NORTHERN TRUST DEVELOPED REAL ESTATE INDEX FUND

Marketing Communication
PASSIVE EQUITY

SHARE CLASS G EUR AS OF SEPTEMBER 2024

Investment Objective

The investment objective of the Fund is to closely match the risk and return characteristics of the FTSE EPRA/NAREIT Developed Index (the "Index") with net dividends reinvested.

The Fund invests in equities (that is, shares and other similar kinds of assets) of Real Estate Investment Trusts (REITs) and Real Estate Holding & Development companies which make up the Index. Real Estate Holding and Development companies are involved in real estate activities such as the ownership, management and/or development of income producing and for sale real estate.

Target Market: This Fund is appropriate for investors who plan to invest over the medium to long term; and are looking for a passively managed investment in the relevant market(s). This Fund may be appropriate for investors who seek a Fund which features tax transparency.

RISK WARNINGS

Investing in REITs (Real Estate Investment Trusts) is not equivalent to investing directly in property. Performance of property securities may be more dependent on the performance of stock markets than the property sector. The ability to sell properties and the sale prices achieved depend on market demand.

Liquidity Risk – Some recognised exchanges are less liquid or more volatile which may affect the price received and time taken when selling investments. Small capitalisation companies are also less liquid and this may result in fluctuations in the price of units.

Investment Risk - The Fund may not achieve its investment objective. An investment in the Fund involves investment risks including possible loss of the amount invested.

Counterparty Risk - In case of bankruptcy of the broker, there is no guarantee collateral held by the broker will be returned to the Fund. In the event of bankruptcy of the counterparty, the premium and any unrealised gains may be lost.

Derivative Risk - Derivatives may result in gains or losses that are greater than the original amount invested.

Valuation Risk - A position in the Fund may be valued incorrectly, as some prices may be uncertain at a point in time.

Currency Risk - Where a class of units are in a currency other than the base currency of the Fund, the non-base unit classes of the Fund may be affected unfavourably by fluctuations in currency rates.
