

NORTHERN TRUST ASSET MANAGEMENT

THE NT GLOBAL BOND 1-5 YEARS

ESG CLIMATE INDEX FUND

Marketing Communication
PASSIVE FIXED INCOME

SHARE CLASS I GBP AS OF SEPTEMBER 2024

Investment Objective

The investment objective of the Fund is to track the risk and return characteristics of the Solactive Global Bond 1-5 Years ESG Climate Index (the "Index"). The Fund invests primarily in freely transferable Debt and Debt Related Securities including investment grade bonds that are constituents of the Index. The Fund may also invest in investment grade bonds that are not included in the Index that are deemed by the Investment Manager to exhibit similar characteristics to securities in the Index and that have a similar risk profile. The Index excludes securities that do not meet certain Environmental, Social and Governance (ESG) criteria and companies that are in breach of UN's Global Compact Ten Principles.

Target Market: This Fund is appropriate for investors who plan to invest over the short to medium term; and are looking for a passively managed investment in the relevant market(s) ESG principles implemented according to a defined set of exclusions as well as certain defined ESG criteria.

**NORTHERN

ASSET MANAGEMENT

For regulatory reasons we are unable to provide performance information where the track record is less than 12 months; if you are an existing investor in, or distributor of, this fund please contact your normal representative.

Northern Trust Asset Management

As a leading global asset management firm, our investment expertise, strength and innovation have earned the trust and confidence of the world's most sophisticated institutional and individual investors.

Our forward-looking, historically aware investment approach powers a broad range of capabilities and solutions. And our comprehensive asset class offering includes passive, factor-based, fundamental active and multi-manager solutions that are available in a variety of investment vehicles.

With \$1 trillion in total assets under management,* and a long-standing history of solving complex investment challenges, we believe our strength and stability drive opportunities for our clients.

Learn more at northerntrust.com/strength.

* Assets under management as of December 31, 2023. For the Northern Trust Asset Management entities included in the AUM total, please see disclosure at end of this document.

RISK WARNINGS

Liquidity Risk – Some recognised exchanges are less liquid or more volatile which may affect the price received and time taken when selling investments. Small capitalisation companies are also less liquid and this may result in fluctuations in the price of shares.

Investment Risk - The Fund may not achieve its investment objective. An investment in the Fund involves investment risks including possible loss of the amount invested.

Counterparty Risk - In case of bankruptcy of the broker, there is no guarantee collateral held by the broker will be returned to the Fund. In the event of bankruptcy of the counterparty, the premium and any unrealised gains may be lost.

Valuation Risk - A position in the Fund may be valued incorrectly, as some prices may be uncertain at a point in time.

Currency Risk - Where a class of shares are in a currency other than the base currency of the Fund, the non-base share classes of the Fund may be affected unfavourably by fluctuations in currency rates.

Emerging Markets Risk - Emerging markets are generally more sensitive to economic and political conditions than developed markets and so may be more volatile. Disclosure and regulatory standards may be less stringent, the legal infrastructure may not provide the same degree of shareholder protection and the Fund may encounter restrictions on investment or transfer of assets and failed/delayed delivery of securities or payments.

ADVOCACY DATA

Advocacy data is updated on a quarterly basis capturing the previous 3 months engagement activity. For more information on our engagement, please read our quarterly engagement reporting at northerntrust.com/engagement. Engagement undertaken by Hermes EOS on behalf of Northern Trust.

Glossary

Business Related Exclusions : Business related exclusions cover tobacco manufacturing, retail and trade and for-profit prisons.

Duration: is a measure of the sensitivity of the price of a bond or other debt instrument to a change in interest rates.

Forward EPS Growth: is an estimated growth of the next period's earnings of a company, usually till the completion of the current fiscal year and sometimes to the following fiscal year.

ISIN: International Securities Identification Number. It is a 12-digit alphanumeric code that uniquely identifies a specific security.

LT / ST: Long Term / Short Term.

Modified Duration: measures the change in the value of the a bond in response to a change in 100-basis-point (1%) change in interest rates.

Ongoing Charge: is a figure representing all annual charges and other payments taken from the fund.

Price-to-Book Ratio: is used to compare a firm's market capitalization to its book value. It's calculated by dividing the company's stock price per share by its book value per share. Book value is calculated as follows: (total asset - total liabilities) / number of shares outstanding.

Quant Active: securities are chosen based on numerical data compiled through quantitative analysis. It is aiming for high alpha from exposure to multiple factors: proven stock ranking model focused on selecting stocks that exhibit good value, quality, momentum and analyst revisions characteristics etc.

Spread Duration: is an estimate of how much the price of a specific bond will move when the spread of that specific bond changes.

SRRI: is a value based on the volatility of the fund, which gives an indication of the overall risk and reward profile of the fund.

Swing Pricing: protects existing shareholders against fund dilution by passing transaction costs to purchasing or redeeming shareholders. It allows funds to adjust the net asset value up or down once purchase or redemption limits are exceeded.

Trailing 12-month price-to-earnings ratio: is a relative valuation multiple based on the last 12 months of actual earnings, calculated by dividing the current stock price by the trailing EPS for the previous year.

WAL (Nominal Weighted Average Life): A bond's maturity is the length of time until the principal amount of the bond is to be repaid. WAL of the fund is calculated as the average of the underlying bonds' maturities, adjusted to take account of their relative weight (size) within the fund.

WAM (Weighted Average Maturity): A bond's maturity is the length of time until the principal amount of the bond is to be repaid. WAM of the ETF is calculated as the average of the underlying bonds' maturities, adjusted to take account of their relative weight (size) within the fund.

Weighted Average Market Cap: refers to a type of stock market index construction that is based on the market capitalization of the index's constituent stocks.

Yield to Maturity (%): is the total return anticipated on a bond if the bond is held until it matures.
