RISK WARNINGS

Investment Risk - An investment in the Fund involves investment risks including possible loss of the amount invested.

Counterparty Risk - In case of bankruptcy of the broker, there is no guarantee collateral held by the broker will be returned to the Fund. In the event of bankruptcy of the counterparty, the premium and any unrealised gains may be lost.

Derivative Risk - Derivatives may result in gains or losses that are greater than the original amount invested.

Valuation Risk - A position in the Fund may be valued incorrectly, as some prices may be uncertain at a point in time.

Currency Risk - Where a class of shares are in a currency other than the base currency of the Fund, the non-base share classes of the Fund may be affected unfavourably by fluctuations in currency rates.

Risks associated with investing in the Master Fund - The value of this Fund and the income from it is closely linked to the performance of the Master Fund. There is no guarantee that the investment objective of the Master Fund will be achieved. As a unitholder of the Master Fund, this Fund bears, along with other unitholders, its pro rata portion of the expenses of the Master Fund. These fees are in addition to the other fees and expenses which this Fund bears directly in connection with its own operations.

CARBON DATA METRICS

Carbon footprint of the index constituents versus parent

Potential carbon emissions are emissions of fossil fuel companies that can be potentially released should all the fossil fuel reserves they own be extracted. This field represents the potential carbon emissions of the fossil fuel reserves owned by a company using a formula from the Potsdam Institute for Climate Impact research. Carbon intensity represents the company's most recently reported or estimated Direct (fuel combustion, company vehicles) and Indirect (purchased electricity heat and steam) greenhouse gas emissions.
