportionately few voting rights. Investors that finance a VIE through debt or equity interests are variable interest holders in the entity and the variable interest holder, if any, that has both the power to direct the activities that most significantly impact the entity's economic performance and, through its variable interest, the obligation to absorb losses or the right to receive returns that could potentially be significant to the entity is deemed to be the VIE's primary beneficiary and is required to consolidate the VIE.

Community Reinvestment Act (CRA) Investments. Northern Trust fulfills its obligations under the CRA by making a variety of qualified investments for purposes of supporting institutions and programs that benefit low-to-moderate income communities within Northern Trust's market area. These investments are made in legal entities that are primarily VIEs and consist of equity in limited partnerships and beneficial interests in securitized debt. Based on its analysis, Northern Trust has determined that it is not the primary beneficiary of these VIEs under GAAP and therefore they are not consolidated.

Northern Trust's investments in these unconsolidated entities are reported in Other Assets or Held to Maturity Debt Securities, depending on the structure of the investment.

Tax credit structures. Northern Trust holds tax-advantaged investments in unconsolidated entities that own and operate affordable housing and projects through the new markets tax credit program. These entities, which are limited partnerships and similar entities, are primarily VIEs and are designed to generate a return primarily through the realization of tax credits and other tax benefits, such as tax deductions from operating losses of the investments. Northern Trust invests as a limited partner/investor member and lacks both the power to direct the entities' most significant activities and the obligation to absorb losses or right to receive benefits that could potentially be significant to the entities. Northern Trust is not required to consolidate these entities as it does not have a controlling financial interest and thus is not the primary beneficiary.

Northern Trust's maximum exposure to loss as a result of its involvement with tax credit structures and other CRA investments is limited to the carrying amounts of its investments, including any undrawn commitments. Northern Trust's funding requirements are limited to its invested capital and undrawn commitments for future equity contributions. Northern Trust has no exposure to loss from liquidity arrangements and no obligation to purchase assets of these entities.

Northern Trust's investments in these unconsolidated tax credit structures and related unfunded commitments are reported in Other Assets and Other Liabilities, respectively, on the consolidated balance sheets.

TABLE 116: SUMMARY OF UNCONSOLIDATED TAX CREDIT STRUCTURES

(In Millions)	DECEMBER 31, 2024		DECEMBER 31, 2023	
Investment Carrying Amount				
Affordable Housing	\$	657.0	\$	622.8
New Markets		219.7		266.3
Total Investment Carrying Amount ⁽¹⁾	\$	876.7	\$	889.1
Unfunded Commitments				
Affordable Housing	\$	227.1	\$	178.8
New Markets		—		—
Total Unfunded Commitments ⁽²⁾	\$	227.1	\$	178.8

⁽¹⁾ As of December 31, 2024 and December 31, 2023, \$849.3 million and \$857.0 million are VIEs, respectively.

⁽²⁾ As of December 31, 2024 and December 31, 2023, \$221.0 million and \$172.0 million relate to undrawn commitments on VIEs, respectively.

Upon adoption of ASU 2023-02 on January 1, 2024, Northern Trust elected to account for qualifying new markets tax credit investments under the proportional amortization method. Prior to the adoption of ASU 2023-02, Northern Trust accounted for qualifying affordable housing investments under the proportional amortization method and continues to do so subsequent to the adoption of ASU 2023-02. Under the proportional amortization method, the carrying amount of the investment is amortized in proportion to the income tax credits and other income tax benefits received in the current period as compared to the total income tax credits and income tax benefits expected to be received over the life of the investment. Income tax credits and other income tax benefits and amortization expense associated with unconsolidated tax credit structures are primarily reported in the Provision for Income Tax on the consolidated statement of income.

Northern Trust adopted ASU 2023-02 on a modified retrospective basis. As a result, amortization expense related to new markets tax credit investments is reported in the Provision for Income Tax beginning January 1, 2024. Prior to January 1, 2024, amortization expense related to new markets tax credit investments was reported in Other Operating Expense. Refer to Note 2—Recent Accounting Pronouncements for additional information.

TABLE 117: INCOME TAX CREDITS AND OTHER TAX BENEFITS AND AMORTIZATION EXPENSE ASSOCIATED WITH TAX CREDIT STRUCTURES

(In Millions)	FOR THE YEAR ENDED DECEMBER 31,		
	2024	2023	2022
Income Tax Credits and Other Income Tax Benefits			
Affordable Housing	\$ 87.0	\$ 89.3	\$ 76.4
New Markets	20.1	24.6	22.7
Total Income Tax Credits and Other Income Tax Benefits	\$ 107.1	\$ 113.9	\$ 99.1
Amortization Expense			
Affordable Housing	\$ 71.8	\$ 76.8	\$ 60.0
New Markets	17.5	19.7	21.4
Total Amortization Expense	\$ 89.3	\$ 96.5	\$ 81.4

Investment funds. Northern Trust acts as asset manager for various funds in which clients of Northern Trust are investors. As an asset manager of funds, Northern Trust earns a competitively priced fee that is based on assets managed and varies with each fund's investment objective. Based on its analysis, Northern Trust has determined that it is not the primary beneficiary of these VIEs under GAAP and therefore, the funds are not consolidated. Northern Trust's maximum exposure to loss is limited to the carrying amount of its investments, including any undrawn commitments.

Certain funds for which Northern Trust acts as asset manager comply or operate in accordance with requirements that are similar to those in Rule 2a-7 of the Investment Company Act of 1940 for registered money market funds and, therefore, the funds are exempt from the consolidation requirements in ASC 810-10. Northern Trust does not have any contractual obligations to provide financial support to the funds. Any potential future support of the funds will be at the discretion of Northern Trust after an evaluation of the specific facts and circumstances.

Periodically, Northern Trust makes seed capital investments to certain funds. As of December 31, 2024 and December 31, 2023, Northern Trust had no seed capital investments and no unfunded commitments related to seed capital investments.

Note 29 – Pledged Assets, Accepted Collateral and Restricted Assets

Pledged Assets. As part of its liquidity management strategy, Northern Trust may pledge loans and/or securities to various financial market utilities to allow for client payment, clearing and settlement processing as part of our custody services. Northern Trust may also pledge loans or securities to Central Banks, Federal Home Loan Bank (FHLB) of Chicago and third parties for various purposes, for example: securing public and trust deposits, repurchase agreements, borrowings and derivative contracts.

The following table presents the carrying value of Northern Trust's pledged assets by type.

TABLE 118: TYPE OF PLEDGED ASSETS

(In Billions)	FOR THE YEAR ENDED DECEMBER 31,	
	2024	2023
Debt Securities ⁽¹⁾	\$ 29.3	\$ 33.0
Loans ⁽²⁾	9.5	10.3
Total Pledged Assets	\$ 38.8	\$ 43.3

⁽¹⁾ Debt securities are comprised of held to maturity and available for sale securities.

⁽²⁾ Loans pledged at the FHLB of Chicago and the Federal Reserve Bank of Chicago.

As of December 31, 2024 and 2023, \$1.2 billion and \$1.1 billion, respectively, of collateral pledged related to loans and/or securities, is eligible to be repledged or sold by the secured party.

Accepted Collateral. Northern Trust accepts financial assets as collateral that it may, in some instances, be permitted to repledge or sell. The collateral is generally obtained under certain reverse repurchase agreements and derivative contracts.

The following table presents the fair value of securities accepted as collateral.

TABLE 119: ACCEPTED COLLATERAL

(In Millions)	FOR THE YEAR ENDED DECEMBER 31,	
	2024	2023
Collateral that may be repledged or sold		
Reverse repurchase agreements ⁽¹⁾	\$ 65,311.1	\$ 62,767.8
Derivative contracts	23.6	12.2
Total Collateral Accepted	\$ 65,334.7	\$ 62,780.0

⁽¹⁾ The fair value of securities collateral that was repledged or sold totaled \$64.8 billion and \$62.0 billion at December 31, 2024 and 2023, respectively. This primarily includes collateral accepted as related to the FICC sponsored member program. Refer to Note 24, "Commitments and Contingent Liabilities" and Note 27, "Offsetting of Assets and Liabilities" for further information.

Restricted Assets. Certain cash may be restricted in terms of usage or withdrawal. As a result of the continuing military conflict involving Ukraine and the Russian Federation and related sanctions and legal restrictions in place, cash balances denominated in Russian rubles received for the benefit of certain clients in our Asset Servicing business are subject to distribution restrictions. As of December 31, 2024 and 2023, these balances totaled \$1.1 billion and \$722.2 million respectively, and are reported in Cash and Due from Banks on the consolidated balance sheet.

At December 31, 2024 and 2023, Northern Trust held cash of \$491.2 million and \$575.2 million, respectively, to meet non-U.S. reserve requirements. The Federal Reserve's U.S. reserve requirement is zero percent. There were no average deposits required to meet Federal Reserve Bank reserve requirements at December 31, 2024 and 2023.

Note 30 – Restrictions on Subsidiary Dividends and Loans or Advances

Various federal and state statutory provisions limit the amount of dividends the Bank can pay to the Corporation without regulatory approval. Approval of the Federal Reserve Board is required for payment of any dividend by a state-chartered bank that is a member of the Federal Reserve System if the total of all dividends declared by the bank in any calendar year would exceed the total of its retained net income (as defined by regulatory agencies) for that year combined with its retained net income for the preceding two years. In addition, a state member bank may not pay a dividend in an amount greater than its “undivided profits,” as defined, without regulatory and stockholder approval.

Under Illinois law, an Illinois state bank, prior to paying a dividend, must carry over to surplus at least one-tenth of its net profits since the date of the declaration of the last preceding dividend, until the bank’s surplus is equal to its capital. In addition, an Illinois state bank may not pay any dividend in an amount greater than its net profits then on hand, after deduction of losses and bad debts (defined as debts due to a state bank on which interest is past due and unpaid for a period of six months or more, unless the same are well secured and in the process of collection).

The Bank is also prohibited under federal law from paying any dividends if the Bank is undercapitalized or if the payment of the dividends would cause the Bank to become undercapitalized. In addition, the federal regulatory agencies are authorized to prohibit a bank or bank holding company from engaging in an unsafe or unsound banking practice. The payment of dividends could, depending on the financial condition of the Bank, be deemed to constitute an unsafe or unsound practice. The Dodd-Frank Act and Basel III impose additional restrictions on the ability of banking institutions to pay dividends (e.g., the Corporation may pay dividends only in accordance with the capital plan rules and capital adequacy standards of the Federal Reserve). Subsequent to December 31, 2024, our Bank subsidiary could declare dividends to the Corporation of approximately \$260 million, without obtaining prior regulatory approval.

Under federal law, financial transactions by the Bank, the Corporation’s insured banking subsidiary, with the Corporation and its affiliates that are in the form of loans or extensions of credit, investments, guarantees, derivative transactions, repurchase agreements, securities lending transactions or purchases of assets, are restricted. These transactions must be on terms and conditions that are, or in good faith would be, offered to non-affiliated companies (i.e. on terms not less favorable to the Bank than market terms). Further, extensions of credit must be secured fully with qualifying collateral and are limited to 10% of the Bank’s capital and surplus for transactions with a single affiliate and to 20% of the Bank’s capital and surplus with all affiliates. Other state and federal laws may limit the transfer of funds by the Corporation’s banking subsidiaries to the Corporation and certain of its affiliates.

Note 31 – Reporting Segments and Related Information

Segment Information. Northern Trust is organized around its two client-focused reporting segments: Asset Servicing and Wealth Management. Asset management and related services are provided to Asset Servicing and Wealth Management clients primarily by the Asset Management business. The revenue and expenses of Asset Management and certain other support functions are allocated fully to Asset Servicing and Wealth Management.

Reporting segment financial information, presented on an internal management-reporting basis, is determined by accounting systems used to allocate revenue and expense to each segment, and incorporates processes for allocating assets, liabilities, equity and the applicable interest income and expense utilizing a funds transfer pricing (FTP) methodology. Under the methodology, assets and liabilities receive a funding charge or credit that considers interest rate risk, liquidity risk, and other product characteristics on an instrument level. Additionally, segment information is presented on an FTE basis as management believes an FTE presentation provides a clearer indication of net interest income. The adjustment to an FTE basis has no impact on Net Income.

Equity is allocated to the reporting segments based on a variety of factors including, but not limited to, risk, regulatory considerations, and internal metrics. Allocations of equity and certain corporate expense may not be representative of levels that would be required if the segments were independent entities. The accounting policies used for management reporting are consistent with those described in Note 1, “Summary of Significant Accounting Policies.” Transfers of income and expense items are recorded at cost; there is no consolidated profit or loss on sales or transfers between reporting segments. Northern Trust’s presentations are not necessarily consistent with similar information for other financial institutions.

Revenues, expenses and average assets are allocated to Asset Servicing and Wealth Management, with the exception of non-recurring activities such as certain corporate transactions and costs incurred associated with acquisitions, divestitures, litigation, restructuring, and tax adjustments not directly attributable to a specific reporting segment, which are reported within the Other segment.

Reporting segment results are subject to reclassification when organizational changes are made. The results are also subject to refinements in revenue and expense allocation methodologies, which are typically reflected on a prospective basis.

Effective January 2024, Northern Trust implemented certain enhancements to its FTP methodology, impacting the allocation of Net Interest Income to the Asset Servicing and Wealth Management segments. As a result, the approximate impact on the Asset Servicing and Wealth Management segments was a \$132.0 million decrease and a \$132.0 million increase in Net Interest Income, respectively, for the year ended December 31, 2024. Prior-year segment results have not been revised to reflect this methodology change.

Northern Trust's Chief Operating Decision Maker is the Chief Executive Officer. The Chief Operating Decision Maker uses growth and profitability metrics to assess segments' performance including segment revenue and income before income taxes. Those same measures are used by the Chief Operating Decision Maker as primary inputs into the allocation of resources in the annual planning process. Allocation of capital to each segment takes into consideration a variety of factors including average loans, average deposits and applicable regulatory capital requirements.

Asset Servicing. Asset Servicing is a leading global provider of asset servicing and related services to corporate and public retirement funds, foundations, endowments, fund managers, insurance companies, sovereign wealth funds, and other institutional investors around the globe. Asset servicing and related services encompass a full range of capabilities including but not limited to: custody; fund administration; investment operations outsourcing; investment management; investment risk and analytical services; employee benefit services; securities lending; foreign exchange; treasury management; brokerage services; transition management services; banking; and cash management. Client relationships are managed through the Bank and the Bank's and the Corporation's other subsidiaries, including support from locations in North America, Europe, the Middle East, and the Asia-Pacific region.

Wealth Management. Wealth Management focuses on high-net-worth individuals and families, business owners, executives, professionals, retirees, and established privately-held businesses in its target markets. In supporting these targeted segments, Wealth Management provides trust, investment management, custody, and philanthropic services; financial consulting; guardianship and estate administration; family business consulting; family financial education; brokerage services; and private and business banking. Wealth Management also includes Global Family Office, which provides customized services, including but not limited to: investment management; global custody; fiduciary; and private banking; family office consulting, and technology solutions, to meet the complex financial and reporting needs of ultra-high-net-worth individuals and family offices across the globe. Wealth Management services are delivered by multidisciplinary teams through a network of offices in 19 U.S. states and Washington, D.C., as well as offices in London, Guernsey, Singapore, and Abu Dhabi.

Other. Other includes expenses for Asset Management, corporate and support functions not directly incurred by, but ultimately allocated back to, our two client-focused reporting segments. Income and expenses associated with non-recurring activities such as certain costs associated with acquisitions, divestitures, litigation, restructuring, and tax adjustments are retained within Other. Other also includes the FTE adjustments of \$31.8 million, \$57.5 million, and \$45.6 million for 2024, 2023, and 2022, respectively, in order to reconcile the segment results that are reported on an internal management-reporting basis into consolidated results.

The following tables reflect the earnings contribution and certain average balances of Northern Trust's reporting segments for the years ended December 31, 2024, 2023, and 2022. Segment results are stated on an FTE basis which has no impact on net income.

TABLE 120: RESULTS OF REPORTING SEGMENTS

(\$ In Millions)	ASSET SERVICING			WEALTH MANAGEMENT

Geographic Area Information. Northern Trust’s non-U.S. activities are primarily related to its asset servicing, asset management, foreign exchange, cash management, and commercial banking businesses. The operations of Northern Trust are managed on a reporting segment basis and include components of both U.S. and non-U.S. source income and assets. Non-U.S. source income and assets are not separately identified in Northern Trust’s internal management reporting system. However, Northern Trust is required to disclose non-U.S. activities based on the domicile of the customer. Due to the complex and integrated nature of Northern Trust’s activities, it is difficult to segregate with precision revenues, expenses and assets between U.S. and non-U.S.-domiciled customers. Therefore, certain subjective estimates and assumptions have been made to allocate revenues, expenses and assets between U.S. and non-U.S. operations.

For purposes of this disclosure, all foreign exchange trading income has been allocated to non-U.S. operations. Interest expense is allocated to non-U.S. operations based on specifically matched or pooled funding. Allocations of indirect noninterest expenses, when made, are based on various methods such as time, space, and number of employees.

The following table summarizes Northern Trust’s performance based on the allocation process described above without regard to guarantors or the location of collateral.

TABLE 121: DISTRIBUTION OF TOTAL ASSETS AND OPERATING PERFORMANCE

⁽¹⁾ Total revenue is comprised of net interest income and noninterest income.

Note 32 – Regulatory Capital Requirements

The Corporation and the Bank are subject to various regulatory capital requirements administered by the federal bank regulatory authorities. Under these requirements, banks must maintain specific risk-based capital and leverage ratios in order to be classified as “well-capitalized.” The regulatory capital requirements impose certain restrictions upon banks that meet minimum capital requirements but are not “well-capitalized” and obligate the federal bank regulatory authorities to take “prompt corrective action” with respect to banks that do not maintain such minimum ratios. Such prompt corrective action could have a direct material effect on a bank’s financial statements.

As of December 31, 2024 and 2023, the Bank had capital ratios above the levels required for classification as a “well-capitalized” institution and had not received any regulatory notification of a lower classification. The results of the 2024 DFAST, published by the Federal Reserve Board on June 26, 2024, resulted in Northern Trust’s stress capital buffer and effective Common Equity Tier 1 capital ratio minimum requirement remaining constant at 2.5% and 7.0%, respectively, for the annual capital plan cycle, which began on October 1, 2024 and continues through September 30, 2025.

Additionally, Northern Trust’s subsidiary banks located outside the U.S. are subject to regulatory capital requirements in the jurisdictions in which they operate. As of December 31, 2024 and 2023, Northern Trust’s non-U.S. banking subsidiaries had capital ratios above their specified minimum requirements. There were no conditions or events since December 31, 2024, that management believes have adversely affected the capital categorization of any Northern Trust subsidiary bank. The following table provides capital ratios for the Corporation and the Bank determined by Basel III phased in requirements.

The Northern Trust Company	N/A	N/A	3,974.3	3.0	N/A	N/A	3,825.6	3.0

Under the final Basel III rules, the Corporation and the Bank are required to calculate and publicly disclose risk-based capital ratios using two methodologies: an advanced approach and a standardized approach. Under the advanced approach, credit RWA are based on internal credit models and parameters. Additionally, the advanced approach incorporates operational risk RWA. Under the standardized approach, RWA are based on supervisory prescribed risk weights that are primarily dependent on counterparty type and asset class.

Pursuant to the Federal Reserve Board's implementation in the final Basel III rules of a provision of the Dodd-Frank Act, the capital adequacy of the Corporation and the Bank is assessed based on the lower of the advanced approach or standardized approach capital ratios.

Note 33 – Northern Trust Corporation (Corporation only)

Condensed financial information is presented in the following tables. Investments in wholly-owned subsidiaries are carried on the equity method of accounting.

ITEM 9 – CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A – CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

As of December 31, 2024, the Corporation's management, with the participation of the Corporation's Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of the Corporation's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) that are designed to ensure that information required to be disclosed by the Corporation in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. Based on such evaluation, such officers have concluded that, as of December 31, 2024, the Corporation's disclosure controls and procedures are effective.

Management's Report on Internal Control Over Financial Reporting

Management of the Corporation is responsible for establishing and maintaining adequate internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) to provide reasonable assurance to the Corporation's management and Board of Directors regarding the preparation of reliable published financial statements. This internal control includes monitoring mechanisms, and actions are taken to correct deficiencies identified.

Management assessed the Corporation's internal control over financial reporting as of December 31, 2024, based on the criteria for effective internal control over financial reporting described in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on this assessment, management concluded that, as of December 31, 2024, the Corporation maintained effective internal control over financial reporting. Additionally, KPMG LLP, the independent registered public accounting firm that audited the Corporation's consolidated financial statements as of, and for the year ended, December 31, 2024, included in this Annual Report on Form 10-K, has issued an attestation report on the effectiveness of the Corporation's internal control over financial reporting as of December 31, 2024.

Changes in Internal Control Over Financial Reporting

There have been no changes in the Corporation's internal control over financial reporting identified in connection with the evaluation required by Rules 13a-15 and 15d-15 under the Exchange Act during the last fiscal quarter that have materially affected, or are reasonably likely to materially affect, the Corporation's internal control over financial reporting.

Report of Independent Registered Public Accounting Firm

To the Stockholders and Board of Directors
Northern Trust Corporation:

Opinion on Internal Control Over Financial Reporting

We have audited Northern Trust Corporation and subsidiaries' (the Corporation) internal control over financial reporting as of December 31, 2024, based on criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission. In our opinion, the Corporation maintained, in all material respects, effective internal control over financial reporting as of December 31, 2024, based on criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated balance sheets of the Corporation as of December 31, 2024 and 2023, the related consolidated statements of income, comprehensive income, changes in stockholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2024, and the related notes (collectively, the consolidated financial statements), and our report dated February 24, 2025 expressed an unqualified opinion on those consolidated financial statements.

Basis for Opinion

The Corporation's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Corporation's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Corporation in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control Over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

KPMG LLP

Chicago, Illinois
February 24, 2025

ITEM 9B – OTHER INFORMATION

During the three months ended December 31, 2024, none of our directors or officers (as defined in Rule 16a-1(f) promulgated under the Securities Exchange Act of 1934, as amended) adopted, terminated or modified a Rule 10b5-1 trading arrangement or a non-Rule 10b5-1 trading arrangement (as such terms are defined in Item 408 of Regulation S-K).

ITEM 9C – DISCLOSURE REGARDING FOREIGN JURISDICTIONS THAT PREVENT INSPECTIONS

Not applicable.

PART III

ITEM 10 – DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

The information called for by this item is incorporated by reference to “Supplemental Item – Information About Our Executive Officers” in Part I of this Annual Report on Form 10-K, as well as the following sections of the Corporation’s definitive Proxy Statement for the 2025 Annual Meeting of Stockholders: “Item 1 – Election of Directors,” “Information about the Nominees for Director,” “Security Ownership by Directors and Executive Officers,” “Corporate Governance – Code of Business Conduct and Ethics,” “Corporate Governance – Director Nominations and Qualifications and Proxy Access,” “Corporate Governance – Securities Transaction Policy and Policy Against Hedging,” “Board and Board Committee Information – Audit Committee” and “Board and Board Committee Information – Board Committees.”

ITEM 11 – EXECUTIVE COMPENSATION

The information called for by this item is incorporated herein by reference to the “Compensation Discussion and Analysis,” “Human Capital and Compensation Committee Report,” “Executive Compensation,” and “Director Compensation” sections of the Corporation’s definitive Proxy Statement for the 2025 Annual Meeting of Stockholders.

ITEM 12 – SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

The information called for by this item is incorporated herein by reference to the “Security Ownership by Directors and Executive Officers,” “Security Ownership of Certain Beneficial Owners,” and “Equity Compensation Plan Information” sections of the Corporation’s definitive Proxy Statement for the 2025 Annual Meeting of Stockholders.

ITEM 13 – CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

The information called for by this item is incorporated herein by reference to the “Board and Board Committee Information,” “Corporate Governance – Director Independence” and the “Corporate Governance – Related Person Transactions Policy” sections of the Corporation’s definitive Proxy Statement for the 2025 Annual Meeting of Stockholders.

ITEM 14 – PRINCIPAL ACCOUNTANT FEES AND SERVICES

The information called for by this item is incorporated herein by reference to the “Audit Matters” section of the Corporation’s definitive Proxy Statement for the 2025 Annual Meeting of Stockholders.

PART IV

ITEM 15 – EXHIBITS AND FINANCIAL STATEMENT SCHEDULES

ITEM 15(a)(1) AND (2) – NORTHERN TRUST CORPORATION AND SUBSIDIARIES LIST OF FINANCIAL STATEMENTS AND FINANCIAL STATEMENT SCHEDULES

The following financial statements of the Corporation and its Subsidiaries included in Item 8, “Financial Statements and Supplementary Data,” of this Annual Report on Form 10-K are incorporated herein by reference.

For Northern Trust Corporation and Subsidiaries:

**Certification of CEO Pursuant to
Section 302 of the Sarbanes-Oxley Act of 2002**

I, Michael G. O'Grady, certify that:

1. I have reviewed this report on Form 10-K for the year ended December 31, 2024 of Northern Trust Corporation;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

**Certification of CFO Pursuant to
Section 302 of the Sarbanes-Oxley Act of 2002**

I, David W. Fox, Jr., certify that:

1. I have reviewed this report on Form 10-K for the year ended December 31, 2024 of Northern Trust Corporation;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

**Certifications of CEO and CFO Pursuant to
18 U.S.C. Section 1350, as Adopted Pursuant to
Section 906 of the Sarbanes-Oxley Act of 2002**

In connection with the Annual Report of Northern Trust Corporation (the "Corporation") on Form 10-K for the period ended December 31, 2024 as filed with the Securities and Exchange Commission on the date hereof (the "Report"), Michael G. O'Grady, as Chief Executive Officer of the Corporation, and David W. Fox, Jr., as Chief Financial Officer of the Corporation, each hereby certifies, pursuant to 18 U.S.C. section 1350, as adopted pursuant to section 906 of the Sarbanes-Oxley Act of 2002, to the best of his knowledge, that:

- (1) The Report fully complies with the requirements of section 13(a) or 15(d) of the Securities Exchange Act of 1934; and
- (2) The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Corporation.
